Heavenly Father, lover of our souls, whose Spirit greets us at the threshold of the dawn, make us friends of all the world as we touch the hands and lives of men. Suffer us not to bruise the rightful self-respect of any by our malice or contempt. Help us by our sympathy to cheer the suffering, by our hopefulness to freshen those who droop in sorrow, by our striving on the heighths of great endeavor to strengthen in all the wholesome sense of the worth and joy of life, and bring us to the eventide free from conscious wrong and grateful for this day of serving Thee. Through Jesus Christ our Lord. Amen.

The Chief Clerk proceeded to read the Journal of the proceedings of the legislative day of Monday last, when, on request of Mr. JONES and by unanimous consent, the further reading was dispensed with and the Journal was approved.

PROHIBITION ENFORCEMENT

Mr. BLEASE. Mr. President, on yesterday I presented two newspaper clippings with certain remarks in connection therewith and asked that they be printed in the RECORD, because I was very anxious that they should follow certain statements made previously. I would like to have printed in to-day's RECORD another short article from yesterday evening's Star, which I send to the desk.

The VICE PRESIDENT. Without objection, it is so ordered.

The clipping is as follows:

[From the Star, Washington, D. C., December 11, 1928]

THREE MEN HELD IN HIJACK EFFORT—FUTILE ATTEMPT IS MADE TO CAPTURE CARGO OF BOTTLED GOODS

Baltimore police and Federal agents are investigating a futile attempt last night by four men to "hijack" a $10,000 truck load of imported whiskies consigned to Spanish, Swiss, Italian, Honduran, and Haitian embassies here, and to-day were holding three men for questioning in the affair. They gave their names as George Martin, Howard Dublen, and John Herbert.

A truck in charge of Carl Poole had just received 217 cases of bottled goods from the British steamship *Davisian* and was proceeding to the United States appraiser's warehouse when a small coupé containing four men pulled abreast and crowded the truck to the curb.

Poole said the newcomers leaped from their machine and ordered him to return to the pier with the liquor.

Poole asked them to show their authority, whereupon, Poole said, they flourished guns, hauled him from his truck, and applied the butt end of an automatic to his skull.

But a crowd gathered quickly, according to the driver, and the men, becoming frightened, leaped into their coupé and drove away.

As a result of the hold-up attempt, Charles H. Holtzman, collector of customs, to-day ordered that future truck loads of whisky for transportation through the streets be attended by two armed guards in addition to the driver.

WORLD PEACE

Mr. SHEPPARD. Mr. President, I send to the desk a telegram which is in the nature of a memorial and ask that it may be read.

There being no objection, the telegram was referred to the Committee on Foreign Relations and was read, as follows:

HOUSTON, TEX., *December 11, 1928.*

Senator MORRIS SHEPPARD,
Washington, D. C.:

We lend our heartiest indorsement to the Scripps-Howard "Kellogg antiwar treaty before Christmas" movement.

Mrs. LOUISE MASTERSON,
President of Houston League of Women Voters.
L. PEARL PERKINS,
Executive Secretary.

Mr. BRUCE. I should like to ask the Senator from Texas whether the communication which he has just sent to the desk reached him after Paraguay and Bolivia renounced war under the Kellogg peace pact and before they practically entered on war?

Mr. SHEPPARD. The telegram reached me this morning.

The VICE PRESIDENT. The telegram will be referred to the Committee on Foreign Relations.

A COUNTRY WHITE HOUSE

Mr. FESS. Mr. President, I ask unanimous consent to have printed in the RECORD a letter of the President which appeared in the St. Louis Post-Dispatch on December 9, together with an editorial on the subject therein discussed.

There being no objection, the letter and editorial were ordered to be printed in the RECORD, as follows:

A SUGGESTION CONCERNING THE PRESIDENCY

By Calvin Coolidge, President of the United States

THE WHITE HOUSE,
Superior, Wis., August 10, 1928.

Mr. JOSEPH PULITZER,
Editor the Post-Dispatch, St. Louis, Mo.

MY DEAR MR. PULITZER: Your message advising me that the Post-Dispatch is planning on celebrating its fiftieth anniversary with a special edition containing contributions from various people and requesting me to send you an article dealing with some phase of the presidential office has been received. A half century is an exceedingly respectable age for a newspaper in our country. That period has seen the development of the community which you serve from a thriving town to a great metropolis, in which your publication has taken an important part. Your distinguished father, Joseph Pulitzer, was for many years one of the leading figures in the journalism of the United States and left his publications strongly marked with the force of his own character when he handed them down to those who are worthily carrying on the various enterprises which he had built up. Those who like myself have known him by reputation and his successors by personal contact may well join you in celebrating your coming anniversary.

As a President about to retire, I feel at liberty to write of certain phases of that office which one who was entering upon its duties might feel some hesitation in discussing. I shall briefly express my opinion concerning a subject which is often broached, but about which nothing is ever done, although it is recognized by everyone as a matter of the gravest importance. I refer to the health and physical condition of the President, not so much for my own sake as for my successors. I have often remarked that at least I had one distinction. I have been the healthiest President that the country has ever had.

My ability to keep well has not been due to a particularly robust constitution or any extraordinary efforts in physical exercise. My habits have been regular. It is seldom that I have been late at meal time and I have avoided keeping late hours. Very little work has been done before breakfast, but usually I have taken a short walk, and during the winter season a more extended walk before dinner, which has been my chief mode of exercise. I have kept a couple of vibrating machines in my room, which I found helpful. It will be seen that in the matter of exercise my efforts have been toward a conservation of time. Such activities have been adopted as could be put into operation at once without the necessity of a change of clothing or travel to some other location before exercise could begin.

At the time I took office there was considerable discussion of what could be done to remove all unnecessary burdens from the President. Some legislation was proposed. I did not look upon that with much sympathy, perhaps because unconsciously I may have felt it would be a declaration of weakness, but certainly because my experience in public office made me know that whether I was to be overburdened with work and broken down in health depended more on myself than any act of Congress. The duties of the Presidency are exceedingly heavy. The responsibilities are overwhelming. But it is my opinion that a man of ordinary strength can carry them if he will confine himself very strictly to a performance of the duties that are imposed upon him by the Constitution and the law. If he permits himself to be engaged in all kinds of outside enterprises, in furnishing entertainments and amusement to great numbers of public gatherings, undertaking to be the source of inspiration for every worthy public movement, for all of which he will be earnestly besought with the inference that unless he responds civilization will break down and the sole responsibility will be on him, he will last in office about 90 days. There are certain addresses which the President must make, certain appeals to which he may respond, like this one which you have made to me. But in the vast majority of cases he must and should decline.

It is of course obvious that the President should not burden himself with details. These should be attended to by his departments and his office staff. He should not do any work that he can have done by others. Such energy as he has should be directed not so much toward doing work as making certain that the work is being well done.

There is, however, one thing which the Government could do, which I think would be of great physical assistance to the President. Washington is practically at sea level. Its climate is an exceedingly good all the year round climate, but at times the humidity is high and unrelieved it becomes monotonous. The only avenue of escape for the President is the naval boat *Mayflower*. This is a regular naval craft used for the training of seamen, like any other craft, but it is kept stationed in the navy yard in Washington and is fitted up for the use of the President whenever he may desire to go aboard. The handicap about the *Mayflower* is that it must necessarily go down the Potomac, which is a change of view and of considerable relief, but affords no change in altitude and very little in climatic conditions.

The movements of the President are a very ponderous operation. Other officers of the Government can travel with a considerable degree of freedom. If they wish to spend a week-end at a hotel or club, they can do so without difficulty. They also have greater liberty in accepting private hospitality. When the President moves it is an event. A large retinue follows and extensive preparations have to be made in advance for his reception and care. The only place he can enter without considerable preliminary disturbances is the White House.

For these reasons it seems to me that some place should be provided in the hills within easy striking distance of Washington where the President might go for two or three days at a time when he was so disposed with conveniences for entertaining members of the Government and other guests, where he could have that freedom of action which he has only at the White House, and where he could get a complete change of atmosphere.

While I have made no mention of the mistress of the White House, she is of course to be considered. The public little understands the very exacting duties that she must perform and the restrictive life that she must lead. Fully as much as the President, she needs an opportunity for a change and some place where she can have the seclusion of the White House without a constant reminder of its obligations.

Three or four years ago some thoughtful-minded person left a legacy of $200,000, which I should judge would have been ample to provide a place of this kind within 60 or 75 miles of Washington. It had a proviso that it should be accepted by the Congress. I did not give the matter any thought at the time and the Congress never paid any attention to it. Had it been accepted, a country house would now be available.

Such a residence would not be in a strict sense a summer White House, but if such a place had been provided I should not have desired to leave Washington so early in the season or return so late. Being distant from the Capital for a considerable length of time each summer is attended with a good many inconveniences, even when we have the use of the airplane for mail purposes and a special wire running into the White House. It is desirable for the President to stay for some time in different sections of the country, but a month or six weeks at the most is ample for him to make such observations and acquaintances as are required for him to understand something of the problems of various localities.

It is not too much to hope that the press of the United States can bring about this desired result. I am certain that if you would take it up and pursue it with the vigor which always marks the advocacy of any cause in which you believe, you could undoubtedly prove an important factor. If this could be done, future Presidents and future mistresses of the White House would have a great deal for which to thank you, and you would have the satisfaction of knowing that the celebration of your fiftieth anniversary has been an opportunity for a real service to our country.

Very truly yours,

CALVIN COOLIDGE.

[Editorial from the St. Louis Post-Dispatch]

FOR A COUNTRY WHITE HOUSE

In more ways than one, Mr. Coolidge's suggestion for a country White House, published in this edition, is an extraordinarily interesting document. Throughout Mr. Coolidge's long tenure as President, he has rarely relaxed his official personality. His rigid conception of the proprieties of the presidential office has debarred us from such familiar glimpses of the man as we had during the administration, for example, of Theodore Roosevelt. Only now, on the eve of his retirement, does Mr. Coolidge feel at liberty—as he himself explains—to write of certain phases of the office "which one who was entering upon its duties might feel some hesitation in discussing."

It need not be said that he does so with tact, modesty, and charm, and no one can read his message without feeling that the American people have been grossly remiss and even cruelly negligent in their provision for the President's comfort and health. It is true there was considerable discussion of the subject at the time Mr. Coolidge entered the White House, and some legislation was proposed to relieve the President of unnecessary burdens. But Mr. Coolidge, with that quality of New England ruggedness which has come to be associated with him, declined to look upon it with favor. He desired no supporting crutch which might be furnished by an act of Congress, preferring to rely upon himself to safeguard his health. How he did so by conserving every possible moment is a story which must quicken our realization of the exactions of the presidential office.

Mr. Coolidge can thank himself that he emerges from the White House in splendid condition. As he puts it, with a flash of dry

Coolidge-ian wit: "I have often remarked that at least I had one distinction: I have been the healthiest President that the country has ever had."

Out of his experience, however, Mr. Coolidge has a suggestion to make by which the lot of his successors may be made easier. It is that a country White House be provided in some location within 60 or 75 miles of Washington, where the President might escape from the humid sea-level climate of the capital. As it is, there is only the yacht *Mayflower*, providing small relief, since it affords no change of altitude and very little in climatic conditions. Such a country White House might be placed in the lovely hills of Maryland or Virginia. To it the President might go at any time of the year without the irksome ceremony that now attends any departure from White House routine. It would not necessarily be a summer White House, rather a kind of week-end refuge.

The Post-Dispatch is certain that the American people will not default much longer in making such a provision for the President. No expense or care should be spared in seeking a suitable site or in making the country White House a gem of architecture. It must be borne in mind that in time it will become as rich in historical value and national significance as Mount Vernon, Arlington, and Monticello, three gorgeous examples, incidentally, of the possibilities of a country White House.

This newspaper is prepared to do everything in its power to see that Mr. Coolidge's suggestion is carried out, and it thanks him, on behalf of the American people, for so graciously reminding us of a way in which we may temper, to some degree, the overpowering demands of the Presidency.

CALL OF THE ROLL

Mr. JONES. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McKellar	Shortridge
Barkley	Frazier	McMaster	Simmons
Bingham	George	McNary	Smith
Black	Gillett	Metcalf	Smoot
Blaine	Glass	Moses	Steck
Blease	Glenn	Neely	Steiwer
Borah	Goff	Norris	Stephens
Bratton	Gould	Nye	Swanson
Brookhart	Greene	Oddie	Thomas, Idaho
Broussard	Hale	Overman	Thomas, Okla.
Bruce	Harris	Phipps	Trammell
Capper	Harrison	Pine	Tydings
Caraway	Hawes	Pittman	Tyson
Couzens	Hayden	Ransdell	Vandenberg
Curtis	Heflin	Reed, Pa.	Wagner
Dale	Johnson	Robinson, Ark.	Walsh, Mass.
Deneen	Jones	Robinson, Ind.	Walsh, Mont.
Dill	Kendrick	Sackett	Warren
Edge	Keyes	Schall	Waterman
Edwards	King	Sheppard	Watson
Fess	Locher	Shipstead	Wheeler

Mr. SHEPPARD. My colleague the junior Senator from Texas [Mr. MAYFIELD] is unavoidably detained on account of illness. This announcement may stand for the day.

Mr. WAGNER. I desire to announce that my colleague [Mr. COPELAND] is unavoidably detained from the Senate owing to illness in his family.

The VICE PRESIDENT. Eighty-four Senators having answered to their names, a quorum is present.

REPORT OF THE LIBRARIAN OF CONGRESS

The VICE PRESIDENT laid before the Senate a communication from the Librarian of Congress, submitting, pursuant to law, his annual report, together with that of the register of copyrights, for the fiscal year ended June 30, 1928, which, with the accompanying reports, was referred to the Committee on the Library.

REPORT OF UNITED STATES EMPLOYEES' COMPENSATION COMMISSION

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the United States Employees' Compensation Commission, transmitting, pursuant to law, a report of the operations of the commission for the fiscal year ended June 30, 1928, which was referred to the Committee on Education and Labor.

CLAIM OF MRS. THELMA PHELPS LESTER

The VICE PRESIDENT laid before the Senate a communication from the Comptroller General of the United States, transmitting, pursuant to law, a report and recommendation concerning the claim of Mrs. Thelma Phelps Lester against the United States, which, with the accompanying paper, was referred to the Committee on Claims.

GASOLINE TAXES COLLECTED BY THE DISTRICT OF COLUMBIA

The VICE PRESIDENT laid before the Senate a communication from the Comptroller General of the United States, transmitting, pursuant to law, a special report relative to gasoline taxes collected by the District of Columbia on gasoline purchased for use by the United States, which, with the accompanying paper, was referred to the Committee on Claims.

CREDENTIALS

The VICE PRESIDENT laid before the Senate the credentials of PHILLIPS LEE GOLDSBOROUGH, chosen a Senator from the State of Maryland for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

THE STATE OF MARYLAND,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

I, Albert C. Ritchie, Governor of the State of Maryland, and having control of the great seal thereof, do hereby certify that on the 6th day of November, 1928, Hon. PHILLIPS LEE GOLDSBOROUGH was duly chosen by the qualified electors of the State of Maryland a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1929.

In testimony whereof I have hereunto set my hand and have caused to be hereto affixed the great seal of the State of Maryland, at Annapolis, Md., this 30th day of November, 1928.

By the governor:

ALBERT C. RITCHIE.

[SEAL.] DAVID C. WINEBRENNER, 3d,
Secretary of State.

Mr. NORRIS presented the credentials of R. B. HOWELL, chosen a Senator from the State of Nebraska for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

STATE OF NEBRASKA.

CERTIFICATE OF ELECTION

At an election held on the 6th day of November, A. D. 1928, Hon. R. B. HOWELL was elected to the office of United States Senator for a term of six years, beginning March, A. D. 1929, and ending in March, 1935.

ADAM MCMULLEN, *Governor.*

Attest:

[SEAL.] FRANK MARSH,
Secretary of State.

Mr. GLASS presented the credentials of CLAUDE A. SWANSON, chosen a Senator from the State of Virginia for the term commencing on March 4, 1929, which were read and ordered to be placed on file, as follows:

COMMONWEALTH OF VIRGINIA.

To all to whom these presents shall come, greeting:

This is to certify that at a meeting of the board of State canvassers, held at the office of the secretary of the Commonwealth the fourth Monday in November, 1928, on an examination of the official abstract of votes on file in that office it was ascertained and determined that at the general election held on the first Tuesday after the first Monday in November, 1928, for United States Senator from the State of Virginia CLAUDE A. SWANSON was duly elected United States Senator from the State of Virginia for the term prescribed by law.

Given under my hand and seal of office, at Richmond, this 26th day of November, 1928.

[SEAL.] M. A. HUTCHINSON,
Secretary of the Commonwealth.

Mr. FESS. I present the certificate of election of Mr. BURTON, Senator elect from Ohio. The Senator elect will be here on Saturday next to take the oath of office.

The credentials were read and ordered to be placed on file, as follows:

THE STATE OF OHIO.

CERTIFICATE OF ELECTION OF THEODORE E. BURTON TO THE OFFICE OF UNITED STATES SENATOR

This is to certify that at the general election, held in the State of Ohio, on the 6th day of November, A. D. 1928, THEODORE E. BURTON was duly elected United States Senator, unexpired term, and that he is entitled to all the rights and privileges of such office.

Given under my hand and seal at Columbus, Ohio, this 6th day of December, A. D. 1928.

VIC DONAHEY, *Governor.*

Countersigned:

[SEAL.] CLARENCE J. BROWN,
Secretary of State.

Mr. LOCHER presented the credentials of SIMEON D. FESS, chosen a Senator from the State of Ohio for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

THE STATE OF OHIO.

CERTIFICATE OF ELECTION OF SIMEON D. FESS TO THE OFFICE OF UNITED STATES SENATOR

This is to certify that at the general election, held in the State of Ohio on the 6th day of November, A. D. 1928, SIMEON D. FESS was

duly elected United States Senator, full term, and that he is entitled to all the rights and privileges of such office.

Given under my hand and seal at Columbus, Ohio, this 6th day of December, A. D. 1928.

VIC DONAHEY, *Governor.*

Countersigned:

[SEAL.]

CLARENCE J. BROWN,
Secretary of State.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate resolutions unanimously adopted by the General Sunday School Council of the Methodist Episcopal Church, South, favoring the prompt ratification of the so-called multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. STECK. I present a resolution in the nature of a memorial relative to the Boulder Dam bill, which I ask may be printed in the RECORD and lie on the table.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas there is now before the United States Senate for consideration a bill popularly known as the Boulder Dam bill, which is designed to produce power and water supply for a comparatively local area, and which will bring under water and into production a large amount of irrigated land which will compete with the agricultural areas of the Middle West; and

Whereas this project is intended to be built with public money, a large portion of which must come from taxes assessed against the agricultural interests of the Middle West; and

Whereas the Boulder Dam project as now conceived goes far beyond the needs for flood protection in the Imperial Valley:

Resolved, That the Ottumwa Chamber of Commerce requests the United States Senators from Iowa, in the interest of the agricultural industry of this State, to vote and work against this bill.

OTTUMWA CHAMBER OF COMMERCE.
C. G. BAKER, *Secretary.*

Signed December 5, 1928, Ottumwa, Iowa.

Mr. CAPPER presented a resolution adopted by the annual convention of the Kansas State Bar Association, at Hutchinson, Kans., favoring the passage of the so-called Gillette resolution suggesting a further exchange of views relative to the World Court, which was referred to the Committee on Foreign Relations.

Mr. JONES presented petitions numerously signed by sundry citizens of Goldendale, Aberdeen, Kirkland, Des Moines, Everson, Sumas, Marietta, Lynden, Seattle, Olympia, Bellingham, Tacoma, Raymond, Spokane, Lowell, Everett, Tukwila, Montesano, Menlo, Lebam, Hoquiam, Cosmopolis, South Bend, and Bremerton, all in the State of Washington, praying for the prompt ratification of the so-called multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

UNEMPLOYMENT CONDITIONS

Mr. WAGNER. Mr. President, I have some letters on the subject of unemployment which I have received from a number of distinguished citizens. I ask to have the letters printed in the RECORD and then referred to the Committee on Education and Labor, before which is pending some legislation I have introduced on the subject of unemployment.

There being no objection, the communications were ordered to be printed in the RECORD and referred to the Committee on Education and Labor, as follows:

DENNISON MANUFACTURING CO.,
Framingham, Mass., August 17, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR: Your letter of August 10 was sent to me under the misconception that I am a professor. I am a mere manufacturer, professing to nothing except the usual line that our company is the best in the world and the goods it makes and the service it renders are incomparable. I am not sure that you want just now a layman's answer to your letter; but if not, it is a very easy matter for you to drop the rest of this in the wastebasket.

I am keenly interested, and have been for a long time, in the unemployment problem and am delighted that you put in these bills.

With respect to 4158, I have only to say that it seems as if the sum of a hundred thousand dollars was pretty small. I recognize, of course, that it may be the best you felt could be gotten and approve always of getting a start, even if insufficient. But these figures are getting to be of greater and greater importance. The controversy of last winter as to whether we had any considerable unemployment or not amply proves the complete inadequacy of our information on this subject, and it is important, not only from the point of view of social management but it is important to employers from the point of view of industrial management also.

I believe that valid figures will be pretty difficult to get and should expect a considerable number of partial failures on the road toward finally getting them. I should hope, then, that the facilities for getting them would be made as liberal as possible to meet difficulties not now suspected.

On 4157 I have been for a long time in considerable doubt. It is not that I am afraid the Government can not do a good job of running employment offices. I believe that most of the talk against Government management is heavily biased and the Government can and has very effectively undertaken things there was a special reason for it to undertake. I recognize also, being on the inside, that private management isn't so confoundedly efficient as its advertising and publicity matter would lead one to believe. But I wonder if the customers will come, under the relatively moderate pressures in this country; if either employees or employers will sufficiently patronize a State employment office; in fact, whether they will patronize any employment office at all to a significant extent. The tradition has been to run around from door to door, and the pressure hardly seems great enough to change this habit. I haven't, therefore, been able to stand very strenuously for employment offices; but the chance that, started in a relatively small way, they will provide for a need which may grow very serious in the future would prevent my standing against them. I should, therefore, be neutral on this bill and give it Godspeed if it didn't in any way stand in the way of the other two.

Bill 4307 goes very properly further than the bill which received the approval of Senator JONES'S committee, and in favor of which I appeared last winter before them. I favored the Jones bill for the same reason that I should your 4158, on the principle that it is a great deal better to get something than nothing, and I have been interested with Otto Mallery ever since the unemployment conference of 1921, working at one time with Senator Kenyon to try to get the beginnings of some such measure on the books.

As between the two, yours is very much more thoroughgoing and should be favored. You will find me, if you should care to, very willing and ready to go further yet. I should like immensely to get States and cities interested in a similar scheme. Since it would be immensely expensive to do it seriatim, I wonder if a standard form of law could not be prepared at Washington by Congress or otherwise and proposed to the minor divisions of the Government for their edification.

A really serious determination to withhold something of public works during booms and a letting loose during bad times would have a marvelous effect. It would be an example set for business, and I believe through its reverberative effects would so damp the swings of the cycle that we should very rarely have in this country a first-class problem arising from them. Nothing quite cures unemployment so fully as employment.

There is one specific point in your bill that I should like to comment upon. On page 6 there does not seem to be sufficient provision made for the necessary preliminary engineering work with the blue prints and all. Perhaps the customs of the departments are such that a lot of this is done, but I remember in Massachusetts in 1914, on the State committee, we found lots of things that could very properly be done to reemploy men, but about four to six months' civil engineering work, with a lot of blue printing and a lot of scientific discussion, had to take place before a shovel could be stuck in the ground.

Of course, it is asking a great deal of human nature to prepare a lot of plans and discuss projects and not force them through immediately, but the very essence of the conquest of the business cycle as a social evil lies in social self-control. If we can't control ourselves, we can't win anyhow, and no law will help us.

Shouldn't there be, then, on page 6, more specific provision for the advance preparation of plans so that work can be undertaken immediately? You have provided for an excess annual authorization of projects, and if this includes all considerable time-consuming engineering work that is enough; but if not, I hope that specific provisions to this end can be put in.

On the off chance that you have read this far, I should say that I hope you will not trouble yourself to acknowledge or comment upon this letter. You must be getting plenty of responses and will have to find something to say in answer to each one. Please don't bother with mine.

Yours very truly,

HENRY S. DENNISON.

HOLLYWOOD, N. Y., *August 20, 1928.*

DEAR SENATOR WAGNER: I have your letter and inclosed bills relating to the unemployment problem. I am greatly pleased to find that some one is thinking and planning with reference to the problem. It is about time. I have glanced over the bills and feel sure you are on the right track. I shall try to study them carefully and write you again as to details.

* * * * * * *

Sincerely yours,

W. W. COOK,
Of the Institute for the Study of Law,
Johns Hopkins University.

WASHINGTON BRANCH, INTERNATIONAL LABOR OFFICE,
Washington, D. C., September 4, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Senate Office Building,
Washington, D. C.

MY DEAR MR. SENATOR: I appreciate very much your having sent me for comment the three bills respecting unemployment which you are introducing in Congress.

For the moment I am addressing myself exclusively to S. 4157, which has to do with the establishment of a national employment exchange system through State cooperation.

May I say at once that the international labor organization, which I happen to represent in this country, embodied in one of its first draft labor treaties adopted at the Washington conference in 1919, the principle of a nationally coordinated system of employment exchanges. Since that year, 23 countries have ratified that treaty and enacted legislation for maintenance of such a system; some are still amending or improving their system. In other words, it can be said to be the judgment and experience of the principal industrial countries of the world that public employment offices are the necessary instrumentalities of a nationally coordinated labor market. The problem of placing a willing worker in an offered job is about the same the world over, and reasonable men have readily agreed upon the answer to that problem.

Anything I have to say in what follows will be little more than amplification of that very important and solid fact of experience. What I have to say will be based upon study of the national system in vogue in this country during the war years, and upon examination of this foreign experience.

The most important suggestion I wish to offer is for the provision of advisory commissions of employers and workers to advise in matters of administrative policy of the national system headed up, as proposed, in the Department of Labor. There is suggested both a general advisory commission for the national system, as a whole, and State commissions, if and when States accept conditions of the bill and are prepared to match their money against the contributions of the Federal Government. Such advisory commissions of employers and workers have been found helpful for three reasons: First, they tend to guarantee the impartiality and neutrality of the exchanges; second, they secure for the system the interest and support of the two parties most concerned in the successful operation of any system of employment exchanges; and, thirdly, they prevent the system from becoming a political bureaucracy, as the interest of both parties will be in service for them rather than for creating a vested political interest. These points could easily be amplified, but space in a letter scarcely permits of that.

In connection with this point of preventing political and personal use of the machinery of the system, it seems to me the bill, if it does not already do so, should contain a definite statement that appointments to the staff should be through the civil service. While it is true that the present Department of Labor is a civil-service department, it would do no harm to specify policy in this respect. The task of finding jobs and moving workers to jobs is a technical expert's job, once general policy is established. Experience shows that State employment exchanges have too frequently been rendered useless, if not means of exploitation, by being made the instruments of persons with selfish interests to serve.

A second comment is this: If I read the bill aright, it does not contain any declaration of policy as respects notifying jobs to points of strikes or lockouts. This, it seems to me, is a question of public policy, and one, therefore, that should be declared by Congress and not left to administrative discretion. I may point out that legislation abroad has come to a reasonable degree of agreement respecting the most desirable policy to observe in this matter. Obviously, an employment exchange should be neutral as between employer and worker. That neutrality has come to be expressed by giving notice to an applicant that a dispute (strike or lockout) has arisen at a point where labor is demanded. Employers are required to inform every exchange to which they apply as to whether or not a strike or lockout is in progress. Everyone is thus informed, and decision is left with the applicant. Foreign legislation on this matter differs only as to the certainty with which that information shall be imparted to the applicant, whether by mere posting of a notice in a labor exchange or by the definite placing of such notice under the eyes of the applicant, to be read by or to him.

A third but not less important suggestion, it seems to me, relates to a declaration of policy in the bill respecting the organizing of the exchanges in such a way as to meet the needs of specialized occupations. While that can be left to detailed administrative regulation for proper handling, it seems to me that the bill should contain a recommendation to that effect. That kind of specialization is, of course, what is taking place in private agency practice—teachers' agencies, engineers' agencies, the special trade-union agencies, the seamen's offices, etc. All too commonly in the past also the public employment offices have come to be known only as places for unskilled-labor hiring. There has been about them an atmosphere of charity rather than of upstanding, respectable social service. Such specialized service of the agencies as suggested should prove very helpful in dissipating that attitude and should make them able to meet the actual requirements of industrial specialization.

The International Labor Office, in summarizing the legislation and the experience of employment exchanges in various countries, came to the following conclusion with respect to general principles. I take this statement from the International Labor Review of July, 1922, observing, incidentally, that time is not an element which in any way detracts from these general conclusions:

"The organization of public employment exchanges can not be left solely to the local authorities. The State must intervene to coordinate the exchanges in a national system. It is, however, undesirable to make the employment exchanges a centralized bureaucratic organization. If they are to carry out their work in a satisfactory manner, they must enjoy a large measure of autonomy. They should be supervised by joint committees consisting of authorized representatives of the workers' and employers' organizations invested with considerable administrative powers.

"The employment exchanges, although State institutions, should belong less to the system of political administration than to the industrial organization. It is therefore desirable that they should, as far as possible, be subdivided into branches dealing with particular occupations or industries, and that these branches should in turn enjoy sufficient autonomy to adapt themselves to the various requirements of the occupations and industries with which they deal.

"The public employment exchanges should not be diverted from their proper functions by other dutes of a purely administrative nature. They can and should, however, play an important part in the application of other means of preventing or palliating unemployment. Such means include unemployment insurance and the organization of relief work or the establishment of a systematic policy aiming at reserving public works, as far as possible, for periods of industrial depression.

"The public employment agencies should adopt a strictly neutral attitude toward the interests of employers and workers, respectively. The attitude adopted may, as has been shown, vary in different countries, and may be modified in order to conform to the observed relations existing between the employers' and workers' organizations at any particular time.

"In so far as these conditions are fulfilled, the public employment exchanges are already, and may progressively become, the mainspring of all the institutions which have been set up in order to organize the labor market and thus to mitigate the evil of chronic unemployment."

Perhaps I may seem to have made suggestions which complicate the unity and simplicity of the system of coordinated employment exchanges outlined in your bill. My intention has been quite the reverse. I am sure you will find that these complexities are not real but only apparent. They have arisen in the attempt to point out how Congress might well anticipate as many problems of policy as possible in order that the administrative authorities, upon whom will fall the onus of enforcement, may be left free to concentrate on matters of efficiency rather than to embroil themselves in controversial issues. In other words, by anticipating decisions of policy, Congress simplifies rather than complicates the difficult problems of administration.

I inclose a memorandum showing the present progress of employment exchange legislation in various countries as gathered from the publications of the International Labor Office, but more particularly from the annual report of the director of that office to the annual International Labor Conference.

I am glad to be of service, and hope you will not hesitate to call on me for further information and elucidation as you may think necessary.

Respectfully and sincerely yours,

LEIFUR MAGNUSSON, *Director.*

WASHINGTON BRANCH, INTERNATIONAL LABOR OFFICE,
Washington, D. C., November 2, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Senate Office Building,
Washington, D. C.

MY DEAR SENATOR WAGNER: Sometime ago I had occasion to send you a letter and memorandum with respect to the functioning of employment exchanges abroad. I have now made a further analysis of the offices in 16 countries, showing the distribution of employment agencies in relation to the population and area of those countries. Such a quantitative statement reflects in a measure the efficiency with which the system is likely to be functioning in the different countries. Thus, a country which shows that there is an employment agency for every 1,000 square miles or less in territory, for example, is probably more efficient than a country which has only an agency for several thousand square miles. While it might be desirable to compare the distribution of the exchanges with respect to the industrial population rather than the population as a whole, the basic figures for the former are not available, and hence it has been necessary to confine the comparison to the population as a whole.

I inclose a table which I have prepared to show the distribution of employment exchanges.

It may be interesting to add that an analysis of the nationally coordinated systems which existed in the United States during the war showed an average of one exchange for every 4,000 square miles of area, and for every 136,000 of population. The analogous data for the 16 countries in my table shows an employment exchange for approximately every 2,500 square miles of area and for every 106,000 of population. There are, of course, great variations from Great Britain, with an employment exchange to every 76 square miles and 37,000 population, to Russia with an employment exchange to every 29,000 square miles and 521,000 population. The range in population averages employment exchanges for every 26,000 in South Africa to 1,716,000 in Jugoslavia.

Trusting this may be of some interest to you, I am,

Sincerely yours,

LEIFUR MAGNUSSON, *Director.*

Distribution of employment exchanges in 16 countries, by area and population, 1927

Country	Number of employment offices	Population	Area (square miles)	Average population per office	Average area per office
Czechoslovakia	437	13,613,172	54,877	31,151	126
Denmark	89	3,419,056	17,144	38,416	193

AMERICAN ASSOCIATION FOR LABOR LEGISLATION,
New York City, September 13, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: Upon my return from several weeks' study of labor legislation in England I find your letter of August 10. I am, of course, deeply interested in and strongly in favor of the legislative purposes indicated by the three bills you have inclosed—S. 4158 and S. 4157 in detail and S. 4307 in principle.

It will always be a pleasure to work with you and to be of any possible service in getting the right kind of a constructive labor legislation program passed by Congress.

Sincerely yours,

JOHN B. ANDREWS, *Secretary.*

RYDE HOTEL,
Ryde, Calif., August 19, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: Thank you for sending me a copy of the labor bills proposed by you; also for the letter. I was particularly struck by the last sentence of your letter:

"I am convinced that the elimination of unemployment far transcends in importance the attainment of any immediate ends."

We of the teaching profession get pretty well disgusted with politics, because a politician is apt to have "an ulterior motive" behind his declarations of opinion.

There is no question about the fact that a national unemployment exchange would go far toward alleviating the unemployment problem in this country. England and Germany, as you know, both have a comprehensive system of employment exchanges. As we become more highly industrialized and our population presses upon subsistence we shall be compelled to shed more and more of our frontier individualism and take measures to make provision for the hazards that labor must face in a highly industrialized society.

The next step, which goes right along with "national unemployment" exchanges, should be a bill introducing "national unemployment insurance." Then you will have reduced unemployment by your "public works" and "unemployment exchange" idea. And you will also have made provision for those who do not happen to have been provided for by these two acts, or in periods of general unemployment (depression period of the cycle) when jobs are scarce everywhere.

The public works proposal is sound, according to my way of thinking, if the type of work to be done during a period of depression is carefully planned ahead of time and not suddenly trumped up for a particular occasion.

I believe that your progressive measures will win the support of economists regardless of their or your political affiliations. I should be pleased to read and comment upon any more bills which you believe I should be interested in.

Very sincerely yours,

DONALD ANTHONY.

New address: Department of Economics, Lehigh University, Bethlehem, Pa.

THE CRESTWOOD,
Cresco, Pa., August 18, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have read with interest the three bills you sent to me. With the proposals to collect statistics in regard to changes in employment and to establish a national system of public employment offices I am in complete accord. You are doing a useful piece of work in presenting these matters and ought to have the support of all thinking people. It will be something of a problem to administer such offices in a way that will keep the confidence of both employers and employees, but it ought to be done.

In regard to emergency work to relieve hard times, my point of view is somewhat different from yours. You will find it presented in the reprint from the Annalist which is inclosed. You may care to read it.

You will note there that, in our judgment, the trouble begins with so-called "prosperity." By beginning there to use correctives we would make it easier to take care of depression. Prevention is better than cure. There is a great chance for some statesman to do a piece of work comparable to the establishment of the Federal reserve banking system. I think there is a real possibility of reducing the industrial swings of the business cycle just as we have taken the financial panic out of it. I hope you are the man to press toward that goal.

Yours sincerely,

C. C. ARBUTHNOT,
Western Reserve University, Cleveland, Ohio.

NEW YORK UNIVERSITY,
DEPARTMENT OF ECONOMICS,
New York, August 15, 1928.

The Hon. ROBERT WAGNER,
United States Senate, Washington, D. C.

MY DEAR MR. WAGNER: I wish to thank you for the copy of your bill introduced April 20, 1928, on the subject of unemployment.

I do not hesitate to say that the subject of unemployment in my mind far transcends the importance of over 90 per cent of the subjects which come before Congress. Unemployment and the fear of it through the operation of forces beyond the control of the individual worker explains much of the misery and resentment that are present in industry or threaten to arise at any moment.

The first step in controlling the problem is to know exactly the extent to which it exists and where it exists. As a member of the teaching profession I have found myself constantly unable to get information adequate enough for an intelligent discussion of its significance or what can be done about it.

Your bill, therefore, seems to me to be addressed to a particularly fitting subject of inquiry, and I can not but voice a very hearty approval of its purpose.

Sincerely yours,

WILLARD E. ATKINS.

PHILADELPHIA RAPID TRANSIT CO.,
Philadelphia, August 14, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: I have read your three proposed bills for unemployment relief with considerable interest. I am quite in favor of the provisions in bills 4158 and 4307, but I am very dubious concerning the feasibility of extending a national employment system, for I fear that it can be subject to much abuse, and I believe that in most industrial centers at least there are fair employment agency facilities.

It seems to me that the gathering of data by the Department of Labor would be very vital, for there is a close relationship between business conditions in general and the variations of employment and earnings.

I wish you success in your endeavors.

Very truly yours,

EUGENE J. BENGE,
Chief Statistician.

INDUSTRIAL ARBITRATION,
New York City, September 5, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Senate Chamber,
Washington, D. C.

DEAR SIR: I have your letter of August 10, inclosing copies of three bills introduced by you during the last session of Congress, such bills

being designed to meet some phase of the unemployment situation. You invite comment and criticism of said bills.

In bill (S. 4157) creating the United States Employment Service, in section 4, page 5, of the bill as printed, I would suggest that in the paragraph commencing line 4 there should be set up some system or method of ascertaining just how State offices are being run and their rules and regulations. My experience is that it would not do to accept in all cases the report of the State director as to just how he was running the State offices. What I am asking for here is that there should be briefly named a method of obtaining first-hand information regarding the way the offices are run and their rules and regulations.

In bill S. 4307, which is cited as "unemployment emergency act, 1928," you seek to establish a board to be known as the Federal unemployment stabilization board. May I suggest that in naming this board the syllable "un" be omitted? It occurs to me that this board is for the purpose of stabilizing employment and therefore should not be called an unemployment stabilization board.

Very truly yours,

CHARLES B. BARNES.

UNIVERSITY OF CINCINNATI,
COLLEGE OF ENGINEERING AND COMMERCE,
Cincinnati, Ohio, October 29, 1928.

The Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR: Acting President Herman Schneider, of the University of Cincinnati, has asked me to make such comments as came to mind on the three bills which you sent a while back dealing with the employment situation.

After going over the bills carefully, I am of the opinion that, were they passed, Congress would have provided some much-needed legislation.

Any serious student of the labor situation of this country would point out that one of the outstanding problems which needs attention is that of a better handling of the employment situation. Your bill S. 4158 provides that the Department of Labor shall set about to collect reliable employment statistics. At the present time there is no adequate machinery for gathering these data. How can the country cope with the unemployment situation which it has to face every few years unless it has facts? This bill provides for the first step in a constructive employment program—the continuous collection and publication of reliable statistics.

Your bill S. 4157, which would establish and maintain a national system of public employment offices, if passed, would put into effect legislation which has been urged by those familiar with present conditions for a long time. It seems to me that your bill is drawn along the right lines. I would particularly indorse the policy of granting Federal aid to the public employment offices in each State which comply with the rules and regulations and the standards of efficiency prescribed by the Director General. This should tend to bring about the uniformity of practice among State public employment offices which is now lacking.

In order to coordinate the activities of the various State public employment offices it is necessary that they be operated according to the same administrative principles throughout the country and that an accurate and standard system of record keeping be installed so as to provide for uniform and dependable reports. Further, there should be standard methods of selecting the personnel to man these offices so that the temptation to make political appointments will be removed. It appears to me that your bill as drafted would bring about the removal of some of the defects in the present administration of our public employment offices to the advantage of everyone concerned.

Your bill S. 4157, which provides for the collection of employment statistics by the Department of Labor, ties right in, of course, with the bill under discussion. If both bills were passed, I take it that the Secretary of Labor would have ample authority to coordinate the employment statistics gathering activities.

I am confident that your bill S. 4157 is drafted along practical lines because the same principles are applied that have been working out successfully in the administration of the Canadian employment offices' coordination act of 1918. There is one provision in the Canadian act, however, which seems to be working out very well which has not been incorporated in your bill, and I am wondering why it has been omitted. I refer to the Employment Service Council of Canada. This is an advisory committee to the Federal Minister of Labor made up of representatives of employers and employees and of the railroad companies. Mr. A. J. Odam, statistician of the employment service branch of the Department of Labor at Ottawa, stated at a recent meeting of the International Association of Public Employment Services that this council had contributed largely to the success of the service and the harmonious relations existing between the different Provinces, employers, and employees with regard to employment service work. He made the following statement: "The annual meetings of this council permit of a full discussion of all employment and unemployment problems by representatives of those most concerned, and the free exchange of ideas which is so helpful in promoting that degree of coordination which is essential in the operation of an efficient employment service. Many of the recommendations of the council to the Minister of Labor have been brought to fruition as a result of action taken by him on account of advice received.

In this country I know that the operation of the State public employment office at Milwaukee has been materially aided because of the practical suggestions and cooperation of an advisory committee representative of local employers and employees which was established for the purpose.

Your bill S. 4307, which provides for the emergency construction of certain public works to relieve employment during periods of business depression, fits in properly with the other two bills. Business cycles appear to be inevitable under our modern industrial system and they will continue to bring with them peaks and valleys in employment. It is quite generally agreed by those who have studied the problem that the Federal Government could well undertake the emergency construction of public works to take care of those who are thrown out of industrial establishments during a period of depression. This would tend to benefit the employees by lessening the hardships which they undergo when their earning power is cut off and benefit the business man by stabilizing the purchasing power of those who constitute their mass buyers. If this bill became a law it would set up definite machinery to plan ahead for these employment emergencies and do away with our present hit-or-miss methods of attempting to deal with employment crises after they are upon us.

Here again your bill S. 4157, which provides for the collection of employment statistics, dovetails in with your bill S. 4307, which provides for the preparation of an index of employment. Adequate machinery for the nation-wide collection of reliable employment statistics is basic to the whole employment program which you have in mind in these three bills.

If these bills pass, you will have done much to benefit both the employers and employees of the United States.

Yours truly,

FRANCIS H. BIRD,
Professor of Commerce.

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK,
SCHOOL OF BUSINESS,
September 19, 1928.

Senator ROBERT F. WAGNER,
Senate Office Building, Washington, D. C.

DEAR SENATOR WAGNER: Your letter of August 10, inclosing copies of S. 4157, S. 4158, and S. 4307, reached me in due course.

I have examined the three bills which you inclosed with a great deal of interest. First of all let me congratulate you on your enterprise and public spirit in pushing a project which is, in my opinion, of such great public importance. I think that the three bills which you are sponsoring are well calculated to improve at its weakest points existing machinery for the stabilization of employment. The need for long-time planning of public works has for years been obvious enough, but despite this fact practically nothing has been done about it, at any rate by the Federal Government.

I take it that S. 4158 is intended to make it possible for the United States Bureau of Labor Statistics to extend and improve its monthly statistics on the volume of employment. Such an extension would, I think, be very useful.

In connection with the index of employment to be utilized by the proposed Federal stabilization board, and referred to at the top of page 3 of S. 4307, I am wondering whether you might not find it desirable to consider the use, for the same purpose, of ratios between the number of applicants for jobs and the number of jobs available as reported by a number of the State employment exchanges. When and if the United States Employment Service is recreated on something like its war-time scale its statistical records would, of course, make possible the utilization by the proposed stabilization board of similar ratios for the whole country. It is my opinion that the ratio of applicants for jobs to jobs available is a more reliable index for this purpose than the ordinary index of employment.

In respect to S. 4157, I should like to suggest the need for some means of preventing the new system from being operated in any way which would give justification for the charge (so often made by employers concerning the United States Employment Service of the war period) that the employment service is operated as an adjunct of the labor unions and staffed chiefly by partisans of the unions. Would this purpose be accomplished by the insertion of a clause putting the whole personnel under civil service? I know that you fully realize the importance of assuring that the director general of the United States Employment Service be a person generally representative of the public interest and free from partisanship either to associations of employers or associations of employees.

In closing let me express the hope that these bills may receive favorable action in the coming session of Congress.

Yours very sincerely,

PAUL F. BRISSENDEN.

MONTEVALLO, ALA., *August 14, 1928.*

Hon. ROBERT F. WAGNER,
United States Senate.

DEAR SIR: You communication addressed to me at Brookwood Labor College has been forwarded here where I am teaching for the summer.

Your three bills dealing with unemployment are absolutely sound and should meet with universal approval. The advance planning should ultimately be carried further, but you have gone as far as could be expected for a start.

The only suggestion I have is that the secretary of the unemployment stabilization board ought to be in the Department of Labor, but if opposition is disarmed by putting him in the Commerce Department, probably the issue may rest.

Yours truly,

ARTHUR W. CALHOUN,
Teacher of Economics, Brookwood Labor College.

HARVARD UNIVERSITY,
DEPARTMENT OF ECONOMICS,
Cambridge, Mass., August 13, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: I have read the three bills which you were kind enough to send me with your letter of August 10. I gather from my reading that the bill to provide for the emergency construction of certain public works for the relief of unemployment during the periods of business depression, is more important, at least, it is the one which proposes something new. The other two, as I understand them, merely clear the way or help to provide the machinery for this one. I shall therefore confine my remarks to this bill.

Why not add a provision to the effect that whenever the United States Employment Service finds that there is an abnormal number of unemployed in the country, the President shall, upon the advice of the Secretary of Labor, suspend all immigration of laborers into the country. Unless something of this kind is done, there would be nothing in the bill to prevent a positive acceleration in immigration from the non-quota countries whenever this bill becomes operative; that is, whenever large numbers of laborers are taken off the labor market and set to work on these public improvements. Even at the present time when there is an abnormal amount of unemployment in the country, we are still importing large numbers of laborers. They are presumably getting jobs or they would not continue to come. By no circuitous reasoning, can one avoid the conclusion that this has something to do with unemployment.

By far the most important piece of legislation we have ever had bearing on the subject of unemployment was the restriction of immigration. The chief weakness in the restriction act is that it did not apply the quota basis to the American Continent. By far the most needed piece of labor legislation at the present time is one which will extend the quota basis, especially to Mexico and the West Indian Islands.

Aside from the effect on wages in this country of the wholesale importation of labor with a low standard of living, the rapid increase in the number of Mexican peons and the future increase already beginning of the importation of West Indian negroes will create new race problems in this country. The Mexican peon is already beginning to create a race problem quite as difficult as the Chinese or the Japanese problems ever were in California and will in time create a problem quite as difficult as the negro problem now is in the South.

I wonder how many of us realize the extent to which the unevenness of business, sometimes miscalled the business cycle, are due to the wholly unnecessary industrial reserve army which we have always had and which some seem to think necessary. I have made this point in a recent book entitled "This Economic World," pages 340–341:

"It is coming to be realized that something is needed to act as a drag or a brake upon the overexpansion of business in boom times. If business is permitted, with no hindrance or retarding factor, to expand as rapidly as it wants to, it will overdevelop at one time, and this overdevelopment will be followed by a period of excessive stagnation.

"The only effective check that works automatically is an increase in the cost of production. If, when orders are coming in rapidly, every manufacturer can increase his production without having to pay a higher price for any of the things he needs—raw materials, labor, loans, etc.—there is no effective drag. That is, if he can hire increased numbers of workers at the same wages, buy increased quantities of raw materials at the same prices, borrow increased sums of working capital at the same rates of interest, there is no drag on the expansion of his business. But if a boom, anticipated or potential, finds him unable to get more labor without offering higher wages for it to buy increasing supplies of raw materials without bidding higher prices to get it or to borrow more working capital without paying higher rates of interest, these things act as a drag and prevent excessive booms. Again, if a depression should begin, if all these wages, prices, and interest rates tend to fall, this would stimulate the profit makers to increased activity and thus smooth out the depression.

"In the past we have had to rely mainly upon variations in the rate of interest to act as a repressant in boom times and a stimulant in times of depression. Lately the Federal Reserve Board has acted in a rather positive manner to increase the efficiency of the depressant and the stimulant. But the principal item of cost is not interest on loans but the wages of labor. So long as there is a large labor reserve there need be no increase in wage cost in boom times and decrease in times of depression to act as a depressant and a stimulant. But if there were no reserve labor army, then when every employer wanted to expand his business to take advantage of an active market, he could not get indefinite supplies of new labor by merely hanging out a shingle saying 'men wanted.' In fact, he could not get extra help at all in a real boom. All employers would be wanting extra help at the same time and they would merely bid against one another for the help that was already employed. This would put a more effective drag on a business boom than a mere rise in the interest rate could possibly do."

Please understand that I am positively in favor of your plan for the expansion of public works in times of unemployment, but I think, however, that your plan will not be very effective unless something is done at the same time to control the labor supply. In other words, the plan proposed in your bill is only a part, though an essential part, in a much larger program.

Very sincerely,

T. N. CARVER.

LAW SCHOOL OF HARVARD UNIVERSITY,
Cambridge, Mass., October 3, 1928.

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: During the summer you kindly sent me three bills which you had drawn to help remedy the unemployment situation. I am very glad that you are working at this, for I have always felt that unemployment was the weakest spot in our present economic system. It seems to me that this weakness must be removed if that system is, as I hope, to endure.

Unfortunately I am not able to afford you much assistance since the problem lies outside the field in which I work. So far as I could judge, your three proposals were sensible and likely to help. With reference to S. 4157 on public employment offices, I venture one suggestion. Some of my manufacturing friends expressed a good deal of dissatisfaction with the public employment offices which were in operation during the war because of the strong unionist bias, as they regarded it, of the Government agents in charge. While it would not be fair, of course, to select only men without unionist affiliations for the positions under your system, it would probably be necessary to convince open-shop manufacturers that the offices would be administered without such a bias. I realize that the problem is very difficult, but mention it because your plan will work much more successfully if you are able to obtain the hearty support of the considerable group of manufacturers in the East who favor an open shop. I am not sure myself that these gentlemen are right, but their opinion is an important factor which has to be reckoned with.

* * * * * * *

Yours sincerely,

Z. CHAFEE, Jr.

COLUMBIA UNIVERSITY IN THE CITY OF NEW YORK,
FACULTY OF POLITICAL SCIENCE,
August 28, 1928.

Senator ROBERT F. WAGNER,
Washington, D. C.

MY DEAR SENATOR WAGNER: I have just collected my university mail and found your letter inclosing copies of three bills dealing with unemployment. The aims of these three bills—better statistics, a national employment system, and scheduled public works—represent eminently sound remedies urgently needed by the Nation. I shall examine the bills as soon as practicable, and if I find any specific points on which I feel qualified to make suggestions I shall be glad to do so.

Sincerely yours,

J. M. CLARK,
Department of Economics.

WALWORTH CO.,
Chicago, Ill., August 17, 1928.

Hon. ROBERT F. WAGNER,
Senate Building, Washington, D. C.

MY DEAR SENATOR: Your letter of August 10, with its inclosures, was handed to me as I was boarding the train for a trip through the Central West. I have read carefully the three bills introduced by you and am giving you my frank reaction.

I am heartily in favor of an arrangement whereby Congress will make its appropriations for expenditure at a time of unemployment. There is no step that I can conceive would be more effective in a balancing of our employment. I, therefore, am heartily in sympathy with the provisions of S. 4307.

I do not feel so definitely in sympathy with the other two bills except as they provide for a study of the trend of employment throughout this country. It seems to me we already have sufficient employment bureaus. What we need is an accurate and intelligent reporting instrument which would give the employers in general and the Government in particular the background for carrying out the provisions of S. 4307. I assume that you are aware that at the present day many of the progressive manufacturers are working under a budget system which very definitely takes into consideration the equalization of employment throughout the year. Next to the plan of carrying out Federal, State, and municipal work during periods of lessened activity this step on the part of the manufacturers is the most helpful.

Very sincerely yours,

HOWARD COONLEY, *President.*

YALE UNIVERSITY,
DEPARTMENT OF ECONOMICS, SOCIOLOGY, AND GOVERNMENT,
New Haven, Conn., September 3, 1928.

The Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I must first of all thank you very much for your letter of August 10, 1928, with the inclosed bills. I have not the technical equipment to make any useful comment on the administrative and similar details of the bills. I can simply record my complete approval of the broad general principles of economic theory and practice which they embody.

I read the account of (I believe) your "maiden speech" in the press and clipped it for my files as one of the most encouraging signs of a growing and sensible interest in the problem. I have since followed your Senate career fairly closely.

I find bills S. 4157, S. 4158, and S. 4307 so interesting and sensible that I should very much like to use them in my classes here in labor problems. Would it be possible for you to have sent to me 125 copies of each, addressed, W. J. Couper, Departmental Library of Economics, Kent Hall, Yale University?

I am not yet an American citizen, and therefore should not wish to be quoted in anything that I now say. It may interest you slightly to know that if I get citizenship before the election I shall vote for your party chief, among many other reasons, specifically in order that if these bills should ever be passed they might have the fair chance that would come from his excellent administration.

Very sincerely yours,

W. J. COUPER.

NEW YORK, *September 10, 1928.*

Mr. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: I appreciated your courtesy in sending me with your letter of August 10 copies of the three bills introduced by you in connection with the subject of unemployment. I have just found opportunity to read over these bills, but I do not think I have any important comments or suggestions.

The bill in relation to statistics of unemployment seems to me to fill a need, since the lack of statistics of this kind was a serious handicap in the discussions of unemployment last winter and spring.

The bill for the establishment of a national employment system seems to me sound in principle, although naturally there would be many difficulties in organizing and administering the proposed system in a way that would be effective and that would avoid the building up of cumbersome bureaucracy.

I am not quite sure whether it is the intention in the bill for the emergency construction of public works to add to the total construction program over a period of years or to plan the work so that contracts will be held back during periods of business activities and released during times of depression. I think I should favor the long-time planning of public works with the latter idea in view. I would not favor the authorizing of additional public construction simply to make work during periods of unemployment, as I do not think that would be sound either economically or governmentally.

I am much interested in this whole subject and am glad to have an opportunity of reading your three bills. Incidentally, I assume that you are familiar with the report of the industrial transference board appointed by the British Minister of Labor. This report gives the most vivid account that I have seen of the unemployment situation in England.

Yours very truly, E. S. COWDRICK.

MANOMET, MASS., *August 16, 1928.*

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR WAGNER: I have read with interest the bills, copies of which you have sent me. I am not an expert in such matters, but as a lawyer and citizen am concerned about them.

S. 4158 seems to be subject to no criticism. There should be available at frequent intervals accurate information collected by an official agency showing current employment and unemployment in different industries. For example, it would help to an understanding of the coal problem if we knew how many more miners there are than can expect full-time employment under normal industrial conditions. Of course, the figures given out by an administration bureau would be regarded as untrustworthy because from a partisan source, but it seems to be the best organization to do the job now obtainable. Perhaps the board in charge should be made bipolitical or biparty.

S. 4157 presents a large question of federalization of what is in many respects a local problem. The ideal situation for labor is a permanent family domicile in a community, not a shifting about like freight cars to meet demands here and there. It seems to me that States and communities should be encouraged to deal with this problem, so far as possible, by the establishment of employment agencies, and the Federal Government confine itself to collecting and distributing information about the supply and demand for labor. Yet it must be recognized that agriculture presents a seasonal demand for transient labor which must be filled from outside the State in many cases, and so we have a national problem.

S. 4307 is admirable in the plan for a drafting of projects for public works a long time in advance and the execution of the plans when business generally is slack. I imagine the trouble is that when a locality can show an improvement is needed, like flood-relief construction, and there is money in the Treasury due to large tax returns from prosperous business, then is the time for Congressmen to see that the people of the home community are taken care of and at the maximum cost to the Government. It ought to be possible to prepare plans for worth-while improvement not of an extremely urgent nature but recognized as in the public interest and execute them at times when the purchase of materials and employment of labor is a relief to a stagnant market, and not a competitive enterprise which booms or inflates prices.

It is a strange coincidence that just before receiving your letter I was reading some of G. B. Shaw's observations on this matter in The Intelligent Woman's Guide, etc., pages 281–282. He would probably note the difficulties of getting Congress to agree on the Boulder Dam and Muscle Shoals projects as showing the impossibility of planning any large-scale enterprise in detail.

I am sorry I am not well enough informed to contribute anything constructive, but I can assure you of my interest and the hope that you succeed in doing something to alleviate our recurrent troubles from unemployment. As a national problem, it seems to me to be of greater importance than farm relief or compulsory total abstinence, which seem to absorb attention at present.

Very sincerely yours,

JUDSON A. CRANE.

UNIVERSITY OF MICHIGAN,
DEPARTMENT OF ECONOMICS,
Ann Arbor, September 18, 1928.

Senator ROBERT F. WAGNER,
Washington, D. C.

MY DEAR SENATOR WAGNER: Your letter of August 10 was forwarded to me during my summer-school work on the Pacific coast, but I have been so busy traveling that I could not answer sooner. I agree with you entirely on the importance of the unemployment problem and believe that economists generally will be glad to give you their views freely without fear of partisan manipulation. Naturally, all your bills contain numerous details about which there will be reasonable differences of opinion, but I assume that what is wanted now is merely comment on the general procedures proposed.

S. 4158: First of all, undoubtedly, we need more data concerning fluctuations in unemployment. I believe our Department of Labor can well be intrusted with more funds for this purpose. Measurement in fluctuations of employment is well known to be more easily feasible than the measurement of a state of unemployment; nevertheless, I think our Federal bureau should make a start toward the systematic collection of other data reflecting the number of unemployed—such as volume of work handled by social agencies, applications for jobs, and so on.

S. 4157: I favor also the development of a national system of employment offices, developed in cooperation with States and municipalities so that local initiative is stimulated. I have been receiving the New York State Industrial Bulletin for several years and judge that the State employment offices in that State and elsewhere in our country have done a good deal of the necessary pioneering. On the other hand, your bill appears to me as a promising means of developing the comprehensive system that we need.

S. 4307: I am not very favorable to the construction of public works for the relief of unemployment, in the present state of our economic knowledge and political skill. No doubt something can be done in this direction, but I should prefer to see the new machinery for the present limited to study and recommendation. I think that if our highway funds, public utilities, etc., had the matter brought more explicitly to their attention by a continuing body of specialists

they would manage to regulate their construction in the desired manner of their own initiative. At any rate this type of project appears to me decidedly more in the experimental and theory state than projects embodied in the other two bills.

Faithfully yours,

Z. C. DICKINSON,
Associate Professor of Economics.

UNIVERSITY OF ILLINOIS,
Urbana, Ill., November 19, 1928.

Hon. R. F. WAGNER,
United States Senator from New York,
Washington, D. C.

DEAR SENATOR: My hat comes off to you for the speech of April 20—An Affirmative Policy Toward Unemployment. Any economist would be proud of such an intelligent, scientific analysis of this great problem facing our country.

In my thesis you will note frequent reference to the fact that it was limited to factory employment, because of inadequacy of statistics in other fields. If I can help you in getting bills (S. 4157, S. 4158, S. 4309) passed, let me know. Your efforts are worthy of the greatest praise.

Yours very truly,

FRANK G. DICKINSON.

LASALLE EXTENSION UNIVERSITY,
Chicago, August 13, 1928.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

MY DEAR SENATOR: I appreciate your sending me copies of the three bills which you introduced during the last session of Congress for my comments and criticism.

With regard to S. 4158, I would insert after the semicolon, on line 10, the following: "data with regard to the number of employees and compensation are to be reported under the following classifications:

"1. Productive or operative workers classified by leading trades or occupations.

"2. Clerical workers classified by leading occupations.

"3. Technical workers classified by leading occupations.

"4. Workers engaged in selling or distribution.

"5. Workers engaged in administration or supervision."

Heretofore, instead of giving a complete employment and economic cross section, our data and interests have been confined to trade workers. In recent years the Government has interested itself to some extent, also in the matter of shifting and placement of common labor and farm labor.

Owing to the simplification of administrative, accounting, and clerical methods, however, and the lack of organization of this class of employees, they have not received the attention to which they are entitled as citizens of United States. The so-called "white-collar class" has suffered in the last eight years a loss in the purchasing power of their income, whereas trade workers have been able to secure a considerable increase in the purchasing power of their income.

What is true of ordinary clerical workers is equally true of technical workers, such as college-trained engineers. It is also true of men engaged in the administrative departments and on whom the actual burden of management usually falls, such as men in charge of personnel work, production control, cost control, and office management.

The statistics above mentioned would be particularly desirable as they would give a complete cross section of American economic conditions of workers of all classes and not merely those belonging to organized trades.

With regard to bill S. 4157, I would add a section between lines 3 and 4 of page 8, as follows: The facilities of the United States Employment Service are to be extended to workers in all classes of employment, including not only the organized trades but also to clerical workers and workers in the sales, technical, and administrative departments of business and industry.

Bill S. 4307, for emergency construction during periods of business depression, is wholly desirable and I have no suggestion to offer.

I should appreciate your comments on my communication. The steps I have advocated have been suggested as desirable in conversations I have had with members of various national engineering and management organizations.

That Member of Congress who will undertake the leadership in the movement to widen the scope and utility of the services heretofore applicable only to organized trades, so as to make them available to all classes of workers, will make a place and reputation for himself as an outstanding statesman who can command any gift within the power of the American electorate to bestow.

Very truly yours,

HUGO DIEMER,
Director Business Management Courses and Personnel.

NEW YORK, *September 29, 1928.*

Senator ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SENATOR WAGNER: On my return to the city I find your letter of August 10 asking me to express my opinion on three bills introduced by you at the last session of Congress to meet different aspects of the unemployment situation.

In principle I approve each one of them. They are all integral parts of meeting various phases. The particular mechanics may leave much room for debate. For example, it is not free from doubt whether the policy of having the employment service a bureau of the Department of Labor is a wise one or not.

Again, it is open to question whether the particular method suggested for concentrating the expenditure of money for public works at certain periods in order to mitigate unemployment is adequate. Whether the problem is not a more fundamental one and whether a board with broader powers that could accelerate Government work before the depression would not be a more adequate procedure. But a beginning should be made and some such board as is suggested would doubtless be a useful first-stage experiment.

As I have said, I am in principle emphatically in favor of the program that you suggest.

Yours very truly,

SAM A. LEWISOHN.

FIFTEENTH DECENNIAL CENSUS

Mr. JONES. Mr. President, from the Committee on Commerce I report back favorably with amendments the bill (H. R. 393) to provide for the fifteenth and subsequent decennial censuses, and I submit a report (No. 1342) thereon.

Three of the amendments recommended by the committee propose to change the time for beginning the census from May, as provided in the House bill, to November 1. We have done that because the Secretary of Agriculture wrote a very strong letter insisting upon the change. This measure was before the House committee, and that committee in its report says that after very carefully considering the matter they fixed the 1st of May. The Senate committee, however, acceded to the request of the Secretary of Agriculture. We thought that the wise thing to do in the interest of time and expedition was to get the matter into conference, where these different dates could be very carefully harmonized and we could reach a satisfactory conclusion.

The other amendment is an amendment providing an authorization for an appropriation to carry on the census, that provision not having been incorporated in the House bill. Those are the only amendments, and I ask unanimous consent that the bill may be considered at this time. I do not think it will take much time.

Mr. SMOOT. What is the bill?

Mr. JONES. A bill providing for the fifteenth decennial census.

Mr. ROBINSON of Arkansas. Is the report of the committee unanimous?

Mr. JONES. The report is unanimous, on the theory that I have stated, that we would save much time and much controversy by taking the matter to conference, where it could be very carefully considered and an attempt made to harmonize the different views.

Mr. ROBINSON of Arkansas. I understood from the Senator that he would probably report the bill this morning, but I believe, considering the importance of the measure, that it should go over until to-morrow for consideration.

The VICE PRESIDENT. The bill will go to the calendar.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CURTIS:

A bill (S. 4848) for the relief of T. L. Young and C. T. Cole; to the Committee on the Judiciary.

A bill (S. 4849) to authorize an appropriation for the construction of 2 barracks buildings, 1 hospital wing, and 2 sets of double quarters for doctors at the Western Branch of the National Home for Disabled Volunteer Soldiers; to the Committee on Military Affairs.

By Mr. TYSON:

A bill (S. 4850) to give credit for longevity pay and retirement to warrant officers of the United States Army for services rendered in all other departments of the United States Government; to the Committee on Military Affairs.

By Mr. McNARY:

A bill (S. 4851) for the relief of George Parker; and

A bill (S. 4852) for the relief of Thomas M. Hopkins; to the Committee on Claims.

By Mr. BORAH:
A bill (S. 4853) granting a pension to Charles L. Shaeffer (with accompanying papers); and
A bill S. 4854) granting a pension to James A. Jordan (with accompanying papers); to the Committee on Pensions.
By Mr. NEELY:
A bill (S. 4855) granting a pension to Isaiah Nixon; and
A bill (S. 4856) granting a pension to Lydia M. Hunt; to the Committee on Pensions.
By Mr. GREENE:
A bill (S. 4857) granting an increase of pension to Ella I. Fisher; to the Committee on Pensions.
By Mr. KEYES:
A bill (S. 4858) granting an increase of pension to Ida Annette Dixon; to the Committee on Pensions.
By Mr. BRATTON:
A bill (S. 4859) granting a pension to Gertrude E. Reid; to the Committee on Pensions.
By Mr. NORRIS (for Mr. HOWELL):
A bill (S. 4860) granting a pension to Fannie D. Abbott; to the Committee on Pensions.
A bill (S. 4861) authorizing the Brownville Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Brownville, Nebr.; to the Committee on Commerce.
By Mr. ROBINSON of Indiana:
A bill (S. 4862) granting a pension to Robert J. Chapman;
A bill (S. 4863) granting an increase of pension to Clinton F. Henderson;
A bill (S. 4864) granting a pension to Florence Crane;
A bill (S. 4865) granting a pension to Canada M. Wing;
A bill (S. 4866) granting a pension to Eliza Howes;
A bill (S. 4867) granting an increase of pension to Margaret Treadway;
A bill (S. 4868) granting a pension to Elizabeth Huron;
A bill (S. 4869) granting a pension to Martha A. Mohler;
A bill (S. 4870) granting a pension to Susan Dill;
A bill (S. 4871) granting an increase of pension to William B. Harrison (with accompanying papers);
A bill (S. 4872) granting a pension to Mary E. Browne (with accompanying papers);
A bill (S. 4873) granting a pension to Samuel Porter Conway (with accompanying papers);
A bill (S. 4874) granting a pension to Rachel Featherston (with accompanying papers);
A bill (S. 4875) granting a pension to Nellie R. Goodman (with accompanying papers);
A bill (S. 4876) granting a pension to Mary A. Blue (with accompanying papers);
A bill (S. 4877) granting a pension to Ella L. Anderson (with accompanying papers); and
A bill (S. 4878) granting an increase of pension to Nancy J. Graves (with accompanying papers); to the Committee on Pensions.
By Mr. BROOKHART:
A bill (S. 4879) granting a pension to Mary A. Long (with accompanying papers); and
A bill (S. 4880) granting an increase of pension to Laura B. Pogue; to the Committee on Pensions.
A bill (S. 4881) granting a pension to Gorfey Orland Laughlin (with accompanying papers); and
A bill (S. 4882) granting a pension to George W. Preigel (with accompanying papers); to the Committee on Finance.

AMENDMENTS TO THE BOULDER DAM BILL

Mr. HAYDEN, Mr. JOHNSON, and Mr. PHIPPS each submitted an amendment intended to be proposed by them to House bill 5773, the so-called Boulder Canyon Dam bill, which were severally ordered to lie on the table and to be printed.

AMENDMENTS TO TREASURY, ETC., APPROPRIATION BILL

Mr. BRUCE submitted an amendment proposing to change the appropriation for enforcing the provisions of the national prohibition act, etc., from $13,500,000 to $270,627,384, intended to be proposed by him to House bill 14801, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed.

Mr. McKELLAR submitted an amendment intended to be proposed by him to House bill 14801, the Treasury and Post Office Departments appropriation bill, which was ordered to lie on the table and to be printed, as follows:

On page 18, line 7, after the word "each," to strike out the period and insert a comma and the following:

"Said reports to be made at each regular session of the Congress after May 29, 1928, and no part of the appropriation herein made for tax refund shall be paid out until said report is filed."

Mr. BLEASE. Mr. President, I wish to present an amendment which I propose to offer to the Treasury Department appropriation bill, and ask that it may be printed, printed in the RECORD, and lie on the table.

There being no objection, the amendment intended to be proposed by Mr. BLEASE to House bill 14801, the Treasury and Post Office Departments appropriation bill, was ordered to lie on the table, to be printed, and to be printed in the RECORD, as follows:

Amend on page 14, providing for Federal farm loan bureau, by adding at the end of line 24, as follows:

"That the said board shall instruct the officials of all banks under their control not to foreclose any lien or mortgage held by them upon any real estate which is or will become due and payable prior to October 1, 1929."

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 6687) to change the title of the United States Court of Customs Appeals, and for other purposes, requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. GRAHAM, Mr. HICKEY, and Mr. MAJOR of Missouri were appointed managers on the part of the House at the conference.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 279. An act to amend section 8 of an act entitled "An act to incorporate the Howard University, in the District of Columbia," approved March 2, 1867;

H. R. 7346. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indans may have against the United States, and for other purposes;

H. R. 11983. An act to provide for issuance of perpetual easements to the Department of Fish and Game, State of Idaho, to certain lands situated within the original boundaries of the Nez Perce Indian Reservation, State of Idaho;

H. R. 12312. An act for the relief of James Hunts Along;

H. R. 12533. An act to authorize the Secretary of Commerce to dispose of certain lighthouse reservations and to acquire certain lands for lighthouse purposes; and

H. R. 13606. An act for the relief of Russell White Bear.

UNITED STATES COURT OF CUSTOMS APPEALS

The PRESIDING OFFICER (Mr. FESS in the chair) laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 6687) to change the title of the United States Court of Customs Appeals, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WALSH of Montana. I move that the Senate insist upon its amendments, comply with the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to, and the Presiding Officer appointed Mr. NORRIS, Mr. WATERMAN, and Mr. WALSH of Montana conferees on the part of the Senate.

PRESIDENTIAL APPROVALS

A message from the President of the United States, by Mr. Latta, one of his secretaries, announced that the President had approved and signed the following joint resolution and act:

On December 7, 1928:

S. J. Res. 131. Joint resolution providing for the participation by the United States in the International Conference for the Revision of the Convention of 1914 for the Safety of Life at Sea; and

On December 10, 1928:

S. 4402. An act authorizing the Secretary of the Navy to assign to the Chief of Naval Operations the public quarters originally constructed for the Superintendent of the Naval Observatory in the District of Columbia.

REPORT OF THE PANAMA RAILROAD CO.

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was

read, and, with the accompanying report, referred to the Committee on Interoceanic Canals:

To the Congress of the United States:

I transmit herewith, for the information of the Congress, the Seventy-ninth Annual Report of the Board of Directors of the Panama Railroad Co. for the fiscal year ended June 30, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 12, 1928.*

STUDY OF BATTLE FIELDS FOR COMMEMORATIVE PURPOSES (S. DOC. NO. 187)

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying report, referred to the Committee on Military Affairs and ordered to be printed:

To the Congress of the United States:

In compliance with section 2 of the act of Congress to provide for the study and investigation of battle fields in the United States for commemorative purposes, approved June 11, 1926, I transmit herewith a report by the Secretary of War of the progress made under the said act, together with his recommendations for further operations.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 12, 1928.*

FREDERICK D. SWANK

Mr. NORRIS. Mr. President, on behalf of my colleague, Mr. HOWELL, who is detained from the Chamber by illness, I enter a motion to reconsider the vote by which the bill (S. 584) for the relief of Frederick D. Swank was passed on Monday. I do not ask for a vote now, but it becomes necessary under the rules of the Senate, as I understand it, to ask the House to return the bill to the Senate, and that motion has to be voted on at this time. I have talked with the Senator from Washington [Mr. JONES] about the matter, and he makes no objection to this step. I desire to say, as I have already stated to the Senator from Washington, that I know nothing about the merits of the bill, but my colleague is chairman of the committee from which the bill was reported, and I enter the motion in his behalf.

The PRESIDING OFFICER (Mr. FESS in the chair). The Senator moves that the House be requested to return the bill to the Senate?

Mr. NORRIS. I make that motion.

Mr. JONES. I wish to say that much as I regret this action as a matter of courtesy it is due to the junior Senator from Nebraska, and I make no objection to it.

The PRESIDING OFFICER. Without objection, the motion is agreed to, and the House will be requested to return the bill to the Senate.

CUMBERLAND FALLS

Mr. BORAH. Mr. President, there is a controversy going on in the country with reference to what is going to become of Cumberland Falls. I think this matter is of more than local interest, and I ask to have printed in the RECORD a statement in regard to it by one of the leading papers of the country.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PROPAGANDA ON TRIAL

By Tom Wallace, Chief of the Editorial Staff of the Louisville Times

The case of Cumberland Falls, which was called for a hearing by the Federal Power Commission for November 14, is to be more than the case of Cumberland Falls alone.

The effectiveness of utilities propaganda is on trial in Washington, which has been the scene of an investigation of utilities financing and publicity by the Federal Trade Commission, in response to the Walsh resolution, and in the United States.

The effort of utilities propagandists, in Kentucky and elsewhere, to convince the public, and officers of the Federal Government sitting as judges, that a power plant below Cumberland Falls and an impounding dam above the falls, would not mar the scenery in the vicinity of the falls, or injure the cataract itself, has spanned several years.

Maj. Harold Fiske, a Federal engineer who attempted to persuade Gov. William Jason Fields—predecessor of the present Kentucky executive, Flem D. Sampson—that the power plant would be beneficial to the State denied the assertion of a newspaper that he had said the dam would improve the falls, stating that he had said it would be an improvement to the falls region.

O. C. Merrill, executive secretary of the Federal Power Commission, says: "The only effect upon the falls, or the area immediately adjacent, would be reduction in the amount of water passing over the falls."

Some persons might say reducing Niagara to a dribble would be injurious to its grandeur, but utilities propagandists and Secretary Merrill do not feel that way about Cumberland Falls.

The water of Cumberland River would be conveyed, through a tunnel above the falls, to a point below the falls, where it would operate turbines. A limited artificial waterfall, between a power dam and a power plant, is proposed as a substitute for the natural falls. The licensee would own the land and exercise rights over it which would make any individual visiting the falls, or its surroundings, except by permission of the licensee, a trespasser, subject to expulsion.

The argument of propagandists is that, in these circumstances, a State park, quite as desirable as the unmarred tract, which Senator T. Coleman du Pont, a former Kentuckian, has offered to buy, and present to the State, could be made.

The power company has indicated that it would cooperate in making a park in these circumstances. I have no doubt that it would whitewash the trees on the land allotted to the State, and place iron greyhounds here and there to ornament it.

But there would not be any water on the ledges over which Cumberland River's water now plunges, as I shall show by quoting the text of Mr. Merrill's proposal:

"That except when water is wasted past or over the dam, or is released by the licensee for its own purposes, at rates in excess of 100 cubic feet per second, the licensee shall release, for the purpose of the maintenance of the falls, such an amount of water, not in excess of 100 cubic feet per second, as may be fixed by the State park commission, or other appropriate authority of the State of Kentucky."

It will be noted that this provision of the contract which Mr. Merrill proposes would protect the licensee from running more than 100 cubic feet per second over the falls. The licensee might run any amount less than 100 cubic feet which might satisfy the State park commission "or other appropriate authority." For example, a pint a week.

Governor Sampson, in his message to the 1928 legislature, recommended enactment of a law giving the State park commission power to condemn land, that the du Pont gift might be accepted without mentioning Senator du Pont's name.

After the power lobby had read his message, and had sent its best men to Frankfort to deal with the situation, Governor Sampson, apparently, underwent a change of heart. The condemnation bill was killed without the hand of the administration appearing in its favor. The governor procured control of the State park commission by removing Vance Prather, who had advocated the du Pont gift and appointing in his place a woman, who is a prodam member. The head of the utilities lobby was indicted on a felony charge and convicted of misdemeanor, as a result of his activities on the floor of the legislature.

Subsequently Mr. Merrill returned his report, favoring the power plant, without mentioning the circumstances in which propark legislation had been defeated. Governor Sampson came out publicly for the power plant in August representing the State park commission as being unanimously for it. The statement was untrue. Dean Thomas D. Cooper, of the State College of Agriculture, ex officio a member of the State park commission; a statutory member whose vote Governor Sampson can not control and whose removal he can not accomplish, stands steadfastly for the State park, and no power plant.

Mr. Merrill's report provoked from Dr. Wilbur Nelson, head of the geological department of the University of Virginia and secretary of the Southern Appalachian Power Conference, an interview in which he said it was "exceedingly biased in favor of the power applicants," and that it omitted mention of Senator du Pont's offer, which was undoubtedly known to the Federal Power Commission.

The power company drive in Kentucky in behalf of the sacrifice of Cumberland Falls to the greed of a private interest is a part of the nation-wide utilities drive which, as revealed in the Federal Trade Commission's investigation, presented itself to a leading conservationist, Gifford Pinchot, as being "wholesale debauchery amazing even in this age of propaganda."

"Subsidized writers, editors, converted to 'sane views,' planted news, and canned editorials broadcast by sweetened news syndicates are successive chapters in the sordid story of wholesale civic debauchery which is unrolled from day to day," says Mr. Pinchot.

Features of the Kentucky drive include also submitting to weekly newspapers "for free publication" matter prepared by a Louisville advertising agency.

The entire State has been propagandized extensively, and in some of the mountain cities, where the fight to control local opinion has been especially hot, many business men and salaried men are afraid to express their views, lest business in the one case, and in the other case positions, be lost as a result.

The trifling 40,000 horsepower which can be developed at Cumberland Falls is by no means the whole stake involved in this effort to control public opinion. The effort is to create the impression, popularly, that the power makers should be looked upon as benefactors to whom even the State's greatest scenic asset should be surrendered, willingly, because they will develop industrially the territory in which they create current.

The Kentucky case is a "cause celebre" in the outcome of which all utilities propaganda bureaus and every utilities contract man, every lobbyist throughout the country is interested. If Cumberland Falls can be grabbed and destroyed, what scenic asset can present an

obstacle to "development"? What argument against letting power companies have their way in all matters will be considered valid?

The cause of conservation throughout America will be to some extent affected by the ultimate fate of Cumberland Falls. With hundreds of millions of dollars behind them, the propaganda bureaus of more than two score utilities companies are making a drive to control national education and the press in the interest of getting what they want in the way of scenic assets and, what is more important, in the way of rates. In the effort schools, universities, newspapers, and magazines are being honeycombed with propaganda.

Because the opposition to the ruin of Cumberland Falls has been such as to give the controversy national prominence, the drive to win the case is out of all proportion to the value of the falls to the power company. There is more horsepower in the propaganda drive than there would be in the Cumberland Falls plant.

HOWARD UNIVERSITY

Mr. TRAMMELL. Mr. President, on Monday, when we were considering the calendar under the rule, as is usually the case, we proceeded very rapidly. There is but little or no consideration often given to bills appearing on the calendar, unless some Senator happens to notice objectionable features and objects to their passage, working as we do under that limited rule for the purpose of expediting legislation.

On Monday House bill 279, providing for the establishment of a policy for making appropriations for Howard University, was passed practically without any consideration and really, I think, without the knowledge of many Senators. That bill brings up a question of policy which I think should be considered by the Senate—that is, the policy of having a law providing that appropriations shall be made to private educational institutions. That is the sum and substance of the policy of the bill and what it means.

I desire to make a motion to reconsider the vote by which the bill was passed on Monday, and with that to make a request that it be returned from the House. I should like very much to have it further considered by the Senate. The bill has been sent to the House.

Mr. BRUCE. Mr. President, ought not the motion to recall the bill from the House to precede the motion to reconsider?

Mr. TRAMMELL. Under the rules, the two motions are embraced together.

The VICE PRESIDENT. The question will be on the motion to request the House to return the bill.

Mr. BRUCE. Does the Senator propose to ask for a vote on that motion now?

Mr. TRAMMELL. I desire to ask for a vote on having it returned from the House.

Mr. BRUCE. Yes; but I mean now?

Mr. TRAMMELL. Under the rule, we take a vote on returning the bill.

The VICE PRESIDENT. The bill will have to be returned from the House before the vote is taken on reconsideration.

Mr. TRAMMELL. Of course, I do not want to take the vote on reconsideration now.

Mr. BRUCE. I simply desire to say that I am opposed to its reconsideration and its return.

The VICE PRESIDENT. The question is on the motion of the Senator from Florida that the bill be recalled from the House.

The motion was agreed to.

Mr. TRAMMELL. Now I make my motion for reconsideration.

The VICE PRESIDENT. That motion is out of order until the bill is returned. The motion will be entered.

Mr. TRAMMELL. I do not want to lose my privilege of making it to-day, because this is the last day, under the rules, on which that motion can be made.

The VICE PRESIDENT. The Senator's rights are preserved when the motion to reconsider is entered.

APPOINTMENTS AND DISMISSALS IN THE CIVIL SERVICE

Mr. HEFLIN. Mr. President, before the Senate adjourned in May it adopted Senate Resolution 154, giving authority to a committee appointed by the Vice President to investigate the civil service. Under the terms of that resolution the committee was required to finish its work and report within 60 days. Senators will recall that the campaign was on, and Members of this body all went home, and we were unable to have more than two short meetings. I now ask unanimous consent that the authority granted by the resolution may be continued during the present session of Congress.

The VICE PRESIDENT. Is there objection?

Mr. CURTIS. May the resolution be read? I was out of the Chamber when the Senator from Alabama stated the object of his request.

The VICE PRESIDENT. The clerk will read the resolution, as requested.

The Chief Clerk read the resolution (S. Res. 154), as follows:

Whereas William C. Deming, president of the Civil Service Commission, admitted in an article published in the Washington Post of March 6, 1927, that the Civil Service Commission has appointed in excess of quotas over 10,000 persons from the District of Columbia, Maryland, Virginia, and other States; and

Whereas many legally appointed civil-service employees from States whose quotas are in arrears, and many ex-service men and women have been illegally separated from the service, and much suffering and hardship caused thereby, terminating in some cases in commitments to St. Elizabeths Hospital, and in other cases in suicide; and

Whereas the morale and efficiency of many of the executive departments and independent establishments of the Government have been completely broken down by the injustice, discrimination, intimidation, and illegal dismissals in the civil service and much loss to the Government caused by the resulting maladministration of the laws: Therefore be it

Resolved, That there is hereby created a special committee of the Senate, to consist of five members appointed by the President of the Senate, three of whom shall be from the majority party (including one Progressive Republican), and two of whom shall be from the minority party. The committee is authorized and directed to investigate illegal appointments and dismissals in the civil service since July 1, 1919. The committee shall meet and organize within five days from the date of appointment and immediately thereafter shall begin hearings upon this resolution. Within 60 days after the adoption of this resolution, the committee shall report to the Senate concerning such illegal appointments and dismissals in the civil service, and shall include in its report such recommendation for legislation and suggested action for the removal from office of any parties to such illegality, as it deems advisable to correct abuses in appointments and dismissals in the civil service.

For the purposes of this resolution the committee is authorized to hold such hearings, to sit and act at such times and places, to employ such experts and clerical, stenographic, and other assistants, to require by subpœna or otherwise the attendance of such witness and the production of such books, papers, and documents, including the records of the Civil Service Commission, the Bureau of the Budget, the Bureau of Efficiency, the Personnel Classification Board, and the several executive departments and independent establishments, to administer such oaths and to take such testimony and to make such expenditures, as it deems advisable. The expenses of the committee shall not exceed $2,500, and shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

Mr. SMOOT. Do I understand that the resolution is void now on account of the time having elapsed?

Mr. HEFLIN. The time has expired. The committee was required to report back, as I said a moment ago, within 60 days; but Senators all went home and we were unable to have meetings during the recess. The work is not completed. We had just started the investigation. The committee was composed of five Senators—the Senator from Vermont [Mr. DALE], the Senator from Iowa [Mr. BROOKHART], the Senator from Oklahoma [Mr. PINE], the Senator from Georgia [Mr. GEORGE], and myself. We desire authority to go on with the hearings. There are quite a number of employees in the Government service who have been to see me since the Congress reconvened asking that they be permitted to testify and get their statements before the committee. I told them it would be necessary to have the resolution continued or to have the authority which I now seek granted by the Senate. That is what I am asking for.

Mr. SMOOT. The only object I had in rising on the question was this: If the resolution is dead, there will have to be some other action rather than simply unanimous consent granted to continue it, although I suppose that has been done in the past; and I have no objection to the request of the Senator.

Mr. HEFLIN. I investigated that question somewhat, and the parliamentarian seemed to think that unanimous consent could be asked, as I have done; and if the Senate granted it, it would be the same as having the resolution passed again.

The VICE PRESIDENT. The Senator from Alabama asks unanimous consent to extend the time within which the committee may report.

Mr. HEFLIN. For the remainder of the present session.

Mr. ROBINSON of Arkansas. Mr. President, that is a perfectly proper request. If the committee has not completed its work, it is appropriate to extend the time in which it may do so.

Mr. JONES. I should like to ask the Senator from Alabama whether or not under his request the committee would be required to report prior to the end of the present session.

Mr. HEFLIN. I ask that the time may be extended through this session, a report to be submitted by the committee before the Senate shall adjourn finally on the 4th of March.

Mr. JONES. If the Senator will modify his motion so as to require a report by the committee on or before the 4th of March, that will be satisfactory.

Mr. HEFLIN. I include that in my request, Mr. President.

The VICE PRESIDENT. Without objection, it is so ordered.

RELIEF OF CONDITIONS IN PORTO RICO

Mr. BINGHAM. Mr. President, on account of the great need for haste and the emergency existing in Porto Rico, with over a hundred thousand people being fed every day by the Red Cross, and the necessity of providing money as soon as possible to enable planters to employ labor, I ask unanimous consent that Senate Joint Resolution 172, reported by me from the Committee on Territories and Insular Possessions on yesterday, as it appears on the calendar, may be taken up and considered at this time.

The VICE PRESIDENT. Is there objection?

Mr. ROBINSON of Arkansas. What is the calendar number?

Mr. BINGHAM. It is the last measure on the calendar.

Mr. SMOOT. I ask that the joint resolution be read.

The Chief Clerk read the joint resolution (S. J. Res. 172) for the relief of Porto Rico, as follows:

Whereas the island of Porto Rico is suffering from the effects of a violent hurricane of extraordinary intensity, unusual duration, and unexampled violence which visited the island on September 13 and 14, 1928; and

Whereas no part of the island escaped suffering some damage; and

Whereas the total number of people affected by the hurricane was 1,454,047 of whom, according to the report of the American Red Cross, more than one-third, or 510,161, were absolutely destitute and without food; and

Whereas the coffee and fruit crops were almost totally destroyed, and the coffee plantations so injured that it will be at least five years before they can be restored to normal conditions; and

Whereas a very large part of the shade trees which are essential for the successful functioning of a coffee plantation were destroyed and more than five years will be required for their replacement or recovery; and

Whereas more than 140,000, or about one-third, of the trees in the coconut plantations were destroyed, and it will be at least seven years before the new trees to be planted in their place will be bearing fruit; and

Whereas the damage to all the insular industries has been so great as to make it impossible for the insular government to give adequate relief in the emergency: Therefore be it

Resolved, That there is hereby created a commission, to be known as the Porto Rican hurricane relief commission (hereinafter referred to as the commission), and to consist of the Secretary of the Treasury, the Secretary of War, and the Secretary of Agriculture, of whom the Secretary of War shall be the chairman. It shall be the duty of the commission to assist in the rehabilitation of agriculture in the island of Porto Rico, particularly on the coffee plantations and on the coconut plantations, to encourage a more general planting of food crops needed by laborers on the plantations, especially of root crops, to aid in the repair and restoration of schools and roads, and to assist in providing employment for unemployed and destitute laborers. The commissioners shall receive no compensation for their services under this resolution.

SEC. 2. (a) The commission is authorized (1) without regard to the civil service laws to appoint and, without regard to the classification act of 1923, as amended, to fix the compensation of a secretary and such clerical and other assistants, and (2) to make such expenditures (including expenditures for personal services and rent at the seat of government and elsewhere) as may be necessary in carrying out the provisions of this resolution. The commission may, to the extent deemed advisable by it, utilize the facilities and the clerical and other personnel of the Department of the Treasury, the Department of War, and the Department of Agriculture in carrying out the provisions of this resolution.

(b) There is hereby authorized to be appropriated the sum of $50,000 for administrative expenses incurred in carrying out the provisions of this resolution.

SEC. 3. For the purpose of carrying out the provisions of this resolution the commission shall have power to make loans to any individual coffee planter, coconut planter, fruit grower, or other agriculturist in the island of Porto Rico in such amounts and upon such terms and conditions as the commission shall by regulation prescribe, including an agreement by the borrowers to use the loan for the purposes specified by the commission; except that no such loan shall be made for a period of more than 10 years or in an amount in excess of $25,000 to any one individual. The rate of interest upon each such loan shall be 5 per cent per annum but the commission may, in its discretion, waive the payment of interest upon any such loan for such a period of time as the commission shall deem necessary. All such loans shall be made by the commission itself or through such agencies as the commission shall designate. For carrying out the purposes of this section there is hereby authorized to be appropriated the sum of $10,000,000, of which $5,000,000 shall be made immediately available, $3,000,000 shall be made available on January 1, 1930, and $2,000,000 shall be made available on January 1, 1931. Any money received as repayment of any loan made under the provisions of this section shall be covered into the Treasury as miscellaneous receipts.

SEC. 4. There is hereby authorized to be appropriated the sum of $2,000,000 to be used for the rebuilding and repair of schoolhouses damaged or destroyed by the hurricane in the small towns and rural districts of Porto Rico and for the employment of labor for repairing insular and rural municipal roads. The sum hereby authorized to be appropriated shall be expended in such manner and in such amounts as the commission shall approve.

SEC. 5. There is hereby authorized to be appropriated the sum of $100,000 to be expended by the commission in the purchase and distribution within the devastated area of Porto Rico of seeds and seedlings, particularly of food and root crops, in such manner as it deems advisable.

SEC. 6. The commission shall make an annual report to Congress at the beginning of each regular session, giving a complete account of its activities in carrying out the provisions of this resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution which had been reported from the Committee on Territories and Insular Possessions with amendments. The first amendment was, in section 2, on page 3, line 12, after the word "Agriculture," to insert "and may request and accept the cooperation of the insular and municipal governments of Porto Rico."

The amendment was agreed to.

The next amendment was, in section 3, page 4, line 4, after the word "loan," to insert "beginning with the fourth year."

Mr. ROBINSON of Arkansas. Mr. President, apparently the joint resolution provides that no interest shall be charged on these loans until the fourth year?

Mr. BINGHAM. That is correct.

Mr. ROBINSON of Arkansas. If I remember correctly, in the flood-relief work that was carried on by the agencies of the Government interest was charged on loans—a small rate of interest—from the time they were made. Why is interest deferred for the period of three years on these loans in the case of Porto Rico?

Mr. BINGHAM. For the reason that the committee was given evidence to show that the coffee plantations could not begin to come back until the fourth or fifth year and the coconut plantations until the sixth or seventh year, and there will be no money whatever with which to pay interest during that period.

Mr. ROBINSON of Arkansas. The destruction was such that it will be necessary to replant the coffee plants?

Mr. BINGHAM. More than half of the coffee plants and 62 per cent of the shade trees were destroyed.

Mr. ROBINSON of Arkansas. It is noted, also, that the commission is authorized to defer permanently the payment of interest, or for such time as the commission may see fit.

Mr. BINGHAM. The reason for deferring the payments was that in the case of planters whose plantations were so wiped out that it would be five or six years before they could have any income, their interest might be deferred after the third year until such time as they could sell a crop.

Mr. ROBINSON of Arkansas. What has been done by the Porto Rican government itself in connection with this relief work?

Mr. BINGHAM. Within three days after the hurricane occurred word was sent out to employ just as many people as could be employed on the roads, and all available money was used in keeping people employed on the roads to the extent of about half a million dollars. The Porto Rican government has about reached the end of its resources, and its taxes will be very seriously crippled. The board of equalization and relief has had to cut down the assessments of the coffee plantations to a nominal sum in order to enable the planters to continue.

Mr. ROBINSON of Arkansas. The Porto Rican government, then, is not participating in loans to its own planters?

Mr. BINGHAM. It is impossible for it to do so at present.

Mr. ROBINSON of Arkansas. It is noted that all funds received during the period of five years after the date of the approval of the act from loans or other arrangements effected under the act shall be treated as a revolving fund. What is it estimated will be the total amount of funds applied in that way during the period of five years for this relief work?

Mr. BINGHAM. Very little will come in, Mr. President, because of the fact that it is not estimated by any of the experts

in coffee that there will be any income from the coffee plantations for the first five years; but with regard to the citrus fruit growers, and with regard to some of the other plantations, there will be payments that can be made. It was also brought out in the hearings that a great deal more than $10,000,000 was needed, but it was not felt wise to ask for it; and it was hoped that the Congress might be willing to permit any principal or interest that might be returned to be used as a revolving fund for the first five years.

Mr. ROBINSON of Arkansas. The bill, I presume, has the approval of the several departments whose heads are made members of the commission?

Mr. BINGHAM. It has their approval; and in the report the Senator will notice that it has the approval of the Bureau of the Budget, and is not in conflict with the President's financial policy.

Mr. KING. Mr. President, in view of the amendment which has just been read, found on line 4, the amendment "beginning with the fourth year," may I inquire of the Senator whether he thinks it is wise to give to the commission the discretion to defer interest after that period? I ask more for information than by way of criticism; but it would seem to me that if the payment of interest is deferred for four years there ought not to be a provision for further waiver of interest or deferring payment.

Mr. BINGHAM. There was no divergence of opinion among the specialists, including the manager of the farm-loan bank and the auditor and the commissioner of agriculture, that it would be impossible for a good many of the planters to pay any interest at all for five years; and the burden of having interest accumulate for the first two or three years would be so great as to make it seem advisable to waive all interest for the first three years in lieu of any grant. At the time of the great hurricane of 1899 we made a direct grant to the people. This time the people are not asking for a direct grant but only for a loan to the planters without interest for the first two or three years. This will affect only the small individual planters and not the corporations or large planters.

Mr. FLETCHER. Mr. President, may I ask the Senator a question? There is a Federal land bank established in Porto Rico, is there not?

Mr. BINGHAM. Yes, Mr. President.

Mr. FLETCHER. Does the Senator know how much their loans have amounted to up to this time?

Mr. BINGHAM. Their loans are about $12,000,000.

Mr. FLETCHER. Already?

Mr. BINGHAM. Yes, sir.

Mr. FLETCHER. And the planters can not get accommodations through those banks for these purposes?

Mr. BINGHAM. No, sir. It is impossible for the banks to extend further credits, because they have already loaned up to their limit on these plantations. As a result of the hurricane of two years ago and the hurricane of six years ago, it has been necessary for the planters to borrow up to the full extent of 50 per cent of the value of their plantations; and the Federal land bank is not permitted to loan any further to them.

Mr. FLETCHER. I understand that; but I did not know whether there were other applications that might be made and other accommodations they might extend. If they have about covered the field, of course, that source is exhausted.

Mr. BINGHAM. One of the best witnesses who appeared before the committee was the manager of the local bank, who has been there for nearly six years and is thoroughly familiar with the whole situation.

Mr. ROBINSON of Arkansas. Mr. President, what was the amount of relief work done or assistance extended through the instrumentality of the Red Cross and other kindred organizations?

Mr. BINGHAM. The Red Cross has set aside $2,750,000 for relief, which is about the same amount or a little less than was set aside for relief to the sufferers in Florida from the same hurricane.

Mr. ROBINSON of Arkansas. The Senator says "set aside"; what does that expression imply?

Mr. BINGHAM. That amount has been already spent or has been allocated, as we used to say during the war.

Mr. ROBINSON of Arkansas. It is expected that it will be expended, then?

Mr. BINGHAM. All of it and more, Mr. President.

Mr. ROBINSON of Arkansas. And more, probably?

Mr. BINGHAM. They will have to continue on through the winter.

Mr. TRAMMELL. Mr. President, will the Senator from Connecticut permit a question?

Mr. BINGHAM. Certainly.

Mr. TRAMMELL. Are the coffee, coconut, and citrus-fruit industries there carried on mostly by natives or by American capital?

Mr. BINGHAM. Almost entirely by natives, Mr. President. American capital is invested in the large sugar plantations, which are not asking for any aid whatever, and in the citrus-fruit industry, which will need aid perhaps for a few months or one year; but for the most part they are taking care of their own needs and necessities.

Mr. TRAMMELL. I was under the impression that American interests have engaged rather extensively in the citrus-fruit industry in Porto Rico.

Mr. BINGHAM. That is true.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The VICE PRESIDENT. The next amendment will be stated.

The next amendment of the Committee on Territories and Insular Possessions was, on page 4, line 6, after the word "discretion," to strike out "waive" and insert "defer," so as to read:

but the commission may, in its discretion, defer the payment of interest upon any such loan for such a period of time as the commission shall deem necessary.

The amendment was agreed to.

The next amendment was, on page 4, line 9, after the word "made," to insert "by the commission itself or," so as to read:

All such loans shall be made by the commission itself or through such agencies as the commission shall designate.

The amendment was agreed to.

The next amendment was, on page 4, line 15, after "1931," to strike out "Any money received as repayment of any loan made under the provisions of this section shall be covered into the Treasury as miscellaneous receipts" and to insert:

All money received during a period of five years from the date of the approval of this joint resolution as repayment of any loan or interest on loan made under the provisions of this joint resolution shall be held by said commission as a revolving fund which may be loaned on applications for the purposes and upon the terms and conditions herein provided, and all money received thereafter, as payments of interest and principal on all loans made under the provisions of this joint resolution shall be covered into the Treasury as miscellaneous receipts.

The amendment was agreed to.

The next amendment was, in section 4, page 5, line 7, after the word "labor," to insert "and the purchase of materials," so as to make the section read:

SEC. 4. There is hereby authorized to be appropriated the sum of $2,000,000 to be used for the rebuilding and repair of school houses damaged or destroyed by the hurricane in the small towns and rural districts of Porto Rico and for the employment of labor and the purchase of materials for repairing insular and rural municipal roads. The sum hereby authorized to be appropriated shall be expended in such manner and in such amounts as the commission shall approve.

The amendment was agreed to.

Mr. KING. Mr. President, may I ask the Senator, in view of the words "revolving fund," if it is the purpose to perpetuate this fund after the period indicated in the joint resolution? In other words, if moneys are paid back by those to whom they may be lent, may the commission loan those moneys again on such terms as they see fit?

Mr. BINGHAM. Only for five years, Mr. President. The revolving fund is to terminate at the end of five years. The object of that was to diminish the amount of relief which will be provided by the United States.

Mr. KING. The obligation, then, might be a great deal more than the $10,000,000. That is to say, suppose the $10,000,000 should be loaned within the next few years, and $5,000,000 of that should be paid, say three or four or five years from now, into this revolving fund, and loans made again, that would constitute, then, a loan probably of $15,000,000 instead of $10,000,000.

Mr. BINGHAM. No; the Senator will realize that if the money is paid back, the loan is not continuing. It was believed by a great many of those who have studied the situation, that $20,000,000 would more nearly represent the actual needs, in view of the destruction of about $80,000,000 worth of property; but it was believed by the committee that it was wise not to ask for a larger loan than $10,000,000 over the period of three years.

Mr. SMITH. Mr. President, I have been very busy with other matters, and was not aware that this Porto Rican relief measure would come up to-day.

I am not personally posted on the condition of Porto Rico as the Senator who has the joint resolution in charge is; but I should feel derelict in my duty to American citizens if I did not call the attention of the Senate to the fact that the situation in my State has been investigated by officers of the Government connected with the Agricultural Department, Federal officers both in the State and here in Washington, and I am informed that the same thing is practically true of a section of Georgia, where from identically the same storm, with a precedent weather condition that made it intensely effective, those sections have suffered perhaps as disastrously as Porto Rico.

It is true that we are in direct touch with and a part of the great American continent; but there is a section of my State—almost one-half of it—that suffered severely from preceding storms, perhaps the worst in the history of my State, and then the disaster reached its climax in this terriffic hurricane that swept up from Porto Rico, entered Florida at Palm Beach, recurved from its northwesterly direction, took a course right up the Atlantic coast, and practically wiped out all that the farmers in that section had. The hay crop, the corn crop, the cotton crop, the tobacco crop, were practically wiped out; and there is a section of my State and of Georgia and a part of North Carolina larger in extent than Porto Rico that has suffered a devastation equal to that which occurred in Porto Rico so far as the crops are concerned. There was not the destruction of buildings that occurred in Porto Rico.

Mr. SIMMONS. Mr. President, the Senator might state, so far as North Carolina is concerned, that that was the condition with reference to probably one-half of the farms in the eastern section of the State.

Mr. SMITH. That is true. We are appointing a commission here to go to a semiforeign region to extend what ought to be extended—the helpful hand of America—and passing right over a section of our own country whose people individually are suffering to-day as intensely as the Porto Ricans are so far as resources are concerned.

As I said before, there was not the destruction of houses that there was in Porto Rico, but my colleague [Mr. BLEASE] will bear me out in the statement that the crops and all that the people have to depend on for a living were practically wiped out. The sheriffs and our fiscal agents in the counties are reporting to us that not only have the people nothing with which to pay taxes but they have nothing with which to meet the obligations incurred in their efforts to make a crop.

Our land banks and intermediate credit banks and local banks are feeling the terriffic strain of the wiping out of this rich section of our State. Bank failure after bank failure has occurred because of the destruction of the cash crops, the tobacco and the cotton crops. That in itself was bad enough, but in addition the food crops have been destroyed.

The feed for animals has been destroyed, and a large number of the animals themselves have been destroyed. I do not think I, at least, am justified in standing here and joining in extending this necessary aid to Porto Rico; but overlooking the distress and suffering, bankruptcy and poverty, that have been visited upon an equal if not a greater number of American citizens.

Before we take action on this resolution I would like to have time enough to provide for similar relief for those people. I like the terms of this measure. I like the manner in which we are going to extend aid to these helpless individuals in Porto Rico, and I would like to amend the resolution so that the world at large may know that in extending aid to these people in other countries we have included along with that aid to our own people.

I would like to have an investigating committee, such as is provided here, visit the stricken sections of the four States of Florida, Georgia, South and North Carolina, and let them, under the provisions of this resolution, include our own people in the provision that we are so splendidly making for others.

I have not conferred with the Senator; I did not think this matter would come up. But he can appreciate the fact that perhaps there has not been as spectacular portrayal of our distress as there has been of the distress in Porto Rico. The fact is that the destruction of dwellings and peoples' homes is an aggravation in Porto Rico that does not exist in the section of the country to which I have referred, but, so far as the possibility of paying debts, so far as their having anything left, is concerned, the individual farmers are stripped of resources, with no possible way to meet their obligations. In fact, there is actual suffering there now, as far up as my own farm, in Lee County, which is in the central part of the State.

I am sure the Senate would not be willing to extend this liberal aid to the Porto Ricans without at least investigating to see whether or not the statements I have made are within the bounds of accuracy and that our people are entitled to the same consideration we are about to extend to the Porto Ricans.

I had in my office our fiscal officials and those dealing with our banking institutions, and they are fully aware of and keenly alive to the fact that the condition there parallels the condition in Porto Rico.

The destruction in both cases was caused by the same identical storm, and we might not be called upon to change the terminology in reference to the commission to be appointed and to relieve a condition brought about by the Porto Rican storm, if we wish to give it that name. But I think it is the duty of the Senate to include in the provisions of this relief American citizens, and I want to ask the Senator if he will not give us time to prepare and offer amendments, or at least to include in the measure a provision that the committee set up shall investigate the storm-stricken region of the South Atlantic, and let them make a recommendation as to the amount that is necessary, as has been provided in this measure as to Porto Rico. Make it as applicable to that stricken region as to Porto Rico.

Mr. BINGHAM. Mr. President, when I called this matter up this morning I had no idea that it would lead to debate. I know there is an appropriation bill about to come before us. I have felt that the relief for the States mentioned, which suffered very severely and for which the Red Cross is also working, would be provided for in a separate measure, which I should be very glad to favor, and which measure would probably go to the Committee on Agriculture, and not to the Committee on Territories and Insular Possessions.

In view of the statement just made by the Senator from South Carolina, I ask for the regular order, and under the regular order the bill will go back to the calendar.

Mr. TRAMMELL. Mr. President, I would like to offer an amendment to the pending resolution before we proceed to the regular order. I desire to offer the amendment which I send to the desk.

Mr. SMITH. Mr. President, before I take my seat I want to state to my colleagues that this is not a mere matter of injecting something that is not pertinent. I know the Senator understands, and the Senate understands, that I could not sit here, knowing the distressed condition of the people in my own immediate vicinity, and allow this relief and then wait for the exigencies of a separate measure. It may be that when we get the committee together and confer on this matter it may seem wiser to introduce a separate measure, but I for one can not vote for the relief for the Porto Ricans until I have the assurance that the suffering Americans will be relieved.

The VICE PRESIDENT. The clerk will read the amendment offered by the Senator from Florida.

The CHIEF CLERK. The Senator from Florida offers the following amendment to Senate Joint Resolution 172: On page 4, line 10, after the word "designate," insert:

That the said commission shall also assist in the rehabilitation of agriculture in that area of the State of Florida which suffered from said hurricane on September 15 and 16, 1928, and shall make and extend to farmers and fruit growers within said area in the State of Florida loans upon similar terms and conditions as herein provided for the purpose of the rehabilitation of agriculture in Porto Rico.

Mr. TRAMMELL. Mr. President, in view of the request of the Senator from Connecticut that we proceed with the regular order, I want to state that I shall discuss my amendment when we return to a consideration of the joint resolution.

The VICE PRESIDENT. The amendment will be printed, and lie on the table.

APPROPRIATIONS FOR THE TREASURY AND POST OFFICE DEPARTMENTS

Mr. WARREN. Mr. President, I ask unanimous consent that we proceed to the consideration of House bill 14801, providing appropriations for the Post Office and Treasury Departments.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 14801), making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. WARREN. I ask that the formal reading of the bill be dispensed with, and that the amendments of the committee be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered. The clerk will read.

The Chief Clerk proceeded to read the bill.

The first amendment of the Committee on Appropriations was, under the heading "Treasury Department, office of the Secretary," on page 2, line 3, after the word "Treasury," to strike out "$10,000" and insert "$12,000," and at the end of line 5, to strike out "$171,275" and insert "$173,275," so as to read:

Salaries: Secretary of the Treasury, $15,000; Undersecretary of the Treasury, $12,000; three Assistant Secretaries of the Treasury, and other personal services in the District of Columbia, $146,275; in all, $173,275.

Mr. KING. Mr. President, this seems a very small item, yet it is establishing a precedent which will involve demands for additional compensation. If the compensation of the Undersecretary of the Treasury is increased to $12,000 per annum, the demand will be made for every assistant secretary in every department of the Government, and there is no reason why a similar raise should not be made to others.

Mr. SMOOT. Mr. President, I want to call my colleague's attention to the fact that this is not for an Assistant Secretary.

Mr. KING. It is for the Undersecretary.

Mr. SMOOT. It is for the Undersecretary, and I want to say again that the Undersecretary has pass through his hands all that is done by the Assistant Secretaries. He is responsible for all the reports made from those Assistant Secretaries, and the labors of those men.

Mr. KING. I appreciate that fact. The same may be said, with some slight modification, perhaps, of the Assistant Secretaries in many of the departments. They have burdens and responsibilities almost as great as those of the Undersecretary. Because a man is labeled "Undersecretary," one whose duties heretofore were performed by others, perhaps not with so high-sounding titles, is no reason why we should increase the compensation. He took the position knowing what the salary was. I submit that if we increase the compensation of the Undersecretary, whoever he may be, a demand will come that we increase the compensation of all Assistant Secretaries, the Assistant Secretaries of War, of the Navy, and of the Department of Commerce, and other departments. There is a responsibility, of course, in all of the executive officers. I think this attempt little by little to increase the salaries of persons in high positions in the Government is very unwise.

Mr. SMOOT. The committee has felt that it was nothing more than right to take care of the two men in the Treasury Department, whose labors are so arduous and so responsible. One is the Undersecretary and the other is the Director of the Budget. The committee has made the amendment to the bill making the $12,000 salary apply to those positions, and that is all, as far as any increase in salaries is concerned. I can not see why we should ask a man to fill the most responsible position there is in the Treasury Department at a salary of less than $12,000.

Mr. DILL. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Utah yield to the Senator from Washington?

Mr. SMOOT. I yield.

Mr. DILL. When was this position created?

Mr. SMOOT. Years ago, I will say to the Senator.

Mr. DILL. How long has it been since the salary was made $10,000?

Mr. SMOOT. As I remember, it was that in the beginning.

Mr. DILL. What reason is there that the Undersecretary should be given a larger salary than Representatives and Senators are given?

Mr. SMOOT. That is for the Representatives and Senators to decide for themselves. I will say this, however: That Senators do not have the particular responsibilities in detail or work as many hours, perhaps, as the Undersecretary.

Mr. DILL. No; Senators must get their positions by going to the people; these men get their positions through political favoritism, by appointment from the President.

I want to call the Senator's attention to this: The message of the President talks about the necessity of holding down expenditures, and we have learned from the operation of the Welch law that a lot of poorly paid clerks are not receiving the increases that it was expected they should receive. We are told also that the attempt to increase those salaries to where it was intended they should be by those who fathered the act will be opposed because of the condition of the Treasury, and with these facts in our faces the committee comes in with an increase of $2,000 a year for a man who is already receiving $10,000 a year. The only excuse given is that he has a great many duties and that they are important duties.

The condition of the Treasury is continually cited as a reason why other matters can not be considered. It seems to me this is an increase in salary that might well await increases of salary of the poorly paid clerks in the different departments of the Government who, it was thought, were being taken care of when we passed the Welch bill at the last session of Congress.

Mr. SMOOT. I have no doubt but that the Welch bill will be amended at this session of Congress.

Mr. DILL. Yes; I understand the Senator wants to amend it to increase the pay of some of the highly paid employees.

Mr. SMOOT. The Senator has no right to have any such understanding, and I think it comes from his own brain and not from any other source.

Mr. DILL. I only read it in the newspapers. Perhaps the Senator was misquoted.

Mr. SMOOT. The Senator has misquoted me entirely. Of course, I never take any notice of what the newspapers say about me. I want to say to the Senator that no expression have I ever made, and no attempt on my part will ever be made, to carry out what the Senator now charges me with.

Mr. DILL. Then I am very sorry I made the suggestion. I simply took the statement of the newspaper.

Mr. President, it seems to me this is very important as a precedent. I make the point of no quorum. I want the Senate to know about it.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McKellar	Shortridge
Barkley	Frazier	McMaster	Simmons
Bingham	George	McNary	Smith
Black	Gillett	Metcalf	Smoot
Blaine	Glass	Moses	Steck
Blease	Glenn	Neely	Steiwer
Borah	Goff	Norris	Stephens
Bratton	Gould	Nye	Swanson
Brookhart	Greene	Oddie	Thomas, Idaho
Broussard	Hale	Overman	Thomas, Okla.
Bruce	Harris	Phipps	Trammell
Capper	Harrison	Pine	Tydings
Caraway	Hawes	Pittman	Tyson
Couzens	Hayden	Ransdell	Vandenberg
Curtis	Heflin	Reed, Pa.	Wagner
Dale	Johnson	Robinson, Ark.	Walsh, Mass.
Deneen	Jones	Robinson, Ind.	Walsh, Mont.
Dill	Kendrick	Sackett	Warren
Edge	Keyes	Schall	Waterman
Edwards	King	Sheppard	Watson
Fess	Locher	Shipstead	Wheeler

Mr. BRATTON. My colleague the junior Senator from New Mexico [Mr. LARRAZOLO] is absent from the Chamber due to illness. This announcement may stand for the day.

The PRESIDING OFFICER. Eighty-four Senators having answered to their names, a quorum is present.

Mr. NORRIS. Mr. President, as I understand it, the pending amendment is a proposal on the part of the Committee on Appropriations to increase the salary of the Undersecretary of the Treasury from $10,000 to $12,000 a year. It seems to me, in the face of the advice the Congress has just received from the Chief Executive, that this would be a very unwise thing for us to do, not alone because it is uneconomical, but because it would have a tendency to endanger the bill, if we should pass it, when the President comes to act upon it. I have no doubt from his official message that he would feel it his conscientious duty to veto the bill if we should increase this salary in this way.

Mr. WHEELER and Mr. WARREN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Nebraska yield; and if so, to whom?

Mr. NORRIS. I yield first to the Senator from Montana, who, I think, rose first.

Mr. WHEELER. In view of the fact that the bill likewise provides for an increase in pay for the Director of the Bureau of the Budget, I have no doubt he will probably hold that the increase in the salary of the Undersecretary of the Treasury is not in conflict with the economy program of the President.

Mr. NORRIS. I am sorry that I can not agree with my friend, the Senator from Montana, because I think the President will probably criticize both of these officials. The President is in favor of economy and I am going to read from his message to show the dangerous ground upon which we are treading if we violate his instructions. I have no doubt that he will take the Director of the Bureau of the Budget and the Undersecretary of the Treasury both in hand and administer the proper punishment to them for attempting to violate his own official directions.

However, before I read from the message of the President, the Senator from Wyoming [Mr. WARREN] wanted to interrupt me a moment ago and if he still desires to do so I shall be glad to yield to him now.

Mr. WARREN. Mr. President, I will not detain the Senator.

Mr. NORRIS. Very well.

In the message of the President I find, after talking about economy and referring to it very properly in a commendatory way, that the President said:

That is constructive economy in the highest degree. It is the corner stone of prosperity. It should not fail to be continued.

This is the very corner stone of the prosperity which the country enjoys.

This action began by the application of economy to public expenditure.

The item in question before us now is a public expenditure.

If it is to be permanent, it must be made so by the repeated application of economy.

It is necessary—

Continued the Chief Executive—

therefore during the present session to refrain from new appropriations for immediate outlay, or if such are absolutely required to provide for them by new revenue; otherwise, we shall reach the end of the year with the unthinkable result of an unbalanced Budget. For the first time during my term of office we face that contingency. I am certain that the Congress would not pass and I should not feel warranted in approving legislation which would involve us in that financial disgrace.

So, in addition to the reasons I have given, I want to call attention of the Senate to the reasons given by the President. It is approaching the point where it will involve us in "financial disgrace." It seems to me, Mr. President, that we ought to heed these words of wisdom that have come down to us from our President. We ought to be willing to obey his injunction; we ought to be willing to follow his advice. Particularly is that true when the proposition is to increase a large salary even though it may not be sufficient, as the world looks upon those things, to compensate for the difficult duties of the official position. If we must increase salaries, it ought to be the salaries of those officials whose salaries are so low that it is difficult under present living conditions for them to make both ends meet. That can not be said of a salary of $10,000 a year where there are no expenses or campaign involved in securing the office; where it comes without any expense of time or money.

Therefore, Mr. President, it seems to me that we ought to be willing and glad to apply the rules of economy and follow the advice of the President and his views and decline to pass legislation which, as he has stated, may involve us in "financial disgrace." Would not the great Undersecretary rather work for $10,000 a year than to get $12,000 a year if by doing so he brought his country into "financial disgrace"? Even if it is necessary to expend all that money, would he not be willing to sacrifice that much and perform his patriotic duty by saving this great country of ours from such a terrible dilemma as "financial disgrace"?

We ought to steer clear of such a danger, and the danger the President points out in his message is close at hand. In this message the President states: "The present indications are that there will be a surplus of only $37,000,000 at the close of this year." And I have noticed in the newspapers in the last few days—I can not vouch for the correctness of the statement—that there has been discovered a new item, amounting to $55,000,000, about which the President did not know when he prepared this message and which was not included in making his calculations—an expenditure of $55,000,000 to refund to taxpayers amounts which they have paid over those which they legally owed under the law. So that even as we now stand we are in terrible danger of being confronted with "financial disgrace."

If there is anything that we can do to avert such a calamity we ought to do it, it seems to me, even to the extent of cutting salaries down temporarily. If we cut this salary down below $10,000 per annum, with the understanding that when we pass the turn in the road where "financial disgrace" exists the salary will again be increased and that the amount now deducted will be repaid in the future, it seems to me we could well do that rather than now, in the face of the record, fly into this terrible predicament.

I am also wondering, Mr. President, if the amendment is not subject to a point of order? I submit the parliamentary inquiry to the Presiding Officer as to whether it is not subject to a point of order under the rules?

The PRESIDING OFFICER. The Chair would like to know upon what the Senator bases the suggested point of order.

Mr. NORRIS. It is an increase of salary in an appropriation bill and legislation on an appropriation bill. I may be wrong, but my understanding is that the salary of this official is fixed by law at $10,000 a year, and it is now proposed to pay him $12,000 per annum. If I am incorrect in my statement in regard to the law, I should like to be corrected.

Mr. WARREN. No point of order could lie against the amendment.

The PRESIDING OFFICER. The Chair will state that the amendment is in accordance with the recommendation of a standing committee of the Senate, which makes it in order.

Mr. NORRIS. Then, does the Chair mean to say that a standing committee does not have applied to it as to any amendments it may bring in the same rule that applies to individual Members of the Senate.

Mr. OVERMAN. Mr. President, my understanding is that if this salary were fixed by law, then the amendment would be subject to a point of order. As I recall, the salary was originally $7,500 and then it was increased to $10,000, and now, without rhyme or reason, it is proposed to increase it to $12,000. There was no statement before the committee as to why that should be done, or any justification being shown for it or any reason given for it. It is simply in the nature of a Christmas gift. Against my opposition the subcommittee and the full committee increased it to $12,000. Why should that be done, when such a condition of affairs exists as has been adverted to by the Senator from Nebraska? Why should the Senate undertake to increase a salary when the increase has not been asked for or any reason shown why it should be increased? The official is now receiving as much as Senators receive, namely, $10,000 a year, and now it is proposed to give him $12,000 a year, when he does not even ask for it.

Mr. WARREN. Mr. President, on the point of order——

The PRESIDING OFFICER. The point of order is overruled.

Mr. NORRIS. Mr. President, I did not make a point of order; I merely made a parliamentary inquiry.

Mr. WARREN. Mr. President, while I am on my feet, I merely wish to say to the Senator from Nebraska that he was a Member of the Senate when the idea was suggested that the Committee on Appropriations should be prevented from having the power that other committees have. The question was settled then and settle for all time by the Vice President who then presided over the Senate and who gave the question due consideration. The Committee on Appropriations has no more and no less power in this regard than other committees have. They have recommended the amendment in their report of the bill, but back of that recommendation, of course, is the Budget estimate, which of itself makes the amendment in order.

Mr. KING. Before the Chair finally rules on the point of order, although he may have done so, let me say that where there is an existing law which determines appropriations, as, for instance, there is an existing law with respect to the amount which shall be contributed or paid by the Federal Government annually to various bureaus and to various agencies of the Government, it seems to me that the action of a standing committee of the Senate in making a recommendation that such existing law shall be changed, even though that recommendation comes from the Appropriations Committee, would not remove the subject from the forum of controversy or, at least, from the forum in which it might be challenged on the ground that it changed existing law. If we have a fixed statute providing for an annual appropriation for a given purpose, I submit that the Appropriations Committee may not change that existing law or, rather, that their recommendation that it shall be changed will not remove the question from the forum of controversy and prevent us from challenging it upon the ground that it is legislation upon an appropriation bill.

The PRESIDING OFFICER. Does the Senator make the point of order?

Mr. KING. I merely support the point of order which has been made.

The PRESIDING OFFICER. There has been no point of order made. If the Senator makes the point of order, the Chair will rule.

Mr. KING. Well, I make the point of order, Mr. President.

The PRESIDING OFFICER. The Chair overrules the point of order and will read the rule. It is as follows:

1. All general appropriation bills shall be referred to the Committee on Appropriations, * * * and no amendments shall be received to any general appropriation bill the effect of which will be to increase an appropriation already contained in the bill or to add a new item of appropriation unless it be made to carry out the provisions of some existing law, or treaty stipulation, or act, or resolution previously passed by the Senate during that session, or unless the same be moved by direction of a standing or select committee of the Senate.

This amendment has been moved by direction of a standing committee.

Mr. KING. I do not think that it was ever intended by the Senate that the Appropriations Committee or any special com-

mittee might report a measure changing existing law on an appropriation bill without it being subject to a point of order.

The PRESIDING OFFICER. The Chair agrees with the Senator as to that.

Mr. KING. I submit to the ruling of the Chair, of course.

Mr. McKELLAR. Mr. President, I want to say just a word about this matter. The Senate will recall that three or four years ago, when an appropriation bill came before the body and we were appropriating for Assistant Secretaries of the Treasury, the word "undersecretary" appeared for the first time in an appropriation bill. I objected to it very strenuously on a number of grounds, stated at that time, which need not be here repeated. One of those grounds was that the very thing that is now happening would happen, namely, that as soon as this official received a different title, that of Undersecretary, there would be a movement set on foot to increase his salary. It was replied by Senators on that side then that that would not be the case; that the proposal was merely to change the title; that it was not intended to change the salary of the official; but at the next session there was a movement to change his salary, when it was increased from $5,000 to $7,500, and then later on—I think it was last year or year before—the salary was increased to $10,000, and now it is proposed to increase it to $12,000.

Mr. SMOOT. The Senator is not correct in his statement.

Mr. McKELLAR. When the committee acted yesterday I voted against the amendment, and I am against it now. I do not think this increase in salary ought to be made. So far as I know as a member of the committee, I never heard any witness testify in favor of the salary being increased; there was no application before the committee, so far as I know, that it should be increased; there was not a scintilla of reason given why it should be increased; and I see no reason why the Senate should agree to the increase.

It is true that it is a very small matter over which to take up the time of the Senate—a $2,000 increase in salary for an official of the Government—but it is a thing that ought not to be done. We have increased this salary in the last four or five years from $5,000 to $10,000. The official who performed the duties five years ago then received but $5,000 for his services; he is now receiving $10,000 for his services, and that is enough; his salary ought not to be increased, and I hope the amendment will be voted down.

Mr. SMOOT. Mr. President, this office was created eight years ago by the Congress. When it was created the salary was fixed at $10,000, and there has been no change in the salary of the Undersecretary from that day until this. It is now proposed, if this amendment shall prevail, to increase it to $12,000. At that time the Assistant Secretaries were receiving $7,500; their salaries have been increased to $9,000. The Secretary of the Interior was receiving $12,000 and his salary has been increased to $15,000. The only official in the whole department whose salary has not been increased is the Undersecretary, who does the work.

Again, Mr. President, I want to say, so that the Senate may know the facts, that on the Shipping Board there are seven commissioners who are paid $12,000 per annum.

Mr. McKELLAR. Yes; and the Senator will recall the fight that a lot of us made to prevent the fixing of those high salaries in the Shipping Board. They ought not to have been agreed to. That is just another illustration of what I have said, that whenever we increase one salary it is given as a precedent for increasing others, and we ought not to do it.

Mr. SMOOT. All I am doing is answering a statement that was made in relation to the salaries in other departments.

There is the Board of Mediation. There are five members of that board. They get $12,500 a year each. This body agreed to that salary; and I will ask the Senator from Virginia [Mr. GLASS] if the responsibilities of the Board of Mediation compare with those of the Undersecretary of the Treasury. The Senator from Virginia has been in that office, and he knows the responsibility that is placed upon the Undersecretary.

Mr. GLASS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Virginia?

Mr. SMOOT. I do.

Mr. GLASS. Inasmuch as I voted for this increase in the committee, I should not like to have the Senate think that the action was based upon a mere whim. The Senator from Tennessee [Mr. McKELLAR] says no reason was given.

Mr. McKELLAR. I will say to the Senator that none was given while I was present.

Mr. GLASS. Perhaps the Senator from Tennessee did not regard my reason as a valid one; but I took the ground, and I reassert it here, that the position of Undersecretary of the Treasury is the most responsible position in the Treasury Department. The Undersecretary has the responsibility and burden of the whole department when the Secretary of the Treasury happens to be absent for any reason; and perhaps I might with a large degree of accuracy say that he has the responsibility of the whole department when the Secretary of the Treasury happens to be present. He does infinitely more work than any two Assistant Secretaries of the Treasury combined. His office is the clearing house for the fiscal operations of the Treasury Department.

As I understand, the incumbent of that office does not need the increase. He does not need the salary that he gets. I voted the salary for the position and not for the man who occupies the position; and I did it because I think, as I have already indicated, that it is the position of the greatest responsibility and infinitely a greater amount of labor than any other position in the Treasury Department.

Mr. SMOOT. I quite agree with the Senator from Virginia.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield to me for a moment on that subject?

Mr. SMOOT. Yes.

Mr. REED of Pennsylvania. I desire to say that I agree with everything that has been said by the Senator from Virginia and the Senator from Utah; but I think we ought to bear in mind the fact that we have not treated these Undersecretaries uniformly. I do not believe we ought to pass on this question without remembering that we are going to have a State Department bill here; that the Undersecretary of State, who carries tremendous responsibilities, is at the present time receiving only $9,000, and his salary ought to be increased to $12,000, just as this ought to be increased to $12,000.

Mr. McKELLAR. Mr. President, that just carries out my statement, made a while ago, that when we increase one salary it immediately becomes a precedent for increasing others. The Senator from Pennsylvania is right. If the salary of this Undersecretary is increased to $12,000, naturally the other Undersecretaries holding similar positions ought to have their salaries increased likewise, and then the others will come along.

Mr. REED of Pennsylvania. Just a word further, if the Senator from Utah will indulge me.

It was because of what the Senator from Tennessee has said that I rose to speak at all on this matter. I had been intending all along to call attention to the contrast, to call attention to the very great responsibility of the Undersecretary of State, and to ask that whatever their salaries be, they be made uniform. There are only two Undersecretaries. All the other departments get along with Assistant Secretaries; but those two Undersecretaries carry a burden of responsibility which is not equaled by anyone excepting officers of Cabinet rank.

Mr. ODDIE. Mr. President, will the Senator yield?

Mr. SMOOT. I yield.

Mr. ODDIE. I should like to ask the Senator from Utah a question, because he is a man of large experience in these matters. Does not the Senator believe that the Government would have to pay several times this proposed salary to the Undersecretary of the Treasury in order to secure a man of equal ability to fill this position?

Mr. SMOOT. If we were looking only at the salary the man could receive outside; yes. Many men accept positions in the Government service at a lower salary than they would ever think of accepting outside. I will say to the Senator, however, that in the case that is referred to, that of the Undersecretary of State, he is getting less than many of the Assistant Secretaries themselves receive to-day under the ruling of the department. It is not right, and the Senator knows that it is not right. That, however, is a matter that is not up here now. It is not to be discussed at this time.

Mr. GLASS. Mr. President, if I may answer the Senator from Nevada, the man who occupied the position when I was there is now getting about ten times the salary that he got as Undersecretary of the Treasury; and his successor, Mr. Gilbert, I think, is now getting five times the salary that he got as Undersecretary of the Treasury.

Mr. ROBINSON of Arkansas. Mr. President, what conclusion is argued from that state of facts? I can not understand the relevancy of such statements. The Secretary of the Treasury probably could make a hundred million dollars a year in private life. I have heard that he has done it.

Mr. ODDIE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah further yield to the Senator from Nevada?

Mr. SMOOT. I do.

Mr. ODDIE. I wish to comment on the statements which have been made by saying that the incumbent of this office has demonstrated his ability to such an extent that he could secure many times the amount that is proposed in this amendment if he were seeking a position in private life.

Mr. ROBINSON of Arkansas. Is not that true of hundreds, perhaps thousands, of persons employed by the Government who choose to perform public service because of the distinction that attaches to that service, rather than to engage in private business? Is it the Senator's theory that we should pay every employee of the United States service, including Senators, what they could earn if they chose to enter into spheres of private business; or is it the Senator's theory that salaries should be reduced in cases where employees of the Government could not on the outside earn as much as they do on the inside?

No such principle as that has ever been incorporated in the Government of the United States. Men like the Undersecretary of the Treasury who have large fortunes, who have business connections of great importance, could unquestionably, if they chose to enter spheres of private business, earn much more money than the Government pays them, or than any Senator here would think of paying them. It is a question of proportion. We raise one salary, and then we are asked to raise other salaries on the theory that the increase which we granted in the first instance has created a situation of disproportion as to other offices. What ought to be done, of course, is to consider all these places at one time, and bring into the Senate a legislative bill increasing the salaries of the Undersecretary of the Treasury and the Undersecretary of State.

The statement made by the Senator from Virginia convinces me that the position of Undersecretary of the Treasury is a very important position. Statements have been made by others that the Undersecretary of State occupies a very important position, and he is receiving less than the Undersecretary of the Treasury is now receiving; so why does not some one who is interested in this subject bring these matters in here at a time when they can be considered with reference to their relative importance?

Mr. SMOOT. We are trying now to correct the present condition.

Mr. OVERMAN. Mr. President, for a hundred years we did not have any Undersecretaries. We had a First Assistant, a Second Assistant, and a Third Assistant. The Senator from Tennessee [Mr. MCKELLAR] predicted that putting the word "under" there would necessarily mean hereafter that we would have to consider the question of how much increase of salary we would give him over the Assistant Secretaries.

When the next Congress assembles, an Assistant Secretary in some other department may come in and want to be called an Undersecretary. This practice started in the Department of State, when Secretary Root came here and asked for an Undersecretary because he said foreign governments had Undersecretaries, and we ought to have one, too. That was the reason given then. We gave the Department of State an Undersecretary, and since that time we have put the word "under" in the law in order to give a man an increased salary over the First, Second, and Third Assistants.

Mr. McKELLAR. Mr. President——

Mr. SMOOT. One moment; then I will yield to the Senator.

That is hardly a fair statement for the Senator from North Carolina to make. Before the office of Undersecretary was created, all of the Assistant Secretaries, five or six of them, were on an equal footing. It was deemed best, Mr. President, that an Undersecretary should be appointed to do work that it was a physical impossibility for the Secretary himself to do. The work of all the other Assistant Secretaries passes to the Undersecretary, and it passes finally to the Secretary of the Treasury himself; and I think 90 per cent of it is work that it would be impossible for the Secretary to consider.

Mr. OVERMAN. How was that work done for 75 or 100 years of the existence of this Government? How was it done then?

Mr. SMOOT. Oh, Mr. President, the duties and responsibilities of the Secretary of the Treasury and the employees of the Treasury Department 75 years ago were nothing compared with what they are now.

Mr. OVERMAN. I am talking about 10 years ago.

Mr. SMOOT. Or 10 years ago, for that matter.

Mr. McKELLAR. Mr. President, will the Senator yield to me?

Mr. SMOOT. I yield.

Mr. McKELLAR. The Senator will recall that at the first meeting of the subcommittee I was not present. There was another committee meeting that it was necessary for me to attend; so I am asking for information. At whose request was this salary raised, and at whose request was the salary of the Director of the Bureau of the Budget increased? I never heard anybody request it until I found it in the bill, and I just want to know at whose request it was done.

Mr. SMOOT. The request came originally from the Bureau of the Budget, which estimated the amount of the increase.

Mr. McKELLAR. The Bureau of the Budget estimated it. The House turned it down?

Mr. SMOOT. The House turned it down.

Mr. McKELLAR. And the Senate committee reported it favorably, after a vote?

Mr. SMOOT. They did.

Mr. McKELLAR. I did not know how it came about.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SMOOT. I do.

Mr. NORRIS. I want to call the attention of the Senator from Nevada [Mr. ODDIE] to his argument in favor of an increased salary here and have it apply to himself. If we should apply this principle to a hard-working Senator like he is, and carry it out, we would have to fix the Senator's salary at at least $25,000 a year. We would have to give the Senator from Utah [Mr. SMOOT] $50,000 a year. They work just as hard as this Undersecretary ever worked.

There was a time, Mr. President, when the Assistant Secretary did not have half or one-third of the employees under him that he has now. Senators talk about his duties now being greater than they were years ago. I suppose there was a time when he did not even have a stenographer.

We can not afford to put these offices up and sell them to men who will say, "I can get this much or that much in private business, and therefore you must pay me that much more." Nobody ever made that application to a salary.

Some of our forefathers advocated that Members of the House and of the Senate ought to serve without pay. There are many good men who would be willing to serve in Congress without pay. There are same who pay more for the office, if you consider it on a financial basis, than they ever get in salary. That does not apply to the Undersecretary. He is not required to make any campaign. But he draws $10,000 a year. He devotes all his time, I presume, to the duties of the office.

It is true, perhaps, of the particular individual who is now Undersecretary that on account of his standing in the financial world he might get $100,000 a year in private business. He would not know what to do with it if he did. He has all those things which he can possibly enjoy, as far as money is concerned. This salary does not mean anything to him. It does mean something to the taxpayers of the country. It does mean something when we are trying to apply the rule of economy which the President asks us to apply, and if we apply it we can not start out to increase these salaries, especially of officials who are drawing as high as $10,000 a year.

The salaries to which the Senator from Utah refers as being $12,000 are perhaps too great, but they were fixed at a different time. We did not have before us then the official message of the President, in which he even threatened a veto if any such thing as that occurred. We were not told officially from the Chief Executive that we were nearing the point where we would bring our country into financial disgrace and have a deficit instead of a surplus at the end of the year.

We are confronted now with that condition. So that as far as conditions are concerned they are entirely different now from what they were when these $12,000 salaries were fixed. There may come a time—and I hope it will come—when it will be perfectly appropriate to increase this salary, but it seems to me under the conditions that have been so well pointed out to us by the official word of the President we should not now, under these conditions, start out to increase salaries of men who are already drawing $10,000 a year. We are already notified in this debate that if this salary is increased there are other undersecretaries whose salaries must be increased, and the same reason can be given that is given now in this case.

Mr. ODDIE. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. ODDIE. We should consider this question more from the broad standpoint of service than from the standpoint of bookkeeping. I will make a comment on our governmental system which I believe should be taken into consideration and given serious consideration.

The question of service is not always paramount in our discussions on these matters. I believe the question of service is far more important to our Government and the people than the question of dollars and cents—the question of bookkeeping. I for one am not fearful of a possible small deficit. I would prefer reorganizing many of the branches of our Government so that we could have a little more money to spend for essentials, and in employing more technical and economic experts. I believe that with the expenditure of a few extra thousand dollars in this way we could save the taxpayers of this country many millions, and I venture to say several hundred millions. Before this session is over I intend to bring certain questions before the

Senate which I hope will receive its favorable consideration, which will mean the expenditure of a few extra thousand dollars, thereby saving our people many, many millions of dollars.

Mr. NORRIS. I commend the Senator very highly for his determination to do just what he has said he will do before this session is closed. That only brings back to me the fact that I was right when I said that he ought to be paid $25,000 a year. If he does the thing he has just announced he is going to do, we will increase his salary to $100,000 a year without any question. He only demonstrates in his very able discourse upon this subject that we have now the cart before the horse. He wants to take these matters up and consider them, so that we can put the right kind of salaries behind the various kinds of offices. We are not doing that here. We are doing it on an appropriation bill. If he wants to revolutionize the Government in the economic way he speaks of before this session is closed, then we should not commence it piecemeal now and raise this salary. Let us wait until a little later in the session, when the Senator brings in his proposition and puts it through the Senate at this session. Let us give him an opportunity to do what he said he can do, and not undertake now to increase this one salary.

Will we get any better service out of the incumbent in the office if we pay him $12,000 than if we pay him $10,000? Would we get any better service if we paid him a million dollars a year? A man is only a human being. He can work only 24 hours a day, and there are many men who are getting less than $3,000 who are doing that for their country and for their Government, and the same applies to private business. That is true the world over. We are not going to increase the efficiency of this department by increasing this salary and then using that as a precedent to increase all the other $10,000 salaries that exist throughout the mechanism of this Government.

Mr. ODDIE. Mr. President, I do not want the Senator from Nebraska to think that I intend to take on too much territory. I refer to certain specific things in certain departments of our Government which I hope to bring before the Senate.

Mr. NORRIS. All right; I commend the Senator for it. I am in earnest about that. I hope he will do it. But we are not going to accomplish it by this kind of a checkerboard proposition to increase salaries on appropriation bills, especially salaries of this size.

Mr. KING. Mr. President, my opposition to the amendment offered by the committee rests upon no personal grounds. I have consistently opposed increasing salaries, and particularly those measures increasing the compensations of persons filling higher positions in the Government. During the past eight years there has been a perfect mania upon the part of Congress to multiply bureaus, create new offices and Government agencies, and increase the salaries of Government officials. My recollection is that there are more than 800,000 persons upon the Government pay rolls and whose compensation for this fiscal year will total nearly $800,000,000. This stupendous sum is more than the entire cost of running the Federal Government in 1913 or 1914. It is nearly as much as the total expenses for the year ending June 30, 1917.

President Coolidge has repeatedly spoken about economy, but his party has supported measures increasing Federal expenses. Indeed, in the interest of accuracy, it should be stated that the executive Budget which, as Senators know, constitutes the President's recommendation for appropriations, has, during the past five or six years, called for larger appropriations than Congress, extravagant as it has been, has been willing to make.

It is sometime since I have examined the records, and, speaking from recollection, the aggregate appropriations made by Congress during the past five years have been more than $300,000,000 below the Budget recommendations of the President. The leaders of the party in power have boasted of their economies, and the country has been led to believe that the Chief Executive has affected great reforms in the executive departments and brought about important economies.

The fact is that there have been no administrative reforms, but upon the contrary the machinery of the Government has been increased and its activities have been more cumbersome, confused, and complicated. The duplications in the departments and Federal bureaus and agencies have multiplied and the operations of the executive branches of the Government have become more difficult to understand. After the Republicans obtained control of Congress in 1919 they promised to consolidate Federal agencies and to bring about drastic reforms in administrative matters. It was promised by President Harding in his campaign and by Republican leaders that following the election there would be departmental and executive reforms that would reduce the operating expenses of the Government and effect greater efficiency in all administrative activities. These promises were soon forgotten, and instead of consolidating Federal agencies and improving the Government service and bringing about reforms and economies the opposite course was pursued.

And to-day, after nearly eight years of control of the executive and legislative branches of the Government, the number of bureaus is greater and the personnel larger. There is more duplication and overlapping of governmental agencies and departmental functions than in any time of the history of this Republic.

Because appropriations have receded from the high peak of the war and the period immediately following the war, when war obligations were to be met, the claim is made that the party in power has practiced economy and reduced governmental expenses. The fact is that during the war enormous revenues were needed to meet the expenses of the war, including the loans made to those nations associated with the United States in the prosecution of the war. High taxes were levied, and they were heavy burdens upon the people. But war always increases the burdens of the people.

In May, 1919, President Wilson came before Congress and called attention to the fact that legislation was required to remove war burdens, to reduce taxes, and to bring the country back to a peace status. His recommendations in the main were unheeded by an adverse House and Senate. There should have been, during the years 1919 and 1920, legislation to meet the recommendations of President Wilson. After the party now in power obtained the Presidency, it slowly and haltingly addressed itself to revenue legislation and to measures for the reduction of the tax burdens. Instead of enacting a sound and wise revenue measure, an imperfect, unsatisfactory, and inadequate tax law was passed. Later another measure was passed and still later another measure of a similar character was passed. Indeed, four tax reduction measures were passed, following upon the heels of each other and synchronizing with approaching elections.

This unsound policy resulted in imposing larger taxes than the situation required and, of course, in increasing the burdens resting upon the country. And now, after these eight years of Republican legislation and executive control, we are confronted with demands which will, in my opinion, result in appropriations for the next fiscal year of approximately $5,000,000,000. In 1916 the total expenses of the Federal Government were approximately $1,000,000,000. They have been so increased that, as suggested, for the coming year they will be about five times as great.

A considerable portion of this stupendous sum is required to meet the salaries of Federal employees. It will only be a year or two under the present policies of the party in power, when the pay roll of the Federal Government will be $1,000,000,000. Appeals are made at every session of Congress for larger appropriations to meet the increased salaries of an increased number of Federal employees. And these appeals are accompanied by vehement declarations that employees of the Government, particularly in the higher grades, are so important to the service and their abilities are of such a high order that their compensation must be greatly increased. And frequently an increase is made in one branch of the service and that becomes the basis for similar increases in all other branches of the Government, particularly if there is any appreciable relation or similarity in the character of the work performed or the responsibilities imposed throughout the various branches of the Government.

Generally speaking, the increases in salaries during the past five or six years and in the higher grades of service have been from 25 to 100 per cent. Much of the time of Congress is taken up in investigating the character of the work performed and the salaries paid to employees of the Government, and in enacting legislation dealing with these matters. And as soon as one increase is made another is demanded. It was contended that a reclassification of salaries would end, at least for a considerable length of time, these persistent appeals for increases, and prevent the step-ladder method of making increases in salaries and classifications. A reclassification act was passed but it did not halt the demands for readjustments of compensation, increases in salaries and legislation to meet the demands made. Undoubtedly in some of the groups, particularly in the lower and intermediate grades, there are inequalities and injustices, but in my opinion there has been too great eagerness upon the part of Congress to respond to demands for increases in the higher grades and in the very many important executive positions. It is a fact that the compensation paid by the Government, take it by and large, and considering the benefits and advantages connected with such service, is greater than that received by the overwhelming majority of the wage earners of the United States.

The earnings of the farmers of the United States do not average a thousand dollars a year. The average earnings of the lawyers of the United States are less than $1,200 a year. Thousands and tens of thousands of professional men earn less than $3,000.

There are to-day millions of wage earners in the United States without employment, and millions whose earnings are considerably less than $1,000 per annum. I am not opposing adequate wages or fair and just compensation. I do not think it a sound public policy, however, to make Government positions so inviting that there are hundreds of applicants for every position.

Too many people are accepting the fallacy that the earnings of the employee and wage earner are measured by the number of dollars received, rather than by what the dollar will procure, and so we are inclined to follow a circle which calls for more dollars and higher prices of commodities. And too often commodity prices rise more rapidly than wages increase.

Mr. President, unless Congress acts with wisdom and applies the knife to appropriation bills, there will be a deficit in the next fiscal year. Indeed, the indications are that a deficit is just "around the corner."

With the enormous revenues of the Government it seems incredible that there should not be a balancing of our national budget. Indeed, the billions collected should yield a considerable surplus to be applied to the reduction of our national debt. Appropriation bills should receive careful scrutiny at the hands of Congress. There should be no demand that they be rushed through under whip and spur. We have before us an appropriation bill carrying considerable more than $1,000,000,000, and yet impatience is exhibited because it is not rushed through the Senate without reading and without consideration.

Mr. President, recurring to the amendment calling for an increase in the salary of the Undersecretary of the Treasury. No one doubts the ability of the present Undersecretary. I pay tribute to his genius, his fine character, and his high executive ability. Of course, his services are valuable, and measured by the standards which obtain in the financial world $12,000 per annum might be an inadequate compensation. There are many men in public life who could earn very much more if they devoted themselves to business pursuits. I see facing me on the other side of the aisle a distinguished Senator who is patriotically serving his State and country for $10,000 per year. He made millions in his business career, and undoubtedly if he were to devote himself to business pursuits he could make a very large sum annually.

Mr. ROBINSON of Arkansas. Every Senator on the other side thinks the Senator from Utah is looking at him.

Mr. KING. Of course, I do not desire to identify the Senator, although I am willing that each Senator shall think that I am looking at him. There are eminent lawyers in the United States whose earnings were very large and who accepted positions upon the bench when the salaries were but $5,000 per annum. Many of the governors in the United States, some of whom are men of large business capacity and whose salaries were, perhaps, many thousands of dollars, are serving as chief executives of their States for three, four and five thousand dollars a year. The Secretary of the Treasury is one of the great business men of the world. It would, perhaps, not be inaccurate to say that in active business he could make one or more millions of dollars annually.

I have been wondering as the debate has been proceeding what is the standard by which the worth of an individual is determined. Shall it be measured solely by the number of dollars which he may have received or might receive in business activities and pursuits? I am told that some brokers and some individuals connected with large institutions have made, during the past year, enormous sums.

The heads of some great financial institutions receive very large salaries. The compensation of some has resulted from fortuitous circumstances, and many persons who are receiving very large salaries may possess no greater ability than hundreds, if not thousands, of others. But I submit that we are not to determine the worth of individuals by the amount of dollars and cents which they may receive at a given time or under particular circumstances. Moreover, I think that in determining the worth and value of an individual to the Government or to society the dollar mark should not be the standard of measurement. There are educators and professors and philosophers and persons engaged in scientific research who are rendering invaluable service not only to their country but to humanity. If the value of their services were measured by money, they would receive many thousands of dollars annually. The compensation of hundreds of these noble men and women is far below the compensation of many of the employees of the Government. Who can measure the worth of a man like Doctor Milliken, the discoverer of the yellow-fever germ, or Doctor Dewey, the great educator and philosopher?

There are those who seem to think that as soon as a person gets a Federal commission, as if by magic, he is endowed with some supernatural power and must immediately receive increased compensation. I repeat, Mr. President, that I have a very high regard for the Undersecretary and for his faithful, efficient, and valuable services in the position which he occupies. I have opposed salary increases upon other occasions. I have voiced my opposition to increases in the salaries of other officials of the Government, so it can not be said that my opposition to the committee amendment is directed against any person or this particular position. I would offer similar objection to an increase in other branches and departments of the Government.

Mr. McKELLAR obtained the floor.

The PRESIDING OFFICER. The hour of 1 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The CHIEF CLERK. A bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. WARREN. Mr. President, I shall not ask at this time, as we sometimes do, for the laying aside of the unfinished business. I thank the Senator from California [Mr. JOHNSON] for his kindness heretofore. We do not undertake, so far as members of the committee in charge of the bill are concerned, to proceed further with it at this time to delay the Boulder Dam bill; but I wish to say, considering the progress we have made this morning from 11 o'clock to 1 o'clock, and if we do not make better progress, that unless the Senator from California begins night sessions for the consideration of the Boulder Dam bill I shall be compelled to ask for night sessions for the consideration of appropriation bills, because the supply bills must be passed.

Mr. MOSES. Mr. President, may I ask the Senator from Wyoming what is his purpose with reference to the appropriation bill?

Mr. WARREN. The Senator has a right to ask and I should have said before that I shall expect to call up the appropriation bill at any moment to-day, should there be a final vote on the Boulder Dam bill. Otherwise I shall expect to call it up to-morrow during the morning hour.

Mr. SACKETT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Kentucky?

Mr. McKELLAR. For what purpose, may I ask the Senator?

Mr. SACKETT. I wish to make a short statement.

Mr. McKELLAR. I yield to the Senator for that purpose.

Mr. SACKETT. I just want to state for the RECORD that when the committee on order of business suggested that certain bills be given a preferred status, it was with the understanding, and so appeared in the RECORD at the time, that appropriation bills should have the right of way whenever they came into the Senate. I have no objection to this procedure being taken, but I simply want to make that fact a matter of record.

Mr. JOHNSON. Mr. President, if the Senator from Tennessee will permit me——

Mr. McKELLAR. Certainly.

Mr. JOHNSON. The Senator from Kentucky is entirely correct about the original situation and the conditions that originally existed, but what exists to-day in reference to the Boulder Dam bill is that in the last day of the preceding session the Boulder Dam bill, by the order of the Senate, not by virtue of the fact that the steering committee had made any rule of one sort or another, but by the order of the Senate was made the unfinished business.

I make that statement because if there were any obligation resting upon me to set aside the Boulder Dam bill for a brief period to consider the particular appropriation bill I would, of course, meet my obligation at once. I do not so regard it in this particular instance, and I think that if the Senate will recall what transpired on the last day of the preceding session the Senate will remember that it was by virtue of the insistence of the Senate itself that the Boulder Dam bill was made the unfinished business.

Mr. SACKETT. I do not dispute the statement of the Senator from California except in so far that at the time of the final adjournment of the last session the matter was taken up with the committee on order of business and it was suggested that if the present status quo at that time be allowed to remain, the Senate would then adjourn. I do not feel that that changes the obligation necessarily. It was agreeable all, and I think

the Senator ought to feel that, when appropriation bills come into the Senate, they should have the right of way because that is the necessary business of the Government.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Utah?

Mr. McKELLAR. I yield.

Mr. KING. I agree with the statement made by my friend from California [Mr. JOHNSON] that the understanding was that the Boulder Dam bill should be taken up on the Tuesday following the convening of the Senate and should be kept before the Senate until it was disposed of. I shall support the Senator from California in all reasonable efforts to keep his bill before the Senate until a vote is had.

Concerning the appropriation bill, I do not think our friends should be so much concerned about appropriation bills. They will be presented and will be duly considered. We had laid before us last night—and none of us have had an opportunity even to read it until this morning—a bill carrying appropriations of more than $1,000,000,000.

Mr. ROBINSON of Arkansas. Mr. President——

Mr. McKELLAR. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. The entire time this morning has been consumed in a discussion of an amendment which constitutes legislation on an appropriation bill. It is only possible to consider that amendment by reason of the fact that the committee itself reported it. If any Senator had offered the amendment, the point of order made by the Senator from Utah [Mr. KING] would have been sustained.

I want to suggest to the committee that the present salary of $10,000 is a living salary. No one believes that there is any emergency involved in the increase of this particular salary. There are thousands of employees of the Government who are working for very meager salaries—for less than living salaries. No proposal is made here to readjust their salaries. A single official or two officials are selected by the Committee on Appropriations, and that committee reports amendments proposing legislation on a general appropriation bill.

Mr. OVERMAN. When the House had rejected it?

Mr. ROBINSON of Arkansas. Yes; when the House of Representatives had rejected the proposal and when no suggestion for the incorporation of the amendment was made either by any Senator or anyone outside of the Senate save as the suggestion was embraced within the original estimate for the increase in the appropriation. If that course, a very unusual course, had not been taken by the Appropriations Committee, the bill in all probability would have passed the Senate by this time.

It is questionable, in my mind, whether the committee ought not to recede from its attitude, and let some one prepare a bill readjusting salaries, including the salary of the Undersecretary of the Treasury if the matter is of such emergent importance that it ought to be permitted to hold up a general appropriation bill. None of us are deceived as to what is taking place. An act of favoritism is occurring, and it is occurring through the cordiality of the Committee on Appropriations for this particular officer. It is admitted that the Undersecretary of State, who is drawing a less salary than this particular officer, is in the same class and should have his salary increased. Why not do the fair thing and let the appropriation bill pass without these amendments, and then let these salaries be readjusted, and such other salaries as ought to be increased, by being incorporated in one bill so that every increase we make here will not be used as a precedent for the increasing of these higher salaries.

It is embarrassing to me to interpose any expression of opinion on this subject. I realize that the Committee on Appropriations has the power.

Mr. WARREN. It rather embarrasses the chairman of the Committee on Appropriations that he has not been allowed to say a word this morning.

Mr. McKELLAR. Of course I am glad to yield to the Senator from Wyoming at any time.

Mr. WARREN. I want to assure the Senator from Arkansas that the committee had before it as to other parts of the bill, the estimates that came from the Budget and which had had the action of the House upon them. Those matters had to come under the consideration of the Senate committee. They were taken up and voted on by the committee and it was determined to put the item in the bill.

Furthermore, the bill which will follow shortly, making provision for the Department of State, will contain an item providing that the Undersecretary of State shall likewise receive $12,000. There is only one other place in this entire bill now before us, carrying $1,119,000,000, where an amendment of the same nature appears. It appears in the same way with the action of the committee as a committee after the approval of the Budget. We think it should go to conference, if it is adopted here, of course.

Mr. ROBINSON of Arkansas. Frankly, considering the history of this position and considering the admitted fact that no emergency is involved in this increase of salary, that the distinguished gentleman who performs the duties of the office is entirely independent of the salary or of any salary, and considering the further fact that there are numerous officers and employees of the Government who are not receiving a living salary, I think it is a questionable policy for this great committee to make such a display of favoritism, even though the facts and circumstances, considered apart from the other cases, justify the increase, as I believe they do. We would pass the appropriation bill without delay if we were dealing with appropriations, but we are dealing now with legislation.

The PRESIDING OFFICER. The Senator from Tennessee will proceed.

Mr. McKELLAR. Mr. President, a few moments ago the senior Senator from Utah [Mr. SMOOT] challenged a statement I made that this legislation first came on an appropriation bill. I shall first read from the CONGRESSIONAL RECORD of June 8, 1921, when a Treasury appropriation bill was before the House of Representatives. It was then that this matter was first offered, and it was offered on an appropriation bill. There was no legislation ever offered about it before that, and there has been no general legislation about it, though I think it had been several times offered before. Whatever has been done in reference to the Undersecretary and his salary has always been done in an appropriation bill.

The raising of the salary has been just as I stated. In 1921 the Secretary of the Treasury had four assistants—first, second, third, and fourth assistants—and he paid each one of them $5,000 a year. That is undisputed. In 1921 the first effort was made both to create in the appropriations bill the office of Undersecretary and to increase the salary from $5,000 to $7,500. A tremendous fight was made on that proposal both in the House and in the Senate. I want to call attention to what was then said by one of my colleagues from Tennessee in the House.

Mr. SMOOT. The Senator said "increase the salary." There was no salary for an Undersecretary at that time, so there could not be an increase in the Undersecretary's salary.

Mr. McKELLAR. What was done was simply to substitute the word "Undersecretary" for the words "First Assistant" in the appropriation bill and to pay that official $7,500, increasing the salary of the man who was the "First Assistant" and was continued as "Undersecretary."

Mr. SMOOT. Of course, the responsibilities were entirely different after the reorganization of the department.

Mr. McKELLAR. The Senator said we had legislation creating the office and fixing the salary at $10,000. The Senator was wholly mistaken about it. It was legislation on an appropriation bill and it increased the salary from $5,000 to $7,500 just as I stated.

Mr. SMOOT. Mr. Mills, in his testimony before the subcommittee of the House Committee on Appropriations, made this statement in regard to the matter. The question was asked by the chairman:

> As I understand it, all the other salaries were raised automatically?
>
> Mr. MILLS. They were; but of course the salary of the Undersecretary is statutory. It was placed at $10,000 when the office was created in 1921. At that time the salary of the Secretary of the Treasury was $12,000, while the Assistant Secretary received $7,500 per annum. The salary of the Secretary is now $15,000 per annum, and the assistant secretaries receive $9,000. There has been no change, however, in the salary of the Undersecretary, which still remains at $10,000, the same as when the office was first created eight years ago.

Mr. McKELLAR. Mr. Mills was entirely mistaken about it. He was not correct. It had not been fixed by statute except or unless fixing it in an appropriation bill might be called a statutory enactment and a fixing of the salary.

Mr. President, a little while ago I made the statement that this office was created under an amendment to an appropriation bill, that before it was created the place filled by this official paid $5,000 a year and it was first increased to $7,500. I quote from the RECORD of June 8, 1921, House proceedings. Mr. BYRNS, the distinguished Congressman from my own State, long a member of the Appropriations Committee of the House, and one of the best posted Members of Congress on all matters of appropriations, spoke then as follows:

> Mr. BYRNS of Tennessee. There is no reason on earth for it if this amendment is adopted. And I wish to say to the gentleman from South Carolina that if this Congress is consistent, when it comes to preparing the next appropriation bill it will increase the salaries of other secretaries in the various departments. You can be very certain that this will be taken for a precedent, and you will be met by the

demand that other secretaries be increased from $5,000 to $10,000 a year.

Now, gentlemen, there was a hearing on this proposition before the committee. The Secretary of the Treasury, for whom I have great admiration and respect, appeared and strenuously presented his claims for the need of an undersecretary of the Treasury. I must confess I never understood just why they wanted to call him "undersecretary." Some question was raised. The only suggestion I heard in reply was that Great Britain has an undersecretary of finance, or some position of that sort. But what I oppose is not so much the name but the salary you are undertaking to fix for this new position, a salary of $10,000—over and beyond any sum Congress has ever appropriated for any position of this particular kind. You only pay your Undersecretary of State, if I remember correctly, $7,500 a year. Why pay the Undersecretary of the Treasury $10,000 a year? The Secretary of the Treasury now has an Assistant Secretary at $5,000 and three Assistant Secretaries at $5,000 each. You here propose an undersecretary at $10,000, and you will soon give him another assistant at $10,000.

By the way, that year the Undersecretary was paid $7,500. The next year the recommendation was made that the Undersecretary be continued and be paid $7,500. That was the report of the committee to which Mr. Frelinghuysen on January 19, 1922, offered an amendment, which I shall read in order to correct the RECORD as stated by the Senator from Utah [Mr. SMOOT]:

The first amendment of the Committee on Appropriations was, under the head of "Office of the Secretary," on page 2, line 2, after the numerals "$12,000," to insert:

"Undersecretary of the Treasury, to be nominated by the President and appointed by him, by and with the advice and consent of the Senate, who shall receive compensation at the rate of $7,500 per annum and shall perform such duties in the office of the Secretary of the Treasury as may be prescribed by the Secretary or by law, and under the provisions of section 177, Revised Statutes, in case of the death, resignation, absence, or sickness of the Secretary of the Treasury, shall perform the duties of the Secretary until a successor is appointed or such absence or sickness shall cease, $7,500."

That was the report of the committee. Thereupon Mr. Frelinghuysen offered an amendment which proposed to increase the salary from $7,500 to $10,000 per year, which was then voted down; but a year or two afterwards, as I stated a while ago, again in an appropriation bill, as this provision is in an appropriation bill, the salary that had been fixed in 1922 at $7,500 per year was increased to $10,000. Now it is proposed to increase the salary to $12,000; and the reason given for another increase is that we will later increase the salary of the Undersecretary of State to $12,000 and the salary of the Undersecretary of the Treasury should be made to accord with it; in other words, these positions are merely being used to prize each other up.

In the first place, these positions ought never to have been created. They have not been legally created. There has never been an act under which they have been legally created. They have been put in on appropriation bills each time. I say this salary ought not to be increased; and I hope that the chairman of the committee will be willing to agree that the two items—one increasing the salary of the Undersecretary of the Treasury and the other increasing the salary of the Budget Director—shall be withdrawn and that the Senate adopt the provision as it passed the House.

Mr. SMOOT. Mr. President, just a word for the RECORD. I wish to call attention to the Revised Statutes of the United States to which the Senator from Tennessee has not called attention. I shall now read what is there stated. This position, I will say to the Senator from Tennessee, is a statutory position.

Mr. McKELLAR. But the statute was passed as a part of an appropriation bill.

Mr. SMOOT. It makes no difference as to whether or not it be a mere yearly appropriation; it is a statutory position, and it is made so by the law, just as much so as any other statutory position which has ever been created. The quotation is as follows:

Salaries: Secretary of the Treasury, $12,000; Undersecretary of the Treasury, to be nominated by the President and appointed by him, by and with the advice and consent of the Senate, who shall hereafter receive compensation at the rate of $10,000 per annum and hereafter perform such duties in the office of the Secretary of the Treasury as may be prescribed by the Secretary or by law.

Mr. OVERMAN. From what is the Senator reading?

Mr. SMOOT. From the statutes.

Mr. OVERMAN. That provision was in the appropriation bill, was it not?

Mr. SMOOT. Yes, it was; of course.

Mr. OVERMAN. That is what the Senator from Tennessee said.

Mr. McKELLAR. That is exactly what I said. It was contained in an appropriation bill that comes before the Senate every year. I really think the amendment is subject to a point of order, with all due respect to the Chair.

Mr. SMOOT. This is not a yearly appropriation. The statute says "hereafter."

Mr. McKELLAR. No.

Mr. SMOOT. Well, I know that it does so provide.

Mr. McKELLAR. Has the Senator the statute there?

Mr. SMOOT. I have it here and will let the Senator read it himself.

Mr. McKELLAR (after reading). The Senator is right. The word "hereafter" is incorporated in the provision. It is in an appropriation bill, however, just as I stated.

Mr. SMOOT. It is not a question as to what bill it is in.

The PRESIDING OFFICER. The question is on the amendment——.

Mr. McKELLAR. I desire the yeas and nays on the amendment.

Mr. ROBINSON of Arkansas. Mr. President, this matter is not now before the Senate.

Mr. McKELLAR. I thought the Senator from California had agreed that it might be considered.

Mr. JOHNSON. Mr. President, the unfinished business is before the Senate at the present time.

The PRESIDING OFFICER. The unfinished business is before the Senate.

Mr. WARREN. Mr. President, I wish to say in connection with what has just been said regarding the steering committee that the Committee on Appropriations does not propose to surrender any of the rights of that committee under the rules. On the other hand, it will be my endeavor, and I think that of the other members of the committee, to respect the rights of all other committees.

The unfinished business is now before the Senate, and it will remain before the Senate until disposed of, unless displaced by consent or motion, and will come up as the unfinished business every day at 1 or 2 o'clock, according to the hour when the Senate may assemble. Hence, I said a few moments ago that unless it is the pleasure of the Senate to hold night sessions for the consideration of the unfinished business and unless—I should not like to call it a "filibuster," but the consideration of the bill shall be shortened—we will have to undertake something along the line of night sessions on behalf of the Committee on Appropriations in order that the measures reported by it may be considered and acted upon. I wish the members of the committee to prepare themselves accordingly at any time.

Mr. ROBINSON of Arkansas. I want to give notice that, so far as I am concerned, there will not be any night sessions before the holiday season. I want to give that gratifying information.

Mr. KING. Mr. President, will the Senator from California yield to me?

Mr. JOHNSON. I yield.

Mr. KING. I wish to say to the Senator from Wyoming what I started to say this morning when my good friend from Arkansas very properly asked for recognition, that the Senator from Wyoming need not be concerned about the appropriation bills. A bill carrying more than a billion dollars is laid before us; many of us never had a chance to look at it until this morning at 11 o'clock. The Senator from Wyoming can not expect to rush through, in a few minutes, a bill carrying $1,000,000,000 and more, especially when there is legislation attached to it. The Senator knows that the appropriation bills in the Senate under his management—and he has been a very able and efficient manager of this character of legislation—have been passed with great expedition. There never has been any purpose upon the part of any Senator to filibuster or to delay the passage of appropriation bills. If a bill of this magnitude should not pass within three or four hours—and it will pass within less time than that, in my judgment—that condition ought not to provoke criticism or resentment upon the part of my friend from Wyoming. I repeat he need not be concerned or anxious about getting the appropriation bills through. They will be passed with great expedition, perhaps with greater expedition than they should be; but, in view of the enormous appropriations they contain, they ought to be subjected to some scrutiny and some criticism.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The PRESIDING OFFICER. The pending amendment is that offered by the Senator from Colorado [Mr. PHIPPS].

Mr. JOHNSON. Mr. President, I should like to have the attention of the junior Senator from Arizona for a moment. I ask that the amendment which we were discussing last evening, submitted by the Senator from Colorado [Mr. PHIPPS], relating to the application of certain sums to flood control be laid aside temporarily and that we return to the amendment of the Senator from Colorado relating to water, to which is pending the amendment of the Senator from Arizona.

Mr. HAYDEN. I have not as yet offered that amendment, but I intend to do so.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

Mr. PHIPPS. Mr. President, just a moment. Reserving the right to object, I wish to say to the Senator from California that after a consideration of the points raised last evening in the debate and after conference with Senators to-day, I felt that a modification of the amendment which we were discussing last night might well be made and that it would then meet the objection which had been raised. I desire to perfect the amendment by the changes that I have written in the draft which I send to the desk, and I should like to have the amendment as modified now read. Then we can determine whether or not to proceed with that amendment and to complete it or to revert to the one the consideration of which was suspended.

Mr. JOHNSON. I prefer, if the Senator has no objection, to revert to the other amendment, the one he has offered to be subsequently considered.

Mr. PHIPPS. I would be perfectly willing to do that, but I should like to have the amendment as I have now modified it read, with the permission of the Senator.

The PRESIDING OFFICER. The amendment proposed by the Senator from Colorado will be read, as requested.

The Chief Clerk read as follows:

On page 3, line 11, strike out the figures "$125,000,000" and insert the following: "$165,000,000. Of this amount the sum of $25,000,000 shall be allocated to flood control and shall be repaid to the United States out of 62½ per cent of revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization, as provided in section 4 of this act. If said sum of $25,000,000 is not repaid in full during the period of amortization, then 62½ per cent of all net revenues shall be applied to payment of the remainder."

On page 4, line 21, strike out the figures "$125,000,000" and insert "$165,000,000."

Mr. PHIPPS. If the author of the bill prefers to take up the amendment which was passed over in some part of the proceedings yesterday, the one relating to the division of water and the power provisions, I have no objection.

Mr. HAYDEN obtained the floor.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Arizona yield to me to suggest the absence of a quorum?

Mr. HAYDEN. I yield.

Mr. ROBINSON of Arkansas. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	Locher	Shortridge
Barkley	Fletcher	McKellar	Simmons
Bingham	Frazier	McMaster	Smith
Black	George	McNary	Smoot
Blaine	Gillett	Metcalf	Steiwer
Blease	Glass	Neely	Stephens
Borah	Glenn	Norris	Swanson
Bratton	Goff	Nye	Thomas, Idaho
Brookhart	Hale	Oddie	Thomas, Okla.
Broussard	Harris	Overman	Trammell
Bruce	Harrison	Phipps	Tyson
Capper	Hawes	Pine	Vandenberg
Caraway	Hayden	Pittman	Wagner
Couzens	Heflin	Ransdell	Walsh, Mass.
Curtis	Johnson	Reed, Pa.	Walsh, Mont.
Dale	Jones	Robinson, Ark.	Warren
Deneen	Kendrick	Robinson, Ind.	Waterman
Dill	Keyes	Schall	Watson
Edwards	King	Sheppard	Wheeler

Mr. WAGNER. I desire to announce that my colleague [Mr. COPELAND] is necessarily detained from the Senate because of illness in his family.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Seventy-six Senators having answered to their names, a quorum is present. The junior Senator from Arizona is entitled to the floor.

Mr. PHIPPS. Mr. President, will the Senator from Arizona yield to me for a moment?

Mr. HAYDEN. I yield.

Mr. PHIPPS. Referring to the amendment which is now before the Senate, in order to remove any possible misunderstanding regarding the 4,400,000 acre-feet of water, I desire to perfect the amendment by inserting, on page 3, line 4, after the word "by," the words "paragraph (a) of article 3 of," so that it will show that that allocation of water refers directly to the seven and one-half million acre-feet of water that are mentioned in paragraph 3.

Mr. HAYDEN. I will state that I have no objection to the amendment offered by the Senator from Colorado to his own amendment, because it makes it even more in conformity with the amendment that I now offer.

The PRESIDING OFFICER. The Chair will state that the Senator from Colorado has the right to modify his amendment.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Utah?

Mr. HAYDEN. I yield.

Mr. KING. If I may have the attention of the Senator from California and the Senator from Colorado, I direct attention to line 5, page 3, of the amendment offered by the Senator from Colorado. Let me read back a few words:

plus not more than one-half of any excess or surplus waters unapportioned by said compact.

I was wondering if there might not be some uncertainty as to what surplus waters were therein referred to. I think it was the intention to refer to the surplus waters mentioned in paragraph (b) of article 3 of the compact, being the 1,000,000 acre-feet supposed to be unappropriated.

Mr. JOHNSON. No; that is not quite my understanding. It is by no means certain that there is any other, and it is by no means certain that there is the 1,000,000; but the language referred to any other waters.

Mr. KING. Speaking for myself, I have no objection; but I was under the impression that the purpose was to link it with paragraph (b) so as to be sure that California was to receive one-half of the 1,000,000 acre-feet.

Mr. JOHNSON. Not necessarily. This gives one-half of the unapportioned water, and I think it is a better way to leave the matter.

Mr. KING. If it is sufficiently certain to suit the Senators of the lower basin, I have no objection.

Mr. JOHNSON. I think it is.

Mr. HAYDEN. Mr. President, I ask the clerk to read the amendment which I offered.

The PRESIDING OFFICER. The amendment will be read.

The Chief Clerk read as follows:

Amendment proposed by Mr. HAYDEN to the amendment offered by Mr. PHIPPS to the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes, viz: On page 3, after line 7, insert a new paragraph, as follows:

"The said ratifying act shall further provide that if by tri-State agreement hereafter entered into by the States of California, Nevada, and Arizona the foregoing limitations are accepted and approved as fixing the apportionment of water to California, then California shall and will therein agree (1) that of the 7,500,000 acre-feet annually apportioned to the lower basin by paragraph (a) of Article III of the Colorado River compact, there shall be apportioned to the State of Nevada 300,000 acre-feet and to the State of Arizona 2,800,000 acre-feet for exclusive beneficial consumptive use in perpetuity, and (2) that the State of Arizona may annually use one-half of the excess or surplus waters unapportioned by the Colorado River compact, and (3) that the State of Arizona shall have the exclusive beneficial consumptive use of the Gila River and its tributaries within the boundaries of said State, and (4) that the waters of the Gila River and its tributaries, except return flow after the same enters the Colorado River, shall never be subject to any diminution whatever by any allowance of water which may be made by treaty or otherwise to the United States of Mexico, but if, as provided in paragraph (c) of Article III of the Colorado River compact, it shall become necessary to supply water to the United States of Mexico from waters over and above the quantities which are surplus as defined by said compact, then the State of California shall and will mutually agree with the State of Arizona to supply, out of the main stream of the Colorado River, one-half of any deficiency which must be supplied to Mexico by the lower basin, and (5) that the State of California shall and will further mutually agree with the States of Arizona and Nevada that none of said three States shall withhold water and none shall require the delivery of water, which can not reasonably be applied to domestic and agricultural uses, and (6) that all of the provisions of said tri-State agreement shall be subject in all particulars to the provisions of the Colorado River compact."

Mr. HAYDEN. Mr. President, an examination of the amendment offered by the Senator from Colorado [Mr. PHIPPS] will

disclose that it proposes that the State of California shall agree with the United States, for the benefit of the States of Arizona and Nevada, that the aggregate annual consumptive use of water from the Colorado River by the State of California shall not exceed 4,400,000 acre-feet. Further, that the State of California may have one-half of any excess of surplus waters unapportioned by the Colorado River compact.

The first part of my amendment is a mere corollary to the amendment offered by the Senator from Colorado. It provides that of the remainder of the seven and one-half million acre-feet there shall be apportioned to the State of Nevada 300,000 acre-feet, and to the State of Arizona 2,800,000 acre-feet, which, combined, with 4,400,000 acre-feet which the State of California will use, completely exhausts the seven and one-half million acre-feet apportioned in perpetuity to the lower basin.

The second proposal in my amendment is that the State of Arizona may annually use one-half of the surplus or unapportioned water, which is likewise a corollary to the proposal made by the Senator from Colorado, which likewise disposes of the total quantity of surplus or unapportioned waters in the lower basin.

Mr. KING. And that is provided in the compact, is it not?

Mr. HAYDEN. Yes; and the compact has been so interpreted. If the Senator from Utah is interested in an interpretation of the meaning of surplus unapportioned water, I might well read to him an answer to a question I addressed to Mr. Hoover shortly after the compact was written. I asked Mr. Hoover:

What is the estimated quantity of water which constitutes the undivided surplus of the annual flow of the Colorado River and may the compact be construed to mean that no part of this surplus can be beneficially used or consumed in either the upper or the lower basins until 1963, so that the entire quantity above the apportionment must flow into Mexico, where it may be used for irrigation and thus create a prior right to water which the United States would be bound to recognize at the end of the 40-year period?

Mr. Hoover's answer to that question was:

The unapportioned surplus is estimated at from 4,000,000 to 6,000,000 acre-feet, but may be taken as approximately 5,000,000 acre-feet.

He referred to the unapportioned surplus in both basins.

The right to the use of unapportioned or surplus water is not covered by the compact. The question can not arise until all the waters apportioned are appropriated and used, and this will not be until after the lapse of a long period of time, perhaps 75 years. Assuming that each basin should reach the limit of its allotment and there should still be water unapportioned, in my opinion, such water could be taken and used in either basin under the ordinary rules governing appropriations, and such appropriations would doubtless receive formal recognition by the commission at the end of the 40-year period.

There is certainly nothing in the compact which requires any water whatever to run unused to Mexico, nor which recognizes any Mexican rights, the only reference to that situation being the expression of the realization that some such right may perhaps in the future be established by treaty. As I understand the matter, the United States is not "bound to recognize" any such rights of a foreign country unless based upon treaty stipulations.

So Mr. Hoover, who was the chairman of the commission which made the compact, expresses it as his opinion that surplus and unappropriated waters above the allocation in the compact are unaffected by the compact, and are subject to appropriation in any State. I think that is not only a very important interpretation of the compact, but it is a sane, logical, and legal conclusion.

Mr. KING. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. KING. Does the Senator interpret the compact to mean that if there is any unappropriated water in addition to the 1,000,000 acre-feet referred to in the compact, that that is subject to the same disposition or division as the 1,000,000 acre-feet?

Mr. HAYDEN. There is no question about it, in the light of the statement I have just read, which was written to me in answer to a specific question which I propounded to Mr. Hoover.

Now, I direct the attention of the Senate—and Senators will find on their desks a copy of my amendment—to the fifth and sixth items of it. The fifth item, beginning in line 22, reads:

That the State of California shall and will further mutually agree with the States of Arizona and Nevada that none of said three States shall withhold water and none shall require the delivery of water, which can not reasonably be applied to domestic and agricultural uses.

That is a mere repetition of language which appears in the Colorado River compact. In section (e), Article III, of the Colorado River compact, are found these words:

The States of the upper division shall not withhold water, and the States of the lower division shall not require the delivery of water, which can not reasonably be applied to domestic and agricultural uses.

I will state frankly that I placed that provision in my amendment after conferences with gentlemen representing the State of California, who thought it proper that there should be the same pledge as between the three States in the lower basin as is contained in the original compact with respect to the upper and the lower basins. I could see no harm in it; on the contrary, it might, in time, be a valuable provision for the benefit of some State which might otherwise be injured. If a provision of that character is found in the original compact, it would therefore be well to repeat it in any supplemental agreement between Arizona and Nevada.

The sixth provision in my amendment is:

That all of the provisions of said tri-State agreement shall be subject in all particulars to the provisions of the Colorado River compact.

That provision conforms to a similar provision in the Phipps amendment, which states that such uses, that is, by the State of California, shall always be subject to the terms of said compact. So that as to five of the substantive propositions that are contained in my amendment, as numbered in it, there can be no controversy. I have mentioned these matters first so that we may get down to the gist of my amendment.

Proposal No. 3 in my amendment is—

That the State of Arizona shall have the exclusive beneficial consumptive use of the Gila River and its tributaries within the boundaries of said State.

The fourth provision is—

that the waters of the Gila River and its tributaries, except return flow after the same enters the Colorado River, shall never be subject to any diminution whatever by any allowance of water which may be made by treaty or otherwise to the United States of Mexico but if, as provided in paragraph (c) of Article III of the Colorado River compact, it shall become necessary to supply water to the United States of Mexico from waters over and above the quantities which are surplus as defined by said compact, then the State of California shall and will mutually agree with the State of Arizona to supply, out of the main stream of the Colorado River, one-half of any deficiency.

Let me read the portion of the compact to which reference is made in my amendment. It is paragraph (c) of Article III:

If, as a matter of international comity, the United States of America shall hereafter recognize in the United States of Mexico any right to the use of any waters of the Colorado River system, such waters shall be supplied first from the waters which are surplus over and above the aggregate of the quantities specified in paragraphs (a) and (b).

That is, over and above the seven and a half million acre-feet apportioned in perpetuity to each basin, a total of 15,000,000 acre-feet, and over and above the 1,000,000 acre-feet additional which the lower basin is given the right to use. From that surplus of unapportioned water Mexico must first be satisfied.

Continuing the reading of paragraph (c) of Article III of the compact:

And if such surplus shall prove insufficient for this purpose, then the burden of such deficiency shall be equally borne by the upper basin and the lower basin, and whenever necessary the States of the upper division shall deliver at Lees Ferry water to supply one-half of the deficiency so recognized in addition to that provided in paragraph (d).

In paragraph (d) the upper basin is required to deliver 75,000,000 acre-feet during the course of any 10-year period, but, in addition to that, the upper basin assumes the duty of supplying one-half of any water that may be demanded by Mexico under any treaty, in the event that the surplus waters are not sufficient to meet the Mexican demand.

My proposal is that as far as the lower basin is concerned the State of Nevada shall be exempt from furnishing any water to Mexico under any conditions. The State of Nevada has been so modest in its demands, asking for only 300,000 acre-feet of water, which quantity of water is so small that we have felt in Arizona that there should never be any question but that the State of Nevada should have all of it.

Mr. KING. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. KING. Does the Senator interpret the compact to mean that if there should be, for instance, 16,000,000 acre-feet of water in the river, and by any treaty negotiated between the two Governments Mexico should be allocated a million acre-feet, that that million acre-feet should be taken from the million surplus; that is, the 16,000,000 and not any part of the 15,000,000 be called upon to meet that payment?

Mr. HAYDEN. The compact, from a literal interpretation of its words, means that the upper basin and the lower basin shall meet that deficiency equally, regardless of how much water is apportioned to each basin.

In further answer to the question of the Senator from Utah, the compact states that any water must first be supplied to Mexico out of the surplus or unapportioned water; but if it is necessary to supply Mexico with any water out of that water which is apportioned in each basin—that is to say, the 7,500,000 acre-feet apportioned to the upper basin and the 8,500,000 acre-feet apportioned to the lower basin—then the upper basin is burdened with furnishing one-half of the water, and these words, I think, should convince the Senator:

> And if such surplus shall prove insufficient for this purpose, then the burden of such deficiency shall be equally borne by the upper basin and the lower basin, and whenever necessary the States of the upper division shall deliver at Lees Ferry water to supply one-half of the deficiency so recognized in addition to that provided in paragraph (d).

Mr. KING. I am not quite sure yet, in view of the statement of the Senator. My understanding is that if there should be, as an illustration, 18,000,000 acre-feet in the river, and the upper States should subtract from the stream 7,500,000 acre-feet and there should flow down the difference between 7,500,000 acre-feet and 18,000,000 acre-feet, and by treaties Mexico should be allotted 3,000,000 acre-feet, 500,000 acre-feet more than that surplus, then the upper States would be called upon to furnish one-half of that 500,000 acre-feet and the lower States one-half of that 500,000 acre-feet. But suppose Mexico should be allocated only 2,000,000 acre-feet, and that quantity of water was there plus the 7,500,000 acre-feet allocated to the lower basin, then that unappropriated 2,000,000 acre-feet—unappropriated because it is above the 7,500,000 acre-feet—would be taken from the lower basin States and there would be left 7,500,000 acre-feet and the upper States would not be compelled to contribute anything.

Mr. HAYDEN. I do not so interpret the Colorado River compact. The compact is perfectly clear to me not only because of the specific reference to the 7,500,000 acre-feet apportioned to each basin but also to the additional 1,000,000 acre-feet:

> Such waters shall be supplied first from the waters which are surplus over and above the aggregate of the quantities specified in paragraphs (a) and (b).

That is, over and above the 7,500,000 acre-feet plus the 1,000,000 acre-feet, and then in addition thereto, if it is necessary to furnish water to Mexico, each basin shall share the burden equally.

All that my amendment seeks to accomplish is to follow the same rule that was laid down as between basins, which is an equality of obligation to furnish water to Mexico under any treaty, of which each basin must furnish an equal amount. My amendment seeks to establish the same principle with respect to that part of the water which must be furnished by the lower basin to Mexico by requiring California and Arizona to share that burden equally.

Mr. McKELLAR. How would they do it under the bill as now proposed?

Mr. HAYDEN. The bill does not cover the subject at all.

Mr. McKELLAR. This, then, is an addition to the bill?

Mr. HAYDEN. Yes; and I want to make that certain. The effect of my amendment would be, if carried out by the tri-State agreement that is contemplated under it, to use round figures, in the event that a million acre-feet of water must be furnished to Mexico under some treaty, 500,000 acre-feet of that amount would be furnished by the upper basin, 250,000 by Arizona and 250,000 by California. Arizona and California would each assume one-quarter of the burden devolving upon the lower basin. I would relieve Nevada from furnishing any water at all, because of the very small amount of water allotted to that State under the tri-State agreement. It seems to me if it is fair to divide the burden between the basins equally, then likewise it is fair to divide the burden equally between Arizona and California.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Arizona yield to the Senator from California?

Mr. HAYDEN. I yield.

Mr. SHORTRIDGE. The Senator's position is that the States of Arizona and California shall contribute equal amounts quite regardless of whether one or the other has used or needs the water to be delivered to Mexico. Is not that the position of Arizona? So that if that contingency should arise, a treaty having been entered into and a demand having been made upon the United States for a certain quantity of water, California must contribute as much as Arizona contributes.

Mr. HAYDEN. No more and no less.

Mr. SHORTRIDGE. No more and no less, even though California has not the water to deliver, having devoted it to beneficial uses, and Arizona not having devoted its portion to such uses.

Mr. HAYDEN. In that event, if Arizona had not used her water, of course it would be surplus water and there could be no question about calling upon California for any water. It is only in the contingency that both States are using all of their water, having made valid appropriations of it by applying it to their lands. Then the question comes that there will be a shortage of water in order to supply Mexico under the treaty. Who is going to bear the shortage? It means that certain farm lands in both States will not receive as much water as they otherwise would. In that event Arizona says that California and Arizona should bear that burden equally.

Let me point out to the Senator the other side of the picture. The time when the demand would be made would be during a period of drought. The Senator is well aware that we have long cycles of dry years in the West. The record of a study of the flow of the Colorado River will show that for a period of years by reason of lack of rainfall there is a great reduction in the flow of that stream. For another period of years we may have floods that will greatly increase the average flow of the river. During periods of flood or rainy years Mexico would have all the water she would want, and everybody else would, too. The pinch comes only during a period of drought. Then by reason of the decreased flow of the river there would not be delivered to Mexico all the water she was entitled to receive under the treaty.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from California?

Mr. HAYDEN. I yield.

Mr. SHORTRIDGE. Taking it as of that condition of affairs and as of that time—Arizona is not then using her water, but California is using her water—does the Senator still think that California should contribute one-half of the waters demanded by Mexico?

Mr. HAYDEN. If Arizona were not using the water, it would not disappear. It would remain in the channel of the Colorado River and would go down to Mexico, and Mexico would be supplied without any demand upon California at all. If Arizona were not using the water, out of Arizona's share of that water Mexico would be fully supplied. It is only in the contingency that both States are using the full allotment of water provided in the bill, and in that event, if a demand comes from Mexico for water, what is the situation? A period of drought has arrived. Mexico has certain rights to water under a treaty. The water is taken out in the upper basin and in California and Arizona and Nevada, and diverted to such an extent that there does not cross the Mexican border line the quantity of water Mexico has a right to receive. Under the terms of the treaty, the Mexican Government would request of our Government that there be delivered at the boundary whatever shortage existed. Where should that water be obtained? Only in the main stream of the Colorado River.

Mr. SHORTRIDGE. May I ask the Senator a further question?

Mr. HAYDEN. Certainly.

Mr. SHORTRIDGE. Does the Senator construe the compact and the proposed amendment to make it necessary for either California or Arizona to discontinue the use of waters which it may have put to beneficial use in order to meet the demands of Mexico?

Mr. HAYDEN. Certainly. A treaty would be the supreme law of the land.

Mr. SHORTRIDGE. Certainly.

Mr. HAYDEN. And if the treaty provided that a certain quantity of water should be delivered to Mexico, the compact contemplates that then and in that event, out of the waters appropriated and used in both States, if there were a shortage, the upper basin would be compelled to let down half of the quantity necessary to supply Mexico. Under my amendment California would furnish one-quarter and Arizona the other quarter until the total quantity was furnished to Mexico, and it would then of necessity deprive land of irrigation water.

Mr. SHORTRIDGE. Does not that excite some fear in the mind of the Senator as applied to his own State?

Mr. HAYDEN. That is exactly what it does; and it was fear which prevented the Legislature of the State of Arizona from ratifying the Colorado River compact when first presented to it. The Legislature of the State of Arizona viewed the mat-

ter in this light. It was said that by the inclusion of the Gila River and its tributaries in the Colorado River system and then placing upon that system in its entirety the burden of furnishing water to Mexico under any treaty, if Arizona ratifies and approves the compact, she takes on an obligation which may in time to come interfere with the proper irrigation of land now under existing irrigation projects on the Gila River or its tributaries. If anyone does not approve the compact the only place that water can be obtained from Mexico is out of the main stream of the Colorado River, because, as I have said a number of times to the Senate, this demand would be made during a time of drought, during a time when the tributaries were diminished by reason of a long dry season; and anyone who is acquainted with the Gila River knows that during such a period it is absolutely dry.

I have here a statement from the United States Geological Survey which will well illustrate that fact. I asked the Director of the United States Geological Survey this question:

During what part of the year is there usually no water flowing from the Gila into the Colorado River?

His answer was that the Reclamation Service had recorded the Gila as having been dry at its mouth during entire months, as follows: During the month of May in 8 years; in June of 13 years; in July of 11 years; in August of 6 years; in September of 8 years; in October of 9 years; in November of 8 years; and in December of 8 years.

That was from a record comprising some twenty-odd years, so that the Senator thoroughly understands that during the dry season, at the only time when a demand would be made by Mexico, the Gila River would be dry at its mouth; in fact, that river would be dry for nearly 200 miles above its mouth. Therefore, even if the water had been impounded in great reservoirs like the Roosevelt Dam or the Coolidge Dam and had been carried over from a wet season, it would be a futile and foolish thing to open the gates of such reservoirs and attempt to deliver any water to Mexico. Water would have to flow down a dry river bed for over 200 miles, and it would be evaporated and lost in the sand. So the only place that Mexico could obtain water would be from the main stream of the Colorado River.

What is the situation with respect to the main stream? By the amendment which the Senate has adopted there has been apportioned in perpetuity to the State of California 4,400,000 acre-feet of water, and there remains for the State of Arizona but 2,800,000 acre-feet of water; yet the State of Arizona is willing to pay the price of having her water rights on the Gila River left clear, unobstructed, and unimpaired in any respect by signing this compact and agreeing that, notwithstanding the State of Arizona has but 2,800,000 acre-feet of water which is available for delivery to Mexico, where California has 4,400,000 acre-feet, Arizona will, out of the lesser amount, assume the burden of supplying an equal quantity of water to Mexico.

I submit to the Senators from California and to the Senate that that is a fair proposal. It is a proposal based upon the same idea as is contained in the original compact. It is true that there is by the Colorado River compact a larger quantity of water allocated to the lower basin than to the upper basin; an additional million acre-feet are allocated to the lower basin, yet the compact places the Mexican burden upon the upper basin and the lower basin equally.

Our concern in Arizona over this question is that we want every State in the basins to have an equal interest in seeing that the Senate of the United States shall not ratify a treaty which grants to Mexico any more water than that country is justly entitled to receive. Our friends from California want the matter arranged in this way: They propose to leave it nebulous, leave it without any definite understanding. Then when the demand comes from Mexico it will be possible for California to assert that this burden is upon the whole Colorado River system. So far as the lower basin is concerned, California would have it apply to every stream and every body of water in the lower basin. If Arizona has 2,800,000 acre-feet of water in the main stream and should also at that time happen to have any quantity of water stored in any reservoir anywhere in the State, two or three hundred miles, perhaps, away from where it could be delivered to Mexico, for the purposes of computation the water in those reservoirs would be added to the quantity of water allocated to Arizona in the main stream, and thereby bring Arizona's proportion of the water to be delivered to Mexico to a higher ratio than that required to be delivered by California. Instead of being upon a 50-50 basis, as we propose, it might be 40 per cent for California and 60 per cent for Arizona.

Nobody knows what the ratio would be; it is an uncertain quantity. It is Arizona's desire to get away from that uncertainty, to make the entire arrangement firm and definite. Arizona is willing, notwithstanding the fact that she is allocated less water in the main stream of the Colorado than is California, out of that lesser quantity, to supply one-half of any deficiency which may be occasioned by a demand from Mexico.

This Mexican question came up very early in the consideration of the Colorado River compact. That interstate agreement was signed in Santa Fe on the 24th day of November, 1922. Very shortly afterwards members of the Arizona Legislature, which was called upon to ratify the agreement, inquired of me as to what it meant. Their questions were directed to the Mexican issue more than to any other one subject. I knew of no better place to go to find out what the Colorado compact meant than to inquire of Mr. Herbert Hoover, who served as the Federal commissioner when the compact was negotiated.

Senators will remember that each of the seven States, by act of their legislatures, appointed commissioners, and under the authority of an act of Congress President Harding appointed Mr. Hoover as the Federal representative to arrange for the negotiation of the Colorado River compact. Mr. Hoover was elected chairman of the commission. Meetings were held in Washington, at Phoenix, in Imperial Valley, in Nevada, in Utah, in Wyoming, in New Mexico, and in every one of the seven States in the Colorado Basin. At those meetings appeared men thoroughly familiar with the Colorado River and all of its tributaries. Mr. Hoover was present and listened to the testimony, with the result that before the compact was negotiated there was no one here in Washington better informed upon that subject and to him is due the credit, when it was impossible to apportion water to each one of the States, of suggesting that the first step was taken by apportioning the water between the upper and the lower basins. Therefore, when these questions were addressed to me by members of the Arizona Legislature, asking what the compact meant in its reference to a treaty with Mexico, I went to Mr. Hoover in order to find out what it did mean.

I addressed a series of questions to him and later I printed the questions and answers in the CONGRESSIONAL RECORD. To show Mr. Hoover's thorough familiarity with the subject, permit me to read some of the questions and the answers. Question 9 was:

Does paragraph (c) of Article III contemplate a treaty between the United States and the Republic of Mexico under which one-half of a deficiency of water for the irrigation of lands in Mexico shall be supplied from reservoirs in Arizona?

That charge was made in Phoenix during the session of the Arizona Legislature, and I wanted an answer to it. Mr. Hoover's reply was:

No. Paragraph (c) of Article III does not contemplate any treaty. It recognizes the possibility that a treaty may at some time be made and that under it Mexico may become entitled to the use of some water, and divides the burden in such an event, but the quantity to which that country may become entitled and the manner, terms, and conditions upon which such use may depend can not be foreseen. It is a certainty that no such treaty will be negotiated and ratified which is unfair to the United States or any State or detrimental to their interests.

Later Mr. Hoover repeated the same statement:

There is no reference in the compact to any rights of any persons in Mexico; none are created and none are recognized. The entire question, if it ever arises, must be dealt with by the Federal Government in the exercise of its treaty-making power.

I asked Mr. Hoover a further question:

Is there any possibility that water stored by dams in the tributaries of the Colorado River in Arizona, such as the Roosevelt Reservoir, on Salt River, or the San Carlos Reservoir, on the Gila, might, under the terms of such a treaty, be released for use in Mexico to the injury of the water users of the projects for whose benefit such dams were constructed?

Mr. Hoover's answer was:

I can not conceive of the making or the ratification of a treaty which would have such an effect. If it were possible to believe that the Federal Government would treat its own citizens with such absolute disregard of their property and rights, I presume that they would receive ample protection even as against the Government, under the provisions of the Federal Constitution.

It must be remembered that the United States now has a large financial interest in the projects already constructed. It is not to be presumed that action will be taken detrimental to these interests. Furthermore each of the seven States directly concerned has two Members of the Senate, by which any treaty proposed must be ratified.

On the strength of that recommendation I advised the Arizona Legislature to approve the Colorado River compact. The legislature declined to do so. The Arizona Legislature considered the Mexican menace to be so serious that, rather than approve the Colorado River compact, they insisted that there be a supplemental agreement with the State of California wherein the State of California would agree to assume one-half of any burden imposed by any such treaty. As I have said, the compact was not ratified by the Arizona Legislature, and the failure to come to an understanding upon that point had more to do with the failure of Arizona to approve the compact than any other one thing. But I can say to the Senate in all seriousness that if an arrangement can be made following the lines of the amendment that I have submitted here, or if this amendment be adopted, and subsequent to that the States of Arizona and California agree so far as the Gila River is concerned that no water from that stream shall be required to be delivered to Mexico, but Arizona will deliver one half of any demand made from Mexico under any treaty out of the main stream of the Colorado River, upon condition that California will deliver the other half, it would solve one of the knottiest problems connected with the entire Colorado River controversy and place it upon such a plane that the Legislature of Arizona, I am sure, would cheerfully ratify the Colorado River compact, and thereby satisfy all of the States of the Colorado River basin with respect to their water rights in the future.

I have read to the Senate these extracts from my questions and the answers made by Mr. Hoover in order that Senators may understand that Mr. Hoover has a thorough and intimate knowledge of this particular issue which I have raised on the floor of the Senate to-day. In that connection I want to advise the Senate that last August at the El Tovar Hotel at the Grand Canyon, in the State of Arizona, where Mr. Hoover met a large number of the most influential citizens of the State of Arizona the question of whether the tributaries of the Colorado River in Arizona should be required to furnish water to Mexico was thoroughly discussed, and Mr. Hoover stated to those Arizona citizens that it was never contemplated that water from the tributaries of the Colorado River should be used for delivery to Mexico, and that he felt sure, if there were any doubt about it, that the States which negotiated the Colorado River compact would be glad to correct it so that there could be no doubt about it.

I read to the Senate a statement published in newspapers throughout the State of Arizona shortly after that time, entitled "Hoover and the Colorado":

> Respecting that great question, it is Mr. Hoover's position that the Colorado River compact was never intended to provide that any of the water that might go to Mexico should come from Arizona tributaries; and he feels sure that other States will agree on a proper amendment to the Colorado River compact to make this plain.

If there is any greater authority than Mr. Hoover on what the Colorado River compact means, I do not know who it is. He made it. He was the chairman of the commission that negotiated it. He spent many months working to bring about the formulation of that document and to secure its approval by the States.

It is his opinion, deliberately stated, that it never was intended by the compact that any tributaries of the Colorado River in the State of Arizona should be required to furnish any water to Mexico.

If that statement were taken literally, and followed out to its logical conclusion, California would be required to furnish more water to Mexico than the State of Arizona, because California has more water in the main stream, under the amendment proposed by the Senator from Colorado [Mr. PHIPPS] than does Arizona. California has been allocated 4,400,000 acre-feet of water, whereas Arizona is to have but 2,800,000 acre-feet. California is to have 1,600,000 acre-feet of water in the Colorado River in excess of the amount that Arizona shall have.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from California?

Mr. HAYDEN. I yield.

Mr. SHORTRIDGE. The Senator is speaking of the 7,500,000 acre-feet allocated under the compact?

Mr. HAYDEN. I am.

Mr. SHORTRIDGE. In addition to that quantity, a vast quantity may flow into the main stream from Arizona. Is not that so? Millions of acre-feet will flow into the Colorado River from the tributaries in Arizona?

Mr. HAYDEN. Oh, no; not millions of acre-feet, by any means. If the Senator wants accurate information on that subject, I can give it to him.

The flow of the Gila River——

Mr. SHORTRIDGE. There are other rivers than the Gila that flow into the Colorado.

Mr. HAYDEN. I could tell the Senator about all of them.

In 1923 I addressed a question to the Chief of the United States Geological Survey on that very subject:

> What part of the total flow of the Colorado comes from the Gila River?

That, the Senator will understand, is the only tributary that I am seeking to have made exempt from the Mexican burden.

The answer is:

> Records showing the flow of the Gila River near the mouth are fragmentary. The Reclamation Service, however, has made an estimate of the total flow for the years 1903 to 1920 (a period of 17 years), based on the available records and measurements of the Gila at or near Yuma. These estimates indicate an annual run-off of the Gila during 1903 to 1920 varying from less than 100,000 to 4,500,000 acre-feet, with a mean of about 1,100,000 acre-feet, which is about 6 per cent of the mean annual flow of the Colorado at Yuma.

So the Gila River, which the Senator will observe upon the map, furnishes on the average less than 6 per cent of the total flow of the Colorado River at Yuma, and the average annual discharge over that 17-year period was a little over a million acre-feet.

I will say to the Senator that in the meantime, since 1920, during the past eight years, a great reservoir was completed on the upper Gila at San Carlos; another reservoir was completed on the Agua Fria, a tributary of the Salt River, and the Roosevelt Reservoir has been enlarged. With all of those improvements less water has gone down to the mouth of the Gila on the average during the past eight years than before. As the years go on there will be less and less water flowing from the Gila into the Colorado, because other reservoirs are contemplated.

The other side of the picture, however, is interesting.

I hold in my hand a report by Mr. E. C. La Rue, a hydraulic engineer of the United States Geological Survey, entitled "Water Power and Flood Control on the Colorado River Below Green River in Utah," published in 1925. In that report Mr. La Rue takes into consideration the proposal that there be diverted from the Colorado River in the vicinity of Parker 2,844,000 acre-feet of water and carried around into the lower Gila River to irrigate the area marked in red upon this map. It is a coincidence that the Senate has fixed 2,800,000 acre-feet of water as the quantity that might be used in that manner. Mr. La Rue estimated only 44,000 acre-feet more. Mr. La Rue finds that if that quantity of water were applied to that land, and a water table established, the return flow from that land emptying into the Colorado at the mouth of the Gila would be 948,000 acre-feet, a quantity of water sufficient to supply all of the demands that Mexico could make for the irrigation of lands in that country which have been put into cultivation up to the present time. In other words, if Arizona were given the privilege of diverting 2,800,000 acre-feet of water from the Colorado River at Parker, and applying it to the lands in the lower Gila Valley, the return flow would be sufficient to take care of all the legitimate demands of Mexico.

Mr. SHORTRIDGE. Mr. President, that never would be done; would it?

Mr. HAYDEN. It will be done, beyond question.

Mr. SHORTRIDGE. You will get the water from other sources, will you not?

Mr. HAYDEN. There is no other source than the Colorado River from which to obtain it.

Mr. SHORTRIDGE. How about the dams in the upper Gila?

Mr. HAYDEN. The dam in the upper Gila at the San Carlos site, known as the Coolidge Dam, will irrigate the area indicated in green in the vicinity of Florence and Casa Grande. The Senator will observe upon the map that it is 150 miles from where that land is irrigated to the area proposed to be irrigated from the Colorado River on the lower Gila. There is no other known source of water supply than the Colorado River for the irrigation of that most excellent tract of land in the lower Gila Valley. If the water is not obtained from that source, the land must forever remain a desert.

It has been asserted that it is impossible to carry out any such plan in the lower Gila Valley by reason of the pump lift, but I beg to direct the attention of the Senate to the fact that the maximum pump lift under that Arizona project is not over 250 feet. The Senate last Monday passed a bill authorizing engineering investigations for a reclamation development on the Columbia Basin where the pump lift averages 450 feet. No one will deny what has been stated by General Goethals and by a board of engineers authorized to make a report upon it under the terms of the Federal waterpower act, that the

pumping scheme on the Columbia Basin project is feasible. General Goethals testified that there was not $10 an acre difference in the cost between the pumping development at Grand Coulee and the delivery of water by gravity on the Columbia Basin project.

The pump lift on the Columbia Basin project is 450 feet. The maximum pump lift under this Arizona plan is 250 feet. Great water-power resources exist on the Columbia River and with that power they expect to lift the water 450 feet and irrigate an enormous quantity of land, more than a million acres of land in the State of Washington. We have enormous hydroelectric resources in Arizona on the Colorado River. More than 4,000,000 horsepower will be generated on that stream above Boulder Dam. It is merely a question of transmitting the power within a reasonable transmission distance to lift the water to irrigate these lands in the lower Gila Valley.

No one who has examined into the project can deny that within a reasonable time, within a generation as the limit, if the prices of agricultural products in the United States justify the reclamation of any additional arid land, it will be just as feasible to irrigate 800,000 acres of land in the lower Gila Valley as it is to irrigate the 1,000,000 acres of land that it is proposed to irrigate in the State of Washington. The projects are upon a parallel, except that the pump lift in Arizona is approximately one-half what it would be in the State of Washington.

Furthermore, while I know that comparisons between States are odious, nevertheless we insist that we have more days of sunshine in Arizona than they have in the State of Washington; and there are only two things required to grow crops—water and sunshine.

Mr. KING. And land.

Mr. HAYDEN. And land—land of a most excellent quality, land well drained, a sandy loam, with a gentle slope toward the Gila River, crossed by two main tracks of the Southern Pacific Railroad, one of the great transcontinental railroad systems in the United States. The transportation facilities are excellent. The climatic conditions are such that any crop that can be grown in the Imperial Valley can be grown upon the area of land which we propose to irrigate in the State of Arizona.

But to get back to the point that I desire to impress upon the Senate, which is that if the State of Arizona carries out the plan that I have indicated, and we should divert 2,800,000 acre-feet of water out of the Colorado River and apply it to beneficial use on this land, according to the estimate of an expert of the United States Geological Survey, Mr. E. C. La Rue, who has devoted his life to studies of conditions on the Colorado River, there will be a return flow from that area sufficient to take care of every demand for water that Mexico now has.

The Senate, I fear, does not appreciate what happens in any irrigated region. The Senator from Wyoming [Mr. KENDRICK] has pointed out many, many times that the use of water in the upper basin means that practically one-half of it returns to the stream. They have lands with good drainage, underlain with gravel beds. The water applied to the surface percolates down through the soil and comes back into the stream. That happens over and over and over again, so that the water may be used more than once. The compact defines the use of water to be a consumptive use—that is, the net use of water—not the quantity diverted from the stream, but the quantity diverted from the stream less the return flow. Anyone can see what an important item it is to take into consideration the return flow that will come from the irrigation of these lands in Arizona.

I have specified in the amendment which I have offered that the State of Arizona lays no claim to that return flow. We do not ask to have any credit for it after it arrives in the main stream of the Colorado River. It will be surplus and unappropriated waters which Arizona can not use, and that water, and that alone, will be sufficient to supply any demand for water to meet the existing uses in Mexico.

Mr. SHORTRIDGE. That would depend upon the carrying out of your gigantic scheme of bringing water from near Parker down to that area of the lower Gila; but suppose you do not carry out that scheme?

Mr. HAYDEN. Then the water will remain in the main Colorado River and go down to Mexico, and that is all there will be to it. Mexico will have all the water she needs in that event.

The Senator thoroughly understands, I hope, that under the set-up to which the senior Senator from California has so often referred, there will be available at Boulder Dam on the average about nine and one-half million acre-feet of water. There are varying estimates, but they all arrive at about that conclusion.

The bill itself provides that a million acre-feet may be used in the vicinity of Los Angeles, and some three and one-half million acre-feet through the all-American canal to irrigate the Imperial Valley. Then there is another half million acre-feet which may be used in the vicinity of Yuma and the Paloverde Valley, leaving about 4,000,000 acre-feet of water unused, and which can not go anywhere else except to Mexico, unless the State of Arizona undertakes this very plan of development which the Senator from California seems to indicate is impossible of accomplishment.

Mr. President, yesterday my colleague the senior Senator from Arizona [Mr. ASHURST], in presenting his amendment showing why the Gila River and its tributaries should be exempt from any interference with development under the Federal water power act, made an argument that is equally convincing with respect to the amendment I now offer. His amendment was adopted because he convinced the Senate that the Gila River and its tributaries are so remote from the project proposed to be constructed in this bill that, whether a power plant were erected in that part of Oregon or not, it could in no manner influence the main project at Boulder Dam.

That is true with respect to water also. Under the terms of this bill the Secretary of the Interior is directed—let me read just exacly what he is directed to do:

> To construct * * * a main canal and appurtenant structures located entirely within the United States connecting the Laguna Dam with the Imperial and Coachella Valleys in California.

Every report and every plan made by the United States Reclamation Service contemplates that the present point of diversion for the Imperial irrigation district, which is at Hanlon Heading, about a mile above the Mexican border, shall be changed and moved upstream to Laguna Dam, about 12 miles above the mouth of the Gila River. Thereafter no water flowing in the Gila River, either in time of flood or by return flow or otherwise, can ever be used in the State of California. There is no way it could be done, because the California point of diversion is always to be above the mouth of the Gila.

The reason for moving the point of diversion from Hanlon Heading to Laguna Dam is that the Laguna Dam site is the first site where there is a rock abutment on each side of the Colorado River. It is the lowest point down the stream where a dam can be firmly fastened so that the river could not go around one end or the other of it. It is a great advantage, in being able to insure a water supply, that that dam will not wash out.

The second advantage is that by going that much farther upstream the water is taken out at a higher level, and can be carried around on that level through the sand dunes to irrigate a larger area of land in the Imperial Valley and extended on to irrigate lands in the Coachella Valley.

If it were necessary to continue the point of diversion at Hanlon Heading, if that were the level at which the water were taken out of the Colorado River, then the area to be irrigated in the Imperial and Coachella Valleys would be greatly reduced. So, from every point of view, it is desirable to do away with the present heading just above the Mexican boundary line and remove it to Laguna Dam, above the mouth of the Gila.

I may state further that the privilege of diverting water from the Colorado River at Hanlon Heading, which the Imperial irrigation district now exercises, is but temporary. There is pending in the courts a proceeding for an injunction to restrain the Imperial irrigation district from diverting water at that point by reason of the fact that the maintenance of a diversion weir there is a menace to the Federal reclamation project at Yuma. Each year the Imperial irrigation district is required to post a bond that if any temporary diversion works are not removed, and the levees on the Arizona side of the river should break, the Yuma project shall be held safe from any damages that may occur. So nobody in California wants to continue to obtain water from the Colorado River at Hanlon Heading.

The people under the Yuma reclamation project want that menace to their project removed. The people under the Imperial irrigation district want to find a firm heading for their canal. Now, only one end of their head gate is attached to bedrock. The other extends out into the silt of the Colorado River Delta.

To be assured of a water supply, it is necessary to go up the river at least to Laguna Dam. To irrigate the maximum quantity of land in Imperial Valley and in the Coachella Valley, it is necessary to go up the river and obtain the advantage of tapping the stream at a point higher up, conveying the water at a higher level for purposes of irrigation.

Under the plan contemplated by the Swing-Johnson bill, once it is put into effect, neither the State of California, nor any other State for that matter, would ever obtain any water out of the Gila River. That would be ended. So we in Arizona say that if that is the case, what interest has the State of California in the Gila River? Her wants and needs will be completely supplied by the water impounded at Boulder Dam. The Gila

River has never been anything but a menace to the State of California. Senators who are familiar with the facts will remember that the original break in the levee, which inundated a part of the Imperial Valley, was caused by a flood which came down the Gila River. The Gila River broke the levee and the Colorado River entered the break and kept it open. That was what happened. At all times the flash floods of the Gila, which vary tremendously in their volume, are a greater menace to the Imperial irrigation district than the floods of the Colorado River, so far as breaking the levee is concerned.

In addition to that, talk with any farmer in the Imperial Valley, and he will tell you that the muddy, silty flood waters of the Gila River—and that is the only kind they ever get out of that stream—are a positive detriment to their land and they will be most happy when they can escape from the necessity of accepting any water from the Gila River.

Under the new scheme the Colorado River water will be desilted at Boulder Dam and will come down relieved of a great burden of silt which now fills the canals or is deposited upon the lands of the Imperial Valley farmers.

In fact, under the plan proposed in this bill the State of California, once the Boulder Dam is built and once the all-American canal is connected with the Laguna Dam, will have no further interest in the Gila River, and can have none. Whatever water can flow in that stream will be of use not to California but to Mexico and to Mexico alone.

Such being the case, the people living on the Gila River in the State of Arizona feel that they should not have their present rights burdened by any demand that may be made by Mexico. They are willing that the State of Arizona shall assume one-half of the burden of furnishing water to Mexico under any treaty that may be made, notwithstanding the fact that in the main stream, which is the only place where the water can be obtained, Arizona will be allocated but 2,800,000 acre-feet and California 4,400,000, a difference of 1,600,000 acre-feet in favor of California. Yet, notwithstanding the fact that Arizona has 1,600,000 acre-feet of water less than California in the main stream, Arizona will equally assume the burden. We will pay that price in order that there may be no cloud upon the water rights of the existing irrigation projects on the Gila River.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. WATERMAN in the chair). Does the Senator from Arizona yield to the Senator from Utah?

Mr. HAYDEN. I yield.

Mr. KING. Suppose there should be a treaty with Mexico which would allocate to her 2,000,000 acre-feet, though I can not conceive of any treaty ever containing such terms. Would Arizona, in meeting her share of the treaty demands made upon the Colorado River's waters, claim any credit for any of the flow from the Gila River which finds its way into the Colorado River and thence down into Mexico?

Mr. HAYDEN. No; and I have so specified in my amendment. There could be no question about that at all.

Mr. KING. So that Arizona would make its contribution, then, out of the limited amount which is awarded it under the amendment adopted yesterday?

Mr. HAYDEN. Exactly so. Let me read my amendment upon that point:

> That the waters of the Gila River and its tributaries, except return flow after the same enters the Colorado River, shall never be subject to a diminution whatever by any allowance of water to Mexico.

I have pointed out to the Senate that estimates made by Mr. La Rue are that if we take out 2,800,000 acre-feet from the Colorado River and use it for irrigation of lands in the lower Gila Valley, 900,000 acre-feet of that water will return to the Gila and thence into the Colorado River and that it can not be used anywhere else except in Mexico. That statement I can verify by figures from the tables which Mr. La Rue prepared and which appear upon pages 122 and 123 of the report that I have cited.

Mr. KING. Nevertheless I take it that, under a proper interpretation of any treaty that might be entered into, Mexico would have to credit the United States with the return flow of the Gila River, whatever that was, as a part of the award made by the Government under the treaty.

Mr. HAYDEN. Yes. I have talked to gentlemen very familiar with irrigation conditions in Mexico. All of them are convinced that if the maximum irrigation development takes place in Utah, Wyoming, Colorado, New Mexico, and Arizona the net result can not fail to be otherwise than that there will be available at all seasons of the year a greater quantity of water for use in Mexico than now exists under the unregulated and undeveloped condition of the Colorado River, so Mexico is bound to benefit under any circumstances. So far as we in the United States are concerned, after we have once supplied our own land to the fullest extent we have no further use for the water, and, of course, would allow it to pass on down to Mexico.

Mr. President, I have noticed the senior Senator from California [Mr. JOHNSON] listening to my remarks, and I want to address myself to him for just a moment in order to point out to him, if I may, the immense advantage it would be to both of our States to arrive at a complete settlement of the Colorado River controversy.

A complete settlement of that controversy means immediate development of the stream, without question. The State of Arizona, once satisfied that her rights are recognized and protected, would, I assure the Senator, join heartily in bringing about the development, which in the end means so much to both of our States. To Arizona it would mean very little immediately. There might be a comparatively small demand for power for mining purposes in Mojave County, Ariz.

The bill as it is now before us does not carry any provision for the construction of any irrigation works in Arizona.

To determine the feasibility of the projects we have in mind in Arizona will require much engineering study of a detailed nature to determine just where the canals should be located and just what lands should be benefited. So that so far as the State of Arizona is concerned at the present moment, the enactment of this legislation means little or nothing. To the future of the State it means a great deal, and it is for the future that Arizona is making a fight and not for immediate benefits. The immediate benefits will come to the State of California so ably represented by the two Senators who are now listening to me.

The effect of the passage of the bill so far as the Imperial irrigation district is concerned would mean that immediately after it becomes a law it would add at least $50 an acre to every acre of land in that valley. It would mean that there will be held out a certainty that the flood menace and the drought menace will be removed in the course of the next seven or eight years when the dam is completed. It means that there will be assured for all time to come an ample water supply for irrigation of the land in the Imperial Valley. It means that additional areas almost as large will be brought under cultivation in the State of California. On top of that it means that there will be a certain water supply in the Colorado River for domestic use in the city of Los Angeles.

If I have stated the comparative benefits to the two States, certainly the Senators should agree with me that the thing to do is to compose our differences in a manner that will make that outcome certain.

I say to them in all seriousness that if the arrangement I have proposed, whereby the two States will assume equally the burden of supplying any deficiency of water that may be occasioned by treaty with Mexico, may be entered into, if the two States will agree to do that, if the State of California will surrender to the State of Arizona any claim or demand upon the waters of the Gila River which that State can not use under this project, then in my judgment ratification of the Colorado River compact may be assured and development may proceed.

May I inquire of either one of the Senators from California what fault they find with the plan I have outlined?

Mr. JOHNSON. Mr. President, has the Senator concluded?

Mr. HAYDEN. I shall be glad to yield to the Senator for the purpose of reply.

Mr. JOHNSON. When the Senator concludes, my colleague will present his views or I will present mine very briefly.

Mr. HAYDEN. For that purpose I yield the floor at this time.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator from Arizona if this is the only remaining or the remaining point of difference or controversy between Arizona and California touching the bill?

Mr. HAYDEN. There are other items that I consider to be of importance that will have to be disposed of by the Senate in the same manner in which we have disposed of such matters when we come to them.

Mr. SHORTRIDGE. They were not disposed of to my satisfaction.

Mr. HAYDEN. Nor to mine, either. Nevertheless the Senate, under the arrangement under which we are now proceeding, must determine those questions.

Mr. SHORTRIDGE. And its wisdom will rule.

Mr. HAYDEN. The issues must be disposed of one at a time.

Mr. JOHNSON. Mr. President, it is due perhaps entirely to a mental strabismus on my part that I have been unable, in the hour and 50 minutes I have listened to the junior Senator from Arizona, to understand just upon what he predicates the

pending amendment and the reasons which he advances in behalf of it. I am unable utterly to comprehend why, if the condition exists, which he has asserted, upon the Colorado River, anything at all is necessary of the character that he indicates to be written into the bill. I am unable to determine, sir, after listening very attentively to everything that has been said of my distinguished friend from Arizona, whether he is endeavoring to do something extremely generous for California or to assume a new and onerous burden in behalf of Arizona.

However that may be, there are certain reasons, it seems to me, why the amendment should not be adopted. The vice of it is, first, in the exemption of the tributaries of the State of Arizona, particularly the one to which he has just adverted, the Gila River, and, secondly, in the endeavor to divide, in the fashion which he says is a perfectly plain and perfectly frank and perfectly open division, the burden that may come to the Colorado River in relation to Mexican lands. He is quite right in one thing. The desideratum that ought to be a desideratum of everybody connected with this bill, whether he represents a State or whether he represents some outside influence, should be entirely the ratification of the Colorado River compact, and anything that will enable us to reach the ratification of that compact that is within reason I am very glad indeed to undertake and very glad indeed to accept.

The argument to me has grown somewhat stale, in relation to every amendment that is presented, that if we would accept that particular amendment then we may at some time in the future accomplish the desideratum that is ours and ratify the Colorado River pact. I need but refer to the very frank statement of the senior Senator from Arizona [Mr. ASHURST], for which I thanked him yesterday, in that regard, where he said, and said without equivocation in the slightest degree:

> If the Senator from California [Mr. JOHNSON] beguiles himself into the belief that because of the adoption of this amendment, opposition will relax as to other features of this bill, he is sadly mistaken. The adoption of this water division amendment will by no means remove the thorns and blades of injustice that would yet remain in the bill respecting power and other subjects, and we shall contend to the last, indeed we shall retire into the rocky passes of the Senate rules and there fight until we secure a bill which will, amongst other features, require a 7-State ratification of the so-called Santa Fe—or Colorado River—compact.

That was a statement frankly made by the senior Senator from Arizona yesterday. When upon every amendment it is insisted that if that particular amendment should be adopted we may reach a conclusion and a compromise, I confess, with the eloquence of the Senator from Arizona ringing in my ears, I receive such assurance with a wee bit of skepticism.

Let us see what the Colorado River compact relates to. I read first from the purposes of the Colorado River compact, Article I:

> The major purposes of this compact are to provide for the equitable division and apportionment of the use of the waters of the Colorado River system.

Now, what is the Colorado River system? The Colorado River system then, with meticulous care, is described in the compact in Article II:

> As used in this compact (a) the term "Colorado River system" means that portion of the Colorado River and its tributaries within the United States of America.

Again, sir, we find in Article III the reference to the Mexican situation, and I read it because I have in my hand at the present time the compact itself. We find in paragraph (c) of Article III the following:

> If, as a matter of international comity, the United States of America shall hereafter recognize in the United States of Mexico any right to the use of any waters of the Colorado River system, such waters shall be supplied first from the waters which are surplus over and above the aggregate of the quantity specified in paragraphs (a) and (b); and if such surplus shall prove insufficient for this purpose, then, the burden of such deficiency shall be equally borne by the upper basin and the lower basin, and whenever necessary the States of the upper division shall deliver at Lees Ferry water to supply one-half of the deficiency so recognized in addition to that provided in paragraph (d).

We find, therefore, that the compact toward which we are all devoting our efforts in order to get everybody satisfied and to unite in agreeing upon it provides for a division of the water of the Colorado River basin, and we find, sir, that in this compact the Colorado River basin embraces not alone the main stream, but embraces the tributaries of the main stream as well.

Sir, the distinguished Senator from Arizona [Mr. HAYDEN] read remarks that were made in answer to queries of his in writing of Mr. Herbert Hoover, who is to be inaugurated soon as President of the United States. He laid great stress upon Mr. Hoover's ability. He said Mr. Hoover knew more about the Colorado River and its intricacies and all the technical aspects of it than probably any other one man, and read to his purposes, as was his right, certain questions that he had propounded in writing to Mr. Hoover and answers which Mr. Hoover had in writing made to him.

But, Mr. President, in reading the queries that thus the Senator put in writing to Mr. Hoover, and which he says were answered so elaborately, so well, so intelligently, and so accurately, the Senator omitted to read one of the very first of the queries that thus he propounded to President-elect Hoover. This is one of the queries that he then propounded to Mr. Hoover that Mr. Hoover in writing answered to him:

> Question 4. Why was the term "Colorado River system" used in paragraph (a) of Article III, wherein 7,500,000 acre-feet of water is apportioned to the upper and lower basins, respectively?

That is the question propounded in writing by the junior Senator from Arizona to Mr. Herbert Hoover, who at that time was the president of the Colorado River Commission, and here is the reply that was made by Mr. Hoover to the distinguished Senator from Arizona:

> This term is defined in Article II—

I have just read Article II to Senators—

> as covering the entire river and its tributaries in the United States. No other term could be used, as the duty of the commission was to divide all the water of the river. It serves to make it clear that this was what the commission intended to do and prevents any State from contending that, since a certain tributary rises and empties within its boundaries and is therefore not an interstate stream, it may use its waters without reference to the terms of the compact. The plan covers all the waters of the river and all its tributaries, and the term referred to leaves that situation beyond doubt.

What is the Senator asking by this amendment? He is asking, indeed, that we amend the Colorado River compact by the action of the Congress of the United States; and then, followed to its logical conclusion, what must occur? Every State must in like fashion take up the amendment of the Colorado River compact, possibly, and thereafter amend it in conformity with this particular amendment.

Mr. HAYDEN. Mr. President, if the Senator from California will be kind enough to yield, I am sure he does not want to overstate my position. I am not asking that the Colorado River compact be amended in any particular.

Mr. JOHNSON. I am stating the effect of the Senator's amendment.

Mr. HAYDEN. I am asking that this effect be secured: That the State of California, which has and will have no interest in the Gila River, waive any claim to the waters of that stream.

Mr. JOHNSON. The Senator from Arizona is asking, in effect, sir, that the Colorado River compact be amended. I stand by that statement because it is entirely accurate. That would be the effect of the Senator's amendment if adopted, that the Colorado River compact shall be amended. No one here ought to wish that to be done, and when the definition is made by the compact itself as to what the Colorado River system means, we ought not to be required here to take as a condition precedent to legislation by the Congress of the United States another definition entirely. That in reality and in effect is what is sought by the amendment that is submitted by the Senator from Arizona.

There is, however, another thing in this amendment, too. It sounds well; how fair it is smilingly to say to us, "Why, we will divide this water into two parts, and each of us will bear a like burden." It is all well enough to say that the Gila River is this and the Gila River is that; that no water of the Gila River comes down under certain circumstances and too much water comes down under other circumstances; it is all well enough to say when the all-American canal ultimately shall be constructed that that all-Amercan canal will be above where the Gila River runs into the Colorado River and that there will be no occasion for differences at all; all those things may be well enough as matters of speculation; but the fact is, sir, that there comes from the Gila River 3,500,000 acre-feet, all of which is claimed by the State of Arizona—every drop of it. When Arizona says that she has but 2,800,000 acre-feet of water, to that must be added the Gila River with its 3,500,000 acre-feet, and it will then be found that Arizona has in reality two-thirds of the water of the Colorado River itself. If we should exempt, as possibly we may should this amendment be adopted, the Gila River from any burden or any servitude that might thereafter attach because of water to Mexico, we should then exempt a

large proportion of the water of the stream from bearing its part at all, and say the rest of the stream, owned in equal shares, shall bear the burden equally, so far as California is concerned and so far as Arizona is concerned.

Mr. HAYDEN. Mr. President, will the Senator from California yield to me?

Mr. JOHNSON. I yield.

Mr. HAYDEN. Taking the statement that there are three and one-half million acre-feet of water in the Gila River in Arizona, if Arizona obtains 2,800,000 acre-feet, from the Colorado the combined sum amounts to 6,300,000 acre-feet. The State of California has allocated to it——

Mr. JOHNSON. California has allocated to it 4,400,000 acre-feet of water.

Mr. HAYDEN. Is it the Senator's contention that when the time comes to supply water to Mexico the proportion borne by Arizona and California should be in that ratio?

Mr. JOHNSON. By no means; I am not asking that at all, because we hope by the storage in this dam to control Mexican water; and if the Senator from Arizona will follow the testimony of Mr. Hoover, which he has read to-day, he will find that that is one of the designs; but what I do not wish to do is to exempt the Gila River at this time and put the whole burden upon the two States subsequently in the proportion the Senator has indicated.

Mr. HAYDEN. The Senator is unwilling that California should divide the burden equally with the State of Arizona?

Mr. JOHNSON. Not a bit; but there would not be an equal division under the system the Senator proposes. It is a division, on the one hand, by which it is proposed to exempt from the stream, first, 3,500,000 acre-feet—and sometimes the people of Arizona have said that there were 6,000,000 acre-feet in that stream, as the Senator is well aware, but taking the lower figure, 3,500,000 acre-feet—the Senator is seeking to deduct that first and then have a division made of the waters that are in the main stream itself.

There is not any necessity for any action in this regard at all. It is an uncertain thing to do to-day; it is a thing from which no man can tell what the consequences may be; and it ought not to be done. Particularly, it ought not to be done in view of the definitions that are found in the Colorado River compact, and which I have read here. Sufficient it is, for us to accomplish that purpose subsequently when the dam shall have been erected. Into this bill write, if you desire, any notice to Mexico that you wish—and I want no water to go down there in excess of that which any law permits Mexico to have to-day—do anything in regard to international comity that you desire, but do not write into this measure in this fashion an exemption which would destroy in one aspect, the definitions that are contained in the Colorado River compact and would put an additional burden on the waters that are to bear the burden of Mexico. That is unjust and unfair from our standpoint.

Mr. HAYDEN. Mr. President, if the Senator will yield to me, I want to find out what he thinks is just and fair.

Mr. JOHNSON. I think it is just to do nothing in relation to that portion of this amendment. It has no place in this bill at all. What are the reasons why the Senator wants this amendment?

Mr. HAYDEN. The reason I want this amendment is that I may say to the people of Arizona that the State of California has agreed with them to furnish one-half of any water that may be demanded by Mexico.

Mr. JOHNSON. But the Senator does not say anything of the kind in the amendment. He says after exempting the tributaries in the State of Arizona that then the State of California agrees out of the main stream to bear one-half of the burden.

Mr. HAYDEN. Would the Senator be willing to have incorporated in this bill the simple proposition that California shall accept one-half of that burden?

Mr. JOHNSON. I do not want anything to interfere with the compact at all. There should be no interference with the compact.

Mr. HAYDEN. There would be no interference with the compact. The compact provides for an equal division.

Mr. JOHNSON. No; I am speaking as to the exemption of the tributaries in Arizona. Let them alone; let the situation remain as it is. We will bargain with Arizona ultimately or agree with her ultimately, as the case may be, but this is neither the time nor the place to alter the compact that is now the desideratum of everybody connected with this enterprise.

Mr. HAYDEN. If the Senator will permit me to say so, I am not seeking in any manner to interfere with the compact. The only effect that the compact can have upon his State is that that State will be bound to furnish one-half of the water which Mexico may receive under any treaty. Beyond that the State of California has no interest in the matter.

Mr. JOHNSON. Very well. The Senator's argument is that we are already bound, is it not?

Mr. HAYDEN. That any State approving the compact is bound.

Mr. JOHNSON. That it is already bound?

Mr. HAYDEN. Any State that has approved the compact is bound.

Mr. JOHNSON. Very well. The Senator has made it a condition precedent to this bill that we approve the compact, has he not?

Mr. HAYDEN. Yes.

Mr. JOHNSON. Very well. Then we are bound, are we not, just exactly as the Senator desires?

Mr. HAYDEN. You are bound; that is true.

Mr. JOHNSON. Very well. Then, what is the purpose of this amendment?

Mr. HAYDEN. The purpose of the amendment is to have my State also bound by the compact.

Mr. JOHNSON. It is a matter as to which the Senator wishes to put a burden upon his State?

Mr. HAYDEN. I want to be sure what that burden is.

Mr. JOHNSON. I leave to the Senate that argument.

Mr. HAYDEN. I want to be perfectly certain what the burden is. If it is to be a burden requiring my State to furnish more than one-half of the water that may be demanded by Mexico, my State will not accept that burden. If it is clearly understood that the burden shall be shared equally, my State will be willing to accept it. If the Senator from California is willing to make it certain that the State of Arizona and the State of California shall equally share the Mexican burden, just as that burden is equally shared between the upper and lower basins——

Mr. JOHNSON. That is provided for by the compact.

Mr. HAYDEN. Yes; but the compact divides the water between basins.

Mr. JOHNSON. That is true.

Mr. HAYDEN. It does not follow down and divide it between States. The State of Arizona refused to ratify the Colorado River compact, "because" it said, "the State of Arizona needs the same protection against the State of California as does the upper basin."

Mr. JOHNSON. Does not Arizona get that protection when the compact is ratified by California?

Mr. HAYDEN. No; because——

Mr. JOHNSON. It does not? Is not the Senator in error there?

Mr. HAYDEN. I am not in error at all.

Mr. JOHNSON. The moment that California ratifies this compact does not Arizona get every particle of protection that it is possible to accord; and, not only that, but is there not put upon California the burden of enacting legislation by which it may never be permitted in the future to utilize more than 4,400,000 acre-feet of water for its people, no matter how great a space of time may elapse?

Mr. HAYDEN. The Senator fails to understand that there are two elements in this water controversy. One is how the seven and a half million acre-feet shall be divided in the lower basin. The Senate has settled that by a vote—that California may have 4,400,000 acre-feet of that water. It follows logically that if that demand is to be conceded, as everybody agrees, the remainder is 2,800,000 acre-feet for Arizona. That settles that part of the controversy.

Mr. JOHNSON. How much from the Gila?

Mr. HAYDEN. Whatever there is in it. That is ours anyhow.

Mr. JOHNSON. It is yours anyhow?

Mr. HAYDEN. Yes.

Mr. JOHNSON. Then your amendment still is of no value. If it is yours anyhow and you already own your tributaries, what is the use of an amendment exempting them?

Mr. HAYDEN. I want to be sure to keep it free from any burden or claim by Mexico, and I want to be sure in connection therewith——

Mr. JOHNSON. But you just said that there could be no claim upon it, did you not?

Mr. HAYDEN. There is no claim as between the States signatory to this compact.

Mr. JOHNSON. There is no claim by the States signatory to this compact. Can there be any other claim upon the waters of the Gila?

Mr. HAYDEN. Yes; there can be.

Mr. JOHNSON. Claims from what?

Mr. HAYDEN. From Mexico. That is the only place.

Mr. JOHNSON. All right. Now, you want to relieve the Gila from that?

Mr. HAYDEN. I do.

Mr. JOHNSON. How much water does Arizona get from the Gila?

Mr. HAYDEN. Let us take the Senator's own figures.

Mr. JOHNSON. No; I am asking you. My figures are, at the minimum, 3,500,000 acre-feet.

Mr. HAYDEN. Yes.

Mr. JOHNSON. All right. Now, in the division of water that the Senate saw fit to impose yesterday Arizona had 2,800,000 acre-feet, and 3,500,000 acre-feet from the Gila, did it not?

Mr. HAYDEN. Correct.

Mr. JOHNSON. Making 6,300,000 acre-feet. California was given, with its claims and its perfected rights, 4,400,000 acre-feet. That is correct, is it not? All right. Now, you wish to deduct from the burden that is imposed by water that goes to Mexico, first, 3,500,000 acre-feet, do you not?

Mr. HAYDEN. I do.

Mr. JOHNSON. Then you wish to put upon California and Arizona—one of them having then 2,800,000 acre-feet and the other 4,400,000 acre-feet remaining—the burden in equal shares, do you not?

Mr. HAYDEN. I do.

Mr. JOHNSON. All right. That is just what I wanted to demonstrate.

Mr. HAYDEN. The Senator is unwilling to do that?

Mr. JOHNSON. Of course I am unwilling to do that.

Mr. HAYDEN. The Senator is unwilling, notwithstanding the fact, which everyone should recognize, that it would be utterly impossible in time of drought to deliver to Mexico any water out of the Gila River or any other Arizona tributary—but I am confining myself to the Gila—to comply with the demands of the treaty. Therefore the Senator wants to place into the calculation of what water shall go to Mexico three and a half million acre-feet of the Gila River, when it is not subject to division and could not be delivered to Mexico; but he adds it in for what purpose? For the purpose of saying that the main stream, which can be divided, shall be divided in the ratio of 6,300,000 acre-feet to Arizona and 4,400,000 acre-feet to California.

Mr. JOHNSON. Let us say, just by way of example, that 2,000,000 acre-feet would be utilized by Mexico. I am unable to say how much it would be; but a while ago some Senator upon the floor used that as an example—that 2,000,000 acre-feet might be ultimately allotted to Mexico. Under your plan, then, 1,000,000 acre-feet would have to be borne by California and 1,000,000 acre-feet by Arizona, would it not?

Mr. HAYDEN. Yes.

Mr. JOHNSON. That would leave, then, for California 3,400,000 acre-feet.

Mr. HAYDEN. And for Arizona, in the main stream, 1,800,000.

Mr. JOHNSON. Yes; with 3,500,000 added thereto from the Gila.

Mr. HAYDEN. It could not be added thereto. It is physically impossible.

Mr. JOHNSON. Wait a minute. What would be California's allotment of water, then? It would have, then, 3,400,000 acre-feet upon any such proposition. Now, the Senator knows, and he knows just as well as I do, that not only are there perfected water rights exceeding that, but that it is an utter, absolute impossibility for us to go on with the plan that is ours in relation to Imperial Valley and in relation to water for domestic purposes for the coastal cities with that quantity of water.

Mr. HAYDEN. I want to say to the Senate that I have offered this amendment in the hope that the State of California would be willing to do as the two basins did—equally divide this burden. The State of California is unwilling to do that. The State of California insists that the ratio shall not be half and half, but shall be on the basis of 6,300,000 to 4,400,000—60-40 instead of 50-50. That is all the difference that there is between us on this issue.

Mr. PITTMAN obtained the floor.

Mr. JONES. Mr. President, will the Senator from Nevada yield to me for just a moment to enable me to give a notice?

Mr. PITTMAN. I yield.

Mr. JONES. I desire to give notice while there are so many Senators present that when we adjourn to-day we shall move to adjourn until 11 o'clock to-morrow.

Mr. JOHNSON. Mr. President, in that connection permit me to say that that is done for the purpose of enabling the appropriation bill to be taken up at 11 o'clock to-morrow. After to-morrow, and after a long session to-morrow if it be necessary, we shall, if I am able to have the assent of my colleagues in that regard, recess only from day to day until this matter be concluded.

Mr. PITTMAN. Mr. President, the Senate is apt to forget that any States are interested in this legislation except the States of Arizona and California. As a matter of fact, one of the reasons that started this whole compact was the realization of four States on the upper Colorado River that unless this impounding of water at Boulder Dam was regulated, when they got ready to use the water of the Colorado River in the future there would not be any; it would all be appropriated in the lower basin. Consequently, we started out in 1921, with the aid of Congress, which authorized the seven Colorado River States to try to agree on the distribution of water and the terms upon which it would be used.

Now we come down to this proposition:

The Senate has already determined upon the division of water between those States. How? It has determined how much water California may use, and the rest of it is subject to use by Nevada and Arizona. Nevada has already admitted that it can use only an insignificant quantity, 300,000 acre-feet. That leaves the rest of it to Arizona. As the bill now stands it is just as much divided as if they had mentioned Arizona and Nevada and the amounts they are to get; but there is just one other phase to the matter. The amount that either one of those States is entitled to under this legislation may be reduced if at some future time it is agreed, by treaty or contract or otherwise, that a certain amount of this water should, in justice, be used in Mexico.

Personally, as I have said before, I think the amount that can be used in Mexico is insignificant. I think, also, that under the comity that exists between nations the only water that Mexico could claim would be water that she has appropriated from the natural flow of the stream, and that she could claim none of the benefits of the water increased by our own impounding works. That, however, is not the question. The question is one of satisfying the States.

Why should we satisfy the States? Because if you do not satisfy a State as to the exact thing that is going to happen to it under legislation, it will oppose the legislation.

As a matter of fact and as a matter of law, I do not believe that the Gila River is in any danger whatever from any demands for water in Mexico for two reasons: In the first place, there is bound to be enough overflow or return flow to satisfy that demand. In the second place, the Congress of the United States has no constitutional authority through the passage of any act to take away a vested water right. If the people of Arizona on the Gila River have put to beneficial use the water of that stream—and they claim that they have—then there is no power in Congress to take it away from them, nor would there be any power by treaty to take it away from them. A treaty certainly is nothing more than a statute; and in my opinion we could not make a treaty that would violate the Constitution of the United States any more than we could a statute. That, however, is not the question. The question is, Are we going to reach a settlement with Arizona?

A majority of the people of Arizona believe that there is danger of their vested rights in water, of the water that they are actually using, being taken in part to supply Mexican demands. As I have said before, I do not think there is any ground for that belief; but if that is the belief of the majority of the Legislature of the State of Arizona and their governor, then we have, if possible, to remove that fear before we can get their ratification.

Do we want their ratification? Is their ratification necessary to this legislation? I think it is. Why?

This bill provides that no construction shall take place—nothing shall be done until six of the seven States, including California, ratify. Where are we going to get the States to ratify? We had six States that ratified the 7-State agreement; but since that ratification the Legislature of Utah has solemnly annulled its ratification. Now we stand in the position that there are no six States in the humor at the present time to ratify. Utah has refused to ratify the agreement and is out of it. Arizona has refused to ratify it. We must get one of those States to ratify in order ever to work under the bill if we pass it—one of them. We must either get Utah back or we must get Arizona.

As a matter of fact, there have been rumblings in the State of Colorado against the safety of a 6-State compact. Personally, I do not agree with them. I do not think there is any ground for any fear. I think the 6-State compact protects the upper basin; but there is a fear there, nevertheless, and a fear expressed by some very able lawyers in Colorado.

Colorado might pull out of a 6-State compact. It would be a splendid consummation if we could get all seven States to agree with regard to this whole legislation.

Let us see what we are up against. There is no question but that we have settled satisfactorily to all States the water question. Now we have gotten down to the question of liability to Mexico, which, while to my mind it amounts to nothing, arouses a great deal of fear in the minds of some people in Arizona.

Admitting that all of the water of the Gila is now being put to use, except the return flow—and in this amendment the return flow is subject to the demands of Mexico—if it is all put to use, as a legal matter, that can never be disturbed. The Senator says, "Why mention it if it can never be disturbed?" There is only one reason I know of, and that is to overcome the fears of the people who do not believe as I do, that the fears are groundless.

Our engineer in Nevada, Mr. Malone, agrees with Mr. La Rue with regard to the return flow of the river. At the present time it is at least five or six hundred thousand acre-feet. It will undoubtedly be increased greatly with further irrigation from the Colorado River water. The Department of the Interior has estimated that there never can be, from the waters of the Colorado, over three or four hundred thousand acres irrigated, and that not by subsurface pumping but by diversion. There is such a limit on it.

As I understand this amendment, Arizona to-day has practically allocated to it 2,800,000 acre-feet of water in the main Colorado River. It is there for their use. As I understand it, they are willing to give up any amount that may be necessary to meet the demands of Mexico from that 2,800,000 acre-feet, provided it is matched by an equal amount of water out of California's allocation of 4,400,000 acre-feet.

In the circumstances, I am exceedingly anxious to bring about a condition that will cause the Legislature of Arizona to ratify the 7-State agreement. I am afraid if we do not make that possible, we may go on trying to get a 6-State agreement for a year or so and maybe find we will have to come back here and try to get legislation for a 5-State agreement or something else.

I would not ask of California to bear any additional burden over what Arizona bears. I can not see that it does. I can not see that there is any danger. But there is one thing in this amendment—and I want the attention of the Senator from Arizona to this—which I do not like. I do not like the form of it. I do not like the method of getting at it. It provides:

> The said ratifying act shall further provide that if by tri-State agreement hereafter entered into by the States of California, Nevada, and Arizona the foregoing limitations are accepted and approved as fixing the apportionment of water to California, then California shall and will therein agree.

That does not seem to be the regular form of entering into an agreement, to have California first proceed to limit herself as to what she will do as a consideration for the passage of this measure. I think it should be a mutual agreement between the three States. I do not think we should bind up this tri-State agreement with ratification. I did believe that it was essential to have California limit herself as to the amount of water she would take in a ratification, in view of the fact that possibly Arizona would never ratify. But this is attempting to have the State of California in advance, as a condition of the taking effect of this measure, state that she will enter into certain agreements with Arizona. In other words, it is coercive.

Mr. HAYDEN. Is it any greater coercion, if the Senator will permit me, than for the State of California to insist that, as a condition to her ratification of the main contract, Congress shall do certain things, to wit, provide storage to the extent of 20,000,000 acre-feet of water in the main stream?

Mr. PITTMAN. I do not consider that coercion.

Mr. JOHNSON. It was impossible to hear what the Senator from Arizona said. All I heard was, "the State of California."

Mr. HAYDEN. I withdraw the remark, because I do not want to have any remark I might make misinterpreted.

Mr. PITTMAN. I do not think that the demand on the part of California that there should be a storage of at least 20,000,000 acre-feet of water is coercion. I think it is essential, as shown by the report of the commission. A demand for what is essential is not coercion.

This is what I suggest, that we provide for an agreement between the three States, and let them enter into it if they want to, but if they do not want to, let them stay out of it. That is not coercing a State.

This is what I propose, to strike out all of the Hayden amendment down to and including the word "agree," on page 1, in line 6, and in lieu thereof insert the following:

> The States of Arizona, California, and Nevada are authorized to enter into an agreement, which shall provide.

Then go ahead and put down the provisions of the Hayden amendment, and at the end of the Hayden amendment put in a seventh paragraph, which shall read:

> Said agreement to take effect upon the ratification of the Colorado River compact by Arizona, California, and Nevada.

The Constitution requires that before States may enter into an agreement they shall be authorized by Congress to enter into the agreement. I start out by having Congress, by this act, authorize an agreement. I make the agreement specific by reason of the fact that otherwise it might be held that they would have to come back to Congress for approval of the agreement they entered into. They approve a specific agreement in advance and authorize it. The terms are set out. It does not take effect unless all three States ratify the Colorado River compact.

Mr. HAYDEN. It should not.

Mr. PITTMAN. It should not. It does not require California to enter into that agreement. It does not require Arizona to enter into that agreement. It does not require Nevada to enter into that agreement. If they do not enter into that agreement, then we have the bill as it stands. Whatever States do not ratify are not bound by this measure. That, then, becomes an optional matter and not a coercive matter.

I am confident, however, that if the State of Arizona were willing to enter into such an agreement she would, of course, ratify the Colorado River compact, and if she were not willing to ratify the Colorado River compact she would not want California bound by these conditions, because she would not be in the 7-State compact, and would have nothing to do with it.

Therefore I say that the fair and practical way is to set out the terms of an agreement which the Congress of the United States would be satisfied for the States to enter into, and say that if they see fit to enter into it they may, but it shall not become effective as a subsidiary agreement to the main 7-State compact until those three States do ratify the 7-State compact.

I offer that as a suggestion. I do not want to interfere with the vote on this amendment, but I would like very much to have it in a voluntary agreement, rather than impose it upon California as a condition of the ratification.

Mr. HAYDEN. Mr. President, I am not at all insistent that my amendment be adopted in the exact language in which it is offered. The suggestion made by the Senator from Nevada is entirely satisfactory to me.

Mr. PITTMAN. Then I offer it.

The PRESIDING OFFICER. The amendment would be an amendment in the third degree, and it would not be in order.

Mr. HAYDEN. Have I the privilege of perfecting my amendment so as to carry out the suggestion of the Senator from Nevada?

The PRESIDING OFFICER. The Senator can do that.

Mr. HAYDEN. Then I am pleased to do that.

Mr. PITTMAN. I will bring the amendment to the desk.

Mr. BRATTON. May I inquire of the Senator from Nevada, if I may, what he thinks of establishing the precedent of Congress consenting to and approving an agreement which is not in existence, and which we have not seen, and of which we do not know the contents? Some dispute might arise as to the interpretation of the agreement that was executed. As I understand, the proposal of the Senator from Nevada is twofold; first, to consent in advance that the three States may enter into this agreement, and to provide that it shall become effective when it has been entered into and the States have ratified the compact.

Mr. HAYDEN. If the Senator will pardon me, I think on reflection the Senator from Nevada will agree that the point made by the Senator from New Mexico is sound. The Constitution of the United States provides that States may not make compacts without the consent of Congress. Congress must necessarily, then, have the compact before it in order to consent to it.

Mr. PITTMAN. That is just exactly the reason why I put the exact terms in the measure, because it might be held, as the Senator is now arguing, that if they did not know what the compact was going to be, they might have to come back for approval. But when you put the exact terms in it—which I have attempted to do, because I have put the exact language in, and if the terms are not sufficiently clear they should be made so by the Senator from Arizona—when you authorize two States to enter into a contract to divide 7,500,000 acre-feet of water, "as follows, to wit," and mention the amount, you can not say that the Congress of the United States has not consented to that agreement.

Mr. BRATTON. There might arise some controversy as to the interpretation of the agreement when and as it is executed.

Mr. PITTMAN. That would be a matter for the courts and not for Congress. When Congress uses certain language, there may be a vast difference of opinion among Senators as to what the courts will construe it to mean; but when they use the exact language which the Congress of the United States says they may use in an agreement, then the Congress is supposed to know what the agreement means.

Mr. BRATTON. But if the Congress consents in advance that the three States may enter into an agreement, and they enter into an agreement, and it is submitted back for the Congress to approve, then it is for each Senator to determine for himself what he thinks is in the agreement and not what some court may thereafter determine. Each individual Senator must exercise his own judgment as to what the agreement is and what its results will be.

Mr. KING. He exercises that judgment now.

Mr. PITTMAN. We are just interpreting right now a constitutional provision. That provision simply states that the States may not enter into an agreement with each other without the consent of Congress. I admit, for instance, that if Congress should pass a particular bill saying that the States of Arizona, California, and Nevada might enter into an agreement, it might be held that that agreement would not be effective until subsequently approved by Congress. But when the Congress of the United States consents that the States of Arizona, California, and Nevada may enter into an agreement, "as follows, to wit," and sets out in haec verba the agreement, it would in my opinion seem absurd to say that they had to come back to Congress for approval in doing exactly what the Congress had already decided they should or might do. It would be an absolute absurdity.

I have simply changed the form of the amendment. Instead of making it a condition of ratification on the part of California, I have simply provided that the States of Arizona, California, and Nevada may or may not enter into an agreement "in the following words, to wit," and so forth; that if they do enter into that agreement it shall take effect when each of those States has ratified the Colorado River compact. The only legal question involved is whether or not Congress passing a bill and setting out the agreement into which they must enter, they would have to come back and have Congress say it was all right.

Mr. KING. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. KING. Let me read the constitutional provision:

> No State shall, without the consent of Congress, lay any duty of tonnage, keep troops, or ships of war in times of peace, enter into any agreement or compact with another State—

And so forth.

If a State wanted to keep troops, it would have to get consent, not after it had the troops there, but in advance. If two States want to make a compact to enter into an agreement, they certainly can get the consent of Congress in advance, and if Congress is advised as to the character of the agreement, just as the Senator from Nevada has stated, I interpret this language to mean that they can get the approval of Congress in advance just as well as subsequently.

Mr. SHORTRIDGE. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. SHORTRIDGE. I understand the position of the Senator from Nevada to be that the Congress may grant terms, if it consents to the entering into of a given contract, when that contract is specifically described or set out, or it may subsequently give its ratification or consent to that contract either before or after it has been entered into by the several States.

Mr. PITTMAN. Undoubtedly that is correct.

Mr. SHORTRIDGE. I fully agree with the Senator.

Mr. PITTMAN. For instance, Congress, when it authorized the seven States to enter into what we call the Colorado River compact, did not know what they were going to enter into, so it was expressly provided in the consent that the Colorado River compact should not take effect until after it was submitted to Congress and approved. The reason for that is apparent. Congress did not know what it would be, but authorized them in advance to enter into the agreement, not to take effect until approved by Congress, realizing that unless they had incorporated that provision it might be questioned whether or not the consent has not already been given.

But in this case that is unnecessary, because the Senator from Arizona [Mr. HAYDEN] in his amendment has set out the exact terms of any future tri-State compact between Arizona, Nevada, and California. He has set it out in exact language so that we can determine right now whether it is to the interest of the United States Government or not. We can determine now every fact we could determine after it was entered into. Consequently the necessity for coming back for ratification does not appear.

What I objected to, as I said once before, was that these conditions or terms of an agreement, involving her ratification of the 6-State compact, were imposed upon California as a condition of the going into effect of this legislation. I contend that it is not a matter that should be imposed upon any State as a condition of ratification of this legislation. I believe that it is a very proper statement of an agreement between these States when we leave it to the States to adopt or not as they see fit. I think it is entirely proper to provide, as a condition of such an agreement coming into effect, that the three States shall have ratified the 7-State compact before it comes into effect, because the main object of the agreement is to bring about an agreement among the seven States.

It is supposed to be a subsidiary agreement to the general agreement among the seven States, and no subsidiary agreement, taking the benefits of another agreement, should be permitted until those getting the benefits of the subsidiary agreement have become parties to the main agreement. So that is in the amendment as it is now accepted and modified by the Senator from Arizona himself.

Mr. WATERMAN. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. STEIWER in the chair). Does the Senator from Nevada yield to the Senator from Colorado?

Mr. PITTMAN. I yield.

Mr. WATERMAN. Is it not true that the entire controversy now pending in this body arises out of the fact that the three States of the lower basin can not agree as to the subsidiary arrangement under the 7-State compact?

Mr. PITTMAN. That is entirely correct.

Mr. WATERMAN. Then, ought we not to use every effort and ever endeavor to so bring about legislation that there is a reasonable probability that Arizona and California may come into accord?

Mr. PITTMAN. I think it is our duty. I have not anything further to say. I have explained my ideas. The amendment is in its present form because it has been modified by the Senator from Arizona. I can not see wey any one of the three lower States should object to such an amendment. It is not imposed as a condition of ratification. It is purely optional with them whether they want to agree to it or not.

Mr. BRATTON. Mr. President, I want to ask the Senator from Nevada whether, in his opinion, it is good policy, assuming that we have the power so to do, to provide in advance what shall be embodied in an interstate or tri-State agreement? In other words, the Federal Government is a sovereign government. Each State is a sovereign State. I seriously doubt the wisdom of the Congress embarking upon the policy of consenting in advance to the execution of an agreement or compact between States with such conditions, provisions, or limitations implied. In other words, I think what the Constitution contemplates is that when States desire to negotiate and agree among themselves, the Congress shall give its consent in advance that they may do so, and when they have done so and submit the agreement here, the Congress shall either approve or disapprove what the States have done.

But I seriously question the wisdom of the policy. No one in this body is more anxious than I am to see the three States in the lower basin agree mutually among themselves, but I doubt whether we can afford to embark upon such a policy in order to secure that result and that outcome. Unless the suggestion is mutually satisfactory to the three States I doubt very much the wisdom of our doing such a thing.

I simply suggest that. I do not want to delay action on the bill. I want to expedite it in every way. But I am unwilling to have us take the step without pointing out the inherent danger that I believe I see in the establishment of such a precedent. We ought to consent that the three States treat among themselves, unhampered and unrestricted by the Federal Government. Then when they have reached an agreement let them submit it here for the consent of the Federal Government. It partakes too much of hampering the States in the exercise of sovereignty. That alone would cause me to vote against the amendment, because I shall never give my consent to the Federal Government undertaking to control the States in negotiating with each other by saying, "We point out in advance what you must do; you must put this and that in your agreement; you must embody this and that in your agreement."

When we are dealing with sovereignties we should be exceedingly careful to keep within the scope of our authority. So far as I know, the Federal Government has never done such a thing. I may be in error about it, but I think the usual course is to

consent that the States may enter into a compact without even indicating what shall be contained in the agreement, and then when it has been executed and reflects the combined agreement of the parties thereto and is submitted to Congress, we either approve or disapprove it. To say that they may negotiate and agree under limitations of this kind, in my judgment, transcends the proper functions of the Federal Government. This alone would control my vote upon the amendment if all other considerations were waved aside. I do not believe we can afford to pay this price in order to bring the three States into agreement.

Mr. PITTMAN. Mr. President, this question has been here now for seven years. The seven States have been attempting to reach an agreement. Apparently the Senate of the United States is about to reach an agreement as to what ought to be done. The Senate has already stated exactly what it thinks about the water. That might have been an imposition on some States. Why do we not leave it to California to say how much water she shall take out of the river or leave it to Arizona to say how much water she shall take out of the river? It is because it happens to become a duty of the United States Senate to settle this matter, and that is the reason.

Has the State of California or Arizona or Nevada asked for any different kind of an agreement than the one that is here? Does the State of New Mexico desire that there should be a different agreement between California, Arizona, and Nevada than the one that has been suggested? If so make another suggestion. Why be so fearful with regard to the imposition upon Nevada, Arizona, and California when the representatives of neither one of those States so far have got up here and raised such an objection? California has not asked for any particular form of agreement between the States; Nevada has not asked for any particular form of agreement between the States; Arizona has not asked for any particular form of agreement between the States.

Arizona, however, has stated that unless certain things are agreed to by California this bill shall not go into effect. I objected to that. I do not think that California alone should be made to agree to anything. I think, however, that if we have in mind a certain agreement that might be entered into by the three of them, if something better shall be submitted we ourselves ought to submit it. That is all that is happening here.

We have already decided as to the division of the water, and we say that if the States wish they can enter into a subsidiary agreement confirming that. We have already agreed that the 7-State pact shall be binding.

Mr. JOHNSON. Mr. President, may I inquire of the Senator whether with or without the qualifying words, which the Senator has courteously inserted at the beginning of his amendment, the States could not do exactly what is suggested?

Mr. PITTMAN. The States could do just exactly what is suggested, except that they would have to come back for ratification unless the terms of the agreement were stated. I understand the constitutional provision as a safeguard to the Federal Government and as a safeguard to the Union to prevent the States from entering into agreements that are contrary to the spirit of the Union.

Mr. JOHNSON. Let me see if I have the words of the Senator's amendment. I simply took them down when the Senator was reading them:

The States of Arizona, California, and Nevada are authorized to enter into an agreement which shall provide—

Is that the beginning of the amendment?

Mr. PITTMAN. Yes.

Mr. JOHNSON. That is accurate, is it?

Mr. PITTMAN. Yes.

Mr. JOHNSON. Why does not the Senator make the language a little elastic?

Mr. PITTMAN. In what way would the Senator suggest that that be done?

Mr. JOHNSON. I would not confine the agreement to the specific words of the amendment.

Mr. PITTMAN. In that event, it is possible that the Senator from New Mexico [Mr. BRATTON] is right, that if we give a general power to two States to contract with regard to a certain matter it will be necessary for them to come back to Congress after they have contracted to ascertain whether or not the terms of the agreement are in conflict with our form of government.

Mr. BRATTON. If the Senator from Nevada will allow me, I would yield to no man more quickly upon a question of that kind than I would to him. If there is any man in the body who would dissuade me from the opinion formed and expressed, it would be the Senator from Nevada; still, notwithstanding his observations, I repeat with emphasis that I am not persuaded.

Mr. PITTMAN. I am merely trying to facilitate this matter.

Mr. JOHNSON. What is the concluding sentence of the amendment of the Senator from Nevada?—

that "said agreement shall take effect upon ratification."

Mr. PITTMAN. Upon ratification of the Colorado River compact by the States of Arizona, California, and Nevada.

Mr. KING. That is the agreement between the three States.

Mr. PITTMAN. It is not to take effect until that shall happen.

Mr. JOHNSON. I am merely curious. I have not any objection to the amendment, as I understand it. My understanding is that the States have the right to do this without any authorization.

Mr. PITTMAN. I do not think they have, but there may be a difference of opinion as to that.

Mr. JOHNSON. I am under the impression that the States could get together at any time and reach an agreement and then come to Congress for the ratification of such agreement.

Mr. PITTMAN. Yes; I think that is true.

Mr. JOHNSON. If they could meet at any time and reach an agreement, they could reach an agreement on the terms of this amendment or otherwise and come back to Congress for ratification.

Mr. PITTMAN. Undoubtedly.

Mr. JOHNSON. Then the States simply being authorized to enter into the agreement, the amendment means merely that they are authorized to do that which they are already competent to do without such authorization.

Mr. PITTMAN. The authorization would not be complete. My view is that if the Congress of the United States shall authorize the States of Nevada, California, and Arizona to divide 7,500,000 acre-feet of water in a certain way, and they agree to do that, such agreement would end it; they would not have to come back here. On the other hand, my thought is this, I will say to the Senator from California: Assume that we pass this bill this week, which as I hope we may; we shall adjourn on March 4; we shall probably not again meet until sometime in the fall, if we have a special session, but in the meantime the legislatures of these States will be in session.

If we could confer on those States the authority to enter into this particular agreement, and the legislatures of those States, being in session, should approve it, and the Legislature of Arizona should then ratify the 7-State pact, construction work on the dam could be started as fast as they could get machinery out there. On the other hand, if we wait until after we adjourn to have an agreement between these States and they have to come back six months from now and submit that agreement to ascertain whether it will be ratified or not ratified, for the Congress would not know what was in it, then the work could not start, and the States in question would have to have their legislatures meet again for the purpose of ratifying the 7-State agreement. I think that we would save months of time by this amendment. If California and Nevada and Arizona do not like this agreement, they do not have to approve it. If they want to amend it they can do so, and ask approval of the amended agreement.

Mr. JOHNSON. Is it not possible so to word the authorization that amendments may be made?

Mr. PITTMAN. The only reason I have for not doing so is that suggested by the Senator from New Mexico [Mr. BRATTON], that if the Congress of the United States merely gives authority to enter into a contract without knowing what the contract contains, it would then become necessary to send it back to Congress for ratification. I do not know as to that. I know that it is a general proposition that when consent is given to do something there must be something definite and certain.

Mr. JOHNSON. Yes.

Mr. PITTMAN. Otherwise the consent is only a permit to start in, and then it is necessary to come back and have it approved. That is all I have in mind. I am trying to save six or seven months' time. I may not be accomplishing anything; but Arizona seems to be wedded to a certain plan. If the California Legislature does not like it, it does not put us in any worse fix than we are in if we do not adopt it.

Mr. JOHNSON. Would we not be, though?

Mr. PITTMAN. I think not, because if the legislatures of the three States adopt it, they could start acting on the 7-State ratification instantly.

Mr. JOHNSON. Here is the difficulty which strikes me in the matter: First of all, we are authorizing the doing of something that already the States have the right to do. Secondly, we are stating the things that the three States are to do, and we are making a sort of Procrustean bed upon which they must

lie in the determination of matters that are suggested within this amendment, without any elasticity, without any opportunity to alter phraseology or possibly terms. What is done by the amendment is to put the impress of the Federal Government upon the necessity of agreement, and, if one of the States should not agree, leave that State in a position which would not be particularly enviable.

With the distinct understanding that this authorization is one that is after all an authorization that is wholly unnecessary, because the parties may, in any fashion they desire, meet together and contract and subsequently come to Congress for ratification of that contract; that there is no impress of the Congress upon the terms, which might be considered coercive to any one of those States, I am perfectly willing to accept the amendment.

Mr. PITTMAN. There is nothing necessary at all, of course, so far as the adoption of this amendment is concerned, unless the element of time is considered valuable. If it should happen, mind you, that two weeks from now the legislatures of the three States, being in session, should be perfectly satisfied with the terms of this proposed agreement and should ratify it, they could on the next day also ratify the 7-State agreement. On the other hand, if we do not adopt this amendment now, but allow the three States to meet together and agree and they should agree, then it will be necessary for them to come to Congress next fall; and we might find that Congress next fall would not ratify the agreement entered into by the three States, might we not?

Mr. JOHNSON. That is possible.

Mr. PITTMAN. Suppose, for instance, a majority of the Senate found there were certain things in the agreement it did not like.

Mr. JOHNSON. That is all right; but what I want to make clear is that this amendment shall not be construed hereafter by any of the parties to it or any of the States as being the expression of the will or the demand or the request of the Congress of the United States.

Mr. PITTMAN. Exactly, not.

Mr. JOHNSON. Very well, then.

Mr. PITTMAN. It is not the request of Congress.

Mr. JOHNSON. I accept the amendment, then.

Mr. TRAMMELL. Mr. President, I desire to make a privileged motion.

Mr. KING. May we not dispose of the amendment first, if the Senator will permit?

Mr. TRAMMELL. I have not occupied more than a very few moments and the matter I have in mind is one of importance.

Mr. KING. I withdraw the request that we have a vote on the motion.

Mr. TRAMMELL. I will take but a moment or two, if the Senator will pardon me. If, however, I can be recognized afterwards, I will be very glad to have the amendment disposed of.

Mr. PITTMAN. Very well; I think we are ready to dispose of it. The Senator from California has accepted it.

Mr. PHIPPS. Mr. President, as I understand, this amendment is to the one offered by myself and which is now the pending amendment. I desire to say that I am willing to accept the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Arizona, as modified, to the amendment of the Senator from Colorado.

The amendment as modified to the amendment was agreed to.

Mr. KENDRICK. Mr. President, I desire to present a request for a unanimous-consent agreement and ask for its immediate consideration.

Mr. ASHURST. Let it be read.

The VICE PRESIDENT. The Secretary will read the proposed unanimous-consent agreement.

The Chief Clerk read as follows:

Ordered, by unanimous consent, That after the calendar day of Wednesday, December 12, 1928, no Senator shall speak more than once nor longer than 15 minutes upon the bill H. R. 5773, the so-called Boulder Dam bill, or upon any amendment proposed thereto.

Mr. JOHNSON. What date is fixed there?

The VICE PRESIDENT. After the calendar day of Wednesday, December 12, 1928.

Mr. PITTMAN. I should like to add to that one thing.

Mr. JOHNSON. Is not that to-day?

Mr. PHIPPS. To-day; yes. It takes effect after to-day.

Mr. ASHURST. Mr. President, let the proposed agreement be read once more.

The VICE PRESIDENT. The proposed unanimous-consent agreement will be restated.

The Chief Clerk restated the proposed agreement.

Mr. SHORTRIDGE. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. Is there objection to the proposed unanimous-consent agreement?

Mr. SHORTRIDGE. For the moment I object until advised how it will affect proposed amendments.

Mr. McKELLAR. Mr. President, may I make a suggestion to the Senator from Wyoming? Will he not hold this over until to-morrow?

Mr. KENDRICK. If it seems desirable to delay the matter for one day, I will do so. I think we have had sufficient time to discuss this measure, and I believe that we ought to agree to some limitation on the discussion.

Mr. JOHNSON. The Senator from Ohio [Mr. FESS] suggests that we make it take effect to-morrow—say, at 2 o'clock to-morrow.

Mr. KENDRICK. I have no objection to that.

Mr. ASHURST. Let the proposed agreement be read as modified.

The VICE PRESIDENT. The Secretary will state the amendment.

The Chief Clerk read as follows:

Ordered, by unanimous consent, That after the hour of 2 o'clock on the calendar day of Thursday, December 13, 1928, no Senator shall speak more than once nor longer than 15 minutes upon the bill H. R. 5773, the so-called Boulder Dam bill, nor upon any amendment proposed thereto.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the unanimous-consent agreement is entered into.

Mr. JONES. Mr. President, may I give a notice while there are so many Senators here? I announced a short time ago that when we adjourned to-day I should move to adjourn until 11 o'clock to-morrow; but in view of this agreement I see no necessity of that. So, when the time comes for adjournment, we will adjourn until 12 o'clock to-morrow.

Mr. McKELLAR. Mr. President, the objection to that is that if that is done it would have been just as well to enter into the agreement for to-day. It will give no time to-morrow for the consideration of the Boulder Dam bill.

Mr. JONES. If it is desired to meet at 11 o'clock to-morrow, I am perfectly willing to do it.

Mr. McKELLAR. I think we had better do that.

Mr. WALSH of Montana. Mr. President, unless there is some imperative reason for that, I hope we will not meet to-morrow until noon. There is an important hearing going on.

Mr. HEFLIN. Mr. President, I understood the unanimous-consent agreement to be that we should meet at 12 o'clock and transact other business, if necessary, until 2 o'clock.

The VICE PRESIDENT. The amendment can be modified so as to read "3 o'clock."

Mr. JONES. I have no objection to meeting at 11 o'clock.

Mr. GOFF. Mr. President, I should like to indorse what the Senator from Montana has said. If the Senate meets at 11 it will interfere with many of our important committee meetings. We shall be unable to hold them. Unless there is some pressing matter before the Senate, I do not see the necessity of meeting before 12 o'clock.

Mr. SMITH. Mr. President, I should like to state that on account of the committee meetings that must be attended to if we are to expedite business the hour between 11 and 12 can be more advantageously used in committee rooms than in discussing this matter. I think the Senate thoroughly understands what is practically agreed on now, and that the unanimous-consent agreement has done away with the necessity of meeting at 11 o'clock; and I hope we will meet at 12 o'clock.

Mr. KING. Mr. President, may I make one suggestion, if I may have the attention of my good friend from Wyoming? In view of the fact that we will perhaps consume the two hours to-morrow in the consideration of the appropriation bill, if the unanimous-consent agreement should go into effect at 2 o'clock it would allow no opportunity for general debate. If it meets the approval of all, I suggest that instead of making the hour 2 o'clock the agreement go into effect at 3 o'clock.

Mr. KENDRICK. That is agreeable to me.

Mr. KING. I ask unanimous consent, then, to amend the unanimous-consent agreement by striking out "2" and inserting "3."

Mr. ASHURST. That is all right.

The VICE PRESIDENT. Without objection, the unanimous-consent agreement is so modified.

The agreement, as finally entered into, is as follows:

Ordered, by unanimous consent, That after the hour of 3 o'clock on the calendar day of Thursday, December 13, 1928, no Senator shall

speak more than once nor longer than 15 minutes upon the bill H. R. 5773, the so-called Boulder Dam bill, or upon any amendment proposed thereto.

Mr. PHIPPS. Mr. President, as I understand, the pending amendment has now been completed by alterations and additions. Therefore I hope we may have a vote on it without any delay. I think it is thoroughly understood by all interested.

The VICE PRESIDENT. The question is on the amendment of the Senator from Colorado, as amended, to the substitute bill.

The amendment as amended was agreed to.

Mr. PHIPPS. Now, Mr. President, I desire to call up the amendment which was discussed last evening, which we attempted to perfect this morning, and which would now be the pending amendment; and I ask that the Secretary state the amendment so that it may be understood.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 3, line 11, it is proposed to strike out "$125,000,000" and insert the following:

$165,000,000. Of this amount the sum of $25,000,000 shall be allocated to flood control and shall be repaid to the United States out of 62½ per cent revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization, as provided in section 4 of this act. If said sum of $25,000,000 is not repaid in full during the period of amortization, then 62½ per cent of all net revenues shall be applied to payment of the remainder.

Mr. KING. Mr. President, may I have the attention of the Senator from Colorado? As I understand, this proposition now calls for a remission of $25,000,000 in the sense that that is to be deducted from the capital, and no returns are to be paid to the Government on account of that amount.

Mr. PHIPPS. No, Mr. President; I suggest an amendment to the Senator's language. I say it is a deferred payment, meaning that out of the total advances that the Government will be called upon to make $25,000,000 will be set aside as having been allocated to flood control, to be repaid out of any surplus receipts from the enterprise to the extent of 62½ per cent of such surplus receipts. The reason for that division is, as the Senator is aware, the fact that under the amendment which the committee approved, the States of Nevada and Arizona are to receive 37½ per cent of the excess revenues over and above the amounts required for amortization of the loans or advances, that being in line with the amounts that are remitted on oil leases.

Mr. KING. Then the Senator expects that this amount will be repaid to the Government?

Mr. PHIPPS. That is the expectation, and I will say to the Senator frankly that it is my belief that it will be repaid in full; but I would not care to make an estimate of the time that would be required to return the amount in full.

Mr. KING. If the Senator expects that it is to be returned to the Government, why segregate it from the general amount which is to be returned to the Government, the amount, for instance, that would be appropriated for the construction of the dam?

Mr. PHIPPS. Mr. President, I will say to the Senator that it affords a very definite idea of the plan and the purpose of the allocation of that fund; that is to say, if we simply set it aside as an amount allocated for flood control, the general impression might prevail that it was never expected to derive a revenue from the project, or to reimburse the Government for its advances. That is really the only thing that is accomplished by setting this out in that language; that is to say, the requirements as to repayment. If the provision were not there, the money would go into the general fund, as the Senator suggests. That is perfectly true.

Mr. KING. Mr. President, I have an amendment which I have had printed, and which I shall ask the Senate to consider to-morrow——

Mr. PHIPPS. Mr. President, the hour is not late, and I was hoping we could dispose of this amendment now. Then it was my intention to call on the Senator to present his amendment. I think I know the one he has in mind.

Mr. KING. Let me complete my sentence, which bears directly on the amendment which the Senator is now offering. I am not sure I am in favor of the amendment which the Senator offers. I want to consider it in connection with the amendment which I expect to offer to-morrow, not this afternoon. I have no objection to letting this be accepted to-night, with the understanding that if to-morrow, upon further consideration, I desire to move to reconsider——

Mr. JOHNSON. If it is to be put over, put it over until to-morrow. I have some remarks I wish to make upon this that will be very brief, indeed.

Mr. KING. I do not desire to interfere with my friend from Colorado, and yet I should feel constrained to make some observations now, with a view to having it go over; but I do not desire to do that if it may be understood that to-morrow, if I move to reconsider, the Senator will consent.

Mr. JOHNSON. I think the Senator from Michigan is interested in this amendment and desires to be heard upon it.

Mr. KING. Then I suggest to my friend from Colorado to let the amendment go over until to-morrow morning, and I will aid him in every way to get the matter disposed of.

Mr. PHIPPS. I am willing to have it go over; and while I am on my feet, may I ask the Senator from Utah if he is now ready to ask consideration of an amendment which he has had printed, one which I also had in mind—that is, to strike out the clause exempting from storage charges waters stored for irrigation or potable use?

Mr. KING. I should be ready to take that up except for the fact that two or three persons from California who are very much interested in it desire to confer with me, and I have promised that I would confer with them before I pressed it.

Mr. JOHNSON. Because of the charge we have made upon the lands that are contiguous to the all-American canal, by reason of the fact that upon them we have put the burden of the all-American canal, I want to eliminate those lands from the charge——

Mr. ASHURST. For potable water.

Mr. KING. All charges.

Mr. JOHNSON. All charges. If the canal is built, with the additional burden that is put upon them, they ought to be relieved, because they are solving an international situation, and that, as I recall it now, was the reason why in the Senate bill we put in the amendment we did. We can strike out the question of potable water entirely, and we can leave to the Secretary of the Interior, in the administration of the bill, such charge as he may deem appropriate in reference to potable water that is returned. I do not like the adjective.

Mr. ASHURST. It is a good adjective because I supplied it.

Mr. JOHNSON. The Senator supplied the adjective. Let us concede, then, that it is a glorious bird of its color. I am perfectly willing to eliminate that; but the rest of the amendment I think ought to be retained.

Mr. PITTMAN. Mr. President, the bill provides that the cost of the all-American canal shall be paid for under the provisions of the reclamation act.

Mr. JOHNSON. Exactly.

Mr. PITTMAN. The reclamation act fixes the charge for the delivery of water.

Mr. JOHNSON. Yes.

Mr. PITTMAN. At a sufficient amount to pay for the canal.

Mr. KING. And the dam.

Mr. JOHNSON. That is all right.

Mr. PITTMAN. So, as a matter of fact, what they do charge for under the reclamation act is water.

Mr. JOHNSON. That is quite so, but you can not make the additional charge if the water right already attaches, and it ought not to be made.

Mr. PITTMAN. The only thing I have in mind is that under the reclamation act the measure of the charges is the amount of water delivered, and it is not a tax on land. They do not tax land.

Mr. JOHNSON. But the building of the canal is a big expense. That burden is to be put upon these people.

Mr. PITTMAN. In what way?

Mr. JOHNSON. It is to be put on them under the reclamation law.

Mr. PITTMAN. That is, they have to pay so much for water.

Mr. JOHNSON. Oh, yes; but they have to amortize the payment for the entire canal. I do not want to put on any charge in addition to that.

Mr. PITTMAN. No, that is right; I agree with the Senator. The Senator does not want to say that the land has to pay and that the water has to pay.

Mr. JOHNSON. Exactly.

Mr. KING. Let me say to the Senator from Nevada, to be entirely frank, that my amendment goes further than the Senator is willing to go. I have felt, and yet I have not made up my mind definitely, that because of the immense advantage that will flow to these lands in the Imperial Valley, lands which have been irrigated in the past, and lands which will be irrigated in the future, by reason of the construction of the storage reservoir and the certainty of obtaining water, and the fact that it has been declared upon the floor of the Senate here, and no one disputes it, that the moment this bill goes through the lands will enhance in value $50 an acre, that there would be no injustice in providing——

Mr. JOHNSON. Mr. President——
Mr. KING. Let me finish.
Mr. JOHNSON. Spare me any real estate talk.
Mr. KING. The Senator has had so much of it in his State I do not blame him.
Mr. JOHNSON. No; I live in San Francisco.
Mr. KING. I was about to observe, if my friend had not interrupted me, that it seemed to me that there would be no injustice in providing, particularly for some of the new lands, that there should be a reasonable charge, based upon the cost of the dam. I may be in error, and I am willing to talk that matter over.
Mr. JOHNSON. Not on the cost of the dam.
Mr. KING. That is to say, that the lands in Imperial Valley should not only pay for the all-American canal but, in view of the advantages resulting from having a certain flow, having the flow equated, having a dam so that they would not year by year have an inadequate supply of water, there would be no injustice in providing that they should make a reasonable contribution to the cost of the dam.
Mr. JOHNSON. They are going to make a contribution that is extraordinarily excessive, according to the recent engineering report. But if we get into a discussion to-night, we will violate the 15-minute rule, unquestionably, that we have fixed for to-morrow. So we will defer it until to-morrow.
Mr. President, I wish to offer an amendment, which may be printed and lie on the desks of Senators. It is to add a new section to be known as section 15.
Mr. ASHURST. Let that be read, Mr. President.
Mr. JOHNSON. It is as follows:

Nothing in this act shall be construed as a denial or recognition of any rights, if any, in Mexico to the use of the waters of the Colorado River system.

Mr. HAYDEN. Mr. President, I offer an amendment which I ask to have read and printed and lie on the table.
The VICE PRESIDENT. The amendment will be read.
The CHIEF CLERK. The junior Senator from Arizona offers the following amendment: On page 11, line 22, after the word "apply," to insert the following:

Provided further, That nothing in this act shall be construed or held to affect the rights of the States or other local authority to exercise any rights which they may have, including the right to levy and collect taxes upon improvements, output of electrical energy, or other rights, property, or assets of any lessee or contractee.

EXECUTIVE SESSION

Mr. JONES. I move that the Senate proceed to the consideration of executive business.
The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened; and the Senate (at 5 o'clock p. m.) adjourned until to-morrow, Thursday, December 13, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 12, 1928

POSTMASTERS

ALABAMA

Minnie V. Compton to be postmaster at Pine Apple, Ala., in place of M. V. Compton. Incumbent's commission expires December 18, 1928.

ALASKA

Martin Conway to be postmaster at Skagway, Alaska, in place of Martin Conway. Incumbent's commission expires December 20, 1928.

CALIFORNIA

Carolyn M. Orcutt to be postmaster at Niles, Calif., in place of C. M. Orcutt. Incumbent's commission expires December 17, 1928.

COLORADO

Beulah J. Wright to be postmaster at Estes Park, Colo., in place of B. J. Wright. Incumbent's commission expires December 12, 1928.

GEORGIA

Julien V. Frederick to be postmaster at Marshallville, Ga., in place of J. V. Frederick. Incumbent's commission expires December 12, 1928.

ILLINOIS

George A. Bowen to be postmaster at Lake Bluff, Ill., in place of T. E. Cahill, resigned.
Lloyd Ritzenthaler to be postmaster at Prairie View, Ill., in place of C. T. Mason, deceased.

INDIANA

Myrtle A. Schreiber to be postmaster at New Palestine, Ind., in place of M. A. Schreiber. Incumbent's commission expires January 6, 1929.

KANSAS

Robert E. Chapman to be postmaster at Belle Plaine, Kans., in place of R. E. Chapman. Incumbent's commission expires December 20, 1928.
William T. Venell to be postmaster at Bird City, Kans., in place of V. O. Booth, removed.
Clitus B. Hosford to be postmaster at Lawrence, Kans., in place of C. B. Hosford. Incumbent's commission expires December 19, 1928.
Theodore C. Conklin to be postmaster at Mulvane, Kans., in place of T. C. Conklin. Incumbent's commission expires December 20, 1928.
Clarence G. Hart to be postmaster at Perry, Kans., in place of C. G. Hart. Incumbent's commission expires December 20, 1928.
George E. Crawford to be postmaster at Whiting, Kans., in place of G. E. Crawford. Incumbent's commission expires December 20, 1928.

KENTUCKY

Herbert E. Dixon to be postmaster at Scottsville, Ky., in place of T. Y. Oliver. Incumbent's commission expired June 6, 1928.

LOUISIANA

Johnnie D. Stagg to be postmaster at Longville, La., in place of J. D. Stagg. Incumbent's commission expires December 20, 1928.

MICHIGAN

Samuel Perkins to be postmaster at Norway, Mich., in place of Samuel Perkins. Incumbent's commission expires December 20, 1928.
Joseph D. Norris to be postmaster at Turner, Mich., in place of J. D. Norris. Incumbent's commission expires December 20, 1928.

MINNESOTA

Fred E. Logelin to be postmaster at Belleplaine, Minn., in place of F. E. Logelin. Incumbent's commission expired December 9, 1928.
Nelson S. Erb to be postmaster at Faribault, Minn., in place of N. S. Erb. Incumbent's commmission expired December 9, 1928.
Carl A. Qvale to be postmaster at Farmington, Minn., in place of C. A. Qvale. Incumbent's commission expired December 9, 1928.
Alfred L. Mallery to be postmaster at Lakeville, Minn., in place of M. J. Rowan. Incumbent's commission expired December 19, 1927.
Emil C. Ernst to be postmaster at Lester Prairie, Minn., in place of E. L. Benjamin, resigned.
Carl A. Ecklund to be postmaster at Marine on St. Croix, Minn., in place of C. A. Ecklund. Incumbent's commission expired January 4, 1927.
James H. Pelham to be postmaster at Menahga, Minn., in place of J. H. Pelham. Incumbent's commission expired December 9, 1928.
Peter W. Gorrie to be postmaster at Morristown, Minn., in place of P. W. Gorrie. Incumbent's commission expired December 9, 1928.
Ernest E. Meyer to be postmaster at Norwood, Minn., in place of E. E. Meyer. Incumbent's commission expired December 9, 1928.
Albert W. Knaak to be postmaster at Waterville, Minn., in place of A. W. Knaak. Incumbent's commission expired December 9, 1928.

MISSOURI

Fred Fielder to be postmaster at Clarksville, Mo., in place of E. C. Hunt, resigned.
Maurice V. Smith to be postmaster at Laddonia, Mo., in place of H. E. Christrup, deceasel.
Amos E. Jennings to be postmaster at Miami, Mo., in place of A. E. Jennings. Incumbent's commission expires December 17, 1928.
Thomas M. Fowler to be postmaster at Nelson, Mo., in place of T. M. Fowler. Incumbent's commission expires December 17, 1928.

MONTANA

Alice L. Cory to be postmaster at East Helena, Mont., in place of A. L. Cory. Incumbent's commission expires December 19, 1928.

NEBRASKA

Jesse G. Fountain to be postmaster at Dunning, Nebr., in place of H. E. Poole, not commissioned.

Roy L. Ericson to be postmaster at Stromsburg, Nebr., in place of J. A. Presson. Incumbent's commission expired June 4, 1928.

Mabel E. Bigelow to be postmaster at Ulysses, Nebr., in place of M. E. Bigelow. Incumbent's commission expired December 11, 1928.

NEW JERSEY

Berta Baker to be postmaster at Leonardo, N. J., in place of Berta Baker. Incumbent's commission expires December 18, 1928.

Philip E. Rockafellow to be postmaster at Stockton, N. J., in place of P. E. Rockafellow. Incumbent's commission expires December 20, 1928.

Louis Meretta to be postmaster at Zarephath, N. J., in place of Louis Meretta. Incumbent's commission expires December 18, 1928.

NEW MEXICO

Charles E. Anderson to be postmaster at Roy, N. Mex., in place of Earl McMinimy, removed.

NEW YORK

Charles E. Hardy to be postmaster at Hudson, N. Y., in place of C. E. Hardy. Incumbent's commission expires December 19, 1928.

Chris Fox to be postmaster at St. Johnsville, N. Y., in place of Chris Fox. Incumbent's commission expires December 19, 1928.

OHIO

George P. Foresman to be postmaster at Circleville, Ohio, in place of G. P. Foresman. Incumbent's commission expires December 20, 1928.

Alsina E. Andrews to be postmaster at Risingsun, Ohio, in place of A. E. Andrews. Incumbent's commission expires December 20, 1928.

Horace G. Randall to be postmaster at Sylvania, Ohio, in place of H. G. Randall. Incumbent's commission expires December 20, 1928.

OKLAHOMA

John R. O'Connell to be postmaster at Willow, Okla., in place of J. R. O'Connell. Incumbent's commission expires December 13, 1928.

OREGON

Thurston V. Morgan to be postmaster at Cochran, Oreg., in place of J. B. Wheeler, resigned.

PENNSYLVANIA

Edward J. Fleming to be postmaster at Cochranton, Pa., in place of E. J. Fleming. Incumbent's commission expires December 19, 1928.

Minnie E. Lewis to be postmaster at Covington, Pa., in place of M. E. Lewis. Incumbent's commission expires December 19, 1928.

Robert Kirkpatrick to be postmaster at Folcroft, Pa., in place of D. W. Shaw, removed.

Charles H. Lapsley to be postmaster at Glassport, Pa., in place of C. H. Lapsley. Incumbent's commission expires December 19, 1928.

Grace S. Albright to be postmaster at Hyndman, Pa., in place of G. S. Albright. Incumbent's commission expires December 19, 1928.

Samuel L. Boyer to be postmaster at Library, Pa., in place of S. L. Boyer. Incumbent's commission expires December 19, 1928.

Charles H. Heller to be postmaster at Morrisville, Pa., in place of C. H. Heller. Incumbent's commission expires December 20, 1928.

Albert R. Morgan to be postmaster at Nemacolin, Pa., in place of A. R. Morgan. Incumbent's commission expires December 19, 1928.

Samuel S. Ulerich to be postmaster at New Florence, Pa., in place of S. S. Ulerich. Incumbent's commission expires December 19, 1928.

Clarence E. Grim to be postmaster at Windsor, Pa., in place of C. E. Grim. Incumbent's commission expired December 9, 1928.

Jenny Paterson to be postmaster at Yukon, Pa., in place of Jenny Paterson. Incumbent's commission expires December 19, 1928.

SOUTH CAROLINA

John W. Willis to be postmaster at Lynchburg, S. C., in place of J. W. Willis. Incumbent's commission expired December 9, 1928.

SOUTH DAKOTA

Fred Engelbrecht to be postmaster at Elkton, S. Dak., in place of Fred Engelbrecht. Incumbent's commission expired July 25, 1925.

Harry O. Starksen to be postmaster at Hetland, S. Dak., in place of H. O. Starksen. Incumbent's commission expired December 11, 1928.

VERMONT

Charles H. Stetson to be postmaster at Enosburg Falls, Vt., in place of C. H. Stetson. Incumbent's commission expires December 20, 1928.

Ernest W. Gates to be postmaster at Morrisville, Vt., in place of E. W. Gates. Incumbent's commission expires December 20, 1928.

Avery G. Smith to be postmaster at St. Albans, Vt., in place of A. G. Smith. Incumbent's commission expires December 20, 1928.

Charles E. Hall to be postmaster at Swanton, Vt., in place of C. E. Hall. Incumbent's commission expires December 20, 1928.

Archie S. Haven to be postmaster at Vergennes, Vt., in place of A. S. Haven. Incumbent's commission expires December 20, 1928.

WEST VIRGINIA

Mary Allen to be postmaster at Filbert, W. Va., in place of Andrew Smith, resigned.

Minnie Ratliff to be postmaster at Yukon, W. Va., in place of G. C. Smith, removed.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 12, 1928

PANAMA CANAL

Harry Burgess to be governor.

UNITED STATES ATTORNEY

Edmond Earl Talbot, of Louisiana, to be United States attorney, eastern district of Louisiana.

POSTMASTERS

COLORADO

Sarah W. Boyden, Mack.

CONNECTICUT

Mary A. Tracy, Central Village.
John J. O'Neill, Killingly.
George E. Dickinson, Rockville.
William Krause, Westport.
Hal R. Kellogg, Woodmont.

GEORGIA

Edith A. Herrington, Millen.

KENTUCKY

Levi Brooks, Blue Diamond.
Hugh B. Gross, Dawson Springs.

MASSACHUSETTS

Robert A. Clark, Sharon.
James P. Smith, Springfield.
Ethel V. Cook, Wenham.

MICHIGAN

Clifford L. Kenney, Milford.

MONTANA

Andrew M. Lodmell, Brockton.
Joshua E. Patterson, Edgar.
Fred Schoensigel, Fairfield.
Myrtle C. DeMers, Hot Springs.
Lawrence E. Osness, Huntley.
Carroll W. Marsh, Sheridan.
George P. Huddleston, Whitetail.

NEW HAMPSHIRE

John E. Horne, Milton Mills.
Maude B. Duston, Plaistow.

NEW MEXICO

John H. York, Las Vegas.

NEW YORK

Fred W. Ravekes, Ardsley on Hudson.
Medose J. Robert, Au Sable Forks.
Charles B. Franklin, Canaeadea.
Ella E. Lewis, Clarkson.
Jay E. Swartwout, Clayton.
Ormond M. Berrington, Clinton Corners.
Elsie J. Moss, Collins.

May Griffin, Dryden.
Herbert A. Roselle, Halesite.
William E. Rogers, Harmon-on-Hudson.
Gretchen V. Lawson, Helmuth.
Milton J. McGibbon, Liberty.
H. Greeley Brown, Otego.
Albert Pinfold, Point Pleasant.
Ernest E. Ridout, Purchase.
Marie L. Wolfe, Sherrill.
Edward A. Cronauer, Skaneateles Falls.
Alfred E. Butler, Suffern.
August P. Lenz, Thendara.
Mary E. Harring, West Nyack.

NORTH DAKOTA

John E. Nelson, Litchville.

OKLAHOMA

Frank O. Parker, Cement.
Pearl E. Hughey, Cleo Springs.
Boze H. Deck, Lima.
Clifton J. Owens, Mill Creek.
Elmer A. Plunkett, Porum.
Homer Tilley, Randlett.
Donald F. Bredbeck, Southard.
Judge Griffin, Valliant.
Harry C. Brickel, Washington.
Powell C. Singleton, Webbers Falls.

SOUTH DAKOTA

Ezra J. F. Lamkee, Avon.
Harold F. Brewer, Camp Crook.
Carl Gammon, Farmingdale.
Loretta M. Stromme, Garretson.
Charles J. Carlson, Hermosa.
Adam F. Glaser, Herrick.
Harry K. Sanborn, Hurley.
Oscar D. Hansen, Irene.
Leland K. Stoddard, Parker.
Fred W. Hink, Raymond.
Donald C. Brown, Redfield.
Joseph W. Gibson, Salem.
John J. Kostel, Tabor.
Henry O. Ramynke, Toronto.
Axel Nelson, Trent.

TENNESSEE

James M. Yokley, Baileyton.
Sandy A. Greenwell, Butler.
James O. Massey, Finger.
Lizzie Roney, Fountain Head.
John L. Law, Maryville.
Roy T. Campbell, Newport.
Hattie B. Huskins, Petros.
James O. Jennings, Rives.
Clara B. Tate, South Pittsburg.
R. Burrel Ketchersid, Spring City.

VIRGINIA

John O. Scott, Carrsville.
George E. Douglas, Elkwood.
Harvey P. McCary, Esmont.
Richard L. Griffith, Hague.
Henry H. Elswick, Jewell Ridge.
Cletus F. Harmon, McGaheysville.
Audrey M. Snodgrass, Meadowview.
Thomas R. Cocks, Prospect.
George B. Jones, Ridgeway.
Summerfield Baber, Shipman.

WITHDRAWALS

Executive nominations withdrawn from the Senate December 12, 1928

POSTMASTERS

CALIFORNIA

Martin Aarhaus to be postmaster at Calpine, in the State of California.

NEW YORK

Henry H. Meinken to be postmaster at Islip Terrace, in the State of New York.

SOUTH CAROLINA

Thomas S. Armour to be postmaster at Eastover, in the State of South Carolina.

HOUSE OF REPRESENTATIVES

WEDNESDAY, *December 12, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our merciful God, we thank Thee for the secrets of Thy breast, which have been unveiled in the words of the Galilean Teacher. Reaching forth for their prize, which is the high calling of God, is the task of every man; herein is the problem of human life. In the rush and hurry of the days, oh, do Thou lift our souls, by broader view, to the things that are more grandly true; make our lives better than is just necessary. Grant that Thy providence, with its enfolding care, may protect and return to his native shore our President elect. By his message and mission may brotherhood and good will be strengthened within the realms of earth. Our country we bear to the altar of prayer. Be with it as it sets out upon higher ventures and richer disclosures of the real and lasting truth of our holy faith, which is the divine fatherhood of all men. Amen.

The Journal of the proceedings of yesterday was read and approved.

PAYMENT OF DECEMBER SALARIES

Mr. ANTHONY. Mr. Speaker, I ask unanimous consent for the consideration of this joint resolution which I submit.

The SPEAKER. The gentleman from Kansas offers a resolution, which the Clerk will report.

The Clerk read as follows:

Joint resolution (H. J. Res. 346) authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month

Resolved, etc., That the Secretary of the Senate and the Clerk of the House of Representatives are authorized and directed to pay to the officers and employees of the Senate and House of Representatives, including the Capitol police, the office of legislative counsel, and employees paid on vouchers under authority of resolutions, their respective salaries for the month of December, 1928, on the 20th day of that month.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

BULLETINS CONCERNING INFLUENZA

Mr. TILSON. Mr. Speaker, I desire to make an announcement to the effect that Dr. George W. Calver, designated under a resolution passed a few days ago, has been assigned from the Navy Department to attend in the Capitol and be ready for any emergency in case of sudden illness here. He will issue bulletins from time to time on subjects such, for instance, as the progress of influenza in the country, and these will be posted on the bulletin board in the Speaker's lobby. One such bulletin will be posted to-day. I simply wish to call the attention of Members to it, so that they may not miss these bulletins when they are posted.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. TILSON. Certainly.

Mr. SNELL. Where is the doctor's office?

Mr. TILSON. I do not know just where it is located.

Mr. SNELL. I was wondering if some place had been assigned to him.

Mr. TILSON. I think some place will be found for him if it has not already been found.

Mr. CLARKE. Will this necessitate Senator COPELAND'S articles to be still published in the newspapers? [Laughter.]

Mr. TILSON. The gentleman himself can find out about that from some other source of information.

LEAVE TO ADDRESS THE HOUSE

Mr. SWING. Mr. Speaker, I ask unanimous consent that on Friday morning, following the reading of the Journal, I may be afforded opportunity to address the House for 30 minutes on the subject of the engineers' report as to Boulder Dam.

The SPEAKER. The gentleman from California asks unanimous consent that on Friday morning, following the reading of the Journal and the disposition of business on the Speaker's table, he may address the House for 30 minutes on the subject of Boulder Dam. Is there objection?

Mr. CLARKE. Reserving the right to object, Mr. Speaker, has the gentleman from Arizona [Mr. DOUGLAS] been consulted upon this proposition?

Mr. SWING. He has not been consulted, but he will have notice.

Mr. CLARKE. I object, then, until he is consulted.

The SPEAKER. Objection is heard.

Mr. HOWARD of Nebraska. Mr. Speaker, I rise to submit a unanimous-consent request that I may be allowed to address the House for 15 minutes to-morrow, after the reading of the Journal and the disposition of business on the Speaker's table.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

Mr. CRAMTON. Reserving the right to object, Mr. Speaker, I am wondering if the gentleman will not defer that until Friday morning. The Interior Department appropriation bill is up and we would like to complete it to-morrow. In addition to the gentleman from Nebraska, two other gentlemen have spoken to me about speaking for 30 or 40 minutes each, and I told them just what I have now stated to the gentleman from Nebraska.

Mr. HOWARD of Nebraska. I would grant any request made by my friend the gentleman from Michigan, and so I think I would now prefer my request for this morning.

Mr. CRAMTON. I would favor that.

The SPEAKER. The gentleman from Nebraska asks unanimous consent to address the House now for 15 minutes. Is there objection?

There was no objection.

FARM RELIEF

Mr. HOWARD of Nebraska. Mr. Speaker, I have asked this privilege for the purpose of discussing a sort of tripartite text. I apprehend that it will deal somewhat with a subject with which the average Member is not as well acquainted as he ought to be. It is the problem of farm relief. In the discussion of that subject there may appear some reference to the subject of Kansas, and in the conclusion perhaps I may talk a little bit about a large, long-haired, shaggy dog.

The inspiration for my address this morning was given to me last evening down at the Raleigh Hotel, where I was privileged to be the guest of the distinguished Senator from Kansas, who had brought from his own State 10 master Kansas farmers. I do not know what a master farmer is, but I know that some of these master farmers who talked down there talked very magnificently with reference to what they thought might be accomplished here in Washington for the welfare of the American farmer.

We had a number of distinguished gentlemen there, of whom I was one. [Laughter.] But I did not speak on that occasion. It seemed to be a sort of an administration program. The first speaker on the list was the distinguished Senator from Ohio. He told, oh very beautifully and very pathetically, of the sad state of agriculture, and how that sad state must be transformed into a state of beauty, and he wound up with the conclusion that it ought to be done, but that it could not be done now.

Then came our lovable colleague, the gentleman from Michigan [Mr. KETCHAM], whom we have all heard with delight many times with reference to the subject of agriculture. He pictured the vast needs of farm relief at the hands of Congress, but my interpretation of him was that he also concluded that it could not be done now.

Then came several other gentlemen speaking on this same subject, with reference to the grandeur and glory of agriculture in general and Kansas agriculture particularly, and all of them pleaded for something in the nature of legislative relief here at Washington in behalf of the farm, but unhappily, with one lone exception, they also concluded that it could not be accomplished now. Then one of the master farmers spoke and, oh, Mr. Speaker, I wish that every Member of this House might have heard that master farmer speak. He told the story of the success he had had in growing wheat in Kansas, and he pictured the grandeurs and the glories of that marvelous wheat zone more beautifully than I have ever heard them pictured before. He admitted he was a master farmer and that he had done fairly well, but he also admitted that Kansas was sadly in need of something that it does not have to any large extent, and that was the need of money. He had been traveling down through the East, and he marveled at the vast expenditures of money he witnessed in the Pullman dining cars and all along the route. He came over here to Philadelphia and he went down, he told me, to the banks of the Delaware River. He did not say it was where George crossed, and I do not know just where it was, but he said the river was full of American battleships. Now, he said he did not come down here to give Congress any advice, and he did not have a word of advice to give to any of his fellows from Kansas, but he did tell us what he would do if he were sitting here in our capacity. He told, after looking at those battleships, how he concluded that if he were a Member of Congress he never would vote for another one of them, and he said that was the voice of Kansas; and I believed it true, because I have talked with a number of Kansas people and that sounded very much like their voice.

Finally, to make the picture complete about the vast need of agriculture and to clearly depict the attitude of the average Kansas Member of the Congress with reference to legislation, with the exception of one of them—and I almost forgot to speak about him—there was one brave Member from Kansas there, and he declared that as far as he was concerned, although he did not claim to speak the voice of Kansas, he was in favor of agricultural legislation, and he was in favor of it right now. [Applause.] That was the only voice I heard from Kansas and elsewhere in favor of legislation now. Do not go away, STRONG, because I am just going to tell them you were the one in favor of action now. [Laughter.]

Mr. BLANTON. He is out of harmony with his party, is he not?

Mr. HOWARD of Nebraska. A little. He is a little bit of an insurgent, but a good one, and I hope his insurgency will spread in Kansas. I think the best part of the program came finally when a fellow by the name of Jesse Johnson, who was a master farmer, spoke. When I first knew Jesse I heard him on the prairies of Nebraska, and I think at that time he was a nonpartisan league organizer, or something of that kind, and he was a good one in his game, too.

I distinctly recall hearing him making a plea to the farmers to get ready for that day in which the American farmers would organize and agree among themselves—not for the purpose of distressing anybody, but for the purpose of making the farm profitable—that they would confine their efforts to the raising of enough food to feed the farmers themselves for a year or so, and that possibly might augment the price of the farmers' products. Jesse at that time came pretty near getting before the council of defense, and yet Jesse was well within his rights when he was making that argument, because I discovered very recently, in the message delivered to the House through our masterful Clerk of the House, that the President of the United States took exactly the same position with reference to potatoes that Johnson took in the long years ago with reference to general farm produce. What position did our President take with reference to potatoes? He said the trouble with the price of potatoes was that the acreage was too large, and I did not hear anybody suggesting that our good President be called before the Council of Defense to answer for that awful charge.

Well, finally, it came the turn of Jesse Johnson to talk, and Jesse told a story, and it was a very applicable story, and I am quite sure it will be interesting to all of our administration friends who are still pleading under their breath for farm relief, "but not now."

Jesse said that once upon a time there was a little boy who had some older brothers, and the older brothers owned a great, shaggy dog, and when the warm days came the boys got hold of some horse clippers and clipped the dog until they made him resemble a lion. Soon after the clipping had been done the dog was resting out on the front porch and this little boy called to his mother and said, "Mother, come and look out the window. There is a lion on the front porch." The mother went out and recognized the lion in the guise of the family dog. She did not enjoy the facetiousness of the little fellow, and she told him he had been very wicked, and that he must go upstairs and go into the closet and close the door, and there, where it was all dark, confess his sin to God, and stay there until God had forgiven him. The little fellow did as directed, but he did not stay in the closet very long. He came out and his mother asked him if he had been forgiven and he said, "Yes, mother." And the mother asked, "Did God forgive you for your sin?" And he said, "Yes, mother; He told me that was all right, that the appearance of the dog so much resembled a lion that it almost fooled Him." [Laughter.]

My administration friends may make the application of the story as they like. I am making my own application of it. [Laughter and applause.]

Mr. GARNER of Texas. Mr. Speaker, I offer a resolution, which I send to the desk and ask for its immediate consideration.

The SPEAKER. The gentleman from Texas offers a resolution, which the Clerk will report.

The Clerk read as follows:

House Resolution 258

Resolved, That LAFAYETTE L. PATTERSON, of Alabama, be, and is hereby, elected a member of the standing committee of the House on Insular Affairs.

Resolved, That JOHN W. MCCORMACK, of Massachusetts, be, and is hereby, elected a member of the standing committees of the House on Territories and Elections No. 3.

The resolution was agreed to.

PERMISSION TO ADDRESS THE HOUSE

Mr. SWING. Mr. Speaker, I renew my request for permission to address the House on Friday. I have been assured by the gentleman who objected that he will not now object.

The SPEAKER. The gentleman from California asks unanimous consent that upon Friday, after the reading of the Journal and the disposition of matters on the Speaker's table, he may be permitted to address the House for 30 minutes. Is there objection?

There was no objection.

Mr. LAGUARDIA. Mr. Speaker, I ask unanimous consent that on Friday, after the reading of the Journal and the disposition of matters on the Speaker's table, following the address of the gentleman from California, I may be permitted to address the House for 40 minutes on the subject of the necessity of a revision of our shipping laws.

The SPEAKER. The gentleman from New York asks unanimous consent that following the address of the gentleman from California he may be permitted to address the House for 40 minutes. Is there objection?

There was no objection.

DENATURANTS IN ALCOHOL

Mr. CRAMTON. Mr. Speaker, I ask unanimous consent to revise and extend remarks which I made in the House on the 6th instant with reference to denaturants in alcohol, and in so doing would like to include a brief extract from an eminent chemist that carries some information in response to the question that the gentleman from New York, Doctor KINDRED, asked me at that time.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. CRAMTON. Mr. Speaker, under the leave granted I desire to call attention to a statement by Dr. Lewis H. Marks, executive secretary of the Industrial Alcohol Institute, which touches directly on the questions asked by the gentleman from New York, Doctor KINDRED. The statement is found in a letter from Doctor Marks to Capt. James P. McGovern, and I quote it, as follows:

> The writer has gone over with considerable interest the congressional debate, during which Mr. CRAMTON introduced the Chatfield letter into the RECORD. I have been particularly interested in the question put by Mr. KINDRED, which appears on page 183 of the RECORD. If you have not already done so, I would suggest that you inform Mr. CRAMTON of the vast amount of effort expended during the past 30 or 40 years to find better, more satisfactory denaturants. It would interest him to know that nothing better has ever been found, although a tremendous amount of work has been put into this problem by many and very capable men. As I understand it, many years ago the Russian Government offered a large prize for a denaturant better than wood alcohol, and the German Alcohol Monopoly has repeatedly offered prizes in an effort to stimulate scientific work along these same lines. Mr. CRAMTON should know that the Mellon Institute, under our financial support and scientific direction, have also devoted over two years' time now to this very problem without any tangible progress. In view of all this, Mr. KINDRED'S suggestion is entirely out of order.

CALENDAR WEDNESDAY

The SPEAKER. This is Calendar Wednesday. The Clerk will call the committees.

MODERNIZATION OF CERTAIN NAVAL VESSELS

Mr. BRITTEN (when the Committee on Naval Affairs was called). Mr. Speaker, by direction of the Committee on Naval Affairs I call up the bill (H. R. 13249) to authorize an increase in the limit of cost of alterations and repairs to certain naval vessels.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Union Calendar. The House automatically resolves itself into the Committee of the Whole House on the state of the Union, and the gentleman from Michigan, Mr. HOOPER, will kindly take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 13249, with Mr. HOOPER in the chair.

The Clerk read the bill, as follows:

Be it enacted, etc., That the limit of cost for the alterations and repairs to the U. S. S. *Oklahoma* and *Nevada*, authorized to be modernized by the act of March 2, 1927 (44 Stat. L. p. 1343), in accordance with the limitations prescribed in the treaty limiting naval armaments ratified August 17, 1923, is hereby increased from $13,150,000 to $13,600,000 in all.

Mr. BRITTEN. Mr. Chairman, the two first-line battleships affected by this kind of legislation have been undergoing general modernization and repair in two Government navy yards, the battleship *Oklahoma* being in the Philadelphia yard and the battleship *Nevada* being in the Norfolk yard.

The purpose of the bill is very evident from its reading. It is the intention to increase the authorized cost of modernizing these two ships $450,000. Four hundred and fifty thousand dollars if taken by itself seems like a large amount of money and seems like a big variance from the original estimates, but when based on the original request of $13,150,000 the increase desired to-day is only about 3 per cent, and when Members of the House ponder for a moment over the intricacies that go with modernizing a battleship they will realize that the entire superstructure, practically the entire insides of the ship are torn out in order to provide various changes, the character of which I will detail to you.

Almost a year ago the Chief of Operations of the Navy and his various bureau chiefs under whose jurisdiction this modernization is made came before our committee with a request for an increased authorization of $450,000. After being questioned at great length by the gentleman from Georgia [Mr. VINSON] and other members of the committee, the committee concluded that the department had not made a clear case that it would require all of the $450,000. They could not tell us just where the $450,000 was going to be spent, because up to that moment the decks had not been torn off the ship. They could not tell what obstacles would be presented when the decks did come off. But after seven months the department comes back and requests the amount requested last April—$450,000.

Much criticism from time to time has been directed against the Navy Department's estimates for not only doing modernization work but also for new work, in original estimates for building ships, and particularly in Government navy yards.

So I thought it might be opportune to call the attention of the House to the original estimates made by the department a couple of years ago and the subsequent estimates made last April, and finally their estimates of to-day, which will show that they shot high in some directions and low in others. In the general estimates the discrepancy of 3 per cent is not very wide of the mark.

Mr. O'CONNELL. Will the gentleman yield?

Mr. BRITTEN. Certainly.

Mr. O'CONNELL. I am glad to see that this work is being done in the Government yards. I am informed, and the papers so State, that the Shipping Board is insisting that most of the work be done in private yards.

Mr. BRITTEN. Most of the repair work that goes on Shipping Board vessels is of a character that can be reasonably estimated in advance, and therefore the Shipping Board can get a lot of competition on repairs. That is hardly possible with major battleship repairs. Another reason why battleships ought to be modernized in the navy yard is because they have an enlisted personnel of 1,200 men, most of whom remain with the ship in repair. They are housed there and do a great deal of the repair work.

Mr. O'CONNELL. And the Government shipyards have the equipment.

Mr. BRITTEN. They have the equipment to do the modernizing work on battleships, but whether they have it for repair jobs on a merchant ship is quite another matter.

Mr. WINGO. Will the gentleman yield?

Mr. BRITTEN. I will.

Mr. WINGO. Is this increased cost of modernization mostly labor or material?

Mr. BRITTEN. The larger part of it is labor. When they rip out the deck they find that pipes are damaged, certain conduits are rusted out, and they find things that they have not contemplated; and generally I would say that 85 per cent is labor.

Mr. WINGO. In their estimates do they give the number of labor hours?

Mr. BRITTEN. No; that is not done in the navy yard in advance. Generally the repairs of modernization are specifically named and the labor takes care of itself.

Mr. WINGO. They do not undertake to tell how many labor hours it will take except by guess for estimate purposes?

Mr. BRITTEN. No; that would be impossible.

Mr. BANKHEAD. Will the gentleman yield?

Mr. BRITTEN. I yield.

Mr. BANKHEAD. I have not seen the report on this bill; do I understand that the sum of thirteen and a half millions was appropriated for the modernization of these ships?

Mr. BRITTEN. Thirteen million one hundred and fifty thousand dollars.

Mr. BANKHEAD. And this is additional?

Mr. BRITTEN. Four hundred and fifty thousand dollars.

Mr. BANKHEAD. How long since these ships were put in commission?

Mr. BRITTEN. About 12 years ago. The *Oklahoma* and *Nevada* are the two first battleships to be thoroughly overhauled and modernized to meet the new condition of warfare which have arisen within the last 10 years—submarine attack and air attack, and spotting at 30,000 yards—all these have come to us within the last 10 years.

Mr. WINGO. If they do not estimate the number of labor hours, how do they arrive at the labor cost?

Mr. BRITTEN. In many instances the estimates will show so many hundred tons of steel, and they estimate that to cut and erect a ton of that kind of steel will cost so much. That is one way they do it.

Mr. WINGO. They estimate so many labor hours to a ton of steel?

Mr. BRITTEN. That is it—or it may be on the percentage basis of the cost of the material.

If it is 500 tons of steel of a certain character to go into a certain job, they say that that 500 tons ought to be done for so much per ton.

Mr. WINGO. They use the method of per cent of material in estimating labor costs?

Mr. BRITTEN. They use both ways, because very often you can not apply percentage. The amount of material going in would be limited, and the amount of labor be very large.

Mr. WINGO. That is the thing that I could not understand.

Mr. BRITTEN. Let me present to the House the items that are cared for in this bill. Under the original estimates for submarine and air attacks, in other words, to put these great big blisters on the bottom of a ship, and ripping off the decks on top, and putting in a heavy superstructure to guard against airplane attacks, the amount estimated was $2,600,000 for both ships. Last April their estimate was $2,364,000, and this year their estimate is $2,250,000. So that they have been dropping all of the time. Then take the question of reboilering. The estimate for that was $2,250,000 originally. It was $2,272,000 last year and $2,461,000 this year. There is an increase of $211,000 for the boilers alone. Those of us who have had something to do with a boiler around our own houses occasionally, know that we have not the slightest idea of the condition of our boilers until we start to tear them out and then we find all sorts of corrosion and rust and a necessity for improvement.

Next there is fire control. Fire control aboard modern ships is so superior to fire control of 15 years ago, that they can not be talked about in the same breath. We are shooting at 35,000 yards now, and hitting. A shot goes away over the horizon. It is impossible to see the target, and yet the gunner down in the turret regulates the gun and hits the target a reasonable percentage of the time. That is done by spotting from airplanes.

The airplane immediately communicates with the ship and says, "Your shot was short so many yards; it was to the left or the right so many yards." They then shoot again and the report comes back that the shot was high and so many yards to the left or right, and the next shot would come mighty near hitting the target. The gunner would know that he is shooting approximately 30,000 to 35,000 yards; he would not see his target.

Mr. WINGO. I think I understand the gentleman, and I think the gentleman has gone far enough. There is no change proposed, but this is simply revising the estimate of the cost of doing the things that were intended to be done under the first authorization.

Mr. BRITTEN. That is correct.

Mr. WINGO. Does the gentleman know of any opposition to this bill? Why not go on to these other bills? A little thing like $400,000 will hardly keep our friend from New York [Mr. LAGUARDIA] awake.

Mr. BRITTEN. Oh, I shall be glad to take my seat right now.

Mr. WINGO. The reason I make that suggestion is because I was afraid the gentleman had misinterpreted my question, and thought that I desired to have the thing more in detail. Of course, in making the suggestion I speak only for myself.

Mr. BRITTEN. I thank the gentleman. I do not think there should be the slightest opposition to the bill, and that is all I have to say for the present.

Mr. LAGUARDIA rose.

The CHAIRMAN. Is the gentleman from New York in opposition to the bill?

Mr. LAGUARDIA. Yes.

The CHAIRMAN. Does any member of the committee want to take time in opposition to the bill? [After a pause.] The gentleman from New York is recognized.

Mr. LAGUARDIA. Mr. Chairman, I want to assure my colleague from Arkansas [Mr. WINGO] that I shall not take very much time, but I think it is wise to keep the RECORD straight so that it will indicate that these naval appropriations are not receiving the unanimous vote of the House. Only a week ago we provided for the modernization of two battleships, the *Arizona* and the *Pennsylvania*, and that bill carries an authorization for the appropriation of about $14,800,000. We had theretofore passed an authorization for the modernization of the *Oklahoma* and the *Nevada*. That matter comes before us now for a slight increase of $450,000. Every Member of the House who has the slightest experience or who has watched the authorizations for naval construction, for naval appropriations, knows that the cost is always above the original estimate and always above the amount first authorized. I remember distinctly the lamented gentleman from Pennsylvania, Mr. Butler, for many years the distinguished chairman of the Committee on Naval Affairs, admitting before the House that the estimates were all the way from 25 per cent to 75 per cent off the actual cost before the vessel was completed. This $450,000 means very little to-day, yet you can be assured that we will again meet the *Oklahoma* and the *Nevada* in a deficiency bill some day. There is no doubt about that.

Following this bill we have another increasing the authorization for the modernization of the *California* by $350,000, and then we have another bill for an increase in the cost of two fleet submarines. It seems to me that the positions we are assuming are quite irreconcilable. We find the great Secretary of State now appearing and appealing before another body of this Congress and urging the ratification of the multilateral treaties outlawing war. It is quite difficult, as I say, to reconcile the two schools of thought.

The Secretary of State, speaking for the administration, and voicing, I believe, the sentiments of the vast majority of the American people, assures the country that this country has assumed leadership in the peace movement of the world, and he brings before it something tangible, something real in the way of the multilateral treaty known as the Kellogg pact, solemnly entered into and signed by nearly all the nations of the world, and declaring as a matter of national policy that war is outlawed, and that none of the countries signing these treaties will resort to war; that they will all use every known means of reconciliation and arbitration in order to adjust differences between the countries. At the same time, at the same session of Congress, we find another school of thought speaking, through the Secretary of the Navy, and going before the Naval Affairs Committee and urging appropriations for more vessels of war and more appropriations for naval armaments, such as modernizing more battleships, more new cruisers, more money for additional costs on submarines. We are placing ourselves in a very peculiar position before the whole world. I pointed out the other day that, assuming that these bills authorizing the expenditure of money for the modernization of these five battleships—two of them last week and three to-day—and the two fleet submarines were passed by the other body, it would be impossible to commence any of the work before July 1, 1930. By that time it is to be hoped that these expenditures may be not at all necessary. These continued appropriations can not continue. The people of this country want disarmament; the people of all countries are demanding disarmament; it must come before very long.

That being so, I believe that it would be prudent and to the best interest of the peace movement to defer action on these bills at this time. Now, I will concede I am powerless to stop the passage of these bills in this House to-day. When committees come before the House on Calendar Wednesday it seems almost an unwritten law that it is the day to pass any bill it desires. Rare is the exception when a committee bill is defeated on the calendar day. I will concede that the committee gives very careful thought and study to the legislation before it. Often it is swayed by the wishes of the particular department under its jurisdiction. I want to say this concerning the great Committee on Naval Affairs—I want the attention of the distinguished chairman—that the only exception, and I believe it is the greatest thing the distinguished gentleman from Illinois ever did, and that was his unique stand on the desire to bring the representatives of the people of two countries together, and with that one exception the Naval Affairs Committee, it would seem, at least to me, permits the Navy Department to outline

the naval policies of this country. Under our form of Government, as I understand it, the reverse should be true. It is for Congress to define the naval or military policy of this country and not for the Army or the Navy.

Mr. SCHAFER. Will the gentleman yield?

Mr. LAGUARDIA. In a moment. The committee, unintentionally perhaps, is under the influence of the Navy Department. That has been so for a great many years. Now I have a particular instance in mind. You gentlemen who are interested in the Navy I am sure want to see the morale of the Navy at the very highest point. I will say now that the morale of the Navy has been shot to pieces; that there is a great deal of dissatisfaction in the Navy; that there is a great deal of discontent among the officers of the Navy owing to a very unscientific pay bill, as I pointed out last week, a situation where a senior officer commanding a battleship, with the longest years of service and the highest rank on the ship, the captain of the U. S. S. *Maryland*, with 33 years of service, the senior officer on that ship, and yet there are three other officers under him on that ship receiving more pay with junior rank and with less years of service.

Mr. BRITTEN. Will the gentleman yield?

Mr. LAGUARDIA. I will.

Mr. BRITTEN. I would like to say at this time in connection with the gentleman's remark that the Navy is shot to pieces, that man for man, ship for ship, morale being considered, the United States has the greatest Navy on earth.

Mr. LAGUARDIA. I agree with the gentleman.

Mr. BRITTEN. So it can not be shot to pieces.

Mr. LAGUARDIA. I will agree this far, confronting an enemy, of course, the present dissatisfaction would disappear at once. We know the personnel of the Navy well enough to know that the dissatisfaction would disappear with an enemy confronting it, but the gentleman must admit there is a great deal of dissatisfaction and discontent among the commissioned personnel of the Navy owing to the pay bill.

Mr. BRITTEN. If the gentleman will yield, the gentleman, of course, knows in any organization of 85,000 men, whether it be in a factory, industrial organization, or whether it be in the Government, with an organization of 85,000 men there is bound to be some dissatisfaction, but not only in the presence of an enemy, but I am speaking of the American Navy in maneuvers at sea, from what I have seen and read, the American Navy, man for man and ship for ship, is the greatest in the world.

Mr. LAGUARDIA. That being so, I do not see the necessity for such a vast expenditure of money. I know in organizations of this country having 85,000 men, in large organizations you will not find an organization where men in command doing important work are receiving less pay than the man who is doing less important work.

Mr. WINGO. Will the gentleman yield?

Mr. LAGUARDIA. I will.

Mr. WINGO. What particular phase of this modernization of these two ships does the gentleman think is unwise and unnecessary?

Mr. LAGUARDIA. I will not pick out any one item, I will say——

Mr. WINGO. Is the gentleman opposed to replacing them?

Mr. LAGUARDIA. I am as a matter of policy——

Mr. WINGO. Is the gentleman opposed to replacing them?

Mr. LAGUARDIA. Yes; at the present time, of any battleship.

Mr. WINGO. The gentleman is aware of the fact that everything proposed will barely keep up the replacement status?

Mr. LAGUARDIA. I may be wrong, but I firmly believe we will never construct another new battleship. That is my belief.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BRITTEN. Is it the gentleman's belief or his hope?

Mr. LAGUARDIA. Both. As a matter of tactics, as a matter of the functions and use of battleships in the face of new weapons of warfare, such as aviation and submarines, I do not believe that any of these battleships will ever get into any more action than they were during the World War.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WINGO. Does the gentleman believe that other nations will abandon battleships too?

Mr. LAGUARDIA. Yes; I do.

Mr. WINGO. You think the millenium is coming?

Mr. LAGUARDIA. No. I am talking about battleships as a class of naval vessels. If we do not come to some understanding, I believe other nations will build other types of warships, but not battleships.

Mr. WINGO. Is the gentleman's conviction induced by the season of Christmas and his belief in Santa Claus?

Mr. LAGUARDIA. Oh, no. I am not losing hope that the people of the world will have their say, because the people do not want for war. But assuming that we do not come to an understanding about naval disarmament, assuming that the nations of the world will continue to build armaments, then, even then, I contend that the countries will not spend money in the construction of new battleships.

Mr. BLACK of New York. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. BLACK of New York. Does the gentleman believe that the Kellogg peace pact itself would justify us in going ahead?

Mr. LAGUARDIA. It would certainly justify us at this time. Taking into consideration the condition of the Navy, as well described by the chairman of the committee [Mr. BRITTEN], that man for man, and ship for ship, and the morale and everything else considered in comparison with other countries, I should say yes.

Mr. WINGO. What is there in the Kellogg peace pact to justify a man in thinking that we should abandon our naval armament? What is there in it, as a practical proposition, that is not in the existing treaties?

Mr. LAGUARDIA. You will find in no other treaty such a definite outlawry of war as in this Kellogg peace treaty.

Mr. WINGO. Does the gentleman think that the millennium has arrived, so that battleships will not be used?

Mr. LAGUARDIA. The gentleman should not construe my attitude as contending that a millennium has arrived. It is my conviction that the millennium has not arrived. But the voice of the majority of the people of the world indicates that they have arrived at that stage of thought where they desire this millennium to be brought about by the termination of the insane policy of competitive armaments.

Mr. WAINWRIGHT. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WAINWRIGHT. I wonder if the gentleman thinks these treaties for the outlawry of war should be construed as indicating that we should not keep up our Army and Navy?

Mr. LAGUARDIA. I do not want to belittle the Kellogg treaty. I think it is the greatest achievement for the cause of peace that has ever been accomplished in the history of the world. It is one step in the right direction.

Mr. WAINWRIGHT. I think most of us will go as far as that. Nevertheless, there is a duty resting upon us that we can not ignore.

Mr. LAGUARDIA. Another duty rests upon us, and that is: Taking our financial position into account and our industrial position in the world, and taking into account the present position and strength of the Navy, I think we should not do anything that may be construed as the United States starting a race in competitive armaments.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. WINGO. Carried to a logical conclusion, the gentleman's logic is that the house of the millionaire does not need police protection as much as the hovels of the poor.

Mr. LAGUARDIA. The gentleman does not correctly follow what I am contending for. He has the right to put any construction he desires on my attitude, but he can not draw conclusions for me.

Mr. WINGO. I asked the gentleman what there is in the proposed treaty that would cause our abandonment of adequate defense as a nation?

Mr. LAGUARDIA. Why should we take leadership in a competitive race for armament when that is not the desire or will of the American people?

Mr. WINGO. Does the gentleman insist that the mere replacement of battleships already in existence is entering into a competitive race for armament?

Mr. LAGUARDIA. I insist that the building of new cruisers is, yes; but I will give you my reasons as to the new battleships.

Mr. WINGO. By the time the new cruisers are completed we shall be further behind than we are now.

Mr. LAGUARDIA. The gentleman says we would be far behind, but there are other factors entering into the question of naval defense. You have got to take into account the mission of the Navy and the possible use of the Navy, and you have got to take into account the natural resources of the country back of the Navy; and, taking all these matters into consideration, I insist that we need not now build the new cruisers. The

President in his message well says that we should eliminate the time clause in the cruiser bill if it is passed.

Mr. WINGO. The gentleman says that the 5-5-3 treaty is not being carried out.

Mr. LAGUARDIA. The gentleman understood me correctly, but he does not apply it correctly.

Mr. GILBERT. What is there about the Kellogg peace treaty that gives the gentleman such hope?

Mr. LAGUARDIA. It is a forward-looking declaration, and it is translating into a treaty the desire of the people of the world to prevent and avoid war.

Mr. GILBERT. It does, but as Lloyd George said last week, it is just singing "hallelujah" while the world proceeds to arm.

Mr. LAGUARDIA. Yes; and we seem to be headed toward that movement of proceeding to arm. I desire to prevent just that.

Mr. GILBERT. For that reason I have not any great hopes of accomplishing great results through the Kellogg peace treaty. I desire to see the people get together. I want to see a disarmament conference—with all the cards on the table—conducted by representatives of the people and not by military and naval experts.

Mr. O'CONNELL. We must have advice, and how are we to act on these things without the advice of experts?

Mr. LAGUARDIA. We have had their advice in the past, and where has it led us? To more ships, more armaments—as the bills now before Congress bear witness.

Mr. BRITTEN. I hope the gentleman will pardon me, but I suggest he is not confining his remarks to the bill. We have seven or eight other bills before us, and I hope the gentleman will confine his remarks to this bill so that we may get on with the matter.

Mr. LAGUARDIA. I think the gentleman's observation is correct.

Mr. BRITTEN. I do not desire to take the gentleman off the floor, but under the rules of the House he should confine his remarks to the bill.

Mr. LAGUARDIA. I think the gentleman is well within his rights. I am seeking to oppose a question of policy, and I can not get away from the fact that there is no need at this time for the United States, situated as it is, to engage in a program of naval building such as we are now following. I believe that the President of the United States in his message, when he suggested the elimination of the time clause in the present cruiser bill, said just that much. Perhaps he might have said it in clearer language. He might have said there was no necessity for the cruisers now, but, knowing the activity of the big Navy people and knowing the desire on the part of some who are personally interested in the selling of armaments, his recommendation is couched in rather diplomatic terms. But the very recommendation to eliminate the time clause justified the position that some of us in the House have taken in opposition to these vast expenditures. [Applause.]

Mr. Chairman, I reserve the balance of my time.

Mr. BRITTEN. Mr. Chairman, I yield five minutes to the gentleman from Arkansas [Mr. WINGO].

Mr. WINGO. Mr. Chairman, I do not think anything is going to be gained in the progress toward the attainment of universal peace by having it insisted that every time a Member of the House states that he believes in maintaining, solely for peace and defensive purposes, a proper Navy for the United States, that he is in favor of a great competitive race among the nations of the earth and that he is opposed to peace. There is not a more peace-loving man in this House than I. I have had some sad moments in my life, and I think the heaviest hearted moment of my life was when I had to vote for war. I do not mean I am apologizing for it or regretting the vote. I regret the necessity for the vote, and I want to tell you there were two things, I am firmly convinced, which forced us into the World War more than any other two factors. One was the belief on the part of Germany that we would not resist her unwarranted aggressions upon the high seas, and the second was that we were not prepared to resist them. I think if she had believed that we either had the desire or that we had the ability to resist her aggressions she never would have indulged in them. If she had believed those things, peace would have come earlier and we would never have been dragged into the war.

I should have contempt for myself, as I would for any other man, if I did not profit by the lessons of experience. So, when I face the problem of national defense, especially the proposition of what we shall do with the American Navy, the first thought that comes to my mind is that fateful moment when I voted for war with the realization of two possible mistakes that had been made in the past. One of those mistakes I had been a party to by being a small Navy man in this House.

What is there in the Kellogg peace treaty that would justify this House in neglecting its constitutional duty? I am in favor of ratifying it and that is not the question. What is there in that declaration on the part of the nations of the earth to abandon war as a policy which would justify this House in neglecting its constitutional duty and saying that not only will we stop this work of reconditioning and modernizing these two vessels, upon which we have already spent millions, but that we shall abandon the cruiser program? I insist, with a great deal of deference for the opinion of the naval expert from New York [Mr. LAGUARDIA] that even when all of those cruisers shall have been completed we will still be slipping backward and that they will not represent a complete replacement of our strength for the Navy as a whole for the capital ships. I am perfectly willing to stand for the 5-5-3 ratio. I think the 5-5-3 ratio was not only the maximum but was accepted as the maximum because it represented the minimum of the defense requirements of the three nations that were mainly the ones whose requirements for defense purposes were taken as a standard.

It will be a sad day for this Nation when the people busy in the shop, in the factory, and on the farm are misled by the appeal to discharge the policemen and saying we all sincerely believe that by a great declaration of peace purpose we have purged the hearts of the children of men of all criminal intent and that policemen are not necessary any more. I say, it will be unfortunate when we become such a silly people as that. Let us urge peace. Let us take the leadership for peace in the world, but let us at all times maintain not only the means that are necessary for our defense but maintain that military condition which will command, when the time comes, the necessary fear of some criminal nations as well as the respect of all. [Applause.]

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. LAGUARDIA. Mr. Chairman, in reply to what the gentleman has stated as to the necessity of being prepared, permit me to remind him that just before the World War the Imperial Government of Germany had the greatest military machine ever known in the history of the world, perfect in every detail, and yet we saw that great military machine crushed. At the same time, the English Empire had the greatest fleet ever known in the history of the world. It was then following a two-to-one policy. It had the greatest fleet of battleships that ever flew the flag of one nation, and yet we saw that battle fleet impotent against the raids of the submarines and the British Isles on the verge of starvation when the United States went to their rescue. So great armanent is not your answer to permanent peace.

Mr. GIFFORD. Will the gentleman yield?

Mr. LAGUARDIA. I yield.

Mr. GIFFORD. The gentleman in his previous speech said that the President, having in mind the desires of the sellers of armament, made a gesture, as he suggested. For one I believe that message contained the sincerest sort of message to the House.

Mr. LAGUARDIA. The gentleman misunderstood me.

Mr. GIFFORD. I think not. The gentleman said, "Having in mind the wishes of the sellers of armament."

Mr. LAGUARDIA. That he couched his sincere statement in diplomatic language.

Mr. GIFFORD. I trust when the gentleman edits his speech he will cut out that particular statement.

Mr. LAGUARDIA. I trust the gentleman will read my speech just as I delivered it, and he will see that he is in error.

I yield 10 minutes to the gentleman from Alabama [Mr. HUDDLESTON].

Mr. HUDDLESTON. Mr. Chairman, I am unable to share the view of the gentleman from Arkansas [Mr. WINGO] that it was either the belief upon the part of Germany that we would not fight nor yet our "naval unpreparedness" that called us into the World War. The former I think may be dismissed without discussion.

So far as our alleged naval unpreparedness was involved, Germany had already been excluded from the surface of the sea. All of her surface vessels were in hiding in her ports and did not dare to venture out. Great Britain, without our help, was in complete control, and Germany's only activity was reduced to furtive submarine expeditions. Had we been able to match equal naval strength with that of Great Britain it would have

had little, if any, additional menace for Germany. It would not have influenced Germany to the slightest extent in the submarinings which caused America to declare war.

WHY AMERICA WENT TO WAR

The gentleman should look for the cause of our becoming involved in the war to something much more direct and obvious than our alleged lack of preparedness on the sea. We had allowed Great Britain to change the rules of war to suit her convenience. She had declared innocent merchandise, intended for civilian populations, to be contraband of war. She had arbitrarily marked out areas upon the sea and declared a "paper blockade" upon them. She had ordained that our ships must not travel upon what hitherto had been the highways of the world. She had captured our merchant ships upon the high seas and taken them into her ports for search. In this and many other instances we had, with merely a formal protest, allowed Great Britain to change international law to suit her convenience. We had permitted her to deny our traditional freedom of the seas. In addition, our manufacturers were furnishing to Great Britain and her allies vast quantities of war material and supplies. We had permitted our bankers to finance both Great Britain and France for war purposes.

Germany's attitude was that as Great Britain had been allowed to change the laws of war and of the high seas to suit her convenience she—Germany—should also be allowed to make changes which suited her. Germany said that as Great Britain had been allowed to delimit areas on the high seas and forbid nations to sail on them in carrying on trade, she—Germany—should also be permitted to set off certain sea areas in which our vessels should not be permitted to go. We refused to recognize any such right upon the part of Germany. We went into the areas forbidden by Germany, and there she sank our vessels, such as the *Essex*, and thereupon America declared war.

This was what brought us into the war. Back of it, of course, was our sympathy with the British cause. Our sentiments were on that side, and our dominant classes had the will to make war on Germany. Many had been shouting for war for months before the actual affront was given.

We could not insist upon our right to sail the seas as the highways of the world and to go wherever we chose, as against Germany, and yet acquiesce in the assumption of Great Britain to limit that right to suit her convenience. Our position was inconsistent, and upon it we stumbled and so entered into the war.

It was not the military weakness or unpreparedness of the nations which went into it that caused the World War. On land Germany was incomparably the strongest nation of the world and yet she "was dragged" into the war. Great Britain was incomparably the strongest nation on the sea and yet she "was dragged" into the war. It was not the weakness of either that caused them to go into the war. Influences such as that do not cause war in these times.

THE FUNDAMENTAL CAUSE OF ALL WAR

The real cause of all war, its fundamental cause, is "the will to make war," the disposition to go to war, the reliance upon force instead of being willing to rely upon justice. Given "the will to make war," and nations will always find a cause for war and a means of waging war. After all, the issue of peace or war is always one of national psychology. The way for us to have peace is really to desire peace and not to assume a pharisaical attitude that we are the only righteous nation and that all the others are governed by selfish motives. We have ourselves to fear more than any other people in the world so far as our danger of war is concerned. [Applause.]

Given the will for war there will always be war, and let me say to the gentleman from Arkansas that the very best way in the world to promote the will for war is to be ready and able to make war. The man who goes down the street with a pistol in his pocket will take very few affronts; he will be far more willing to engage in encounters than if he went weak and unarmed. He may believe that he is looking for peace but in reality he is hunting for a quarrel.

If a man wants to have peace, let him prepare his own heart for peace. [Applause.] If he wants strife, let him be prepared for strife and he will find occasion for it; he will find enemies, he will find excuses, and he will find the means.

"PREPAREDNESS" IS PREPAREDNESS FOR WAR

When we have created a great navy and army we have not prepared for peace, we have prepared for war; we are not marching toward peace, we are marching toward battle. The "preparedness" of which men prate is not preparedness for peace; it is preparedness for war. Do not forget that it is upon ourselves that great armaments will have their greatest effect.

With the power to make efficient war, to meet any and all nations in arms, there grows up in the hearts of a people a willingness to resort to arms and a disposition to rely upon force. There is no influence in the lives of men that will do so much to cause them to rely on force as the consciousness that a resort to force will find them triumphant.

There you have the cause of the World War, you have the reason why both Germany and Great Britain entered that war. Neither was "dragged" into it—both went voluntarily for their selfish, national purposes. Either could have prevented the war had she sincerely desired to do so. Both went into the war with shouting and acclaim because they felt the consciousness of power created by the possession of great military and naval strength.

Great Britain had incomparably the greatest navy the sun had ever shown upon. She knew it; she relied upon it; she was willing to accept the gage of battle.

Germany felt the consciousness of her might upon land. She knew the efficiency of the German Army; she knew what she could do upon the battle-field. Feeling that consciousness, the German Government and people came to rely upon that power, came to rely upon force instead of the justice of their cause. They rejoiced to put their strength to the test.

And are we different from the people of Germany or the people of Great Britain? Is there any inherent and substantial difference between the people of the United States and the people of the civilized nations of Europe?

Such differences as there are are wholly superficial. They are our blood brothers. They have the same hopes and dreams and are moved by the same impulses as we. Their ideals and standards are as high as ours. Do not let us be narrow, pharisaical, and self-righteous. Any assumption that we are inherently superior is based on ignorance and chauvinism; it is provincial and unworthy.

We have within our national life the same influences that led Great Britain and Germany into the World War. We should profit from their awful mistake. We should avoid the pitfall of reliance upon arms and the instrumentalities of wholesale murder instead of justice. Let us not think that the history of other nations has been different from what ours will be. The way to get peace is to love peace; to love righteousness; to be willing to deal justly by all nations, both great and small. We must restrain selfish impulses and avoid the things that bring the spirit of conflict throughout the world.

THE MYTH OF THE "ROBBER NATION"

We need not fear that there is a "robber nation" which will assail us because we are weak. That is merely the oft-repeated propaganda of those who want big armies and navies. It is the patter of those who trust in might instead of justice, those who lack faith in the honor of other men and faith in their own courage and fortitude. Let us trust others, their motives and impulses, and let us trust ourselves to do that which it is right to do. [Applause.]

THE VALUE OF TREATIES

The so-called Kellogg treaty among the nations for the outlawing of war is of immense value. Its chiefest value lies in the appeal which it makes to the imagination of mankind, in its appeal to the love of peace inherent in all men, in its appeal to the enlightened opinion of the thoughtful people of all the world. But let us not delude ourselves. Treaties alone do not secure peace. Without the will for peace back of a treaty, it becomes a mere "scrap of paper." Nations with the disposition to violate treaties will do so. Nations have always done so, even our own when we had not the will to keep the contract.

A mere treaty, no matter how binding its covenants nor how broad its compact, will not alone keep the peace. It must be buttressed by the earnest and sincere desire for peace, the will for peace. Wars are caused by the will for war. Peace is insured by the will for peace.

And so I say that the real cause of all war is the will for war. With it a nation will always find cause for war and means to wage war, and will inevitably submit its issues to the decision of arms.

And the way to have peace is to have the will for peace, to really want peace, and be unwilling to accept war as a substitute. No lasting peace was ever gained by war, or was ever founded upon might. No lasting peace was ever secured through preparedness—the ability to fight. Armies and navies are no insurance of peace. Rather are they incentives toward war. But, without treaties and without military power, in this age and time, that nation which wants peace and will not entertain the will for war—that nation which places its reliance, not upon might, but upon justice and the principles of humanity and brotherhood, need have no fear. [Applause.]

Mr. BRITTEN. Mr. Chairman, before I yield the next five minutes I would like to call the attention of the House to the

fact that we are drifting very far afield from the bill under consideration, and I hope that we may get the House back to the questions under consideration.

I now yield five minutes to the gentleman from Arkansas [Mr. WINGO].

Mr. WINGO. Mr. Chairman, I think the admonition of the chairman is wise, and that is the chief object of rising again to remind the House of the fact which I tried to stress before, that there is nothing in the so-called Kellogg peace treaty, and there is nothing in the honest desire of this Nation to do justice that would justify us in refusing to pass the pending bill for reconditioning and modernizing these two battleships; nor is there anything in the peace treaty or in the history of the world, or indeed in human nature, that would justify us in saying that we will build no more cruisers, or fail to replace the cruisers that are becoming obsolete.

The speech of my friend from Alabama, for whom I have respect and admiration, illustrates what I tried to drive home a moment ago, and that is that it would be unfortunate if you accepted the dictates of these gentlemen; if you are in favor of a policeman, or one battleship, then you are a militarist. You are a great military nation or else you are one of these——

Mr. CROSSER. Will the gentleman yield?

Mr. WINGO. Yes.

Mr. CROSSER. Will the gentleman tell me where you stop in order not to be a militarist and how far you can go?

Mr. WINGO. I suspect I would not stop where the gentleman from Ohio would. If the gentleman had not interrupted me I would have come to it. I think it is unfortunate that you have to take one or two extremes. If you believe in a middle course of maintaining only such a navy as is necessary for defense purposes, avoiding the two extremes, one of competitive armaments and the other of absolute disarmament, you are scornfully denounced as a militarist. These gentlemen wrap the cloak of their own superiority about them, denounce everybody else as military, and they alone are full of the love of peace. [Applause.] Those of us who are a little bit apprehensive by reason of our experience and who want to maintain a navy for defense purposes they cast into outer darkness. They excommunicate us from the temple of our fathers and say, "Begone with you, your heart is too impure to undertake to fix policies for us self-righteous people who alone should be trusted with the custody of the peace of the world."

Mr. Chairman, I decline to be forced into any such position. I still am going to be a practical man and say that I am proud that we do represent the only real peace-loving people on the earth. The nations of Europe, torn by prejudices that are unfortunate, alarmed by the experiences of a thousand years, view each other with suspicion. We are fortunate in that we are over here by ourselves. We can avoid the mistakes of Germany and the mistakes of England and maintain a navy solely for defense purposes, but because we do that, we ought not to be denounced as being a military people and not truly desirous of peace.

The gentleman from Alabama [Mr. HUDDLESTON] met himself coming back. In the first part of his speech he said that England and Germany had great military establishments, but they were dragged into the war.

Mr. HUDDLESTON. Oh, I said they were not dragged into the war.

Mr. WINGO. And in the last part of his speech the gentleman said that they went into it willingly, that they were not dragged into it.

Mr. HUDDLESTON. I said in the beginning that they were not dragged into it.

Mr. WINGO. Oh, I think if the gentleman will refer to the transcript of his remarks he will find that in the first part of his speech he said they were prepared, but that did not prevent them from being dragged in, and in the last part of his speech he said that they went into it voluntarily. I think they did. I do not believe that the peoples of Europe have been made over during the last few years. I do not believe that the old jealousies and the old animosities have been dissipated from the souls of those miserable people of Europe by the mere fact that their foreign ministers have signed a peace treaty which says that we all love peace and will not deliberately go to war. No, Mr. Chairman, human nature is the same. Let us maintain a defensive Navy, but do not let us be like our friend from Alabama, who would have us, in order to show that we really love peace, sink every battleship and cruiser and fire every policeman and just say, "God protect us, because we will not protect ourselves." [Applause.]

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk again reported the bill.

Mr. BRITTEN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HOOPER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13249) to authorize an increase in the limit of cost of alterations and repairs to certain naval vessels and had directed him to report the same back to the House without amendment, with the recommendation that the bill do pass.

Mr. BRITTEN. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. BRITTEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Latta, one of his secretaries, who also informed the House that on December 11, 1928, the President did approve and sign a joint resolution and bills of the House of the following titles:

H. J. Res. 332. Joint resolution to appoint a congressional committee to attend the exercises celebrating the twenty-fifth anniversary of the first airplane flight made by Wilbur and Orville Wright, on December 17, 1903, at Kill Devil Hills, Kitty Hawk, N. C.;

H. R. 8529. An act authorizing the Court of Claims to hear and determine questions of law involved in the alleged erroneous collection of tonnage taxes in 1920 and 1921 on three vessels operated by the Standard Oil Co. of New Jersey, under bareboat charter from a Danzig corporation;

H. R. 10885. An act to amend sections 23 and 24 of the general leasing act approved February 25, 1920 (41 Stat. L., p. 437); and

H. R. 13753. An act authorizing an expenditure of certain funds standing to the credit of the Cherokee Nation in the Treasury of the United States to be paid to one of the attorneys for the Cherokee Nation, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate insists upon its amendments to the bill (H. R. 6687) entitled "An act to change the title of the United States Court of Customs Appeals, and for other purposes," disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. NORRIS, Mr. WATERMAN, and Mr. WALSH of Montana, to be the conferrees on the part of the Senate.

The message also announced that the Senate requests that the bill (S. 584) entitled "An act for the relief of Frederick D. Swank," be returned to the Senate by the House of Representatives.

ALTERATIONS AND REPAIRS OF U. S. S. "CALIFORNIA"

Mr. BRITTEN. Mr. Speaker, I call up the bill H. R. 14660, to authorize alterations and repairs to the U. S. S. *California*.

The SPEAKER. The gentleman from Illinois calls up a bill which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Union Calendar. The House will automatically resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, and the gentleman from Michigan, Mr. HOOPER, will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 14660) to authorize alterations and repairs to the U. S. S. *California*, with Mr. HOOPER in the chair.

The Clerk read the bill, as follows:

Be it enacted, etc., That alterations and repairs are hereby authorized to the U. S. S. *California* at a total cost not to exceed $650,000. The alterations herein authorized shall be subject to the limitations prescribed in the treaty limiting naval armament ratified August 17, 1923.

With the following committee amendment:

Line 5, strike out "$650,000" and insert "$350,000 in addition to the sum of $300,000 authorized to be expended under existing law."

Mr. BRITTEN. Mr. Chairman, I call to the attention of the House the fact that this bill in its intent is distinctly different from the bill that we have just considered. The battleship *California*, affected by this legislation, is intended to

be one of the two flagships of the United States Navy. The *California* and the *Pennsylvania* are to be rigged up as flagships, to be commanded by the admiral who is in command of the fleet in or out of action. Under existing law the *California* may any year go into an extensive repair, costing not to exceed $300,000. The Navy Department has felt—and I think their suggestion is one of good sound business tactics—that as long as the *California* is going into an overhaul, costing anywhere under $300,000, it would be good business to change the antiaircraft protection aboard ship and install some 5-inch antiaircraft batteries, a new gun, very effective, intended to destroy enemy planes. That improvement on this one ship will cost $258,000. It ought to be made. These 5-inch guns should be installed on the *California* when she is put into the navy yard for her general overhaul, which will be done under existing law.

Mr. O'CONNELL. Is the ship going to be repaired at one of the Government yards?

Mr. BRITTEN. Yes. All of these repairs will be done at the Government yards, because it is impossible to make complete plans and specifications on which bidders could compete.

Mr. O'CONNELL. And is this cost necessary because the ship is going to be made a flagship?

Mr. BRITTEN. Yes. Two hundred and seven thousand dollars of the total amount is occasioned on that account. The *California* when remodeled will have the same character of equipment now on the *West Virginia*, the *Colorado*, *Maryland*, and *Tennessee*, the same kind of equipment that is going on the *Oklahoma* and the *Nevada*, and the same character of equipment that will go on the *Pennsylvania* and the *Arizona* under bill passed last Wednesday.

I reserve the remainder of my time.

The CHAIRMAN. The Clerk will report the bill.

The Clerk again reported the bill.

The amendment was read as follows:

Committee amendment: Page 1, line 5, strike out the figures "$650,000" and insert in lieu thereof the following: "$350,000 in addition to the sum of $300,000 authorized to be expended under existing law."

The amendment was agreed to.

Mr. BRITTEN. Mr. Chairman, I move the committee do now rise and report the bill (H. R. 14660) with the amendment to the House, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HOOPER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 14660, had directed him to report the same back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. BRITTEN. Mr. Speaker, I move the previous question on the bill and amendment.

The previous question was ordered.

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. BRITTEN a motion to reconsider the vote by which the bill was passed was laid on the table.

AUTHORIZING AN INCREASE IN THE LIMIT OF COST OF TWO FLEET SUBMARINES

Mr. BRITTEN. Mr. Speaker, I desire to call up the bill H. R. 14922.

The SPEAKER. The gentleman from Illinois calls up a bill, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 14922) to authorize an increase in the limit of cost of two fleet submarines

Be it enacted, etc., That the limitation of $5,300,000 each imposed in the naval appropriation act for the fiscal year ended June 30, 1926, on construction and machinery expenditures on account of two fleet submarines is hereby increased to $6,650,000 each.

The SPEAKER. This bill is on the Union Calendar, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union, and the gentleman from Michigan, Mr. HOOPER, will resume the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 14922, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 14922) to authorize an increase in the limit of cost of two fleet submarines.

Mr. BRITTEN. Mr. Chairman, the bill now before the House is again different from either of the two which have been passed, in that this bill provides an increased authorization for two new ships. By new ships I mean ships designed by the department that have been under construction for several years, and the original estimates of the department and original estimates of the navy yard all having been in error, the department now comes to Congress for an increased authorization.

Mr. BANKHEAD. Will the gentleman yield in that connection?

Mr. BRITTEN. Yes, sir.

Mr. BANKHEAD. It is rather interesting for Members on the floor of the House to see the number of bills brought in by the gentleman's committee authorizing an increase in estimates for the construction for naval vessels. Bill after bill is brought here and it has occurred not only in reference to these bills which have been brought forward to-day, but in reference to airplane carrier ships and others increasing the original estimates by the Navy Department by millions and tens of millions of dollars. I would like to know why it is that time after time the officers of the Navy Department, whose duty it is to make these estimates, fail so badly in making estimates for these vessels. The gentleman will, of course, recall that his committee brings in a number of bills authorizing an increased estimate for these constructions, and somebody must err very badly in making these estimates in the department. Can the gentleman give a satisfactory explanation?

Mr. BRITTEN. I will try to do so.

Mr. BANKHEAD. I wish the gentleman would, if he can.

Mr. WOODRUFF. Will the Chairman permit me——

Mr. BRITTEN. I will yield to my distinguished colleague.

Mr. WOODRUFF. I will say in response to the gentleman's question that in regard to the airplane carrier this was something new in naval construction.

Improvements were being made continuously, even after the work on the ship had been begun and before the ships originally intended for cruisers were transformed into airplane carriers. As I said before, this is a new type of ship, a new type of construction. Constant improvements are being made on the design and in the type of ship itself. That, in a great measure, was responsible for most of the increases in the cost of the ships over the estimate submitted to the Committee on Naval Affairs originally.

Mr. BANKHEAD. Of course, I understand that that relates peculiarly to these airplane carriers. But my inquiry as to the increases of the estimated cost was addressed particularly with reference to the ordinary type of ship.

Mr. WOODRUFF. I shall be very glad to give my opinion in regard to that also. Anyone who understands ship construction will realize that when you go below a ship's deck to overhaul or remodel a ship you will occasionally find conditions that you do not expect to exist when the remodeling begins. We find frequently in the remodeling of these different ships that when they get the ship opened up, much more than was expected is found to be needed. I have no doubt of the ability or the integrity of these splendid men down in the Navy Department when they submit their estimates to Congress. I think they are giving the best service to the Government and to the country that can be given in the United States to-day.

Mr. BANKHEAD. I had no intention of impugning the character or ability of these experts, but I thought it was somewhat remarkable when you consider the number of instances where you have brought in bills to increase the original estimates, involving millions and millions of dollars. I do not recall any case where the original estimates were found to be too high.

Mr. WOODRUFF. I have stated the reasons why these conditions have existed in the past and why they now exist. I have no doubt that in the future we shall find from time to time that it is necessary to increase the limit of cost on work of this character.

Mr. O'CONNELL. Mr. Chairman, will the gentleman yield?

Mr. WOODRUFF. Yes.

Mr. O'CONNELL. Is it not a fact that these increases do not pertain alone to the Navy, but to probably all other departments of the Government after work is given out?

Mr. WOODRUFF. Yes.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. BRITTEN. Yes.

Mr. BLANTON. Was not the real reason for these increases in cost clearly given by Admiral Magruder, for which, of course, the Navy spanked him? Was it not given by him some time ago?

Mr. BRITTEN. Not at all.

Mr. BLANTON. About the excessive expense in our own Government navy yards over the lesser cost in industrial yards?

Mr. BRITTEN. He did complain about the overhead expense in the navy yards.

Mr. BLANTON. And was not that sound?

Mr. BRITTEN. In a way he was right.

Mr. BLANTON. Yes; in a way.

Mr. BRITTEN. But the House has frequently gone on record by voting in favor of building ships in Government navy yards. I have always voted to the contrary.

Mr. BLANTON. Yes. The House has gone on record lots of times one way and another.

Mr. BRITTEN. Yes; usually one way or another. [Laughter.]

Mr. BLANTON. But that does not detract from the soundness of the position taken by Admiral Magruder, and instead of spanking him, if the Navy had paid some attention to what he contended for along that line we would not have this condition.

Mr. MILLER. It was the same Magruder who claimed that the Battle Fleet of 1907 was the superior of the Battle Fleet of 1927.

Mr. WOODRUFF. I do not think the gentleman from Texas will contend that anything Admiral Magruder has said about our navy yards has reflected on the ability or the worthiness of men who do the actual physical work of our navy yards.

Mr. BLANTON. We keep the navy yards in the various districts because the representatives of those districts want them there, and the men must be employed there under certain rules not in accordance with sound industrial principles.

Mr. WOODRUFF. Let the gentleman from Texas enumerate some of those yards.

Mr. BLANTON. I can enumerate four or five of them, but I do not want to embarrass my colleagues.

Mr. WOODRUFF. The gentleman should state which ones are not properly conducted or kept up.

Mr. BLANTON. If you will read again Admiral Magruder's report you will see that he explains the pork-barrel feature.

Mr. MILLER. Perhaps some of the Members have read those reports. He was commandant of the League Island Navy Yard over at Philadelphia.

Mr. BLANTON. Yes; he was. Since he made his plea for economy the Navy Department has removed him and placed him where he can not do them any harm any more.

Mr. BRITTEN. Mr. Chairman, I would like, in answer to the statement of the gentleman from Alabama [Mr. BANKHEAD], in addition to what my colleague from Michigan [Mr. WOODRUFF] has said, to say it is true, as the gentleman from Alabama has pointed out, that in the past the committee has come before each Congress requesting an increase in the limit of cost of ships. But that has been brought about largely by the World War and the conditions following the war, where it was impossible to make accurate estimates with regard to labor and material. It has been the same in every walk of life since then. Every man who has built a house since the war knows that he has had to pay more for that construction than he should have paid and more than he would have to pay to-day.

Mr. BLACK of New York. And we have to pay more for Congressmen.

Mr. BRITTEN. I was wondering whether the gentleman from New York would say that since we are to have a Republican delegation to come from Texas that condition will then no longer prevail.

Mr. BLANTON. We have no Republican delegation to come from Texas. All elected this time are Democrats.

Mr. BRITTEN. We may have a Republican Cabinet officer.

Now, Mr. Chairman, with reference to fleet submarines; we have no fleet submarines. We have a large mine-laying submarine. The minority leader on our committee, the gentleman from Georgia [Mr. VINSON], went into this thing about as thoroughly as any district attorney in any State in the United States would go into a case in an endeavor to locate the responsibility for what the gentleman from Alabama designates as the continual increase in these estimates of cost.

Here is what developed on these two fleet submarines. Away back in February, in 1925, the department came to Congress with the request for an authorization to build these ships at $5,300,000 each. We had never built that kind of a ship and no other nation had. The department made the best estimate it could for the construction of that type of a ship, and let me suggest to my friend from Alabama that since 1925 various devices—sounding devices, detection devices—the installation of big guns on submarines, came into being, something heretofore unheard of. Imagine carrying a 6-inch gun, 25 feet long, two of them, on a submarine and diving with those guns on the upper deck. Those conditions did not prevail in 1925 when their estimates were made and they requested an authorization of $5,300,000. One year later, and after they had been digging into plans and specifications and devising the best means for constructing this type of ship, heretofore unknown, they requested estimates from the navy yards of the country, the Government yards, on certain plans and specifications. That was in February, 1926, practically a year afterwards. The yardmasters, with all the help they could get, went into those plans and specifications as thoroughly as they could. They got into competition with each other with the view of getting those contracts in their respective yards. They did everything possible to determine the cost, and their estimates were in accord with the estimates of the department, that these ships could be built in navy yards for $5,300,000 apiece. Now, what has developed? One is being built at Mare Island and the other is being built at Portsmouth, N. H., both Government yards, and it is now determined that the ships can not be completed for the original authorized price. So the department has requested the increase that is called for in the bill. That is all there is to this proposition, gentlemen.

We are building something no other nation has and will not have unless they follow our example. It is a new machine, patterned along new lines, because of the new methods of warfare of to-day. I think the department has done its best, and I do not think any other navy department in England, Germany, France, or Japan could have done any better, and probably would not have done as well.

Mr. O'CONNELL. And they have received the approval of the Director of the Budget.

Mr. BRITTEN. Oh, yes; they have the approval of the Director of the Budget.

Mr. Chairman, I reserve the balance of my time.

Mr. BLANTON rose.

The CHAIRMAN. Does the gentleman from Texas rise in opposition to the bill?

Mr. BLANTON. I do.

The CHAIRMAN. The gentleman from Texas is recognized.

Mr. BLANTON. Mr. Chairman, I predict with the present administration remaining in power that within the next 10 years we are going to have the biggest, strongest, and most expensive navy that floats the high seas. We have now one of the ablest and most influential men in the House at the head of the Naval Affairs Committee and he stands for the biggest navy that money can buy, and he has a way of putting his convictions over, not only on his committee but on the House itself, and he is going to have a navy that is going to infringe upon our naval disarmament and every other treaty and agreement for the limitation of arms that we could enter into.

Mr. BRITTEN. Will the gentleman yield for a statement?

Mr. BLANTON. Yes.

Mr. BRITTEN. The gentleman knows that the present chairman of the Committee on Naval Affairs recently made an endeavor to promote another naval limitation conference?

Mr. BLANTON. Because he believes we got the worst of it in the last one, and he wants some limitations taken off that will not hamper us in the future. [Laughter.]

Mr. BRITTEN. No; the gentleman is entirely mistaken. I might say to the House now that the committee is on record as being in favor of another limitation conference just as quickly as possible with the view of doing the very thing the gentleman is in favor of, an actual limitation of naval armaments and reduced Navy expenditures.

Mr. BLANTON. Well, I am going to prove what I said, that the gentleman has a way of putting things over on the House when he makes up his mind to do it. I am going to prove to him that he has done it. You take the first bill we passed to-day for an increased cost in modernizing certain battleships. Do you remember the history of that bill? When that bill in its original form years ago first came upon this floor it was a bill embracing only $6,500,000 to modernize certain ships.

Mr. BRITTEN. I know the gentleman desires to be correct?

Mr. BLANTON. Yes.

Mr. BRITTEN. The bill which the gentleman has in mind was one providing for the elevation of turret guns?

Mr. BLANTON. I am going to get to that.

Mr. BRITTEN. No; the gentleman is not. That bill provided for the elevation of turret guns on 13 ships at $500,000 apiece, which amounted to $6,500,000. It did not provide for modernizing the *Oklahoma* and *Nevada*, which were included in the bill just passed.

Mr. BLANTON. I am getting to that.

Mr. BRITTEN. The gentleman is getting at it from the wrong end.

Mr. BLANTON. I am getting at it from the beginning. That bill was brought upon the floor authorizing the ex-

penditure of $6,500,000 for the so-called modernization of 13 battleships. When we looked into it it was to raise the elevation of the guns on those ships. That was the main item. That was sponsored by our distinguished friend from Illinois [Mr. BRITTEN] as the spokesman of the Navy.

This was one of his particular pets, but at that time the distinguished gentleman from Pennsylvania, who was chairman of the committee, at first was against him. He did not think it was necessary. He thought it was in violation of our treaty, and stood against the bill, but through persistent hammering finally agreed to it. But opposition did not stop our friend from Illinois; it only made him more insistent, and he finally brought the bill on the floor and I raised the point of order against it at that time that it was in violation of our 5–5–3 treaty, and I read the provisions of the treaty which said that that sort of change could not be made in our ships, but my point of order was overruled. And as the gentleman has said, the House votes either one way or the other, and it voted with the gentleman from Illinois and passed the bill.

Mr. BRITTEN. Will the gentleman yield right there, please?

Mr. BLANTON. Certainly.

Mr. BRITTEN. The Committee on Naval Affairs reported that bill out favorably and, I believe, unanimously.

Mr. BLANTON. Finally it did so, but in the beginning the chairman of the committee was against it. The gentleman from Illinois won the chairman over.

Mr. BRITTEN. It was sponsored by the then chairman, our very distinguished and dear friend, Mr. Butler.

Mr. BLANTON. I am talking about the first time it came up.

Mr. BRITTEN. That is what I am talking about. It was then passed, and the following year the legislation was repealed on motion of the chairman of the Committee on Appropriations, Mr. Madden, because of certain testimony which had subsequently been given before the Committee on Appropriations about the elevation of guns and did not refer to the general modernization of certain ships.

Mr. BLANTON. That is part of its history I was going to relate. There will not be any disagreement between us about the matter. I am going to convince the gentleman against his will that what I have said is true—when he makes up his mind to do a thing he puts it over. [Laughter.]

Here is what stopped the spending of that money. Certain naval officers had appeared before the committee and testified that England was raising the elevation of her guns in violation of her treaty, and that Japan was doing it in violation of her treaty, and that we should do it likewise, and this was the argument that our friend from Illinois made upon this floor, that if they had violated the treaty we had the right to do it.

Mr. BRITTEN. Now will the gentleman yield?

Mr. BLANTON. I will yield in just a moment.

Mr. BRITTEN. The gentleman can have all the time he desires but I want to have the RECORD correct and in proper order.

Mr. BLANTON. Yes; I yield to the gentleman, if he desires to deny what I have said.

Mr. BRITTEN. And just at this point I would like to say that testimony came to the House from naval officers to the effect, if you please, that England had elevated her guns from 15 degrees to some other elevation and that Japan was elevating her guns——

Mr. BLANTON. Yes; the gentleman is simply admitting what I have said.

Mr. BRITTEN. Well, not quite; the presumption being that in elevating their guns they were not violating the spirit of the Washington treaty and that we could do likewise without violating that treaty. We then passed the legislation, and it developed that England was not elevating her guns, for it was not necessary that England elevate her guns, because they already had a high degree of elevation before the 1922 conference; but Japan was elevating her guns, or since the conference had elevated her guns, and no one——

Mr. BLANTON. I hope the gentleman will allow me to make my own speech.

Mr. BRITTEN (continuing). And no one has said that she violated the treaty.

Mr. BLANTON. We will get to that feature of it later. Notwithstanding the fight I made against it, the gentleman passed his bill to spend the $6,500,000 in raising the elevation of our guns.

The Congress adjourned, and the distinguished Secretary of State took that matter under consideration and decided with my contention, and made a recommendation to the President, if you please, that just what I had contended for in the point of order on the floor was true; that it was in spirit a violation of the terms of our Washington treaty; and Mr. Madden, that distinguished chairman of the Committee on Appropriations, than whom there never will be a more valuable one to the country, stopped the spending of that money; and just as soon as the Congress met he brought a resolution in here attached to one of the appropriation bills to repeal that provision in the law and to put that money back into the Treasury; and he saved that $6,500,000 for the people of the United States. At least he saved it for a time.

And what did Mr. Madden say on the floor of this House at that time? My friend from Illinois will not deny this, because I can reproduce it from the RECORD. Mr. Madden came upon this floor and said that the naval officers of this Government had lied to the committee about the elevation of these guns. Did he not say that?

Mr. BRITTEN. No; he did not.

Mr. BLANTON. What did he say?

Mr. BRITTEN. He said that the naval officers who came before the committee had misrepresented or misunderstood the situation.

Mr. BLANTON. Is not that lying?

Mr. BRITTEN. No; had misrepresented the situation with respect to the elevation of guns by other foreign governments. That is what he said.

Mr. BLANTON. That is the legal difference between tweedledee and tweedledum. If the gentleman will get the RECORD, he will see where I asked Mr. Madden the question. I said, "The gentleman then means to tell us that these naval officers lied to us?" and Mr. Madden said, "Yes; they did."

This was the situation, and Mr. Madden said it had come to a pass where you could not believe the officers of the Navy with respect to the expenditure of the people's money.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. Yes; I will yield to the gentleman in a moment.

This did not stop our friend from Illinois. He kept hammering away on the matter until he again passed his bill, and I think instead of simply embracing the $6,500,000 he raised the ante and got it up to about $13,000,000 so as to embrace further modernization, and so on, and passed the bill. It became a law and is the law to-day, and the money has been spent.

Then he comes in to-day and gets an authorization for an additional amount. Remember what Admiral Magruder said about it. He said if you would take the pork barrel out of the Navy business, take it out of the navy yards in the districts of prominent Congressmen, take away the incentive to spend money when there was no necessity for it, you would save the people of the United States many millions.

The minute I read this statement in the press I knew what was going to happen to Admiral Magruder. It is just what happens to any man of the Army or the Navy or in any other department of Government who makes a suggestion for economy when it does not go through the regular channels.

They want everything submitted first to the Secretary to see whether he wants it given to the public; and poor Admiral Magruder instead of being commandant of the Philadelphia Navy Yard, where is he now? He has lost his special standing in the position in which he used to preside, he has no standing now with the Navy.

Mr. BRITTEN. Yes; he is now occupying a desk in the Navy Department, like hundreds of others.

Mr. BLANTON. That is because they could not get rid of him. That is just the point that Admiral Magruder made; that if you take the desk away from these idle officers doing unimportant nothings that are unnecessary, you would be saving millions.

Mr. BRITTEN. Admiral Magruder was writing stories for newspapers and magazines for pay and the Navy Department gave him a desk to make his work more agreeable.

Mr. BLANTON. He did just what many other Government officials do—write for money. But what he wrote was worth while.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. Yes.

Mr. SCHAFER. Would it not be better to take the admiral away from his desk and put him in command of a Coast Guard vessel to chase the rum runners?

Mr. BLANTON. If he went after the rum runners with the same energy he was trying to stop waste in the Navy, he would stop a lot of this stuff that is coming in here for Christmas. [Laughter.]

We know that there is waste at every turn in the Government navy yards. Every one of us knows that the Government can not build a ship or renovate or modernize a ship in any of its navy yards as cheaply as they can in an industrial yard. They can not do it as cheaply as they can under industrial competition. We ought to get competitive bids for every

piece of such work. We ought to maintain certain navy yards to keep us independent of the industrial yards. We ought not to be put in the position where they could ruin us.

Mr. WOODRUFF. Will the gentleman yield?

Mr. BLANTON. I will.

Mr. WOODRUFF. I suggest that it would be impossible to secure bids on the modernization of these battleships by reason of the fact that before they open up the ship they can not tell what things they will have to do when they get at it.

Mr. BLANTON. Does the gentleman think that the New York Ship Building Corporation would not be in a position to make a proper estimate?

Mr. WOODRUFF. They could not, for the very good reason that there is no possible way in which they can look through a steel hull.

Mr. BLANTON. The gentleman from Michigan does not mean to assert that there is not a great deal of waste in our navy yards?

Mr. WOODRUFF. I have not said anything about that. We have at least one navy yard just as efficient as any industrial yard, and that is the Mare Island yard.

Mr. BLANTON. Does the gentleman recollect what former Assistant Secretary Franklin D. Roosevelt reported at one time, and the New York business men think that he is pretty good authority. He said that under our system of business that controls our navy yards we did not get more than 67 per cent efficiency on any work that was done in the Government-owned yards. If we are only getting 67 per cent efficiency in the Government navy yards, then does the gentleman think that we ought to be confined to them?

Mr. WOODRUFF. I am not disposed to accept the figures of Mr. Roosevelt, because I happen to know something about the navy yards in this country.

Now, I am one of those who regret the passing of the gentleman from Texas from this House. I want to say that he has been a mighty useful Member of the House.

Mr. BLANTON. I thank the gentleman.

Mr. WOODRUFF. I want him after he leaves the House to pay a little attention to naval affairs, and after the cruisers now being built, some in private yards and some in naval yards, are completed, I want him to compare the cost of the cruisers built at Mare Island with those built in the industrial yards.

I think he will find that the comparison will result in great credit to the Navy in that particular navy yard.

Mr. BLANTON. Oh, I do not want to do away with all of our navy yards. I want to keep enough to protect the Government, but I want to do away with the pork-barrel end of it, and there is a pork-barrel end of it, and I hope the Congress some of these days will wake up and put a stop to it.

Mr. JAMES. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes; but I am through.

Mr. JAMES. I am also one of those who are sorry to see the gentleman from Texas leaving us, although he has objected to a good many bills that have come out of our committee, but I know that he did what he thought was right.

Mr. BLANTON. I was merely following my convictions.

Mr. JAMES. I know that, and I so stated. Did I understand the gentleman to state that he thought that the members of the Army would be punished if they called attention to extravagance?

Mr. BLANTON. Yes. Let any general in the Army, I do not care how high his position, make a recommendation publicly that does not come through the Secretary of War's office, and he will be punished just as sure as the gentleman is standing on this floor.

Mr. JAMES. I do not believe that any general in the Army or any officer of the Army needs to be afraid of telling the truth about anything he finds because he fears being punished for it. He will not be punished so far as the House Military Affairs Committee is concerned.

Mr. BLANTON. If the gentleman will cite me to one instance where any general of the Army or any high officer in the Navy has ever made a recommendation that has not come through official channels, when he has not been punished for it, I shall take back every position that I have taken on this bill.

Mr. JAMES. But nobody in the Army needs to be afraid of being punished.

Mr. O'CONNELL. How about General Mitchell?

Mr. BLANTON. General Billy?

Mr. O'CONNELL. Yes.

Mr. BLANTON. He was not punished much. He just had his position taken from him. That was all.

Mr. JAMES. I am not talking about General Mitchell. He was punished and should not have been. I am talking about the last two or three years.

Mr. BLANTON. Oh, I could name the gentleman many big officers in both the Army and the Navy who have been punished in the last 20 years.

Mr. JAMES. Name one in the Army.

Mr. BLANTON. Gen. Billy Mitchell.

Mr. JAMES. Outside of him.

Mr. BLANTON. And then there is Admiral Magruder of the Navy.

Mr. JAMES. Outside of them.

Mr. BLANTON. I will later give the gentleman a list half as long as his arm. I wish it were so that they could make proper recommendations, but neither the Army nor the Navy will permit any one of them to do it except through official channels.

Mr. BLACK of New York. Only a short while ago General Summerall pointed out the bad housing conditions in the Army, and he was not punished. Instead of that there was an investigation made and his recommendations were carried out. And Admiral Plunkett of the Navy, time and time again called attention to the needs of the Navy, and he was not punished.

Mr. BLANTON. The recommendation made by General Summerall was in the interest of carrying out the Army spending plans, so as to get possession of all of the money that they received from the sale of Government property, which they wanted to get within their control without any strings on it held by Congress. He was carrying out the policy of the Secretary of War. He was carrying out the policy of the Army War College. He was helping along the General Staff. He was getting money for them to spend, and that is their sole objective in peace times. They want millions to spend. He was not trying to economize for the people.

Mr. BLACK of New York. The gentleman voted for that money?

Mr. BLANTON. No; I fought on this floor to retain our control of these proceeds from sales.

Mr. BLACK of New York. Did not the gentleman vote for the money spent on Army housing?

Mr. BLANTON. I have voted to spend money for all legitimate housing.

Mr. BLACK of New York. That is all that he asked for.

Mr. BLANTON. If the gentleman will look back through the RECORD for 12 years he will find that every vote that I have cast in this House has been for this Congress to hold the purse strings and for this Congress to pass on every million dollars that comes out of the people's Treasury. That is what ought to have been done in that case. We turned them over $100,000,000 without any strings on it, and they were back the very next month asking for more.

Mr. SCHAFER. Is the reason that the gentleman did not vote for the LaGuardia amendment providing sufficient funds to enforce prohibition because he was looking after the Treasury purse strings?

Mr. BLANTON. Oh, my friend knows that if there is a fundamental wet in this House it is the gentleman from New York [Mr. LAGUARDIA], and that gentleman was trying to hamstring prohibition when he offered that amendment.

Mr. BRITTEN. Oh, Mr. Chairman, I rise to suggest that we are getting away from our bill.

Mr. BLANTON. I am straying from the subject by reason of questions asked, however.

Mr. JAMES. The gentleman speaks about our turning over $100,000,000 to somebody. What hundred million dollars was that?

Mr. BLANTON. From the sale of Government-owned property that had been held by the Army and was sold by it.

Mr. JAMES. We never turned over any hundred million dollars. We gave to the Navy and the Shipping Board and other people over a hundred million dollars' worth.

Mr. BLANTON. We turned over to the Army all of the proceeds from the sale of Government property it no longer had need of, and it was estimated at $100,000,000, and we thus lost our hold on it, and we ought to keep our hold on every dollar of money that comes out of the people's Treasury. Congress should pass on all expenditures. [Applause.]

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the limitation of $5,300,000 each imposed in the naval appropriation act for the fiscal year ended June 30, 1926, on construction and machinery expenditures on account of two fleet submarines is hereby increased to $6,650,000 each.

Mr. BRITTEN. Mr. Chairman, I move the committee do now rise and report the bill (H. R. 14922) to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and Mr. TILSON having taken the chair as Speaker pro tempore, Mr. HOOPER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 14922, had directed him to report the same back to the House without amendment, with the recommendation that the bill do pass.

Mr. BRITTEN. Mr. Speaker, I move the previous question on the passage of the bill.

The previous question was ordered.

The bill was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. BRITTEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

DISTRIBUTION AND PROMOTION OF COMMISSIONED OFFICERS OF THE MARINE CORPS

Mr. DARROW. Mr. Speaker, by direction of the Committee on Naval Affairs, I call up the bill H. R. 13685.

The SPEAKER pro tempore. The gentleman from Pennsylvania calls up the bill which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 13685) to regulate the distribution and promotion of commissioned officers of the Marine Corps, and for other purposes.

The SPEAKER pro tempore. This bill is on the Union Calendar, and the House automatically resolves itself into the Committee of the Whole House on the state of the Union, and the gentleman from Michigan, Mr. HOOPER, will resume the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 13685, which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 13685) to regulate the distribution and promotion of commissioned officers of the Marine Corps, and for other purposes.

Mr. DARROW. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. DARROW. Mr. Chairman, it is not my desire or purpose to enter into any lengthy discussion in an explanation of this bill except to say it has been most thoroughly considered by the Committee on Naval Affairs and unanimously reported with amendment.

Let me say the bill provides a system of promotion by selection, combined with a system of transferring automatically to the retired list each year a certain number of officers from the grades of colonel, lieutenant colonel, and major who have been passed over by the selection board. Promotion by selection, combined with this system of elimination, will accomplish several very desirable results. First of all, it will materially speed up the advancement of the most efficient officers of the Marine Corps in the grades of colonel, lieutenant colonel, and major. It will also raise the standard of efficiency in those grades by transferring a certain number of the least efficient officers each year from the active list.

Mr. O'CONNELL. Will the gentleman yield right there?

Mr. DARROW. I will.

Mr. O'CONNELL. Is not it along the line of the bill which came in the other day for line officers of the Navy, following the same idea?

Mr. DARROW. I was going to allude to that; it follows exactly the same line as the bill we passed last week for the line of the Navy.

Mr. O'CONNELL. And comes with a unanimous report of the committee?

Mr. DARROW. With the unanimous report of the committee. I just want to say here in connection with the lieutenants that it will also, by reason of the increased number of vacancies caused by transfers from the active list of the least efficient officers, speed up the promotion of the officers in the grades of captain and first lieutenant. The bill provides for the promotion of second lieutenants to the rank of first lieutenant after three years' commissioned service, bringing the young men who are appointed in the corps from the Naval Academy and from other sources on an equality in that respect with their brother officers of the same classes at the Naval Academy who are appointed in the line of the Navy, the Supply Corps of the Navy, and the Construction Corps of the Navy. The bill changes the percentages of the various grades but those in this bill are identical with the percentages in the bill we passed last week for the line of the Navy. It increases the number of major generals by two, making five in all, which includes the Major General Commandant of the Marine Corps.

Mr. O'CONNELL. The real commandant.

Mr. COLLIER. Will the gentleman yield?

Mr. DARROW. I will.

Mr. COLLIER. My attention has been directed to a Senate bill that really accomplishes for the most part the same purpose.

What I wish to find out from the gentleman from Pennsylvania is, Is this bill similar to the Senate bill?

Mr. DARROW. I think the gentleman from Mississippi is referring to the warrant officers' bill, is he not, instead of this?

Mr. COLLIER. No. It is to equalize the difference in the rank between the Navy and Marine officers; and from the title and from what I heard of this bill, it would apparently accomplish just what the Senate bill is endeavoring to accomplish. If that is so, I shall be glad to support this bill.

Mr. DARROW. The purpose of this bill is to make it in accord with the naval bill as it passed the House in every particular, so far as it would be applicable to the Marine Corps.

Now, Mr. Chairman, there is one other point that I would like to bring out. The bill completes the amalgamation of the permanent staff officers with the officers of the line. This was commenced under the law of 1916 and is carried to completion now if the provisions of this bill prevail. This is done by revoking their permanent staff commissions and issuing in lieu thereof commissions in the line, so that hereafter staff duties will be performed by the temporary detail of line officers who have specialized in the duties that pertain to the staff.

The bill applies to general officers the same provision that prevails and which has prevailed in the Navy for the past 12 years in reference to admirals, creating two classes of flag officers in the Navy. There are two classes, the upper and lower half of admirals, one receiving the pay and allowances of a major general and the other the pay and allowances of a brigadier general. That is exactly the provision here in reference to general officers.

Now it will, of course, to a certain extent increase the cost of officers in the Marine Corps. In the first year the increase will probably be $121,000, but by eliminating a certain number of the least efficient officers each year, and as the pay of officers in the service depends more upon their longevity than it does upon their rank, this will gradually decrease the amount, so that in a few years it will balance, and thereafter it will save the Treasury additional sums.

Mr. BLACK of Texas. I would like to be recognized against the bill after the gentleman from Pennsylvania gets through.

Mr. FRENCH. Mr. Chairman, will the gentleman yield?

Mr. DARROW. Certainly.

Mr. FRENCH. The report does not indicate whether or not this bill has the support of the department. It was reported by the committee yesterday and made available to Members in print for the first time to-day. I think we ought to be advised as to the opinion of the department and of the Bureau of the Budget, and I would like to have the gentleman indicate to the House the attitude of the Budget and of the department, if he has the information.

Mr. DARROW. I would answer that question by reading a letter from the Director of the Budget addressed to the Secretary of the Navy. It is as follows:

BUREAU OF THE BUDGET,
Washington, May 10, 1928.

The honorable the SECRETARY OF THE NAVY.

MY DEAR MR. SECRETARY: I have your letter of May 9, 1928, inclosing a draft of proposed legislation to regulate the distribution and promotion of commissioned officers of the Marine Corps, and for other purposes, which draft is a substitute for the draft submitted with your letter of November 23, 1927.

I have again taken this matter up with the President, who has instructed me to advise you that this last draft of proposed legislation is not in conflict with his financial program.

Very truly yours,

H. M. LORD, *Director.*

Mr. FRENCH. Is that the bill that we now have before us?

Mr. DARROW. It is the bill that we now have before us.

Mr. FRENCH. It likewise has the support of the Navy Department?

Mr. DARROW. It has the support of the Marine Corps and the Navy Department, as well as the support of the Director of the Budget.

Mr. FRENCH. Let me make this observation: Generally speaking, I think the criticisms that my colleague has directed attention to ought to be corrected by law, but I am not happy that the bill should be available to Members—a bill as important as this—only upon the day when we consider it.

Mr. VINSON of Georgia. Does not that frequently happen with the Committee on Appropriations?

Mr. FRENCH. Would the gentleman draw a parallel here with the practice on an appropriation bill? If he did, he would have a vote on this bill perhaps to-morrow or several days thereafter, whereas, as I understand it, he expects to have a vote now. Upon appropriation bills we usually begin discussion upon the day they are reported to the House, but it is a rare thing that a vote is had until several days later.

Mr. O'CONNELL. This bill does not increase the number of officers at all, does it?

Mr. DARROW. No. The number remains the same as now, practically 1,020. It merely changes the percentages to conform to the present organization, and that is exactly like the percentage that is in the bill that passed the House the other day for the line of the Navy.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Pennsylvania reserves 45 minutes of his time. The gentleman from Texas [Mr. BLACK] is recognized.

Mr. BLACK of Texas. Mr. Chairman, the report of the Naval Affairs Committee, filed on the 10th of December, says of this bill that its main purpose is to equalize the opportunities of all officers of the Marine Corps, subject to their individual ability in their progress through the service.

Now, I take it that there would not be any opposition from any Member of the House if the sole purpose of the bill was to correct an injustice that had been done to some particular individual Marine Corps officer or to some particular class of Marine Corps officers.

But there is one thing I have noticed, and that is that the effect of all of these so-called equalization bills that are brought in—and I may say that the Committee on Naval Affairs is probably the most prolific source of these so-called equalization bills of any other committee of the House—is to increase the charge upon the Treasury of the United States. The naval officers who draw these bills, the Army officers who draw similar ones when they come from the Committee on Military Affairs, and the Marine Corps officers always manage to draw them in a way to increase their pay, both active and retired. Now, the effect of this bill, according to the report of the committee, is to add an additional charge upon the Treasury of the United States of $121,759 per annum. I would like to know why it is the Committee on Naval Affairs can not protect the Treasury of the United States, or at least show some effort to do it. When these so-called equalization bills are brought up why can they not be amended so that they will not impose additional costs upon the Treasury? If there has ever been one brought up of that nature I do not recall it during my entire membership of this House. I would like to witness, before I retire from Congress, one of these so-called equalization bills which does not impose additional charges upon the Treasury.

Mr. DARROW. Will the gentleman yield?

Mr. BLACK of Texas. I yield to the gentleman.

Mr. DARROW. As a matter of fact, this bill is in the interest of the Treasury, and after a few years it will mean much less in cost.

Mr. BLACK of Texas. Oh, yes; after a few years it is claimed there will be economies resulting, but the gentleman can rest assured that before those few years arrive the gentleman's own committee will have brought in another equalization bill that will make certain that there will be no decrease in the charge upon the Treasury. The day for the so-called economy which is to be effected never comes.

Mr. O'CONNELL. Will the gentleman yield?

Mr. BLACK of Texas. Yes.

Mr. O'CONNELL. Would my friend from Texas deny the officers in the Marine Corps the opportunity of obtaining promotions or looking forward to better conditions in the life they have adopted for the benefit of the Nation?

Mr. BLACK of Texas. The gentleman from Texas believes in justice both to the taxpayers and officers of the Marine Corps, and because he believes in justice is the reason he is opposing this bill. What does this bill propose to do? It proposes to set aside the law of promotions by seniority and adopt the method of selection by a board, which is a most certain way that favoritism will creep into the service. Men will doubtless be promoted because of their social relations and because of their intimate acquaintance with certain officers. What method of promotion do we have upon our own committees in the House of Representatives? So far as I know, and as far back as I have any knowledge, the House of Representatives promotes by one rule, and that is the rule of seniority. This rule has its imperfections, and it is doubtless true that there are times in the House of Representatives when, under the rule of seniority, men of mediocre ability become chairmen of important committees. That may be true, but would the House of Representatives think of adopting any other method but the rule of seniority? What other method would work better? Now, you undertake here to set up in the Marine Corps the so-called method of selection in lieu of the rule of seniority.

Mr. VINSON of Georgia. Will the gentleman yield?

Mr. BLACK of Texas. I yield.

Mr. VINSON of Georgia. Is not that due to the fact that that principle is applied both in the Army and the Navy?

Mr. BLACK of Texas. So far as I know, there is no law in the Army comparable to the one the gentleman has here to-day.

Mr. VINSON of Georgia. Is it not a fact that in the Army promotion from colonel up is by selection and that promotion in the Navy from lieutenant commander up is by selection and in the under grades by seniority? Promotion in the Marine Corps in the grades of lieutenant and captain is by seniority and the balance by selection.

Mr. BLACK of Texas. What is the purpose of this bill? Is it not to do away with promotion by seniority in the Marine Corps and adopt the board-selection method?

Mr. VINSON of Georgia. In the upper grades it is and in the lower grades the same law applies. The purpose is to have the selection board take the records of the officers in the higher grades, consider them, and promote those best fitted for the next higher command and eliminate those who are not best qualified. Now, the weakness of the seniority system is that regardless of a man's ability he is promoted.

Mr. BLACK of Texas. Let me ask the gentleman is it not a fact that before a man is commissioned in the Marine Corps he must pass the tests that are prescribed?

Mr. VINSON of Georgia. That is true of all the services. Of course, they must pass an examination.

Mr. BLACK of Texas. Is it not true that in order to retain that commission he must pass certain other tests?

Mr. VINSON of Georgia. That is true; in other words, the men qualified professionally, and one of the benefits of the selection system——

Mr. BLACK of Texas. And he would not be commissioned if he had not shown his qualifications?

Mr. VINSON of Georgia. If you had the seniority rule he would go up regardless of his qualifications professionally, whereas under the selection system if he can not qualify professionally after having been selected he goes out of the service.

Mr. BLACK of Texas. And under the selection system is it not a fact that many complaints have been made of favoritism?

Mr. VINSON of Georgia. I grant you that the personal equation necessarily enters into it.

Mr. BLACK of Texas. And more than that, while the gentleman is on his fect let me ask him, has not the Committee on Naval Affairs many times brought in bills to grant promotions to naval officers by congressional enactment because, as was stated to the House, the selection board had not done justice to the particular officer affected by the bill?

Mr. VINSON of Georgia. Never in the history of the 12 years I have been on the Naval Affairs Committee has the Naval Affairs Committee——

Mr. BLACK of Texas. If the gentleman will permit, I think I can insert the titles of certain bills that will show that the committee has brought in bills of that character.

Mr. VINSON of Georgia. The gentleman has asked a question, and I would like to answer it. There is one thing the Naval Affairs Committee regards as something that should not be interfered with, and that is the matter of the selections of the selection board. It is true that on two occasions the Naval Affairs Committee has brought in a bill recommending promotion after the officer had retired and gone on the retired list, but never in the history of the 12 years that I have been on the committee have we disturbed the selections of the selection board.

Mr. BLACK of Texas. Moreover, is it not the fact that the Committee on Naval Affairs, of which the gentleman is a distinguished member, has brought in bills to restore men to the active list who have been dismissed because of their so-called inefficiency, found by this rating board?

Mr. VINSON of Georgia. He may be dismissed from the active list for various reasons, because of physical disability, for instance.

Mr. BLACK of Texas. I mean because of so-called inefficiency.

Mr. VINSON of Georgia. No, sir; only on two occasions has the Congress ever restored an officer to the active list who was dismissed from the active list on account of inability to pass examinations.

Mr. BLACK of Texas. The gentleman admits that has been done on two occasions?

Mr. BLANTON. Will the gentleman yield?

Mr. BLACK of Texas. Yes.

Mr. BLANTON. The gentleman from Georgia has admitted the point in this kind of legislation which makes it expensive, and that is whenever a man who comes up for promotion, if they decide not to promote him, the only alternative is to retire him.

Mr. BLACK of Texas. Certainly.

Mr. BLANTON. And that is an expense to the Government, because another officer takes his place.

Mr. BLACK of Texas. And not only that, I will say to my colleague, I have no doubt that many men are retired right at the peak of their usefulness and ability.

Mr. BLANTON. Men who are physically and mentally efficient in every respect.

Mr. BLACK of Texas. Surely, and are rendering splendid service to the Government of the United States.

Mr. JAMES. Will the gentleman yield?

Mr. BLACK of Texas. Yes.

Mr. JAMES. The War Department, from the Secretary of War down, for several years has appointed several boards and has made recommendations to our committee to get rid of the so-called "hump" in the line of promotions by kicking competent officers out of the Army.

Mr. BLACK of Texas. Yes; they want to do that.

Mr. JAMES. Even going so far as to be willing to get rid of 2,000 competent officers in order to reduce the "hump." Our committee has taken the attitude that it will never recommend any legislation coming out of our committee which would retire a single competent officer.

Mr. BLACK of Texas. I am glad to hear the gentleman say that, because that is welcome assurance.

Mr. VINSON of Georgia. If the gentleman will permit, let me say to the gentleman that there is nothing in this bill that retires any competent officer unless he reaches the age limit, when, under the law, he has to be retired.

Mr. BLACK of Texas. If the gentleman will read his own bill he will find he is providing for the forcible retirement of men who under the present law do not have to retire, and for that very reason the effect of this bill will be to increase our already burdened retired list and force out of the service men who are trained, men who are competent, men who are physically able to render the very best service of their career. It is not going to be done with my vote. [Applause.]

Mr. DARROW. Mr. Chairman, I ask that the Clerk may read the bill.

The Clerk read the first section of the bill.

Mr. BLACK of Texas. Mr. Chairman, I move to strike out the enacting clause.

The CHAIRMAN. The gentleman from Texas is recognized for five minutes.

Mr. BLACK of Texas. Mr. Chairman, I do not wish to take any time of the committee to make any further argument against the bill in addition to what I have already said. I simply submit the motion to the committee to strike out the enacting clause.

Mr. McSWAIN. Will the gentleman yield to me within his five minutes?

Mr. BLACK of Texas. Yes.

Mr. McSWAIN. Mr. Chairman, I have been unable to read this bill until the last minute, because I have not been very well. I submit this is a revolutionary measure. It is a radical measure and in my humble judgment, if it is passed and becomes the law, it will mark the beginning of the end of that fine espirit de corps and quality that has marked the Marine Corps. They are known now as a set of "Devil Dogs," a large majority of whose officers have risen from the ranks.

The 45-year limit that has been set up here will pluck these fellows who have risen from the ranks and will reduce the officer personnel of the Marine Corps to an exclusive social circle. Mark my words. [Applause.]

Mr. VINSON of Georgia. I will state to the gentleman from South Carolina that the very reason the 45-year limit is put in here is to take care of the men who came up from the ranks.

Mr. McSWAIN. Of course, and they will take care of them by putting them out of the Marine Corps too. [Applause.]

The CHAIRMAN. Is the pro forma amendment withdrawn?

Mr. BLACK of Texas. Mr. Chairman, I moved to strike out the enacting clause in all good faith. It was not a pro forma motion.

The CHAIRMAN. The question is on the motion of the gentleman from Texas to strike out the enacting clause.

The question was taken; and the Chair being in doubt, the committee divided, and there were—ayes 17, noes 62.

So the motion was rejected.

The Clerk read the committee amendments to section 1, which were agreed to.

The Clerk read section 2 of the bill, with the committee amendments, which were agreed to.

Mr. BEEDY. Mr. Chairman, I move to strike out the last word. I rise to get information from the gentleman having the bill in charge. I would like to ask him upon whose original urge this legislation was considered; by whom was it first proposed to the committee to make the change in the law?

Mr. DARROW. This has been under consideration for the last two or three years by the Secretary of the Navy, and the commandant, Major General Lejeune.

Mr. BEEDY. What evidence was there before the committee on the part of the officers themselves that the change was desired? Did the committee hear from officers in all the different grades?

Mr. DARROW. A board was appointed some time ago representing every grade of officer and the entire proposition was gone over to see how it would be possible to improve the morale and efficiency of the Marine Corps, and the result was reported to the Secretary of the Navy, who recommended this.

Mr. WOODRUFF. If the gentleman will yield, is it not a fact that the board communicated the contents of this bill to every officer in the Marine Corps and asked comment on it and that no objections were received from any source whatever?

Mr. BEEDY. That is what I was going to ask. I have an intimation from my district that this legislation was proposed by a few officers and would result in the promotion of a few to the detriment of others, and I wondered if that was correct.

Mr. DARROW. Every officer has recommended this bill with possibly a few exceptions in one grade.

Mr. O'CONNELL. Mr. Chairman, it is impossible to hear the private conversation that is going on on the other side.

Mr. BEEDY. I was not egotistical enough to believe that the gentleman from New York was interested in my conversation. [Laughter.]

Mr. O'CONNELL. I am very much interested in it.

Mr. BEEDY. I was trying to find out whether there had been any representation concerning the proposed legislation in a general way by the officers, and the information is that all the different grades were notified of the proposed changes and that few objections have ever been made to the committee.

Mr. WOODRUFF. No serious objection. There were not objections by half a dozen in the entire Marine Corps.

Mr. BLACK of Texas. If the gentleman from Maine will yield, I want to ask what is the custom as to officers of the Marine Corps if called upon by the committee—would they be permitted to write letters of protest?

Mr. DARROW. I think they were all invited to discuss this matter freely.

Mr. BLACK of Texas. Is it not a fact that if you asked a captain about this bill he would have a hesitancy in raising an objection, unless you summoned him as a witness before the committee?

Mr. DARROW. In this case I think that is not correct. I think many suggestions have been made by officers in reference to it.

Mr. BEEDY. Did any officer after being notified of the contents of the bill send to the committee any representative to voice his objections?

Mr. DARROW. Absolutely none.

The pro forma amendment was withdrawn.

Mr. BRITTEN. Mr. Chairman, I ask unanimous consent to insert in the RECORD a letter from Gen. John A. Lejeune in reference to this matter.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The letter is as follows:

DECEMBER 11, 1928.

Memorandum

From the most reliable information, which has been obtained from a large number of sources, I am of the opinion that practically all of the captains, all of the first lieutenants, and all of the second lieutenants of the Marine Corps are sincerely, earnestly, and enthusiastically in favor of the Marine Corps personnel bill, and that, in addition, all of the general officers and about 75 per cent of the colonels, lieutenant colonels, and majors desire its enactment into law.

All of the company officers above mentioned appreciate fully the hopeless nature of the promotion situation so far as they are concerned. Under existing law there is no future for them, except one of stagna-

tion, as nearly all of their commissioned service would be spent in the lower grades. I have been informed that unless the proposed bill becomes a law a large number of our most efficient young officers will resign from the service. In this event we will keep the least efficient and lose the most efficient. On the other hand, if this bill should become a law, we will keep the most efficient and lose the least efficient. All efficient officers of all grades are in favor of the bill, the only officers in opposition being those who, by reason of their records, realize that they, as individuals, will probably be adversely affected by it. Some of those, in all probability, have communicated their opposition to Members of Congress. On the other hand, it is probable that few, if any, of the officers in favor of the bill have communicated with Members of Congress on the subject, as these officers rely on their commandant and on the Naval Committee and Congress to see that relief and justice are afforded to them by the enactment of the proposed law.

JOHN A. LEJEUNE,
Major General Commandant.

The Clerk read sections 3, 4, 5, 6, 7, and 8, with the committee amendments, which were agreed to.

Mr. BLACK of Texas. Mr. Chairman, I move to strike out the last word in order to ask something about section 7 of the act approved March 4, 1925, which this particular section of the pending bill now repeals. I note that section 7 of the bill that we are now considering repeals that section with certain exceptions, but the report of the committee fails to inform us what the effect of the repeal would be. We should have some information on that point.

Mr. DARROW. With reference to section 7, the existing law that this section amends prescribes a certain method for the disposal of officers who have failed on reexamination for promotion. This bill otherwise disposes of all such officers except captains and first lieutenants under 45 years of age, and of less than 20 years' service, and the existing law is amended by this section to exclude all other officers except those in this statute.

Mr. BLACK of Texas. In other words, the purpose of this section is to repeal section 7 of the act of 1925, which provides the method for the disposal of certain officers and to substitute the method provided in the section.

Mr. DARROW. Exactly.

The committee amendments were agreed to.

The Clerk concluded the reading of the bill.

Mr. DARROW. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HOOPER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 13685) to regulate the distribution and promotion of commissioned officers of the Marine Corps, and for other purposes, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

Mr. DARROW. Mr. Speaker, I move the previous question on the bill and amendments to final passage.

The previous question was ordered.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross. The question is on agreeing to the amendments.

The amendments were agreed to, and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. DARROW, a motion to reconsider the vote by which the bill was passed was laid on the table.

READJUSTING PAY OF COMMISSIONED AND ENLISTED PERSONNEL OF THE ARMY, NAVY, MARINE CORPS, ETC.

Mr. ANDREW. Mr. Speaker, on behalf of the Committee on Naval Affairs, I call up the bill (H. R. 12032) to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended.

The SPEAKER. The gentleman from Massachusetts calls up a bill which the Clerk will report by title.

The Clerk read the title of the bill.

The SPEAKER. This bill is on the Union Calendar. The House will automatically resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, and the gentleman from Michigan, Mr. HOOPER, will take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 12032, with Mr. HOOPER in the chair.

The Clerk read the title of the bill.

Mr. ANDREW. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Massachusetts for one hour.

Mr. ANDREW. Mr. Chairman, this bill readjusts the pay and allowances of warrant officers and commissioned warrant officers of the Navy, Marine Corps, and Coast Guard, but does not propose any considerable increase in the pay of any of these officers. The average increase for all concerned is just about 5 per cent. It is intended, however, to remedy certain discrepancies and inequalities which were left in the joint act of 1922 concerning these groups of officers. I need not explain to the Members of the House what are the warrant officers and the commissioned warrant officers in these various branches of the services. You all know, I assume, that they are the officers who have come up from the ranks in the Navy in eight different types of service—boatswains, gunners, electricians, radio electricians, machinists, carpenters, pharmacists, and pay clerks. Ordinarily a man can not become a warrant officer until he has served for 10 years as an enlisted man, and having become a warrant officer he is under the law required to serve for six years more before he can take examination for a commission and become a commissioned warrant officer, so that when he becomes a commissioned warrant officer in all likelihood he is about 16 years older than the man entering the Navy through the Naval Academy. There are to-day about 300 warrant officers in the Navy and about 1,150 commissioned warrant officers. There are about 130 commissioned warrant officers in the Marine Corps also affected by this bill.

Mr. ABERNETHY. Mr. Chairman, will the gentleman yield?

Mr. ANDREW. Yes.

Mr. ABERNETHY. I am very much interested in this great service of our country, the Coast Guard. If I understand this bill, it takes care of a large number of these warrant officers who have come up from the ranks. Is that correct?

Mr. ANDREW. Yes; in the Coast Guard, as well as in the Navy. There are about 63 commissioned warrant officers in the Coast Guard and 833 warrant officers, boatswains, gunners, and machinists.

Mr. ABERNETHY. I am glad to see that the Naval Committee is branching out to take care of some of these worthy men.

I only wish it would branch out long enough to take care of some of the temporary men who are now serving in the Coast Guard. That I think is one of the things that ought to be attended to. I am very delighted to know that this great committee, headed by the distinguished gentleman from Illinois [Mr BRITTEN], is taking care of these worthy men who go down to the sea in ships as well as the men serving the Navy.

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. ANDREW. Yes.

Mr. GREEN. About what is the increase in pay in the Coast Guard?

Mr. ANDREW. The average increase in pay during the whole period of the warrant officer's career is about 5 per cent—a small fraction over 5 per cent.

Mr. GREEN. I would like to say to the gentleman that several officers in my district have written to me in reference to this matter, and it is my desire to support the legislation.

Mr. BRITTEN. Following the suggestion of my friend on the other side, I will say this is one of the most popular bills the Committee on Naval Affairs has ever reported out.

Mr. GREEN. I have had numerous inquiries with reference to this matter, and I am in favor of it.

Mr. BRITTEN. It is repeatedly said that the Committee on Naval Affairs and Congress seem to favor commissioned officers because of their social position and their advanced education, but this bill does not include those officers at all, merely taking men in the lower grades.

Mr. LAGUARDIA. If the gentleman will yield, of course this is simply an amendment to the pay and allowances of the enlisted personnel in the act of 1922.

Mr. FRENCH. Mr. Chairman, the chairman of the committee has just said that this bill is popularly supported. Undoubtedly he means supported actively by those to whom it refers, for they are the ones who are very earnest in pressing upon Congress the merits of the measure. May I ask the gentleman in charge if the bill has been reported upon favorably by the Navy Department?

Mr. ANDREW. It was reported upon favorably by them and drafted by them.

Mr. FRENCH. Was it reported upon by the Bureau of the Budget?

Mr. ANDREW. So far as I know no report has actually come from the Bureau of the Budget.

Mr. WOODRUFF. If the gentleman will yield, I do not believe I have observed at any time any bill being before our committee and asked for by the Navy Department that is opposed by the Budget Bureau. I take it for granted that the Secretary of the Navy would certainly prohibit any officer appearing before our committee in favor of a bill unless the Bureau of the Budget did not think it was in conflict with the President's policy.

Mr. ANDREW. And it is presented by the Navy Departments, supported by the Treasury and the officials of the Navy Department, so it could not be contrary to the President's policy.

Mr. FRENCH. I do not understand that that is the policy followed at all before legislative committees. I understand that officers of the Government are called upon and testify as to what they believe. However, it is fair that the Bureau of the Budget be called upon for advice and opinions by legislative committees. I have just sought to have the House advised of the attitude of the Bureau of the Budget and particularly since large amounts of money are involved.

Mr. GARNER of Texas. If the gentleman will permit, unless the policy has been changed by the administration, when a bill is referred to the Navy Department as to its advisability and merit as a charge on the Treasury, as I understand, the President refers it to the Bureau of the Budget.

Mr. FRENCH. That is true.

Mr. GARNER of Texas. I am not saying that is right. I am saying that the President delegates his powers in that respect.

Mr. FRENCH. May I just follow that up by saying I was not directing my statement to that which is in the mind of the gentleman from Texas. I think that is the procedure that is followed. The point I was directing my attention to was the suggestion made that because of the fact that the Navy Department has been represented by officers before the committee that therefore the Budget Bureau was necessarily not opposed to a bill. I do not think that is a correct statement.

Mr. WOODRUFF. If the gentleman would attend some of the meetings and hearings of the Committee on Naval Affairs of the House I think he would change his mind about that particular proposition.

Mr. FRENCH. I am not a member of the committee. Let me ask the gentleman whether or not he is able to tell the House that the Bureau of the Budget is in favor of this bill?

Mr. WOODRUFF. I am not saying about that, but I am speaking of the method of procedure. So far as I am concerned it does not make any difference to me whether the Bureau of the Budget approves it or not.

Mr. FRENCH. That is not the point. I simply raised the question whether or not it had been so reported, and to call attention to a few matters involved in the particular bill.

A few days ago it was called to the attention of Congress that the Welch Act, which was also a popular measure and which was passed by this Congress less than a year ago, has been so construed in its administration as to add possibly two millions or more to the expenses of our Government, and in a manner that is not approved generally by the Congress, and that it was not in the minds of Members of the Congress at the time it was enacted.

A few years ago there was a great deal of criticism on account of the inequality in pay of the very men referred to in the pending bill, and of officers of one kind and another under various names in the Army, the Navy, the Marine Corps, the Coast Guard, the Coast and Geodetic Survey, and the Public Health Service; and at that time there was a joint committee appointed, made up of Representatives of Congress from the different committees having charge of the several types of legislation, for the purpose of working out a pay bill that would do the right thing by all those involved, including the ones that are involved in this particular bill. In other words, we had gotten to the point where the different committees legislating upon the immediate subjects before them, doing what each committee thought was equitable and just, and the Congress, considering the report from each committee apart from other reports bearing upon bills referring similar matters arising in other bureaus, and doing what it thought to be the wise thing, had brought about a lack of harmony in the pay and allowances and conditions of men and officers doing comparable work in these different services.

Now, it may be that we have made a mistake in some instances. It may be that a mistake was made as to these particular warrant officers referred to here. In my opinion, their case does need attention, but the condition that exists has been going on ever since that common bill that I referred to was passed, applying to all of these different services. It seems to me that the Members of Congress ought to refer this bill and kindred matters to another joint committee, and that now we ought not pass this particular bill. If all the Members of this Congress could serve at some time upon the Appropriations Committee, they would come to realize that the most favorable conditions allowed and the largest pay drawn by any group are used as a fulcrum for increasing the pay and emoluments of officers and men in other departments doing similar work regardless of the name of the office or the grade or rank held.

If we should pass this bill to-day, we do not know what the effect will be upon other officers doing comparable work. The Naval Committee has not had opportunity to go into the matter and advise the House. The committee has only heard the evidence from the officers of the departments that have to do with the particular service referred to in this bill. The act that this bill amends refers to officers under the War and Treasury Departments as well. I want to tell you gentlemen of the House that in all probability, if this measure shall pass, the committee having to do with the Army in another year will be called upon to bring in a bill for a similar purpose to remove an inequality, and the main argument that will be advanced will be the provisions of this bill.

Other committees will have to do with other branches of the service which were within the jurisdiction of the joint committee a few years ago, and they will be called upon to do the same thing. It seems to me the statesmanlike thing to do is for us to refuse to pass bills of this particular type one at a time. We should refer all bills of this common character to a committee including gentlemen from the committee that has reported this bill and gentlemen from all the committees having the same problem.

Mr. VINSON of Georgia. Mr. Chairman, will the gentleman yield there?

Mr. FRENCH. Yes.

Mr. VINSON of Georgia. Does the gentleman say there is a joint committee now having joint jurisdiction to do things of this kind and pass a similar pay bill?

Mr. FRENCH. No. I say the House has the power to create such a joint committee for the time being, such a committee as we had a few years ago to handle the subjects pertaining to these particular services.

Mr. VINSON of Georgia. Then the gentleman is asking the Committee of the Whole to defeat this bill in the hope that in the future the House may appoint a joint committee similar to the one he mentioned?

Mr. FRENCH. That, in substance, is what I believe, but we should act promptly. Does the gentleman know how much of expense is involved in this bill?

Mr. VINSON of Georgia. Exactly.

Mr. FRENCH. It is stated to be $350,000, which we will be called upon to appropriate if the bill shall pass.

Mr. VINSON of Georgia. But if the Navy Department and the Comptroller General had put the proper construction on the pay act of 1922 it would have done justice to these officers. It was never intended to penalize these men by the act of 1922.

Mr. FRENCH. I am not referring to that. I am referring to the matter of piecemeal legislation touching measures of this kind. This bill, as the gentleman admits, carries authorizations and requirements that will add $350,000 every year to the burden of the Treasury for the purpose indicated in the bill. I think it is the observation of every Member here that these estimates which are made are usually underestimates rather than overestimates. It seems the departments in submitting estimates of costs usually underestimate the costs. Their figures are rarely too high.

The House this afternoon has passed several bills—at least three—increasing the limit of cost of certain work that was estimated for by the department. Here, now, is an estimate of $350,000 which the department says will be entailed on the Treasury if you pass the measure. Maybe that is correct, and maybe the conditions worked out in the bill ought to be cared for. But I want to call the attention of the House to this fact, that when you say that the amount that will be entailed on the Treasury is $350,000 every year you are not considering the question of the burdens that will be added year after year by different services under the Government, who will point to this bill as a reason for relieving them.

Mr. ANDREW. Mr. Chairman, will the gentleman yield?

Mr. FRENCH. Certainly.

Mr. ANDREW. I want to ask the gentleman if he has any particular criticism against the bill as presented, or does he believe that the discrepancy now in the law should be left until the time when there is again a joint committee appointed? Has the gentleman any particular objection in regard to this bill?

Mr. FRENCH. The gentleman does not know, and I do not know, how the conditions set forth in this bill will act and react upon the different services that are provided for in the common bill that was passed a few years ago.

Mr. ANDREW. The gentleman knows there are no other warrant officers or commissioned warrant officers in any other branch of the service except those that are comprised in this bill?

Mr. FRENCH. Oh, no; but this is what I also know; there are men in the other services who have ranks and ratings of comparable character. The gentleman knows that, and we do not need to say that we must carry the name "warrant officer" in some other service in order to find comparable work. We do have, as I say, comparable ranks and ratings in other departments and other services, and it is because of this that we ought to give consideration to the whole thing as one subject.

May I just follow that up with this suggestion? The very last paragraph, section 4, provides:

> That nothing contained herein shall be construed so as to reduce the pay, allowances, emoluments, or other benefits, including the benefits of the act of June 10, 1926 (44 Stat. L., p. 725), that any person now in the service is receiving at the date of the passage of this act.

Mr. ANDREW. The gentleman, of course, knows that a similar saving clause appears in every such pay act?

Mr. FRENCH. That is precisely what I wanted to emphasize, but the gentleman's interruption makes it unnecessary for me to do so. This saving clause will be used as a fulcrum to lift up everyone else who may be discovered to be below the highest paid. In other words, you put what you call a most favored provision in here that no one, if you change the law, is going to have his condition made worse by anything that may be passed subsequently. I am glad the gentleman interrupted me to say that that same clause is carried in all bills of this character. Of course it is, and that is the vice of it. It ought not to be carried.

Mr. ANDREW. The gentleman understands this is not permanent legislation and that it only refers to possible isolated cases of men at the present time in the service who might, perhaps, be receiving something more than is provided by this act but that it lapses when these men have passed on.

Mr. FRENCH. Of course it does; but as long as these persons are in the service this language will be pointed to as an element of a contract made by the Government, made by the Congress, with every person who is a beneficiary under the act.

Mr. ANDREW. And so far as the department knows there are very, very few who would possibly be affected by that provision, and they would be affected only temporarily.

Mr. BLANTON. Will the gentleman from Idaho yield?

Mr. FRENCH. Yes.

Mr. BLANTON. Is this a real or just a sham battle that is going on over there across the aisle?

Mr. FRENCH. I do not know what it is on the other side, but from my standpoint it is a very real one, and from my standpoint I think this House would make a most serious mistake if it passed this measure and did not provide now or at some near time that a joint committee should consider any inequalities that exist in the measures that were the result of the work of the joint committee.

Mr. BLANTON. When the gentleman from Idaho starts a real fight they usually do not sit him down so quickly; but I did notice that the gentleman from Massachusetts sat him down.

Mr. FRENCH. The gentleman from Idaho was not aware of that, and I want to say to the gentleman from Texas that I am tremendously in earnest in urging this thought upon the Congress. It is going to plague this Congress and succeeding Congresses if this measure shall become a law.

Mr. BLANTON. And that is so as to all these other bills that have come from the committee.

Mr. GIFFORD. Will the gentleman yield?

Mr. FRENCH. Yes.

Mr. GIFFORD. I wish to say that I sympathize with the gentleman in his remarks—that some time later on we might find other services comparable with these warrant officers. However, I have lying on my desk—and most of us have them—instances of inequalities brought to our attention, and we must dig into all activities of this great Government in order to see whether these complaints are justifiable from a comparative standpoint. We must study grades P–4 and P–5, and so forth, and all other things that might possibly be comparable with these grades.

Our experience thus far has been that these general classification propositions have done much injustice to many by wrong interpretation as to their grades. Now, is not your proposition altogether too large for us to be expected to follow up in order to get justice for a constituent who may be in the Government service?

Mr. FRENCH. Just a word in reply to what the gentleman has said. The gentleman knows that the very way in which this Congress functions is an answer in itself to the question as to whether or not we ought to refer to everything that is kindred every time an inequality exists in the Government service. On the other hand, it is the experience of this Congress, it is the experience of all Congresses, that when we attempt piecemeal to adjust the salaries and living conditions and the emoluments of people doing somewhat similar work in different services or in different departments with a different presentation of the subject matter to the House we do an injustice against some, we overcare for some, we probably undercare for others, and the result is a lack of harmony, a lack of unity, that in itself calls for new legislation to be proposed to right an alleged wrong.

Mr. BRITTEN. Will the gentleman yield?

Mr. ANDREW. I yield to the gentleman.

Mr. BRITTEN. Mr. Chairman, I think in part at least, and in a goodly part, the suggestions that have just been made to the House by the gentleman from Idaho [Mr. FRENCH] are very well taken, and the Committee on Naval Affairs has followed his ideas within the past 48 hours. We have before us a pay increase bill affecting certain officers in the line of the Navy which would increase their pay approximately $800,000 a year.

Upon looking into this bill—and it is a very good and a very just bill affecting the unmarried officers—we found also, as the gentleman from Idaho has just suggested, that this bill would affect line officers of corresponding relationship in the Army, the Coast Guard, Coast and Geodetic Survey, the Public Health Service, and one other service, and would entail a considerably greater expense on the Treasury than was indicated in the bill before us. The suggestion was immediately made by several members of the committee that the thing to do was to introduce a resolution providing for a joint committee, as suggested by my friend from Idaho, with a view to revising all of the pay schedules in the various services affected by the 1922 pay act, which is under discussion right now.

But, my good friends, that joint board or joint committee should not necessarily take charge of a condition like the one presented to the House to-day, a specific condition where the 1922 act, by inadvertence if you please, or by decision of the comptroller, if you please, did an injustice to a certain group of men in the lower ranks.

This has been going on for six years. These men have been discriminated against for six years. Surely no one will suggest in all seriousness, unless their sole desire is to defeat this legislation, and I do not attribute that desire to the gentleman from Idaho, that we do nothing with this bill until a joint committee has been authorized. They would meet some time in 1929, report some time in 1930 or 1931, and then these injustices may be remedied.

Mr. GREEN. Will the gentleman yield?

Mr. BRITTEN. Yes.

Mr. GREEN. If such a joint committee happened to be appointed after the passage of this bill, it could still go into the matter. I do not see why we should hold up our bill, because if the joint committee wants to act later, it can act.

Mr. BRITTEN. Of course. This bill is not on all fours with the suggestion for a joint committee at all.

Mr. ABERNETHY. Will the gentleman yield?

Mr. BRITTEN. I yield to the gentleman.

Mr. ABERNETHY. As I understand, what the committee is now doing is to take care of the men who have come up from the ranks.

Mr. BRITTEN. And are still in the ranks.

Mr. ABERNETHY. Men who have worked their way up from the ranks.

Mr. BRITTEN. They are men who have been in the enlisted service for 12 or 15 years and have become warrant officers.

Mr. ABERNETHY. I will ask the gentleman if he did not file his report on this bill in May and if the matter has not been on the calendar of this Congress since May, and has not the committee gone into the matter thoroughly?

Mr. BRITTEN. Yes.

Mr. JOHNSON of South Dakota. Will the gentleman yield to me for a statement rather than a question.

Mr. BRITTEN. I would rather yield for a statement when I have finished my statement.

Mr. JOHNSON of South Dakota. Very well; I will ask for recognition then.

Mr. BRITTEN. How does this bill happen to be before us? The Navy Department itself has recognized the injustice to these men. The Navy Department prepared this bill. It sent the bill to the Speaker of the House, who transmitted it to the Committee on Naval Affairs, where it was printed and where hearings were held. Subsequent to that the Secretary of the Navy—and he is a part of the administration just as much as the Director of the Budget—sent a copy of this bill to the Director of the Budget with a view to getting his report on it, just as the gentleman from Idaho says reports are received on all legislation affecting the Treasury. We are still waiting a reply from the Bureau of the Budget. We do not know what that report will be, but we do know that the Navy Department is anxious to remedy a mistake. We do know that the Navy Department has promoted certain legislation to do that very thing. What difference does it make, if a mistake has been made, whether we have a report from the Bureau of the Budget or not? I say that is unimportant.

I think I have covered the subject pretty thoroughly, Mr. Chairman. A mistake has been made. These men have been getting the worst of it for six years, and it is now up to the House to remedy the situation without waiting for a so-called joint committee to go into the entire pay question again, which may take three or four years.

Mr. ANDREW. Mr. Chairman, I yield five minutes to the gentleman from South Dakota [Mr. JOHNSON].

Mr. JOHNSON of South Dakota. Mr. Chairman, in 1924 I happened to have as acquaintances two commissioned officers of the Navy. One of them was a graduate of Annapolis. Another one had come up through the ranks. They held the same commissions. I found to my intense surprise that the graduate from the Naval Academy was receiving a great deal more pay than the one who had come up from the ranks as a warrant officer.

Therefore, in 1924, I introduced the first bill looking to correct this inequality. I knew these two men personally and I knew that such a situation did not exist in other branches of the Government. For instance, if two men are officers in the Army and one of them secures his commission, not going through West Point but coming up from the ranks, he gets exactly the same pay as any other officer of equivalent rank and grade, and the Navy is the only part of the military or armed forces of the Government, so far as I know, where this distinction which this bill will correct is made.

The law as it now exists is manifestly unfair. I happen to have been a Member of the House at the time we passed this pay revision act in 1922, and I know perfectly well, as everyone here knows, that this matter was never called to the attention of the House or the Senate. It is not the intention of the Congress that men should have the same rank and receive different pay because they have come into the service in different ways.

It is just as absurd as if a Member of Congress who came in through a primary and another through a caucus were to receive different amounts of pay—paid on a different basis. The Navy Department in the beginning did not favor the bill that I introduced in 1924. But the equities of the case were such that the Navy Department has indorsed this bill, because it knows that justice is not being done between the two classes of men. It is not right that one who fights his way up to a position and another who gets in by appointment to Annapolis and gets his education should be paid different compensation. I think that is all that can be said concerning the bill.

I yield back the balance of my time.

Mr. JAMES. Has the Committee on Naval Affairs taken any action on the Hale bill?

Mr. VINSON of Georgia. Last Thursday the committee took up the bill, but the gentleman was sick, and the question now is before the committee whether it shall be considered by a joint committee.

Mr. JAMES. The committee has taken no action whatever?

Mr. VINSON of Georgia. No.

Mr. JAMES. Does not the gentleman think that any proposition affecting both the Army and the Navy should be considered by a joint committee of the Committee on Military Affairs and the Committee on Naval Affairs?

Mr. VINSON of Georgia. That was the thought in my mind when I suggested to the committee that a joint committee consider the question of pay between the Army and the Navy.

Mr. BRITTEN. Will the gentleman from Massachusetts yield me a minute?

Mr. ANDREWS. I yield to the gentleman from Illinois.

Mr. BRITTEN. Mr. Chairman, I desire to correct for the RECORD the remarks I made a moment ago. I have just talked with the Judge Advocate General with a view of refreshing my memory as to the statement I made about the bill. I find that it was drawn in the Navy Department by line officers and warrant officers. It was sent to the Bureau of the Budget by the Secretary of the Navy and has not been transmitted to the Speaker of the House by the Secretary of the Navy, as I stated a moment ago. I desire to make that correction, because in the past, during the 15 years of my service on the committees we have enjoyed the utmost confidence of the House. The committee is going to deal frankly with the House on every question. As suggested by the gentleman from New York [Mr. SNELL], we are not going to have "any niggers in the woodpile." We welcome free and open debate on every bill.

Mr. GARNER of Texas. What did the Budget report?

Mr. BRITTEN. The Budget has not yet reported to the Secretary of the Navy.

Mr. ANDREW. Mr. Chairman, I yield two minutes to the gentleman from Idaho [Mr. FRENCH].

Mr. FRENCH. Mr. Chairman, in anything I have said I want a distinct understanding that I did not reflect on the confidence that the House has in the Committee on Naval Affairs. I have perfect respect for that committee. On the other hand, my criticism goes to the matter of considering this type of legislation by piecemeal. I do not think the subcommittee, of which I am chairman, ought to do it; and I do not think the subcommittee of the Committee on Military Affairs, of which the distinguished gentleman from Pennsylvania [Mr. MORIN] is chairman, ought to consider similar bills. I think the whole subject is one that ought to be handled by a joint committee.

Mr. BRITTEN. I appreciate the gentleman's feelings, but I do not consider this as piecemeal legislation at all; I consider it as remedial. It corrects a mistake. It is not piecemeal legislation at all.

Mr. WOODRUFF. I would like to ask the gentleman a question. Are there any comparable ranks in other services which are discriminated against as in this?

Mr. BRITTEN. Not as far as I know.

The CHAIRMAN. The time for debate has expired, and the Clerk will report the bill for amendments.

The Clerk read as follows:

SEC. 2. That section 7 of said act is hereby amended by substituting a colon for the period, volume 42, Statutes at Large, page 629, line 4, and adding the following proviso at the end of said paragraph:

"Provided further, That when the total base pay, pay for length of service, and allowances for subsistence and rental of quarters authorized in this act for any commissioned warrant officer shall exceed $5,000 a year the amount of the allowances to which such officer is entitled shall be reduced by the amount above $5,000, and the pay and allowances of a commissioned warrant officer receiving the pay and allowances of the second pay period shall not exceed $3,158 a year for the first three years of commissioned service, $3,258 a year for the next three years of commissioned service, $3,358 a year for the next three years, and $3,458 a year for from 9 to 10 years' commissioned service."

Mr. FRENCH. Will the gentleman yield for a question? I do not know that this language is wholly clear where it provides that the amount paid to warrant officers shall be $5,000.

Mr. ANDREW. It says that the pay and allowances shall not exceed $5,000.

Mr. FRENCH. What is the effect of the language following:

The amount of the allowances to which such officer is entitled shall be reduced by the amount above $5,000—

And so forth.

Mr. ANDREW. That is to say that he shall have his successive increases in longevity pay as they approach the $5,000, and the reduction shall be in the allowances, so that in the aggregate—and this is only possible in the last 10 years of a commissioned warrant officer's service—his total pay and allowances would not exceed $5,000. Under the longevity system every three years his pay increases by 5 per cent of the base pay of that period.

Mr. FRENCH. Then, notwithstanding what the longevity might suggest, the total amount of pay and allowances shall not be in excess of $5,000.

Mr. ANDREW. Shall never be in excess of $5,000.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 3. That section 10 of said act is hereby amended by striking out, in paragraph 1, lines 1, 2, 3, 4, and 5 of said paragraph, volume 42, Statutes at Large, page 630, the following:

"That on and after July 1, 1922, the monthly base pay of warrant officers of the Navy and Coast Guard shall be as follows: During the first 6 years of service at sea, $153; on shore, $135; during the second 6 years of service at sea, $168; on shore, $147; after 12 years' service at sea, $189; on shore, $168," and inserting in lieu thereof the following:

"That hereafter the monthly base pay of warrant officers of the Navy and Coast Guard shall be as follows: During the first 6 years of service, $153; during the second 6 years of service, $168; after 12 years' service, $189."

With the following committee amendment:

Page 3, line 23, add a new section, as follows:

"SEC. 4. That nothing contained herein shall be construed so as to reduce the pay, allowances, emoluments, or other benefits, including the benefits of the act of June 10, 1926, Forty-fourth Statutes at Large, page 725, that any person now in the service is receiving at the date of the passage of this act."

The CHAIRMAN. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. LAGUARDIA. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 4, add the following:

"SEC. 5. That hereafter officers of the Navy and Marine Corps, without dependents, on sea duty shall receive the same pay and allowances as are paid officers of the same rank and service with dependents."

Mr. BRITTEN. Mr. Chairman, I make the point of order against the amendment that it is not germane. This affects line officers of commissioned rank, and the bill before the House does not affect them at all. It affects only the warrant grades.

Mr. LAGUARDIA. Mr. Chairman, I do not think it is necessary to be heard at length in reply to the reasons urged by the gentleman from Illinois [Mr. BRITTEN]. The purpose of this bill is to amend the pay act of 1922. My amendment is likewise in effect an amendment to one of the provisions of the act of 1922. The bill before the House amends not less than four provisions of the act of 1922. Therefore this being a bill generally for the amendment of the pay act of 1922, an amendment offered from the floor which would amend another section of that law is clearly germane.

Mr. CHINDBLOM. Mr. Chairman, I think the precedents of the House will bear out the proposition that the test is not what is the scope of the law which is amended, but what is the scope of the amendments that are proposed by the committee or by Members offering them from the floor. In other words, the fact that this bill amends an act which covers a large number of subjects would not make germane an amendment covering subjects other than those actually included in the amendments proposed to the act by the bill under consideration.

Mr. LAGUARDIA. The gentleman may be right when he says an act containing various subjects, but an act containing one subject having to do solely with the pay of the Navy and Army surely can not be said to be an act containing many subjects.

Mr. BRITTEN. Mr. Chairman, the gentleman from New York cites the pay act of 1922. The only place where that is used in this bill practically is in the caption. This bill itself does not have any effect upon the salaries, pay, and allowances of line officers of the Navy. The bill provides only for pay and allowances for warrant officers in the Navy. The amendment suggested by the gentleman deals with an entirely different set of officers. It is true that they all came under this act of 1922, but no one would reason that an amendment to this bill providing for certain increases in pay for Coast Guard officers of the line would be in order. An amendment to this bill affecting Army officers would be out of order, and yet the pay act of 1922 takes in not only all of these various corps but takes in the line as well as the warrant officers and every character of commissioned and noncommissioned officers. I make the point of order.

The CHAIRMAN. The Chair feels constrained to hold, though not having any considerable time to examine the precedents, that the amendment offered by the gentleman from New York is not germane. It seeks to bring within a certain class others than the class which is contemplated in the bill, which refers to warrant officers. The Chair, therefore, sustains the point of order.

Mr. LAGUARDIA. Mr. Chairman, I move to strike out the last word. I have no quarrel with the ruling of the distinguished chairman, and while the decision may be very close, I can see the danger of confusing a bill by inserting amendments perhaps that are not as closely related as the main purpose of the bill. But again I want to call the attention of the House to the conditions existing in the Navy, brought about by the pay act of 1922, which provides for certain allowances in case of sea duty and discriminates against officers who do not happen to have dependents of record. It has created a great deal of dissatisfaction. There is discontent in the Navy now, and even the officers who benefit by this law feel that there is this discrimination against their brother officers and are in favor of removing any such discrimination. It was suggested by the chairman of the committee on Naval Affairs that a joint committee would take this matter up.

But permit me to suggest that a joint committee moves very slowly and necessarily so, and before it would be possible to get the joint committee to function it may be necessary to wait for the convening of the next Congress before we can get any legislation to remove existing conditions in the Navy, and it may be 1931 or 1932. Now, you gentlemen who have the interest of the Navy at heart, and whatever Navy we have we want the personnel of the Navy treated properly and the morale to be as high as it can possibly be brought. I say this matter ought to be corrected, that the attention of the Committee on Naval Affairs ought to be given to the removal of this discrimination, and it should not be necessary to wait for a report of a joint committee. I am sure when all the facts are brought to the attention of the leadership of this House, when it is shown that men in command of ships, with the greater number of years of service, with higher rank, are receiving less pay than their subordinates on the ship, you will have no trouble to bring about a change during this session of Congress.

Mr. MAAS. What is a dependent not of record?

Mr. LAGUARDIA. I can tell the gentleman; not what the gentleman has in mind at all. There are officers of the Navy who have dependents, relatives, but still not a dependent of record within the meaning of the comptroller, but for whom they are responsible nevertheless.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

Mr. ANDREW. Mr. Chairman, I move that the committee do now rise and report the bill with the committee amendment with the recommendation that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. HOOPER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 12032, had directed him to report the same back to the House with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. ANDREW. Mr. Speaker, I move the previous question on the bill and amendment to final passage.

The motion was agreed to.

The SPEAKER. Is a separate vote demanded upon any amendment? If not, the Chair will put them in gross.

The question was taken, and the amendment was agreed to.

The bill as amended was ordered to be engrossed and read the third time, was read the third time, and passed.

On motion of Mr. ANDREW, a motion to reconsider the vote by which the bill was passed was laid on the table.

APPOINTMENT OF CHAPLAINS IN THE NAVY

Mr. WOLVERTON. Mr. Speaker, by direction of the Committee on Naval Affairs, I call up the bill H. R. 13414.

The SPEAKER. The gentleman from New Jersey calls up a bill which the Clerk will report.

The Clerk read as follows:

A bill (H. R. 13414) to amend section 1396 of the Revised Statutes of the United States relative to the appointment of chaplains in the Navy

Be it enacted, etc., That section 1396 of the Revised Statutes of the United States is hereby amended by striking out the words "A chaplain" in the first line thereof and substituting therefor the words "An acting chaplain," so that said section will read as follows:

"An acting chaplain shall not be less than 21 nor more than 35 years of age at the time of his appointment."

Mr. WOLVERTON. Mr. Speaker, the purpose of this act is to amend section 1396 of the Revised Statutes of the United States relative to the appointment of chaplains in the Navy.

It is sought to strike out the words "a chaplain" and insert in place thereof the words "An acting chaplain," so that said section will read as follows:

An acting chaplain shall not be less than 21 nor more than 35 years of age at the time of his appointment.

This change has been considered by the Naval Affairs Committee and received its approval and also has the approval and recommendation of the Navy Department.

The necessity, or at least the advisability, of this change arises from the fact that at the present time there is no provision in the law fixing the age limit for appointment to acting chaplain.

The original act of 1862 provided for the appointment of chaplain only and fixed the age limit as 21 to 35 years.

In 1914 an act was passed providing for the appointment of acting chaplains, but not fixing any age limit, but requiring three years' sea service before he could be appointed to chaplain and advanced in rank with his line running mate.

These latter requirements often resulted in an acting chaplain not reaching the time for advancement to chaplain until after he had passed the maximum age of 35 years, and beyond which he could be appointed chaplain, and therefore must continue an acting chaplain or drop out of the service.

Since the original intention of Congress was undoubtedly to fix a maximum age limit for entry into the Corps of Chaplains and in view of the fact that all applicants for appointments must now enter in the grade of acting chaplain, a grade not in existence at the time of enactment of the original law, it seems both natural and proper that the original intention fixed 66 years ago should likewise apply to the appointment of acting chaplain.

Mr. McKEOWN. Mr. Speaker, I want to be recognized in opposition to the bill.

The SPEAKER. Does the gentleman from New Jersey yield to the gentleman from Oklahoma?

Mr. McKEOWN. I desire to be recognized in my own right.

The SPEAKER. The gentleman from Oklahoma is not entitled to recognition. This is a House bill. The gentleman from New Jersey is entitled to an hour.

Mr. WOLVERTON. How much time does the gentleman desire?

Mr. McKEOWN. Not over 10 minutes.

Mr. WOLVERTON. I have no objection to the gentleman using 10 minutes.

The SPEAKER. The gentleman from Oklahoma is recognized for 10 minutes.

Mr. McKEOWN. Mr. Speaker and gentlemen of the House, I have no serious objection to this bill, because I know very little about the question of the appointment of chaplains in the Navy. The thing I want to call to the attention of the House is this, that I am opposed to fixing an age limit of 35 years for gentlemen who are to be appointed as acting chaplains in the Navy. I oppose the tendency in America to establish an age limit where men, however efficient, are not longer eligible to be appointed to positions under the Government.

I stood on a vessel returning from the war carrying New Zealand troops, and I met a man who was 55 or 60 years of age who was the chaplain of a regiment. He had taken his four sons over to France. He was bringing three of them back, and he had left another one over there. Why put an age limit on the appointment of men who look after the spiritual welfare of our boys in the Army and our jackies in the Navy? When men have reached mature ages they are, in my judgment, all the better fitted to fill positions of this kind.

To-day, industry, when it sees a man 45 years of age, says, "We do not want you." We are throwing our aged people into the discard. America ought to awaken to the fact that we are not giving due consideration and proper opportunity to the men who are growing older. The industries are casting out the old men. A man goes into the oil field of Oklahoma to-day, for example, and asks for but a small employment. The first question they propound to him is, "What is your age?" His answer may be, "I am 46 years old." The reply will be, "We can not use you."

In other industries it is the same. Why, my friends, I am not able to say whether industry is wise in that or not, because they are doubtless trying to make as much money as they can. But I wanted to call your attention to the fact that in this country we are fast neglecting our old men, and it is a most distressing sight to me to see old men going about the streets with a little push-cart or a little peanut-roasting stand or a popcorn stand trying to make a living.

You ought to do either one of two things. You either ought not to shut the door on the man able and willing to work, giving him opportunity to make a living, or you ought to make some wise provision, such as other civilized countries throughout the world make, to take care of our older men.

I am calling attention to this because we are passing along now in a hurry in America. We might look to China and to some other countries that we do not call fully civilized and there find some very fine examples of how to treat the aged. I take the opportunity on this bill to call your attention to the situation of these old men in America who are ready and willing and anxious to work, and who need the work, and yet who, because they have reached a certain age limit, are cast aside and discarded. It is true in all employments under the National Government. We have a civil-service rule to the effect that a man past 45 years of age can not be appointed in the civil service; and yet some of the most efficient men in the Government service to-day are men who are past 45 years of age and are rendering better service to-day than many men under that age.

If a man who is past 45 years of age, and is in the employment of the Federal Government, can render magnificent service and better service, why is not a man who is 45 years of age capable of being put into the service?

I just wanted an opportunity to make this statement, and I thank the gentleman from New Jersey [Mr. WOLVERTON] for his courtesy in yielding me time to call attention to the fact that an arbitrary age limit of 35 years for the appointment of a chaplain is all wrong and that we ought not to continue to shut the door to men because they have passed a certain age limit. A man's ability to work and his capability ought to be the measure by which you could employ him. [Applause.]

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

WARRANT OFFICERS

Mr. MILLER. Mr. Speaker, on behalf of the Naval Affairs Committee I call up H. R. 5713, to permit certain warrant officers to count all active service rendered under temporary appointments as warrant or commissioned officers in the regular Navy or as warrant or commissioned officers in the United States Naval Reserve Force for purpose of promotion to chief warrant rank, and I ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Washington calls up a bill which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. The gentleman from Washington asks unanimous consent that this bill may be considered in the House as in Committee of the Whole. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That for the purpose of computing the six years' service required for promotion from warrant to chief warrant rank, all active service, for purposes other than training heretofore rendered during the period from April 6, 1917, to December 31, 1921, under a temporary appointment as a warrant or commissioned officer in the United States Navy, or as a warrant or commissioned officer in the United States Naval Reserve Force, shall be counted.

With the following committee amendment:

On page 2, line 2, after the word "counted," strike out the period, insert a colon, and add the following proviso:

"*Provided*, That officers who have heretofore been commissioned chief warrant officers shall for all purposes be regarded as having been so commissioned from the date of completion of such six years' service, including the service authorized to be counted by this act: *Provided further*, That no back pay or allowances shall be held to have accrued prior to the passage of this act."

Mr. MILLER. Mr. Speaker and gentlemen of the House, this is another of those bills that will remedy injustices to warrant officers and commissioned warrant officers, the backbone of the naval service. About 30 years ago we passed a law providing that there should be six years of active service in the rank of warrant officer before a man could be promoted to the rank of commissioned warrant officer. During the war many of these men were placed in the service as commissioned officers and they served in other ranks superior to the rank they held in the regular service in peace time. The purpose of this bill is to allow that service to apply on the six years' service that they have to serve before they are eligible for promotion under the act of March 3, 1899. It is a bill which the Navy Department urgently recommends to the Congress in order to remedy this discrimination against these officers. It is approved by the Director of the Budget and comes before the House with the unanimous report of the Committee on Naval Affairs.

The SPEAKER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

AMENDMENT TO THE NAVAL APPROPRIATION ACT FOR THE FISCAL YEAR ENDING JUNE 30, 1922

Mr. WOODRUFF. Mr. Speaker, by direction of the Committee on Naval Affairs I call up H. R. 5491, to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1922, and for other purposes," approved July 12, 1921, Union Calendar No. 416, and ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Michigan calls up a bill which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. The gentleman from Michigan asks unanimous consent that the bill may be considered in the House as in Committee of the Whole. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the second proviso under the heading "Contingent, Bureau of Ordnance," contained in the naval appropriation act approved July 12, 1921 (42 Stat. L., p. 128), is hereby amended to read as follows:

"*Provided further*, That hereafter no money appropriated for ordnance or ordnance material or material purchased therewith shall be used for any other purpose than that for which the appropriation was made, except that this provision shall not apply to used or obsolescent material which is no longer needed for the purpose for which originally acquired."

Mr. WOODRUFF. Mr. Speaker, this bill is to amend the naval appropriation act of 1921, which provided that materials purchased for ordnance purposes in the Navy could not be disposed of or used for any other purposes except those stated in the bill. The purpose of the bill which is before the House at this time is to permit the transfer of such used or obsolescent material as the Navy may have to some other department of the Government.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

CLAIMS FOR RETAINER PAY

Mr. MILLER. Mr. Speaker, by direction of the Committee on Naval Affairs, I call up H. R. 5617, to limit the date of filing claims for retainer pay, Union Calendar 431, and ask unanimous consent that the bill may be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Washington calls up a bill which the Clerk will report.

The Clerk read the title of the bill.

The SPEAKER. The gentleman from Washington asks unanimous consent that the bill may be considered in the House as in Committee of the Whole. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That no claim for retainer pay which accrued to enrolled members of the Naval Reserve Force or Marine Corps Reserve prior to July 1, 1925, shall be allowed unless such claim shall have been filed with the General Accounting Office within one year from the date of this act.

SEC. 2. No advance payment to assigned members of the Fleet Naval Reserve or Marine Corps Reserve, no payment of compensation for the performance of drills, equivalent instruction or duty, appropriate duty or for administrative functions, nor any payment for uniform gratuity accruing to members of the Naval Reserve or Marine Corps Reserve subsequent to July 1, 1925, shall be made upon any claim unless such claim shall have been filed with the General Accounting Office within three years from the expiration of the quarter in which the right to such payment accrued.

SEC. 3. The provisions of this act shall not apply to members of the Fleet Naval Reserve or Fleet Marine Corps Reserve, transferred, thereto after 16, 20, or more years' service in the regular Navy or Marine Corps.

With the following committee amendment:

Page 2, line 7, after the word "accrued," strike out the period, insert a colon, and add the following proviso: "*Provided*, That no claim shall be debarred if submitted within one year from the date of the passage of this act."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider the vote by which the bill was passed was laid on the table.

DEPENDENTS OF OFFICERS AND MEN ON THE SUBMARINE "S-4"

Mr. WOODRUFF. Mr. Chairman, by direction of the Naval Affairs Committee I ask unanimous consent to take from the Private Calendar the bill (H. R. 13542) to authorize the payment of the sum of $2,500 to the dependents of the officers and men who lost their lives on the submarine *S-4*, and consider the same.

The SPEAKER. The Chair will ask the chairman of the committee whether all the bills mentioned yesterday have been considered.

Mr. BRITTEN. Mr. Speaker, all the bills referred to yesterday have been called up and passed.

The SPEAKER. And this is the last bill intended to be called up to-day?

Mr. BRITTEN. Yes.

The SPEAKER. This bill is on the Private Calendar, and its consideration will require unanimous consent.

Mr. WOODRUFF. The bill is on the Private Calendar, and for that reason I ask unanimous consent for its present consideration, Mr. Speaker.

Mr. FRENCH. Mr. Speaker, may the bill be reported?

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That in recognition of the hazardous service performed by the officers and men of the submarine *S-4*, which services were of a character which has since been recognized as worthy of increased compensation, the Secretary of the Treasury of the United States is authorized and directed to pay, from any money in the Treasury, not otherwise appropriated, the sum of $2,500 to the widow or widowed mother, or other dependent provided the dependency be satisfactorily established, of the officers and men who lost their lives in the sinking of that vessel on December 17, 1927.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. FRENCH. Mr. Speaker, reserving the right to object, it is a difficult thing for a Member to impose an objection or even suggest anything that is not in harmony with this bill, but I would like to ask the gentleman, a member of the committee, if the committee has gone into the question of other accidents and disasters of this kind where dependents are left, and whether the gentleman knows what the practice has been in the past with regard to them.

Mr. WOODRUFF. I do not think there has been another accident of exactly this character in the Navy. It would be well for the Members to remember that the sinking of the *S-4* was due to a collision between two Government ships. In the case of the sinking of the *S-51*, it resulted from a collision between a submarine and a commercial vessel. In the latter case it is possible for the dependents of the men who lost their lives to take the corporation owning the particular ship into court and secure damages. Obviously, inasmuch as the sinking of the *S-4* was due to a collision between two Government ships, that door is not open to the dependents of the men who lost their lives. There are only 40 men involved. Dependency must be proven and the money can go only to a man's mother, wife, or dependent child. The bill has been given very careful consideration by the Naval Affairs Committee and it is the unanimous opinion of the committee that the bill should pass. I hope no one will object.

Mr. VINSON of Georgia. Will the gentleman yield?

Mr. FRENCH. I yield.

Mr. VINSON of Georgia. I will state to the gentleman from Idaho, following the statement of my colleague, the gentleman from Michigan [Mr. WOODRUFF], that his bill has the indorsement of the committee, that the theory upon which the Naval Affairs Committee acted in reporting this bill is based upon the fact that Congress, immediately after the accident of the *S-51*, saw fit to increase the compensation of the officers and men in the submarine service on account of the hazardous service. This accident occurred some time previous to the accident of the *S-51*. Therefore all officers and men in the submarine service now receive a larger allowance than heretofore on account of the hazards of their occupation, so the committee felt that in view of the position which the Congress had taken with reference to increasing the compensation of all

others in the submarine service, that the dependents of those who were killed by the accident of the *S–4* should be compensated. Of course, the officers and men of the *S–4* did not receive the additional compensation and the committee felt that inasmuch as Congress had established this policy on account of the risk of submarine operation, and inasmuch as these men lost their lives before we adopted the policy, their families should have the benefit of the legislation now proposed. This is the theory of the bill.

Mr. GARNER of Texas. May I make a suggestion to the gentleman from Idaho? The gentleman is a guardian of the Treasury, and very properly and very efficiently so. If this bill is not passed and a bill goes before the Claims Committee and they report such a bill for five or ten thousand dollars, I doubt whether the Congress would turn down a bill of that character, and there would be a number of such bills because there were 40 men involved.

Mr. SCHAFER. The Claims Committee would not report out such a bill for five or ten thousand dollars when we consider the precedents of that committee.

Mr. GARNER of Texas. I can not speak for the Claims Committee like the gentleman, but I know some bills have been reported that I do not think had any more merit than one of these bills would have, and in the interest of economy, as well as justice to these people, it seems to me that $2,500 would be a proper compensation.

Mr. BRITTEN. If the gentleman will permit, what the gentleman has just stated has already occurred, with the exception that the matter has not gone to the Claims Committee. We have pending before our committee now a bill for the relief of Hattie Harris, one of the dependents of one of the boys on the *S–4*, carrying $10,000. We have another bill calling for $10,000 for the benefit of Blanche Burkhart Strange. There will be others that will follow, all involving $10,000, and I agree with the gentleman from Texas [Mr. GARNER] that this bill is very largely in the interest of economy in addition to being a very humane measure.

Mr. DOMINICK. Mr. Speaker, reserving the right to object, I want to add to what has been said by the gentleman from Texas and the gentleman from Illinois, that I am the author of the private bill for the relief of Hattie Harris, and at the hearing it was suggested by the Committee on Naval Affairs that possibly all were entitled to relief, and I concur in that suggestion.

I am satisfied, as suggested by the gentleman from Texas, that had my bill gone before the Committee on Claims they would have allowed at least $7,500, which is the usual amount allowed in death claims. There is no doubt of negligence somewhere on the part of the Government in this matter.

These men were in the submarine, where they not only had a right to be but where they were required to be, and while the findings of the court of inquiry as to this accident were not approved in toto by the naval board, yet the actual findings of the court-martial stated that that accident on the *S–4* was caused by the negligence of both the captain commanding the submarine and also the commanding officer of the Coast Guard cutter which rammed the submarine.

The facts are set out and it is clearly a case of negligence as I read the summary of the report; and the only reason it was not approved by the Secretary of the Navy was that he did not want to pass an aspersion on the commander of the submarine that had gone down with the boat.

Mr. SCHAFER. If one of the marines engaged in the war in Nicaragua was shot and killed, he would be just as dead as any member of the crew of the submarine, and his dependent wife would receive $12 a month pension and his minor children would receive $2 a month under the general pension law, because that is the only law applicable to that case. I think that instead of bringing in this bill the Naval Affairs Committee should bend their efforts toward raising the rates under the general pension law so as to give equal and proper relief in all cases where members of the Army, Navy, or Marine Corps are killed or injured in line of duty. I shall not object to this bill, but I want to call the attention of the House to the injustice of the existing general law pension rates.

Mr. WELSH of Pennsylvania. Will the gentleman yield?

Mr. WOODRUFF. Yes.

Mr. WELSH of Pennsylvania. Do the dependents of these unfortunate men know that by this bill they are estopped from further claim?

Mr. WOODRUFF. I do not know that there is anything in the bill that would estop them from making further claim. I think that they will be well satisfied. If they make a claim which is referred to the Naval Affairs or Claims Committees, it will be two or three years before they can get action.

Mr. TILSON. How much would they get before the Committee on Claims in the ordinary procedure?

Mr. WOODRUFF. I can not state that.

Mr. GARNER of Texas. Five thousand dollars.

Mr. SCHAFER. Any claim for relief by these dependents would not go to the Committee on Claims.

Mr. WOODRUFF. It would go to the Committee on Naval Affairs.

Mr. WELSH of Pennsylvania. Mr. Chairman, I object to the present consideration of the bill.

Mr. FRENCH. Mr. Chairman, I also object to the present consideration of the bill.

THE PANAMA RAILROAD CO.

The SPEAKER laid before the House the following message from the President of the United States, which was read and referred to the Committee on Interstate and Foreign Commerce:

To the Congress of the United States:

I transmit herewith for the information of the Congress the Seventy-ninth Annual Report of the Board of Directors of the Panama Railroad Co. for the fiscal year ended June 30, 1928.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 12, 1928.*

INVESTIGATION OF BATTLE FIELDS

The SPEAKER also laid before the House the following message from the President of the United States, which was read and, with accompanying papers, referred to the Committee on Military Affairs:

To the Congress of the United States:

In compliance with section 2 of the act of Congress to provide for the study and investigation of battle fields in the United States for commemorative purposes, approved June 11, 1926, I transmit herewith a report by the Secretary of War of the progress made under the said act, together with his recommendations for further operations.

CALVIN COOLIDGE.

THE WHITE HOUSE, *December 12, 1928.*

INAUGURATION OF THE PRESIDENT

Mr. SNELL. Mr. Speaker, I present a privileged report from the Committee on Rules, on arrangements for the inauguration of the President elect of the United States on the 4th of March next.

The report was referred to the House Calendar and ordered printed.

CELEBRATION AT KITTY HAWK

The SPEAKER. Under the authority of House Joint Resolution 322, to appoint a committee to attend the celebration at Kitty Hawk, the Chair appoints the following Members:

Mr. PARKER, of New York; Mr. FREAR, of Wisconsin; Mr. GUYER, of Kansas; Mr. KINDRED, of New York; Mr. WARREN, of North Carolina; and Mr. CHAPMAN, of Kentucky.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. W. T. FITZGERALD, indefinitely, on account of illness.

SENATE BILLS REFERRED

Bills of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1462. An act providing for the necessary surveys, studies, investigations, and engineering of the Columbia Basin reclamation project, and for other purposes; to the Committee on Irrigation and Reclamation.

S. 3741. An act for the relief of S. L. Roberts; to the Committee on Claims.

S. 3936. An act to regulate the practice of the healing art to protect the public health in the District of Columbia; to the Committee on the District of Columbia.

ADJOURNMENT

Mr. BRITTEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 45 minutes p. m.) the House adjourned until to-morrow, Thursday, December 13, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Thursday, December 13, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON AGRICULTURE

(10 a. m.)

To amend the packers and stockyards act, 1921 (H. R. 13596).

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

War Department appropriation bill.

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

For the relief of the Gilpin Construction Co. (S. 1530).

DISTRICT OF COLUMBIA COMMITTEE—INVESTIGATING SUBCOMMITTEE

(10.30 a. m.)

To consider prohibition enforcement in the District of Columbia.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

670. A letter from the Secretary of the Navy, transmitting draft of a proposed bill to authorize the transfer to the line of the Navy of certain officers of the Construction Corps who are employed on aeronautical duties; to the Committee on Naval Affairs.

671. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Dennis Creek, N. J.; to the Committee on Rivers and Harbors.

672. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Schuylkill River, Pa., with a view to devising methods whereby the source of pollution caused by the settling of coal dust or culm may be removed (H. Doc. No. 469); to the Committee on Rivers and Harbors and ordered to be printed.

673. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination of Galena River, Ill.; to the Committee on Rivers and Harbors.

674. A letter from the Secretary of War, transmitting report from the Chief of Engineers on preliminary examination and survey of Dry Pass, Alaska (H. Doc. No. 470); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

675. A letter from the Acting Secretary of Commerce, transmitting report that field officers of the Steamboat Inspection Service have reported the sale of 940 pounds of useless papers listed in House report No. 1714, Seventieth Congress, and the revenue received from the same was $3.15; to the Committee on Disposition of Useless Executive Papers.

676. A letter from the Comptroller General of the United States, transmitting special report relating to gasoline taxes collected by the District of Columbia on gasoline purchased for use by the United States; to the Committee on the District of Columbia.

677. A letter from the secretary of the United States Employees' Compensation Commission, transmitting report of the operations of the United States Employees' Compensation Commission for the fiscal year ending June 30, 1928 (H. Doc. No. 379); to the Committee on the Judiciary.

678. A communication from the President of the United States, transmitting supplemental estimate of appropriation for the Treasury Department for the fiscal year ending June 30, 1929, for an additional amount for the purchase of a site for a building for the Supreme Court of the United States, $268,741 (H. Doc. No. 471); to the Committee on Appropriations and ordered to be printed.

679. A communication from the President of the United States, transmitting supplemental estimates of appropriation for the Navy Department for the fiscal year ending June 30, 1929, amounting to $3,305 (H. Doc. No. 472); to the Committee on Appropriations and ordered to be printed.

680. A communication from the President of the United States, transmitting record of a judgment rendered against the Government by the United States District Court for the Northern District of California, amounting to $11,556.60 (H. Doc. No. 473); to the Committee on Appropriations and ordered to be printed.

681. A communication from the President of the United States, transmitting supplemental estimate of appropriation for the fiscal year ending June 30, 1929, for the National Home for Disabled Volunteer Soldiers, for the construction and installation at the Pacific branch, Los Angeles County, Calif., of 3-story barrack buildings and utilities and appurtenances thereto, $1,050,000 (H. Doc. No. 474); to the Committee on Appropriations and ordered to be printed.

682. A communication from the President of the United States, transmitting supplemental estimate of appropriations for the Department of the Interior, Bureau of Indian Affairs, for the fiscal year 1930, amounting to $198,300 (H. Doc. No. 475); to the Committee on Appropriations and ordered to be printed.

683. A letter from the Librarian of Congress, transmitting annual report of the Librarian of Congress, together with that of register of copyrights, for the fiscal year ending June 30, 1928 (H. Doc. No. 354); to the Committee on the Library.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GRAHAM: Committee on the Judiciary. H. R. 14150. A bill to amend section 279 of the Judicial Code; with amendment (Rept. No. 1948). Referred to the Committee of the Whole House on the state of the Union.

Mr. KIESS: Committee on Insular Affairs. H. J. Res. 333. A joint resolution for the relief of Porto Rico; with amendment (Rept. No. 1949). Referred to the Committee of the Whole House on the state of the Union.

Mr. ELLIOTT: Committee on Public Buildings and Grounds. H. R. 12897. A bill to provide for the acquisition of a site and the construction thereon of a fireproof office building or buildings for the House of Representatives; with amendment (Rept. No. 1950). Referred to the Committee of the Whole House on the state of the Union.

Mr. SNELL: Committee on Rules. S. Con. Res. 24. A concurrent resolution providing for the appointment of a joint committee to make the necessary arrangements for the inauguration of the President elect of the United States on March 4, 1929; without amendment (Rept. No. 1951). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CRAIL: A bill (H. R. 15265) providing a nautical school at the port of San Pedro, Los Angeles, Calif.; to the Committee on Naval Affairs.

By Mr. FRENCH: A bill (H. R. 15266) to amend the tariff act of 1922 in order to provide for a tariff on hides of cattle and horses; to the Committee on Ways and Means.

By Mr. GARBER: A bill (H. R. 15267) to amend the tariff act of 1922; to the Committee on Ways and Means.

By Mr. JOHNSON of Texas: A bill (H. R. 15268) amending the World War adjusted compensation act; to the Committee on Ways and Means.

By Mr. SANDLIN: A bill (H. R. 15269) to extend the times for commencing and completing the construction of a bridge across the Red River at or near Coushatta, La.; to the Committee on Interstate and Foreign Commerce.

By Mr. MEAD: A bill (H. R. 15270) to recognize seniority of service in promotions and assignments of clerks in first and second class post offices; to the Committee on the Post Office and Post Roads.

By Mr. KURTZ: A bill (H. R. 15271) authorizing the President of the United States to award in the name of Congress gold medals of appropriate design to Miss Amelia Earhart, passenger, and Wilmer Stultz and Louis Gordon, pilots; to the Committee on Coinage, Weights, and Measures.

By Mr. FISH: A bill (H. R. 15272) to amend section 19 of the immigration act of 1917 by providing for the deportation of an alien convicted in violation of the Harrison narcotic law and amendments thereto; to the Committee on Immigration and Naturalization.

Also, a bill (H. R. 15273) authorizing the Commissioner of Prohibition to establish a foreign intelligence unit to obtain information abroad which will lead to the apprehension of smuggled drugs, smugglers, and other violators of the Harrison Narcotic Act; to the Committee on the Judiciary.

By Mr. Black of New York: A bill (H. R. 15274) to amend the national prohibition act, the act supplemental to the national prohibition act, the Post Laws and Regulations, and for other purposes; to the Committee on the Judiciary.

By Mr. DALLINGER: Joint resolution (H. J. Res. 347) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. KIESS: Resolution (H. Res. 260) providing for the consideration of H. J. Res. 333; to the Committee on Rules.

By Mr. GRAHAM: Resolution (H. Res. 261) amending clause 4 of Rule XI of the rules of the House of Representatives; to the Committee on Rules.

By Mr. LAGUARDIA: Resolution (H. Res. 262) favoring the ratification of the Kellogg peace pact; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ARNOLD: A bill (H. R. 15275) granting a pension to Margaret Adeline Douthit; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15276) granting an increase of pension to Nancy E. Stanley; to the Committee on Invalid Pensions.

By Mr. BACON: A bill (H. R. 15277) providing for the examination and survey of West Harbor, N. Y.; to the Committee on Rivers and Harbors.

By Mr. BOWMAN: A bill (H. R. 15278) granting a pension to Rebecca A. Walter; to the Committee on Invalid Pensions.

By Mr. BURDICK: A bill (H. R. 15279) for the relief of the family of Wang Erh-Ko; to the Committee on Naval Affairs.

By Mr. COCHRAN of Pennsylvania: A bill (H. R. 15280) granting an increase of pension to Mary J. Matha; to the Committee on Invalid Pensions.

By Mr. CONNOLLY of Pennsylvania: A bill (H. R. 15281) for the relief of Amos Gaul; to the Committee on Military Affairs.

Also, a bill (H. R. 15282) for the relief of Peter Guilday; to the Committee on Military Affairs.

Also, a bill (H. R. 15283) granting a pension to Emma C. Bragg; to the Committee on Pensions.

By Mr. DYER: A bill (H. R. 15284) granting a pension to John S. McClanahan; to the Committee on Pensions.

Also, a bill (H. R. 15285) granting a pension to Mary Gallion; to the Committee on Invalid Pensions.

By Mr. ENGLAND: A bill (H. R. 15286) granting a pension to John Cook; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15287) granting an increase of pension to John H. Jackson; to the Committee on Invalid Pensions.

By Mr. FENN: A bill (H. R. 15288) for the relief of Angelo Cerri; to the Committee on Claims.

Also, a bill (H. R. 15289) granting a pension to Alfred A. Abel; to the Committee on Pensions.

Also, a bill (H. R. 15290) granting an increase of pension to Conrad E. Nelson; to the Committee on Pensions.

By Mr. FISH: A bill (H. R. 15291) granting an increase of pension to Maria A. Finnegan; to the Committee on Invalid Pensions.

By Mr. HASTINGS: A bill (H. R. 15292) for the relief of the First National Bank of Porter, Okla.; to the Committee on Claims.

By Mr. HILL of Alabama: A bill (H. R. 15293) for the relief of Lieut. John J. Powers, Quartermaster Corps; to the Committee on Military Affairs.

By Mr. HOGG: A bill (H. R. 15294) for recognition of meritorious service performed by Chief Gunner Clarence L. Tibbals; to the Committee on Naval Affairs.

By Mr. HUDDLESTON: A bill (H. R. 15295) granting an increase of pension to Allison D. McKinney; to the Committee on Pensions.

By Mr. JOHNSON of Illinois: A bill (H. R. 15296) granting a pension to Eliza Fox; to the Committee on Invalid Pensions.

By Mr. JOHNSON of Indiana: A bill (H. R. 15297) granting an increase of pension to William McCrocklin; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 15298) granting an increase of pension to Lucy J. Carr; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15299) granting an increase of pension to Tillie J. Smyser; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15300) granting an increase of pension to Ella M. Reed; to the Committee on Invalid Pensions.

By Mr. KING: A bill (H. R. 15301) granting an increase of pension to Caroline Clements; to the Committee on Invalid Pensions.

By Mr. MOORE of Kentucky: A bill (H. R. 15302) granting a pension to Americus Watt; to the Committee on Pensions.

By Mr. MOORMAN: A bill (H. R. 15303) granting an increase of pension to Christopher C. Hamilton; to the Committee on Pensions.

By Mr. NELSON of Missouri: A bill (H. R. 15304) granting a pension to Sallie Nelson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15305) granting a pension to Anna Mary Margaret Kerperin; to the Committee on Invalid Pensions.

By Mr. PARKER: A bill (H. R. 15306) granting a pension to Ida E. Russell; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H. R. 15307) granting an increase of pension to Robert J. Jones; to the Committee on Pensions.

By Mr. REED of New York: A bill (H. R. 15308) granting a pension to Catherine L. Lawrence; to the Committee on Invalid Pensions.

By Mr. SNELL: A bill (H. R. 15309) granting an increase of pension to Ida Ballard; to the Committee on Invalid Pensions.

By Mr. STOBBS: A bill (H. R. 15310) granting a pension to Esther Spellman; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15311) granting an increase of pension to Mary A. Hughes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15312) granting an increase of pension to Cora L. Mason; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15313) granting an increase of pension to Ruth M. Robbins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15314) granting an increase of pension to Sarah A. Jackson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15315) granting an increase of pension to Agnes R. Jacocks; to the Committee on Invalid Pensions.

By Mr. COHEN: A bill (H. R. 15316) granting an increase of pension to Isaac Adler; to the Committee on Pensions.

By Mr. TARVER: A bill (H. R. 15317) granting an increase of pension to Snowden Jones; to the Committee on Pensions.

By Mr. THURSTON: A bill (H. R. 15318) granting an increase of pension to Barbara A. Stewart; to the Committee on Invalid Pensions.

By Mr. VESTAL: A bill (H. R. 15319) granting an increase of pension to Cora E. Benadum; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15320) granting an increase of pension to William Briney; to the Committee on Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 15321) granting a pension to Dell Toy; to the Committee on Invalid Pensions.

By Mr. WELLER: A bill (H. R. 15322) for the relief of Clara C. Talmadge; to the Committee on Claims.

By Mr. MACGREGOR: Resolution (H. Res. 259) to provide for a temporary assistant majority floor manager of telephones; to the Committee on Accounts.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7959. By Mr. McCORMACK: Petition of New England Shoe and Leather Association, Thomas F. Anderson, secretary-treasurer, 166 Essex Street, Boston, Mass., urging early and favorable consideration of House bill 9195, providing for the removal of present quantity restrictions on imports of cigars and cigarettes from Cuba; to the Committee on Ways and Means.

7960. By Mr. WYANT: Petition of Jeannette Lodge No. 486, Benevolent Protective Order of Elks, favoring enactment of Senate bill 1727, providing for optional retirement after 30 years' service when age 63 years is attained; to the Committee on the Civil Service.

7961. Also, petition of Capt. George A. Cribbs Post, No. 276, Grand Army of the Republic, Greensburg, Pa., favoring pension legislation at the present session of Congress for the relief of aged and decrepit Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

SENATE

THURSDAY, *December 13, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Almighty God, fountain of life and light, whose tireless energy pervades the universe, enable us in our work to reflect some broken beam of Thy glory. Grant that we may accomplish our appointed tasks with a sense of ease and mastery, always conscious that we are greater than they, and so direct our efforts by Thy purpose that we may win for mankind that freedom and mutual trust which shall cause all nations, in the spirit of unity and abiding fellowship, to bring their honor and glory into Thy kingdom. Through Jesus Christ our Lord. Amen.

ROBERT M. LA FOLLETTE, Jr., a Senator from the State of Wisconsin, appeared in his seat to-day.

THE JOURNAL

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 5491. An act to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1922, and for other purposes," approved July 12, 1921;

H. R. 5617. An act to limit the date of filing claims for retainer pay;

H. R. 5713. An act to permit certain warrant officers to count all active service rendered under temporary appointments as warrant or commissioned officers in the regular Navy or as warrant or commissioned officers in the United States Naval Reserve Force for purpose of promotion to chief warrant rank;

H. R. 12032. An act to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended;

H. R. 13249. An act to authorize an increase in the limit of cost of alterations and repairs to certain naval vessels;

H. R. 13414. An act to amend section 1396 of the Revised Statutes of the United States relative to the appointment of chaplains in the Navy;

H. R. 13685. An act to regulate the distribution and promotion of commissioned officers of the Marine Corps, and for other purposes;

H. R. 14660. An act to authorize alterations and repairs to the U. S. S. *California;*

H. R. 14922. An act to authorize an increase in the limit of cost of two fleet submarines; and

H. J. Res. 346. Joint resolution authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month.

SENATOR FROM DELAWARE

Mr. BAYARD. Mr. President, I send to the desk a certificate of appointment from the Governor of the State of Delaware, designating Hon. DANIEL O. HASTINGS as a Senator from that State, which I ask may be read.

The VICE PRESIDENT. The clerk will read the certificate.

The certificate was read and ordered to be placed on file, as follows:

STATE OF DELAWARE,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

Be it known that I, Robert P. Robinson, Governor of the State of Delaware, according to the form of the act of the general assembly of said State, have appointed DANIEL O. HASTINGS to be a Senator of the United States, to serve as such Senator until the electors of the said State shall fill the vacancy caused by the resignation of Coleman du Pont, lately Senator from said State, in the Senate of the United States.

Given under our hands, in obedience to the said act of the general assembly and of the act of Congress, this 10th day of December, A. D. 1928, and of the independence of the United States of America the one hundred and fifty-third.

ROBT. P. ROBINSON.

By the governor:
[SEAL.]
CHARLES H. GRANTLAND,
Secretary of State.

Mr. BAYARD. Mr. President, Mr. HASTINGS is present, and I ask that he be sworn in at this time.

The VICE PRESIDENT. The Senator designate will present himself at the desk and receive the oath.

Mr. HASTINGS, escorted by Mr. BAYARD, advanced to the Vice President's desk; and the oath prescribed by law having been administered to him, he took his seat in the Senate.

REPORT OF THE COMPTROLLER OF THE CURRENCY

The VICE PRESIDENT laid before the Senate a communication from the Comptroller of the Currency, transmitting, pursuant to law, his annual report covering activities of the Currency Bureau for the year ended October 31, 1928, which was referred to the Committee on Banking and Currency.

ANNIVERSARY OF FIRST AIRPLANE FLIGHT

The VICE PRESIDENT. Under the terms of the joint resolution (H. J. Res. 342) to appoint a congressional committee to attend the exercises celebrating the twenty-fifth anniversary of the first airplane flight made by Wilbur and Orville Wright on December 17, 1903, at Kill Devil Hills, Kitty Hawk, N. C., the Chair appoints the junior Senator from Connecticut [Mr. BINGHAM], the senior Senator from North Carolina [Mr. SIMMONS], and the junior Senator from North Carolina [Mr. OVERMAN].

Mr. SIMMONS. Mr. President, much as I regret it, I find that I would not be able to attend the celebration, and I ask the Chair to appoint some one in my place.

The VICE PRESIDENT. The Chair will appoint in place of the senior Senator from North Carolina the junior Senator from South Dakota [Mr. MCMASTER].

Mr. OVERMAN. Mr. President, it will be a very great occasion and I should like to go, but it is impossible for me to do so at this time. As I desire the Senate to be represented on the occasion, I ask the Chair to appoint some one in my place.

The VICE PRESIDENT. The Chair will appoint the junior Senator from Alabama [Mr. BLACK] in place of the junior Senator from North Carolina.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated below:

H. R. 5491. An act to amend an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1922, and for other purposes," approved July 12, 1921;

H. R. 5617. An act to limit the date of filing claims for retainer pay;

H. R. 5713. An act to permit certain warrant officers to count all active service rendered under temporary appointments as warrant or commissioned officers in the regular Navy, or as warrant or commissioned officers in the United States Naval Reserve Force, for purpose of promotion to chief warrant rank;

H. R. 12032. An act to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended;

H. R. 13249. An act to authorize an increase in the limit of cost of alterations and repairs to certain naval vessels;

H. R. 13414. An act to amend section 1396 of the Revised Statutes of the United States relative to the appointment of chaplains in the Navy;

H. R. 13685. An act to regulate the distribution and promotion of commissioned officers of the Marine Corps, and for other purposes;

H. R. 14660. An act to authorize alterations and repairs to the U. S. S. *California;* and

H. R. 14922. An act to authorize an increase in the limit of cost of two fleet submarines; to the Committee on Naval Affairs.

H. J. Res. 346. Joint resolution authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month; to the Committee on Appropriations.

PETITIONS AND MEMORIALS

Mr. BLEASE. Mr. President, I present resolutions adopted by the Wardens' Association of America meeting with the American Prison Congress, at Kansas City, Mo., in opposition to the Hawes bill with reference to prison-made goods, which I ask may be printed in the RECORD and lie on the table.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

WASHINGTON, D. C., *December 12, 1928.*

Senator COLE L. BLEASE,
Senate Office Building, Washington, D. C.

The Wardens' Association of America, meeting with the American Prison Congress, at Kansas City, Mo., in October, 1928, unanimously adopted the following resolution:

Whereas idleness in penal institutions is destructive of the physical, mental, moral and spiritual welfare of their inmates; and

Whereas productive labor under normal sanitary working conditions in penal institutions is a controlling factor in prison reformation, discipline, and order; and

Whereas there have been introduced, from time to time, bills in Congress and in the State legislatures, the effect of which, if enacted into law, would be to destroy or cripple the marketing of products of penal institutions and farms: Therefore be it

Resolved, That we are opposed to any and all State or Federal legislation that would directly or indirectly interfere with the production, manufacture, sale, or transportation of products of penal institutions; that we believe such legislation is unnecessary, unwise, and unfair to the penal institutions, and their inmates; be it further

Resolved, That a committee be appointed to keep in touch with all such proposed legislation and to protest to Congress and the State legislatures against its enactment.

We respectfully petition the Senate not to pass the Hawes-Cooper bill, H. R. 7729. We ask that it be referred to a committee and that we be permitted to appear before that committee.

Committee Wardens' Association of America:

E. J. Fogarty, chairman, superintendent Cook County Jail, Chicago, Ill.; R. M. Youell, superintendent Virginia State Prison, Richmond, Va.; A. H. McCauley, chairman board of directors South Carolina State Prison, Chester, S. C.; J. J. Sullivan, warden Minnesota State Prison, Stillwater, Minn.; T. P. Hollowell, warden Iowa State Prison, Fort Madison, Iowa; Elmer Greenn, warden Illinois Penitentiary, Joliet, Ill.; Archdeacon B. M. Spurr, chaplain West Virginia State Prison, Moundsville, W. Va.; John J. Hannan, chairman board of control, Madison, Wis.; George Jameson, superintendent South Dakota Penitentiary, Sioux Falls, S. Dak.; H. K. W. Scott, superintendent Connecticut State Prison, Wethersfield, Conn.; J. F. Thames, Mississippi Prison Commission, Jackson, Miss.; John Snook, warden Federal Prison, Atlanta, Ga.; P. J. Dugan, warden New Mexico State Prison, Santa Fe, N. Mex.; Lewis D. White, warden United States Federal Prison, Leavenworth, Kans.; A. F. Miles, superintendent Indiana Reformatory, Pendleton, Ind.; Mrs. Blanche La Du, member Minnesota board of control, St. Paul, Minn.; Miss Margaret Elliott, superintendent Women's Prison, Indianapolis, Ind.; Warden Davis, Utah State Prison, Salt Lake City, Utah; F. E. Crawford, warden Colorado State Prison, Canon City, Colo.; Homer K. York, member of board of trustees, Marion, Ind.; Mrs. William Harrison Cade, board of welfare, 2506 Aubert Avenue, Chicago, Ill.; Ralph Howard, superintendent of Indiana State Farm, Putnamville, Ind.; William H. Harrison, director of penal institutions, Jefferson City, Mo.; John J. Burnet, industrial director, Jefferson City, Mo.

Mr. BLEASE. I also present a letter from the president of the South Carolina American Legion Auxiliary in reference to the so-called Kellogg treaty, which I ask the clerk to read and that it be referred to the Committee on Foreign Relations.

There being no objection, the letter was read and referred to the Committee on Foreign Relations, as follows:

AMERICAN LEGION AUXILIARY,
DEPARTMENT OF SOUTH CAROLINA,
Charleston, S. C., December 10, 1928.

Senator COLE BLEASE,
Washington, D. C.

DEAR SENATOR BLEASE: Representing 3,000 women (the American Legion Auxiliary, Department of South Carolina), I am writing protesting against the ratification of the Kellogg multilateral treaty or any other treaty until after the naval bill has been passed.

Please let me have an expression from you on these subjects for the information of my department.

With best wishes, I am very sincerely,

(Mrs. J. S.) WILLIE B. RHAME,
President Department of South Carolina,
American Legion Auxiliary, 58 Rutledge Avenue.

Mr. BLEASE. I also present resolutions adopted by Charleston Post, No. 10, of the American Legion, Department of South Carolina, which I ask may be read and referred to the Committee on Military Affairs.

There being no objection, the resolutions were read and referred to the Committee on Military Affairs, as follows:

Resolution duly adopted at regular meeting Charleston Post, No. 10, the American Legion, Department of South Carolina, November 14, 1928

Whereas in the preamble to the Constitution of the United States of America it is stated that one of the objects of the establishment of the Constitution is to "provide for the common defense"; and

Whereas the members of this post believe that this object is of as much importance to-day as it was when the Constitution was adopted: Now, therefore, be it

Resolved, That a copy of this resolution be sent to the Senators and Department of South Carolina, earnestly urges the Senators and Congressmen from South Carolina to exert their best efforts to see to it that we have an Army adequate for the defense of this country and that we have a Navy second to none in the world; be it further

Resolved, That a copy of this resolution be sent to the Senators and Congressmen from South Carolina, to the newspapers of the city of Charleston, all posts of the American Legion, Department of South Carolina, and all departments throughout the United States.

AUBREY E. DAVIS, *Adjutant.*

CHARLESTON, S. C., *November 14, 1928.*

Mr. FESS. Mr. President, Mrs. Atlee Pomerene, whose husband was once a very distinguished Member of this body, handed me a resolution adopted by the Women's Council for the Promotion of Peace. I ask unanimous consent that the clerk may read the resolution, and that it be referred to the Committee on Foreign Relations.

The resolution was read and referred to the Committee on Foreign Relations, as follows:

Whereas during the past 10 years the dominant desire of all thoughtful people has been to discover some means whereby permanent peace may be established; and

Whereas various efforts to democratize justice among the nations have culminated in the Kellogg multilateral treaty whereby "the high contracting parties solemnly declare in the names of their respective peoples that they condemn recourse to war for the solution of international controversies and renounce it as an instrument of national policy in their relations with one another," and "agree that the settlement or solution of all disputes or conflicts of whatever nature or of whatever origin they may be which may arise among them shall never be sought except by pacific means":

We, therefore, the women of the Women's Council for Promotion of Peace, appeal to you, Senator SIMEON FESS, our representative in the United States Senate, to adopt the multilateral treaty and work for its passage in the Senate.

MARY D. PRESCOTT, *President.*

Mr. JONES presented papers in the nature of petitions numerously signed by sundry citizens of Tacoma and South Bend, in the State of Washington, praying for the prompt ratification of the so-called multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. CAPPER presented a resolution adopted by Riley County (Kans.) Farmers Union, No. 45, favoring the passage of legislation making the tariff on agricultural products more effective, and also providing for the early completion of an inland waterway system, which was referred to the Committee on Finance.

Mr. DENEEN presented resolutions adopted by Peoria Post, No. 2, the American Legion, Department of Illinois, which were referred to the Committee on Military Affairs and ordered to be printed in the RECORD, as follows:

PEORIA POST, NO. 2 (INC.),
THE AMERICAN LEGION,
DEPARMENT OF ILLINOIS,
Peoria, Ill.

Resolved by Peoria Post, No. 2, the American Legion, District of Illinois, at a regular meeting assembled this 15th day of November, 1928, That we are in unanimous accord with the national organization and stand squarely behind the national committee on matters of national defense as particularly exemplified by the following editorial appearing in the Peoria Journal under date of Saturday, November 10, 1928, which in words and figures next follows:

"The American people have frequently shown a profound respect for the man who knows his business. Babe Ruth is acclaimed on the baseball diamond, but not on the political rostrum. What Lindbergh says about aviation is respected because of his consistent and triumphant conquests of the air. Thomas A. Edison is an authority on electricity, but his views on college education cause a smile. Henry Ford probably has made a deeper impression in his time than any of his contemporaries, but he excels as an industrialist, not as an editor.

"The American Legion is composed of men who offered their lives for their country. In the aggregate they represent a body of American public opinion deemed competent to discuss national defense. It is a matter of no immediate importance whether they got into the war as volunteers or as conscripts. It is they who risked and suffered. It is they who saw their comrades fall in the dark days of the war.

"The American people will soon be inundated with pacifist propaganda. They will be told that the pact of Paris, renouncing war as an instrument of national policy, must be ratified by the United States Senate in December, and later they will be told that having consented to the renunciation of war it is their moral duty to refrain from making preparations for war. The pact of Paris is a good gesture. If it promotes peace, it is deserving of enthusiastic support. There is not the slightest doubt that the Senate will ratify it. But if it is seized upon as a pretext for abandoning naval construction and weakening our national defenses while European states continue to strengthen their own, the result will be disastrous.

"The American Legion is peculiarly fitted to deal concretely and authoritatively with problems of national defense. We have had in this country one year of war for every five years of peace and we have entered every war unprepared. Had it not been for the British Navy Germany would have won the World War. Britain is still realist; so are France and Italy. It was Mussolini who signed the Locarno pact on behalf of Italy. Il Duce is also a realist, and as a realist he is commanding respect for his unique policies. The obligation rests upon the United States not only to defend its homeland but to protect its investments and its citizens in all parts of the world.

"National defense, in the light of modern conditions and involvements, is a meaningless term. There is no such thing apart from defense of everything that is American everywhere. That is national defense, or there is none. The American Legion is barred from participation in all controversies in which its membership is divided on racial, religious, political, or sectional grounds. But on a national-defense policy it should speak with one voice.

"The pacifists are coming; fall in."

And be it further Resolved, That this post of the American Legion memorialize the Congressman from this district, the Senators from Illinois, and Congressmen at large, RUTH HANNA MCCORMICK and RICHARD YATES, and exert exert all possible collective and individual effort to the carrying out of the proposition enunciated in the above editorial.

PEORIA POST NO. 2,
JAMES M. SHUTE,
Commander.

Official:

N. C. CATION, *Adjutant.*

Mr. REED of Pennsylvania presented resolutions which were referred to the Committee on Immigration and ordered to be printed in the RECORD, as follows:

Resolutions adopted by Ellwood City Council, Fraternal Patriotic Americans, No. 182, Ellwood City, Pa.

ELLWOOD CITY, PA., *December 11, 1928.*

To the Congress of the United States:

Whereas it has come to our notice that large numbers of immigrants are entering the United States by the way of Canada and Mexico and that many of them remain in the United States permanently: Therefore be it

Resolved, That legislation be speedily enacted to apply the quota law to Canada and Mexico, and also that an alien registration law be adopted and that all aliens who are now in the country illegally be deported; and be it further

Resolved, That Congress pass an alien deportation bill and that sufficient money be appropriated to make such a law effective, and that the "national origins" provision of the present law be put into effect without any further delay.

ELLWOOD CITY COUNCIL, FRATERNAL PATRIOTIC AMERICANS, NO. 182,

[SEAL.] G. S. MOOK, *Secretary.*

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GLENN:

A bill (S. 4883) granting a pension to Annie Robins (with accompanying papers); to the Committee on Pensions.

By Mr. NEELY:

A bill (S. 4884) granting an increase of pension to Melissa F. Morris; to the Committee on Pensions.

By Mr. DENEEN:

A bill (S. 4885) for the relief of Paul D. May; to the Committee on Claims.

A bill (S. 4886) granting a pension to Julius Perkins; and

A bill (S. 4887) granting an increase of pension to Adaline E. Draper; to the Committee on Pensions.

By Mr. THOMAS of Oklahoma:

A bill (S. 4888) providing for the establishment in the Department of State of a board of foreign affairs and a Foreign Service school; to the Committee on Foreign Relations.

By Mr. BRATTON:

A bill (S. 4889) to provide for the erection and operation of public bathhouses at Hot Springs, N. Mex.; to the Committee on Public Lands and Surveys.

A bill (S. 4890) authorizing the Secretary of the Treasury to pay the Gallup Undertaking Co. for burial of four Navajo Indians; to the Committee on Indian Affairs.

By Mr. METCALF:

A bill (S. 4891) granting an increase of pension to Ella Reynolds (with accompanying papers); to the Committee on Pensions.

A bill (S. 4892) granting an increase of pension to Ellen F. Richards (with accompanying papers); to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 4893) granting a pension to Clara Belle Mathews (with accompanying papers); to the Committee on Pensions.

By Mr. REED of Pennsylvania:

A joint resolution (S. J. Res. 177) for the appointment of a joint committee of the Senate and House of Representatives to investigate the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service; to the Committee on Rules.

AMENDMENT TO PORTO RICAN RELIEF RESOLUTION—STRICKEN AREAS OF SOUTHEASTERN UNITED STATES

Mr. SMITH submitted an amendment intended to be proposed by him to the joint resolution (S. J. Res. 172) for the relief of Porto Rico, which was ordered to lie on the table and to be printed.

AMENDMENTS TO BOULDER DAM BILL

Mr. HAYDEN submitted two amendments, and Mr. KING and Mr. PITTMAN each submitted three amendments, intended to be proposed by them to House bill 5773, the so-called Boulder Canyon Dam bill, which were severally ordered to lie on the table and to be printed.

PRISON-MADE GOODS

Mr. HAWES and Mr. STEPHENS each submitted two amendments intended to be proposed by them to the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases, which were severally ordered to lie on the table and to be printed.

AMENDMENT TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. ODDIE submitted an amendment intended to be proposed by him to House bill 15089, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

Insert at the proper place in the bill, under the Bureau of Reclamation, the following:

"That such portion as may be necessary of the unexpended balance of the appropriation of $50,000 for the survey and examination of water-storage reservoir sites on the headwaters of the Truckee and Carson Rivers, made available under the provisions of the second deficiency act, 1928 (Public, No. 563, Session Laws, 1st sess., 70th Cong., p. 902, Newlands project, Nevada), shall also be available for the boring of test wells in the Truckee Meadows, Washoe County, near the city of Reno, Nev."

ORDER OF BUSINESS

Mr. WARREN. Mr. President, I ask that we may now resume the consideration of House bill 14801, making appropriations for the Treasury and Post Office Departments.

Mr. TRAMMELL. Mr. President, is morning business yet concluded?

The VICE PRESIDENT. Morning business is not yet concluded.

Mr. TRAMMELL. I object, then, to the consideration of the appropriation bill before the morning business is concluded.

The VICE PRESIDENT. If there are no further bills and joint resolutions, the introduction of concurrent or other resolutions is in order.

HOWARD UNIVERSITY

Mr. TRAMMELL. Mr. President, I send to the desk a concurrent resolution and ask for its immediate consideration.

The VICE PRESIDENT. The clerk will read the concurrent resolution.

The Chief Clerk read the concurrent resolution (S. Con. Res. 26), as follows:

Resolved by the Senate (the House of Representatives concurring), That the action of the Speaker of the House of Representatives and the Vice President of the United States in signing the enrolled bill (H. R. 279) to amend section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867, be, and the same is hereby, rescinded.

Mr. SMOOT. Mr. President, in my opinion the concurrent resolution ought to go to a committee.

Mr. TRAMMELL. Mr. President, on yesterday I made a motion to reconsider the vote by which the bill in question (H. R. 279) was passed on Monday. I made that motion within the time required under the rule, but it was necessary also to couple with it a request that the bill be returned from the House. It now develops that the bill had been signed by the Speaker of the House of Representatives and the Vice President.

In view of the fact that I made the motion within the time I was required under the rule to make it, it seems to me that we should have the privilege of having the signatures canceled and the bill returned from the House. I do not think it is advisable to have it delayed because if it is delayed then necessarily the bill would go to the President for his approval.

Mr. SMOOT. It being a concurrent resolution which the Senator has now introduced, it ought to go to a committee. The motion the Senator made yesterday has not been disposed of by the Senate. Therefore it seems to me the pending matter

constitutes a piece of legislation. If the committee want to do so, they can report it out this afternoon.

Mr. TRAMMELL. Mr. President, of course, that would go into the question of the merits of the whole proposition. I am trying to make effective the privilege which a Senator has under the rules, within two days after the passage of a bill, to make a motion that it may be reconsidered. That is the whole question involved—as to whether or not there is merit in having the privilege of making a motion and enjoying the benefits of the rule which provides that a Senator may make such a motion.

Mr. SMOOT. Under the rules, the concurrent resolution ought to be referred to the committee, and I ask that that be done.

The VICE PRESIDENT. The Chair will state that the pending concurrent resolution is not legislation in the sense that it calls for the expenditure of any money, and should, therefore, be referred to a committee.

Mr. SMOOT. If the Senator desires a vote right now, I have no objection to a vote upon the resolution.

The VICE PRESIDENT. It is in order to move a reconsideration of a bill within the time allowed by the rule, and to take the necessary steps to that end.

Mr. SMOOT. I myself think that the concurrent resolution ought to go to a committee, but if the Senator wants a vote I am ready to vote now on the resolution.

Mr. TRAMMELL. I should like to have it disposed of. The bill involved is a very important bill and it passed through the Senate with practically no consideration.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution submitted by the Senator from Florida.

Mr. MOSES. Mr. President, what the Senator says as to the importance of the bill is true; but, as a matter of fact, it has been here for a long time and has been objected to for well-understood reasons from time to time whenever it has come up. The sole purpose of the legislation is to relieve the Senate of a continuance of the farcical proceeding through which we have to go every time the appropriation bill containing the item for Howard University comes to us for consideration.

Mr. SMOOT. Let us have a vote on the resolution.

Mr. FESS. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Ohio will state his parliamentary inquiry.

Mr. FESS. Mr. President, is the pending question a motion to reconsider?

The VICE PRESIDENT. No; the question is on the adoption of the concurrent resolution offered by the Senator from Florida.

Mr. MOSES. Mr. President, I am entirely willing that the concurrent resolution shall be voted upon now. It can not be after the Senate's repeated performances in reference to the legislation involved that it will now take the action which the Senator from Florida demands.

The VICE PRESIDENT. In further reply to the inquiry of the Senator from Ohio, the Chair will state that the concurrent resolution merely authorizes the cancellation of the signatures of the Speaker of the House and the President of the Senate to the enrolled bill.

Mr. FESS. The effect of that would not be to reconsider the vote by which the bill has been passed. I understood the Senator from Florida to enter a motion to reconsider. So if we should adopt the resolution we would still have the motion to reconsider pending.

The VICE PRESIDENT. The next action would be that of the House on the request of the Senate to return the bill.

Mr. SMOOT. We might just as well have a vote now and dispose of it.

Mr. MOSES. That is what I understand the Senator from Florida desires, namely, to have the concurrent resolution acted on.

Mr. TRAMMELL. I entered the motion to reconsider yesterday.

Mr. HEFLIN. Mr. President, I have spoken to a number of Senators about this matter. I do not think as many as six Senators in this body knew what was passing at the time the bill was hurriedly passed. I want to ask the Senate why should this particular institution be singled out and the Congress committed to an appropriation for it from time to time while leaving out other educational institutions in the city of Washington? What is the purpose of it and where is the justification for it? I do not think if Senators had known what was in the bill at the time of its passage that it would have been passed. Why should Congress commit itself in advance to payments to this negro institution for years and years to come? If you are going to appropriate for this particular institution, why not let Congress decide at each session what it will do regarding the matter?

Mr. MOSES. Mr. President, if I may inject the statement, let me say that for 40 years or more each Congress has decided in the affirmative on this proposition, but we always have to go through the farcical proceeding of having the item stricken out in the House of Representatives on a point of order and coming here and being reinserted. The reason has been stated over and over again on the floor of the Senate why this institution receives Government aid. It is because it was, in the first instance, established by the Government, and gradually as the Freedmen's bureau went out of existence the Government took over the charge of the university.

Mr. HEFLIN. Then, the Senator proposes, it seems to me, to tie the hands of Congress in both branches, so that neither one of them or both of them can hereafter prevent an appropriation even if they desire to do so.

Mr. MOSES. No; any Congress which desires to repeal the act which has been passed could do so.

Mr. HEFLIN. I do not like the principle, Mr. President.

Mr. MOSES. And any Congress could withhold the appropriation, because if Congress is authorized to make an appropriation that does not mean that Congress must make it. We know of hundreds of cases in every session of Congress where ample authorization exists but an appropriation is not made.

Mr. HEFLIN. It is a piece of class legislation, singling out a particular institution, showing partiality above all other institutions in the District of Columbia, to this one institution, and it is committing the Congress now for all time hereafter to continue appropriations to this particular institution. It ought not to be done.

Mr. SMOOT. Mr. President, as the Senator from New Hampshire has stated, we have this question up every year on the appropriation bill in which the item for Howard University appears. I should like to have the Senate now express itself upon this question definitely and for all time so far as this matter is concerned. If some other Congress wants to repeal the law, it is just as easy to repeal it as it is to fight over the item every time it comes up.

Mr. TRAMMELL. I desire to say a word further. Howard University is not a public institution; it is a private institution, and was incorporated as a private institution. I do not like the idea of amending the law so as to commit the Congress to making appropriation to a private institution, whether it be Howard University or any other university. That is the reason why I desire to have the bill recalled and considered upon its merits. I would appreciate the opportunity of having the resolution considered at the present time.

Mr. BLEASE. Mr. President, I was in the Chamber when this bill was passed, and I knew exactly what was being done. I have on several occasions heretofore objected to the passage of the appropriation when it was reached, but this Congress and other Congresses have, regardless of the Constitution and regardless of whether it was right or wrong, by a considerable majority, voted to include the item in appropriation bills. When it has been objected to in the House and has been objected to in the Senate, the conference committee has replaced it and brought it back and the report has been adopted.

My opinion is that the people of this Nation just a few weeks ago indorsed the Republican Party very whole-heartedly. This has been a part of the Republican Party's policy and administration in the past. The people have indorsed that party, and I hope its action in this matter will stand. However, I shall vote for the reconsideration as that courtesy is due the Senator from Florida.

Mr. BRUCE. Mr. President, I desire to say that I for one fully understood the intent and purpose of this measure when it was passed by the Senate. I think that there ought to be some university in this country to which promising young colored men may go and without any social discrimination, obtain the requisite degree of professional training as lawyers, as doctors, and as dentists. The Howard University is such an institution, and, therefore, I trust that this bill will be enacted into law, and that the motion of the Senator from Florida will not prevail.

Mr. HEFLIN. Mr. President, there is an institution in this city known as the American University. White boys are working their way through college there; they are doing all manner of work in the District of Columbia in order that they may get degrees in law and in other professions. Does the Senator from Maryland want to discriminate against those white boys in favor of the negroes who are attending school at the Howard University? That is exactly what this measure does. There is no recognition of the American University for white boys, but the Senate is singling out this particular institution for its special favor.

Mr. BRUCE. Mr. President, will the Senator yield?

Mr. HEFLIN. I yield to the Senator from Maryland.

Mr. BRUCE. Then, why does not the Senator offer an amendment including to some extent the other institutions which he has in mind?

Mr. HEFLIN. I prefer that we have an opportunity to work this matter out, take it before the Committee on Education, and prepare a general plan for the District of Columbia, rather than to pick out one institution for special favors of the Congress. I hope the motion of the Senator from Florida will prevail.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution submitted by the Senator from Florida.

Mr. MOSES and Mr. WATSON asked for the yeas and nays.

The yeas and nays were ordered.

Mr. BINGHAM. Let the concurrent resolution be read.

The VICE PRESIDENT. The clerk will read, as requested.

The Chief Clerk read the concurrent resolution (S. Con. Res. 26) submitted by Mr. TRAMMELL on December 13, 1928, as follows:

Resolved by the Senate (the House of Representatives concurring), That the action of the Speaker of the House of Representatives and the Vice President of the United States in signing the enrolled bill (H. R. 279) to amend section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867, be, and the same is hereby, rescinded.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution. On that question the yeas and nays have been ordered. The roll will be called.

The Chief Clerk proceeded to call the roll.

Mr. KING (when his name was called). I have a pair upon this vote with the senior Senator from South Dakota [Mr. NORBECK], and therefore withhold my vote.

The roll call was concluded.

Mr. FESS. On this question I have a pair with the Senator from Maryland [Mr. TYDINGS]. I transfer that pair to the Senator from Massachusetts [Mr. GILLETT] and will let my vote stand.

Mr. MOSES (after having voted in the negative). I have a general pair with the junior Senator from Louisiana [Mr. BROUSSARD]. He being absent, I transfer that pair to the senior Senator from Vermont [Mr. GREENE] and will permit my vote to stand.

Mr. McMASTER. I desire to announce that my colleague the senior Senator from South Dakota [Mr. NORBECK] is unavoidably absent. If present, he would vote "nay."

Mr. BAYARD (after having voted in the negative). Has the Senator from Pennsylvania [Mr. REED] voted?

The VICE PRESIDENT. That Senator has not voted.

Mr. BAYARD. I have a pair with the Senator from Pennsylvania. In his absence, I withdraw my vote.

Mr. JONES. I desire to announce that the Senator from Pennsylvania [Mr. REED] is detained on official business. If present, he would vote "nay."

Mr. WAGNER. I desire to announce that my colleague [Mr. COPELAND] is detained by illness in his family.

Mr. SHEPPARD. I wish to announce that my colleague [Mr. MAYFIELD] is detained by illness.

Mr. HARRISON. I desire to announce that the Senator from Missouri [Mr. REED], the Senator from Arkansas [Mr. ROBINSON], the Senator from Louisiana [Mr. BROUSSARD], and the Senator from Virginia [Mr. SWANSON] are detained on official business.

The result was announced—yeas 14, nays 54, as follows:

YEAS—14

Black	George	Overman	Stephens
Blease	Harris	Sheppard	Trammell
Bratton	Harrison	Simmons	
Fletcher	Heflin	Smith	

NAYS—54

Ashurst	Frazier	Metcalf	Steiwer
Barkley	Glenn	Moses	Thomas, Idaho
Bingham	Goff	Neely	Thomas, Okla.
Blaine	Gould	Nye	Tyson
Brookhart	Hale	Oddie	Vandenberg
Bruce	Hawes	Phipps	Wagner
Capper	Jones	Pine	Walsh, Mass.
Caraway	Kendrick	Ransdell	Walsh, Mont.
Couzens	Keyes	Robinson, Ind.	Warren
Curtis	La Follette	Sackett	Waterman
Deneen	Locher	Schall	Watson
Dill	McKellar	Shortridge	Wheeler
Edge	McMaster	Smoot	
Fess	McNary	Steck	

NOT VOTING—27

Bayard	Gillett	King	Reed, Mo.
Borah	Glass	Larrazolo	Reed, Pa.
Broussard	Greene	McLean	Robinson, Ark.
Copeland	Hastings	Mayfield	Shipstead
Dale	Hayden	Norbeck	Swanson
Edwards	Howell	Norris	Tydings
Gerry	Johnson	Pittman	

So the concurrent resolution was rejected.

ADDRESS BY SENATOR JOHN J. BLAINE ON FEDERAL INJUNCTIONS

Mr. WHEELER. Mr. President, I ask unanimous consent to insert in the RECORD a speech delivered by the junior Senator from Wisconsin [Mr. BLAINE] at Plankinton Hall Auditorium, Milwaukee, Wis., Friday night, November 16, 1928, on the subject of Federal injunctions.

The VICE PRESIDENT. Without objection, it is so ordered. The matter referred to is here printed, as follows:

FEDERAL INJUNCTIONS

I have been invited on this occasion to address you on the subject of injunctions in labor disputes from the standpoint of what ought to be the public policy within the legislative domain.

The occasion that gives rise to the invitation extended me no doubt grows out of the fact that I am a member of the subcommittee of the Senate Judiciary Committee having under consideration and investigation this subject. I have sat for weeks on the hearings at Washington, and as the facts at those hearings developed there grew upon me the conviction that we are fast approaching a menacing system of government—government by injunction instead of government by law.

In the so-called courts of equity, or, rather, through the procedure within the equity jurisdiction of the courts, there has developed what has so well been termed "discretionary government by the judiciary." This discretionary power naturally grows, for when men are given discretionary power it is in the very nature of things that they seek more power.

Thus the discretionary power in the equity courts has been constantly extended until to-day it is invading the domain of government by law and until practically all men and women who work must live under a government by discretion, and without the protection of the law and the Constitution that hedges about the constitutional liberties of other classes of individuals.

These observations, however, in no way imply that the fault is with the judiciary alone. The substantive law of the land must come from the legislative branch. That department of government determines the public policy, and the responsibility for the enactment of laws or the failure to enact laws is a legislative responsibility.

The growing menace of government by injunction, or discretionary government by men must be laid to the door of the legislative branch of Government as well as to that of the judicial branch of Government.

Men in exercising discretion may act wisely or they may do a grave injustice, for after all, whatever the act may be, it is an act flowing from discretion. Therefore, if courts continue to extend the use of this discretionary power, it will be because the legislative branch of Government has failed to circumscribe and limit this discretionary power, called equity power.

It is said that this is a Government of checks and balances, and when the judiciary undertakes to abuse its discretionary power, such abuse should be challenged in the legislative halls of our Government until men and women shall be governed by law, and whose rights and liberties shall not depend upon the discretion of a single individual.

A government by a king is a government by individual discretion. It may be by a benevolent king or a despotic king. That theory of government was rejected on the birth of this Republic.

The injunctive process does not involve a question of excessive use of injunctions. The question involved, as I see it, is the existing evils of injunctions. It is not a question of numbers, it is a question of the character of injunctions. It is that question that the legislative branch of our Government is called upon to solve.

The hearings before our committee led to the inevitable conclusion that there is growing up in the United States, in the Federal judiciary, the theory that a human being, sitting upon the bench under life appointment, may take unto himself, if, in fact, it has not been granted to him by legislation, through the injunctive process, power to enforce criminal laws; powers that set aside the constitutional guaranties of free speech, free assembly, and trial by jury; power to control the lives and destiny of millions of working men and women, without giving them any adequate remedy at law. If this power is not restricted, and if the practice now prevalent in the Federal judiciary longer prevails, there will be brought about a judicial tyranny, grave and dangerous in its consequences.

Therefore the major political parties in the recent campaign have promised legislative action to correct existing abuses and to restore the structure of our Government to its foundation, into which was built the Declaration of Independence and the Constitution of these United States. To that task the legislative branch of Government is pledged.

It has been the consensus of opinion in this country that there should be legislative action. Congress is now applying itself to the solution of these problems. The Senate Judiciary Committee selected a subcommittee which had under investigation a solution at the last session of Congress. That committee has prepared a tentative bill.

The reasons that have given rise to the demand for a solution of the problems I have, in general terms and without specific reference to any case, outlined. I will now proceed to analyze the remedy proposed.

It is impossible to discuss within the limits of the time allotted me the proposed bill in any great detail. The committee has not attempted to destroy the judicial power to grant injunctive relief in labor dis-

putes, for two reasons: First, because if relief against wrong in one class of cases is withheld and relief against the same wrong in another class of cases is permitted, the legislative act would be unconstitutional and therefore futile. Second, it must be understood that there is an infinite variety of wrongs that may be done and irreparable injuries committed with respect to which injunctive relief may be the only adequate remedy.

In considering legislative and judicial reform we must take note of the revolution in industry that has taken place in less than a quarter of a century. Great combinations of capital are thrown together, combined under a corporate entity which has destroyed the last vestige of association of the workman with his employer. In the larger industrial plants the workman seldom ever goes by name, and is known only by a number. There is no intimate relationship between the workman and his employer in the vast multitude of cases.

The corporation by whom he is employed is often owned by stockholders who are absentees, many hundreds of miles distant from the industry, and who do not know the workmen nor do the workmen know them. The machine has further complicated the industrial world. The individual workman, therefore, no longer occupies a position of equal opportunity with his new employer, the soulless corporation.

There are other elements which I have not time to discuss which have changed the relationship between employee and employer, and all of which make the struggle an unequal one, with the overwhelming balance against the workman.

Therefore in the application of the so-called equity power, embracing the injunctive process, there is reasonable ground for classification where limitations upon the judicial power may be imposed, and such classification will find justification in the social and economic aspects of this industrial age.

The committee, having that classification in view, proposes to divide its tentative bill into two parts: First, the declaration of public policy, and second, injunctive procedural reform. The bill is not a complete labor code. It does not set forth all of the laws applicable to injunctions in labor disputes. It does not repeal the labor section of the Clayton Act, but merely supplements these provisions and clarifies the intent of Congress.

It is drawn upon the theory that Congress has authority to define and limit the jurisdiction of the Federal courts, other than the original jurisdiction conferred by the Constitution upon the Supreme Court. All inferior courts are creatures of the law, and it is within the power of Congress to prescribe their jurisdiction. The proposed bill limits this jurisdiction both with reference to the situations in which injunctions may be issued and the procedure which must be followed.

The bill recognizes that under "prevailing economic conditions developed with the aid of governmental authority for owners of property to organize in the corporate and other forms of ownership association, the individual, unorganized worker is commonly helpless to exercise actual liberty of contract and to protect his freedom of labor and thereby obtain acceptable terms and conditions of employment." That economic condition is a fact and, in my opinion, will be recognized by the courts as a fact.

To assure the workman an equality of opportunity the bill declares that the public policy of the United States is to grant to workmen full freedom of association, self-organization, and designation of representatives of his own choosing to negotiate terms and conditions of employment; and it further provides that he shall be free from the interference, restraint, or coercion of his employers or their agents, and under such freedom he may exercise the power of collective bargaining for mutual aid and protection.

To make that right something more than mere lip service and a mere abstract right as heretofore "yellow-dog contracts" are outlawed. One of the gravest abuses existing to-day in industrial relations, and one that has the most alarming development, is the so-called "American plan" of organization of workmen, which is nothing more or less than the employer's organization. The question is not one of the open shop, necessarily, but under the "American plan" employers may dictate every phase of the life of their employees and enforce the "yellow-dog contract" through injunctive process. As I said, the bill outlaws the "yellow-dog contract" and makes effective in actual practice the doctrine laid down by the Chief Justice of the United States in the American Steel Foundries case.

While it may be impossible for Congress to absolutely prohibit "yellow-dog contracts," what the committee proposes to do and which Congress has the power to do is to provide that such contracts shall not be enforcible, nor shall they afford any basis for the granting of legal or equitable relief.

You know what the "yellow-dog contract" is. It is a contract which prohibits the workingman from joining or becoming or remaining a member of any labor organization. It is a contract which, when once executed, in effect entirely destroys every vestige of freedom of association.

Under section 4 of the bill the general scope of said section provides that in cases involving and growing out of labor disputes no person or persons participating and interested in such dispute shall be enjoined from striking or from making strikes effective by methods not involving fraud or violence.

It also prohibits interference with labor unions in supporting strikes, again by methods free from fraud or violence. It does not provide that the acts enumerated are always lawful, but only that these acts shall not be prohibited by injunction. It is a limitation upon the use of injunctions in labor disputes to prevent such orders from being used to prohibit or cripple strikes in cases in which there is a bona fide dispute in which the participants have an economic interest, direct or indirect.

The right to strike is a necessary part of the freedom of association and self-organization. The right to strike is often the only way labor has of making effective the rights declared in the bill. No responsible labor leader advocates resort to strikes when other methods of gaining labor ends will prove effective; but in the last analysis working people must be free to strike or their freedom of association and self-organization is meaningless.

The section expressly permits collective action in the payment of strike benefits, unemployment insurance; permitting union members to aid other members, individually or collectively, in protecting their rights in the courts.

The proposed bill also permits the workmen to give publicity to strikes and to use persuasion and peaceful picketing. The right of peaceful assembly, the right to give notice of a contemplated strike, and the right of labor unions and officers and agents to give advice, to call a strike, and to support a strike, individually or collectively, are protected.

In the exercise of these rights no injunctive process can be used to defeat the workingman in these rights.

Most complaints in labor injunction cases are drawn upon the theory that the defendants have conspired to injure the property of the complainants or to restrain interstate commerce, or for some other unlawful purpose. While in the orders issued by the courts this conspiracy theory does not figure in every case, it is resorted to for the purpose of justifying sweeping injunctions and to give the Federal courts jurisdiction in those cases where there is no diversity of citizenship.

Conspiracy, as alleged in such cases, is a mere fiction. The individuals, acting as individuals, may follow a certain course, perfectly proper, involving neither fraud nor violence, and yet, if two or more persons do the same thing a conspiracy is alleged.

To prevent the use of the conspiracy theory, section 5 of the bill prohibits the Federal court from granting an injunction where workmen in concert perform the same acts that individuals may rightfully do; for example, an individual workman may pay toward strike benefits. No one can say that it is wrong to contribute money to the support of a fellow man who is out of employment. Therefore the law should say there is nothing wrong in two or more persons, in concert, paying aid toward the support of their fellow men who may be in distress.

Another very important provision, and a very necessary provision, is to extend the law of agency in labor cases. It is unjust to hold all members of a union responsible for every conceivable act of its officers and other members, merely because of membership in a union. It is also unjust to hold the officers responsible for everything that occurs during a strike, merely because they have general charge and direction. It is to estop abuses of this kind that an attempt is here made to apply the well-recognized rules of the law of agency to labor cases.

Turning now to procedural reform, the bill provides that no Federal court shall issue an injunction in labor disputes except after hearing the testimony of witnesses in open court with opportunity for cross-examination. Under the present practice, complainants go before a Federal judge, and upon the complaint and affidavits, at chambers—sometimes at the judge's home—obtain a temporary order, without any opportunity for cross-examination or defense. Under the bill, before a temporary restraining order may issue the court, from such public hearing and testimony, must find that unlawful acts have been committed and will be continued unless restrained, that substantial and irreparable injury to complainant's property will follow, that complainant has no adequate remedy at law, and then two other important findings, namely, that the public officers charged with the duty to protect complainant's property are unable or unwilling to furnish adequate protection, and these public officers must have an opportunity to appear before the Federal judge. The other proposition is comparative relief, and complainant must show that greater injury will be inflicted upon him by the denial of relief than will be inflicted upon defendants by the granting of relief.

This hearing can not be held until after due and personal notice has been given to all persons against whom relief is sought and to all public officers charged with a duty to preserve the peace.

It is provided, however, that a temporary restraining order may issue without notice in cases where substantial and irreparable injury will be unavoidable, but such temporary restraining order must be supported by testimony under oath that would justify the courts in issuing a temporary injunction upon a hearing. Such temporary restraining order, however, shall be effective no longer than five days, and thereafter void.

Under the present practice a temporary restraining order may be issued upon affidavits, without full hearing, and the merits of such order may not actually be determined for many months, long after the

occasion for the order has ceased. But under the provision of the proposed bill a temporary restraining order expires at the end of five days. It can not be renewed.

Moreover, no restraining order or injunctional relief can be granted unless the complainant comes into court with clean hands, showing that he has complied with all obligations imposed by law, and that he has made every reasonable effort to settle the dispute, either by negotiation or through available governmental machinery of mediation or arbitration.

Whenever a temporary restraining order or temporary injunction is issued, the court must make a finding of fact and file its finding prior to the issuance of such order or injunction.

Whenever a Federal court has entered judgment granting or denying a temporary injunction, the court shall, upon the request of any party to the proceedings, forthwith certify the entire record of the case, including a transcript of the evidence taken, to the Circuit Court of Appeals for its review. The Circuit Court of Appeals must give precedence to that case over all other matters except older matters of the same character. That provision will hasten final judgment and prevent the interminable delays under the present procedure.

The bill guarantees to every person accused of an indirect criminal contempt for violation of a restraining order or injunction the right to a speedy and public trial by an impartial jury, the exception being as to contempts committed in the presence of the court or so near thereto as to interfere with the administration of justice, or as to misbehavior, etc., of officers of the court.

The bill includes other technical matters with reference to definitions, etc., which I shall not discuss.

As I see this proposition, the bill, if enacted into law, will prevent the abuse of the injunctional process, whether that abuse comes through the misguided discretion of Federal judges or through the past failure of Congress to enact proper laws.

There is one grave omission in the bill. I shall call your attention to that omission and also the committee's attention to that omission.

I am sure there will be a unanimity of opinion that the law respecting punishment for contempt should be modified. Under our Federal judicial code, where a person has been found guilty of a contempt, judgment shall be entered prescribing the punishment, either by fine or imprisonment or both. The law presently provides: "Such fine shall be paid to the United States or to the complainant * * * but in no case shall the fine to be paid to the United States exceed, in case the accused is a natural person, the sum of $1,000, nor shall imprisonment exceed the term of six months."

You will note that where the fine is to be paid to the United States, the maximum fine is $1,000 and the maximum term of imprisonment is six months. Where the fine is to be paid to the complainant there is no limit upon the amount of the fine nor is there a limit upon the term of imprisonment.

In other words, under the present law, if the dignity of the court is violated, if there is willful, contemptuous conduct with respect to the authority and dignity of the court, if an arm of Government, in its governmental capacity, is held up to ridicule and disrespect, and if that arm of Government is paralyzed through force and coercion or intimidation, then the offender can be punished with a fine of not exceeding $1,000 or imprisonment not exceeding six months. That is one side of this peculiar law. Now let us look at the other side of it.

If a private complainant has obtained an injunction prohibiting picketing, we will say, within certain circumscribed area or prohibiting grimaces at strike breakers or poking fun at the family of strike breakers or calling such strike breakers "scabs," then the law permits a court to assess a fine without limit and to impose a prison sentence without limit or to prescribe both a fine and imprisonment without limit, in the discretion of the court.

The mere statement of the facts is sufficient condemnation of the present law. That part of the judicial code should be amended. In my opinion, the right of a court to impose a fine payable to the complainant, as provided under the present judicial code, should be repealed.

If any damage is done to a complainant, he has an adequate remedy at law, and he should be required to pursue that remedy as all other persons, under all other circumstances, are now restricted to the remedy at law.

Therefore it is not that the court is to blame in the exercise of the power conferred by law where the law is wrong in conferring such power. Whether a judge has abused the exercise of that power or abused his discretion becomes a debatable question in each particular case. There should be no such power in any case and then there would be no debatable question.

The bill which I have discussed may not be a perfect bill. It may not accomplish all that is claimed for it, but if that bill, with the suggested amendment and some other minor amendments relating to formal, technical matters, becomes a law, in my opinion it will effectually strip the Federal courts of their power to misuse and abuse the injunctional process in labor disputes.

APPROPRIATIONS FOR THE TREASURY AND POST OFFICE DEPARTMENTS

The VICE PRESIDENT. The morning business is closed.

Mr. WARREN. Mr. President, I ask that the appropriation bill be taken up, and that the item under discussion when we adjourned yesterday be laid aside for the present.

The VICE PRESIDENT. Is there objection to the request of the Senator from Wyoming?

Mr. McKELLAR. Mr. President, what is the request?

The VICE PRESIDENT. The Senator from Wyoming asks unanimous consent to take up the appropriation bill, and that the item under discussion at the end of the session of yesterday be temporarily laid aside.

Mr. DILL. Why lay it aside? Why not decide the matter now?

Mr. McKELLAR. I hope the Senator from Washington will defer the matter for the present. Just let it be laid aside.

Mr. DILL. I do not want this item to be brought up at some later time without notice to Senators.

Mr. McKELLAR. I assure the Senator that it will not be. I assure him that there will be a roll call.

Mr. SMOOT. If the Senator desires, I will assure him that before any action is taken on it he or his office will be notified.

Mr. DILL. I think the Senate ought to be notified by a quorum call if it is going to be laid aside.

Mr. WARREN. The chairman of the committee, of course, would much prefer an immediate vote, but in order to get along with the bill I have asked consent to lay aside that particular matter; and it is not proposed to take it up in the absence of Senators without proper quorum call to bring about their presence.

Mr. DILL. May I have the assurance that Senators will be notified by a quorum call when the item is taken up?

Mr. SMOOT. Yes; that will be done if the action taken in regard to it is not satisfactory to the Senator.

The VICE PRESIDENT. Is there objection to the request of the Senator from Wyoming? The Chair hears none.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes.

Mr. WARREN. I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 2, line 14, after the word "act," it is proposed to insert "as amended," so that it will read:

compensation rates specified for the grade by such act as amended, and in grades in which only position is allocated—

And so forth.

Mr. McKELLAR. May I ask the chairman of the committee whether that is a committee amendment?

Mr. WARREN. I prefer that the Senator look at it. It amounts to nothing except that it includes the act as amended; that is all.

Mr. McKELLAR. May the proposed amendment be stated again?

The VICE PRESIDENT. The amendment will be restated.

The CHIEF CLERK. On page 2, line 14, after the word "act," it is proposed to insert the words "as amended."

Mr. McKELLAR. That is all right.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Wyoming.

The amendment was agreed to.

THE COTTON CROP

Mr. HEFLIN. Mr. President, a few days ago, when the Government's estimate of this year's cotton crop was made public, I wired to the commissioners of agriculture of the various cotton-growing States to give me their opinion as to the number of bales remaining to be ginned in their respective States. I was of the opinion that the Government's estimate was too large, and the Senators from the cotton-growing States with whom I talked agreed with my position in the matter. I wired the commissioners, and the telegrams that I have received from the commissioners of agriculture in the cotton-growing States show that the Government's estimate of the 1928 cotton crop is too large by at least 500,000 bales. The Government's estimate placed the number of bales of this year's crop at 14,373,000 bales. The Government's gin report of cotton ginned prior to December 1 was 12,561,000 bales. In order for this cotton crop to reach the Government's estimate of 14,373,000 bales it would necessitate the ginning of 1,812,000 bales after December 1 to the end of the season. Everybody familiar with cotton production knows that cotton is matured and practically all of it gath-

ered and ginned before December 1. And this year more nearly than any other year recently the cotton crop was nearly all gathered and ginned by December 1. The boll weevil did a great deal of damage in some States, and in some others the wet weather caused a vast number of cotton bolls to rot; and on top of that there was no top crop this year.

The average number of bales ginned after December 1 for the last eight years is 1,576,000 bales, and the number of bales ginned last year after December 1 was 1,044,000 bales; and, I repeat, that in order to reach the Government's estimate it would be necessary to gin after December 1 this year 1,812,000 bales. And, Mr. President, the cotton is not there to be ginned. I have received telegrams from the commissioners of agriculture in the following cotton-growing States, giving, in their opinion, the amount of cotton remaining to be ginned after December 1 this year:

Alabama	46,000
Arkansas	None.
Florida	None.
Georgia	40,000
Mississippi	126,000
North Carolina	100,000
South Carolina	40,000
Louisiana	12,000
Oklahoma	230,000
Texas	500,000
Total	1,094,000

If we should allow 100,000 for Arkansas—and I do not think there will be half that much there remaining to be ginned—the total will be 1,194,000 bales.

The total amount remaining to be ginned, according to the opinion of these commissioners in the cotton-growing States, is 1,194,000 bales, allowing 100,000 bales for Arkansas. That is 718,000 bales less than the Government's estimate of cotton remaining to be ginned after December 1.

Mr. President, I contend, as do hundreds and thousands of others in the cotton-growing States, that the Government estimate is too large by at least half million bales, and I believe that the final gin reports will justify this contention.

Mr. President, I wanted to put these facts in the RECORD, and I want to read in that connection a statement from the Government regarding the production of cotton all over the world in 1927 and the consumption of cotton in the world for 1927 and up to August 1, 1928. I do that because when the Government's estimate of the cotton crop was made public it broke the price of cotton about four or five dollars a bale. There was no occasion on earth for it, because the statistical position of cotton justified an advance in price.

I will read the Government's statement:

The estimated world production of commercial cotton, exclusive of linters, grown in 1927, as compiled from various sources, is 23,370,000 bales, counting American in running bales and foreign bales of 478 pounds, while the consumption of cotton, exclusive of linters, in the United States for the year ending July 31, 1928, was approximately 25,285,000 bales.

APPROPRIATIONS FOR THE TREASURY AND POST OFFICE DEPARTMENTS

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 14801), making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes.

The PRESIDENT pro tempore. The clerk will report the next amendment of the Committee on Appropriations.

The next amendment of the committee was, on page 13, line 8, in the items for the Bureau of the Budget, after the word "Director," to strike out "$10,000" and to insert in lieu thereof "$12,000."

Mr. McKELLAR. I understand that goes over.

The PRESIDENT pro tempore. The Chair understands that this amendment is to be passed over, as is also the second amendment on the same page, line 15, where in the total the committee proposes to strike out "$171,000" and insert in lieu thereof "$173,000."

The reading of the bill was continued.

The next amendment was, under the subhead "Office of Treasurer of the United States," on page 15, at the end of line 4, to strike out "$1,170,000" and insert "$1,176,000," so as to read:

Salaries: For Treasurer of the United States, Assistant Treasurer, and for other personal services in the District of Columbia, $1,176,000.

The amendment was agreed to.

Mr. BLEASE. Mr. President, I desire to offer an amendment.

The PRESIDENT pro tempore. Is it an amendment to a committee amendment?

Mr. BLEASE. No; it is an amendment to the section itself.

The PRESIDENT pro tempore. That can not be considered under the unanimous-consent agreement until the committee amendments have been agreed to.

Mr. BLEASE. Then I move to strike out the entire section under the head of "Federal farm loan bureau."

Mr. McKELLAR. On what page is that?

Mr. BLEASE. Page 14.

The PRESIDENT pro tempore. That amendment will not be in order until the committee amendments have all been disposed of.

Mr. BLEASE. My motion is to strike out the entitre section under the head of "Federal farm loan bureau."

The PRESIDENT pro tempore. The Chair can not permit the Senator's motion to be entertained under the unanimous-consent agreement already entered into.

Mr. BLEASE. That motion can be entertained, and I make that motion. I move to strike out the whole section.

The PRESIDENT pro tempore. Of course, the Senator can be heard, but the Chair can not entertain his motion under the unanimous-consent agreement.

Mr. BLEASE. Then, Mr. President, I will be heard awhile.

At the last session of Congress I introduced a resolution in the Senate asking that the Federal Farm Loan Bank at Columbia, S. C., be investigated. I went before the Committee on Banking and Currency, and there was a person there said to be Mr. Eugene Meyer. I left the committee room because I saw very plainly that I was not going to receive the proper consideration, as I considered it, from the members of the committee present. I then came upon the floor of the Senate and insisted upon an investigation of the Farm Loan Bank at Columbia, S. C.

I know that Mr. Arnold, the man who is at the head of that bank, was sent from the Atlanta (Ga.) penitentiary, in some position, to Columbia, S. C., to that bank. Two years ago, when the losses which have since been found to exist in that bank were made known, Arnold came to Washington, went before the Federal board, and acknowledged the losses, said that there were other losses yet to come, and stated that he did not want anyone else to blame for it, that it was entirely his fault.

The board endeavored to get him a first-class banker to help him in his work. He absolutely refused to do so, and tendered his resignation. The board saw that to accept his resignation would lead to a conflict which would not be beneficial to the Government interests, between the board and the directors of that bank. Consequently the board gave in.

Arnold passed personally on the different claims coming into his bank for loans, declined to consult anybody, and made loans on property which was perfectly worthless, and declined loans in several instances which would have been perfectly secure, and by which no loss could have come to the Government.

Arnold had had no banking experience up to the time he was put into that position, knew absolutely nothing about the details of running a bank, but was simply stubborn, even in his dealings with the Federal Farm Loan Board.

I am informed that no one around the bank could get along with him unless he simply bowed to his arbitrary rule and manner.

That information came from a member of the Federal Farm Loan Board, for whom I asked the committee to send, and to let testify before them, but which they did not do.

Mr. President, the committee made a report, and the resolution is now on the calendar, No. 1165. In their report they made statements which on examination have proved to be absolutely incorrect.

When I saw that I could not get this examination made, and when the farmers of my State were being deliberately robbed by the Government of the United States through its agents, a set of men calling themselves experts and bookkeepers, and three secret-service men, were sent to Columbia, S. C., and went into the examination of these banks.

The head of that detective agency, I am told, the chief man now making the investigation, is a Mr. Thomas, whose headquarters are at Charlotte, N. C. I want to state facts. I want the Senate to know the facts. That is why I call these men's names.

I am reliably informed that they have discovered millions of dollars of losses. I am reliably informed that there was one mortgage actually accepted that was given on the big road that belonged to the State of South Carolina, and still belongs to them, included in the boundary in order to make out the acreage necessary to get the money.

Without any investigation, without properly looking into the matter, this man loaned the bank's money indiscriminately to friends, pets, favorites. Then the Committee on Banking and Currency reported. This man, Meyer, who, I knew by his

conduct before that committee, was a tyrant, and who, I knew, did not know what he was talking about, appeared before the committee. I had information in my possession then that the statements made by Meyer before the committee were absolutely false. If he did know the condition, he attempted to falsify the record; if he did not know it, he is too ignorant to be a member of this board. He should have known it.

The committee make other statements in this report which I do not care to take up the time to read.

Mr. WHEELER. To what Meyer has the Senator reference?

Mr. BLEASE. They told me his name was Eugene Meyer. I have seen him but once, but they told me who he was. I do not know whether that is his name or not. I know that if you can judge by a man's general make-up and appearance, that man has no business dealing with money matters at all. I do not know whether he could discriminate between another man's money and his or not, if he were handling both.

The investigation was refused. After one of the cashiers had gone into court and plead guilty and had gone to the penitentiary—and he is there now, in Atlanta; after another one in a branch bank in Columbia committed suicide; and after some other transactions were made known here, then somebody decided that they would send down and investigate this bank.

Any board that runs its business as the record shows this board looked after the affairs of that bank in Columbia, and its subsidiary, is not fit to be in office. I do not know who composes the board.

When I came into the Senate and asked the Senate, on behalf of the farmers of my State, to make that investigation, this committee not only refused to recommend that it be made but they came here with a report disapproving it. Then, after this rascality and fraud were uncovered, now investigators are down there. If you do not believe it, wire to Columbia and ask if there are bookkeepers and experts and Secret Service men right there at this time in these two banks investigating just what I asked the Senate to investigate a year ago.

I am not surprised at the conditions.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. BLEASE. I yield.

Mr. WHEELER. Most of this took place, however, before Eugene Meyer came on the board, did it not?

Mr. BLEASE. I hope so. I would not like to know that he is what I think he is. If he did, I would have a better opinion of him than I have. I have a poor one of him now, publicly expressed and privately thought. I know he came before that committee and prevented this investigation.

Mr. President, when that banking law was up for discussion I was not a Member of the Senate, but I held a position in my State. I made the statement then, which is in writing and in print, that that law would be used so as to be a detriment to the farmers of my State, just as all other such like laws of the National Government along this line are—for the benefit of favorites—and that the banks which received the money would lend it in their respective communities to their favorites and friends. Just as I predicted then, the investigation to-day has shown to be the fact beyond a doubt.

I have made this motion. Of course, I realize that the Senate is not going to strike this section out. I realize that the amendment which I am going to offer probably will not be adopted. It is an amendment to give relief to the poor people whose property is being sold under mortgages to-day, whose wives and children are being turned out into the road. I want to know what the Government is going to do about it; who is going to occupy these lands? These people, as my colleague said here yesterday—and he did not overdraw the picture one word—are not able to pay these mortgages. They could not pay them. If they were going to be beheaded in 10 days or pay these debts, they could not pay them unless some friend would come to their rescue.

The Government has put a good deal of this land on the block, and there is more to follow. They bid it in, and the Government is becoming a large landholder in my State. Who is going to occupy it, and what are they going to do with it?

I take the position that if these people were encouraged, if they were given more time until their crops could be harvested, they would be able to take care of the situation. But some one says, "Oh, yes; if they made a big cotton crop, but that is too uncertain." In the upper part of the State of South Carolina they ask no favors of anybody, but in the storm-stricken section, of which my colleague, the senior Senator from South Carolina [Mr. SMITH] spoke on yesterday, the people can not help themselves. It is a fact that they are selling everything on their farms that they can get their hands on that is salable to buy meat and bread. Some of them are going so far as to have to kill the last chicken on their farms in order to get meat to eat. Some of the people in that part of the State will go to bed to-night, as children went to bed last night, without sufficient food.

Mr. WHEELER. Are they enjoying the Coolidge prosperity?

Mr. BLEASE. Yes; they are enjoying the Coolidge prosperity very much, and I suppose the Senator has noticed by their votes that they did not appreciate the Hoover chocolates.

Mr. President, I say that if this land bank is in the condition which will be shown by the Government's report itself, it is not right to push these people to the wall and sell their property and turn them out in the streets and let the land lie idle because there is no one to use it.

Mr. CARAWAY. Mr. President, may I ask the Senator from South Carolina a question?

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Arkansas?

Mr. BLEASE. I yield.

Mr. CARAWAY. Has the Senator a resolution for an investigation?

Mr. BLEASE. I did have, but I did not get very far with it and I did not get anything out of it.

Mr. CARAWAY. Has he introduced it again?

Mr. BLEASE. No. I am now trying to get something to help my farmers.

Mr. CARAWAY. The whole system, it strikes me, might very well be inquired into.

Mr. BLEASE. I thank the Senator for the suggestion. I think so myself, especially if Eugene Meyer is going to stay on the board.

Mr. CARAWAY. I know that the situation with reference to the farm land bank in St. Louis is such that it is becoming absolutely impossible for some communities to do business with it at all. I would be very glad to see the entire system inquired into to find out if it is not possible to make it serve the farmers instead of serving the salary drawers. If the Senator contemplates introducing his resolution again, I would be very glad.

Mr. BLEASE. I will state to the Senator that the resolution is now on the calendar with an unfavorable report.

Mr. CARAWAY. Let us get a vote on it.

Mr. BLEASE. This is the amendment which I am now submitting:

That the said board shall instruct the officials of banks under its control not to foreclose any lien or mortgage held by them upon any real estate which is or will become due and payable prior to October 1, 1929.

I have in my hand a letter from the sheriff of Clarendon County, S. C., which I will not read, but I would like to have it inserted in the RECORD as a part of my remarks. I also have a letter from Hon. Phillip H. Arrowsmith, and attached thereto certain correspondence with him, including the reply of the Department of Agriculture, in which Mr. Marvin, who seemed to be the Acting Secretary at the time, said he could not be of any assistance as matters now stand; also a letter from the chairman of the board of county commissioners of the county of Horry, in South Carolina, inclosing a copy of a resolution passed by the county commissioners of that county, all of which I ask may be printed in the RECORD in connection with my remarks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The documents referred to are as follows:

OFFICE OF J. EDWARD GAMBLE,
Manning, S. C., December 10, 1928.

Hon. COLE L. BLEASE,
Senator for South Carolina, Washington, D. C.

MY DEAR SENATOR: I notice that Congressman H. P. FULMER has introduced in Congress a bill to provide aid for the farmers of the stricken area of South Carolina. As you are somewhat familiar with general conditions in this section, I feel that the bill will have your sympathy and support. I desire to furnish you with the following information.

As sheriff of Clarendon County I am in a position to realize the dire need of the farmers in this county. Within the past three months I have sold under foreclosure 51 tracts of land and over 400 homes and tracts of land for delinquent taxes. I now have on hand several thousand tax executions against personal property. In addition to this I understand that several hundred foreclosures against homes and farms are now pending.

I know of my own knowledge that literally hundreds of small farmers are compelled to sell their grain, poultry, and livestock, which is badly needed on the farms, in order to exist from day to day. It is also a fact that hundreds of farmers have no funds with which to buy seeds

and fertilizer, and it will be utterly impossible for them to produce a crop unless they immediately receive aid from such a source as is proposed in the bill.

With kindest personal regards, I am,

Sincerely yours,

J. E. GAMBLE,
Sheriff of Clarendon County, S. C.

FLORENCE, S. C., *October 13, 1928.*

Hon. COLE L. BLEASE,
Pendleton, S. C.

MY DEAR SENATOR: I inclose copy of letter which I have just received from our county demonstration agent and copy of letter which I have written to Doctor Lewis, the State veterinarian.

My investigation and observation leads me to the conclusion that a widespread distress throughout the overflow areas which constitute a very large part of the county can not be overstated. There are many families now whose entire crops have been wiped out. They have no potatoes, peas, corn, or any fall vegetables, and, of course, no money crop. Just at present they are going about from field to field picking cotton in the higher sections of the county, out of which they are living from day to day. In 30 days this opportunity to work will be over and God only knows what is going to happen to them. In this flooded area there are a large number of hogs. The farmers for the most part are illiterate and have never appreciated either the value of a hog or the necessity of inoculation against cholera. But this year, when the hog is a vital cog in the cycle of life, he has awakened to this necessity from the prevalence of cholera as an epidemic only to find that he is deprived of its benefit through his inability to pay for the serum.

The county and Federal Governments combining are spending substantial sums to carry on this educational work, and the opportunity is present to bring it to a splendid climax, but the funds to accomplish this result and to save the remaining vestige of food to these flood sufferers is absent. It would probably not cost more than $15,000 to buy all the serum necessary to inoculate all of the hogs in the county which have not been inoculated. The county hasn't the funds because every available fund has been utilized to make the roads and bridges passable, and it is a conservative estimate, I believe, that the county will not collect more than 50 per cent of the taxes this year. Therefore, you see that the county is helpless. The State, as you know, has no appropriation out of which to give aid in this situation. I am appealing to you, and I know in advance that I will have your heartiest cooperation in presenting this matter to the Department of Agriculture or the Bureau of Animal Industry to supply us with the serum so that our State veterinarian, in conjunction with our county demonstration agent, can immediately embark upon the execution of this program. What with pellagra, tuberculosis, hog cholera, and attendant ills, it just seems that we are almost overwhelmed. We must have help, and I know of no one that I can appeal to in behalf of my people other than you with any foundation to hope for success.

I know that you will help us if you can.

Believe me.

Sincerely and cordially yours,

P. H. ARROWSMITH.

WASHINGTON, D. C., *October 17, 1928.*

Hon. PHILIP H. ARROWSMITH,
Attorney at Law, Florence, S. C.

DEAR MR. ARROWSMITH: Senator BLEASE has your letter of the 13th instant, together with inclosed copy of letter received by you from the Florence County demonstration agent, and copy of letter which you have written to Doctor Lewis, the State veterinarian.

In reply I am pleased to advise you that this matter is to-day being placed before the United States Department of Agriculture, and that Senator BLEASE will be glad to do all that he can for the relief of his constituents affected by the trouble you mention.

You will be further advised immediately upon receipt of word from the department. Hoping that this office may be of service in this emergency and with assurances of the Senator's good wishes and high personal esteem, I have the honor to be, sir,

Very respectfully,

JOHN D. LONG, *Secretary.*

WASHINGTON, D. C., *October 17, 1928.*

Hon. WILLIAM M. JARDINE,
The Secretary of Agriculture, Department of Agriculture, Washington, D. C.

MY DEAR MR. SECRETARY: Senator BLEASE is advised that there is a widespread distress throughout overflow areas from recent floods in Florence County, S. C. Crops have been generally destroyed and there is actual want and suffering.

In this flooded area there are a large number of hogs. Heretofore the farmers do not appear to have appreciated the value or the necessity of inoculation against cholera. This year he has awakened to this necessity from the prevalence of cholera in the proportion of an epidemic only to find that he is deprived of its benefit through inability to pay for the serum.

The county and Federal Governments combining are spending substantial sums to carry on educational work, and the opportunity is present to bring it to a splendid climax, but the funds to accomplish this result and to save the remaining vestige of food to the flood sufferers is absent.

It would probably not cost more than $15,000 to buy all the serum necessary to inoculate all the hogs in Florence County which have not been inoculated.

The county has not the funds, because every available fund has been utilized to make roads and bridges passable, and it is a conservative estimate that the county will not be able to collect more than 50 per cent of the taxes this year. Therefore the county is helpless, and the State has no appropriation out of which to give aid in this situation.

The Senator will, therefore, appreciate all the cooperation and assistance that the Department of Agriculture and the Bureau of Animal Industry can furnish to supply this county with serum, so that the State veterinarian, in conjunction with the county demonstration agent, can immediately take steps to save the situation.

Inclosed for your information are the copies of two letters relative to this matter, which the Senator will thank you to kindly return for his files upon the completion of your investigation.

Thanking you for your courtesy and with assurances of the Senator's high esteem, I have the honor to be, sir,

Very respectfully,

JOHN D. LONG, *Secretary.*

FLORENCE, S. C., *October 13, 1928.*

Dr. W. K. LEWIS,
State Veterinarian, Columbia, S. C.

DEAR SIR: I am taking the liberty of addressing you in connection with hog cholera in Florence County. You are probably aware that our farming population has labored under tremendous difficulties and against overwhelming circumstances during this entire year, all of which reached its climax in the storm of September 17, which has left a large part of this county in the worst condition that I have ever known; and, as I am advised by some of the older farmers, the worst that they have ever experienced.

As a concomitant of the excessive rains and flood conditions to add to their distress, there seems to be an epidemic of hog cholera prevalent, particularly in the flooded areas of the county.

It was my information that pellagra was on a rapid increase and, in order to check up on this situation, I wrote to the chairman of each board of school trustees in the county, asking them to make a survey of the conditions of their district and report to me at a meeting which was held on yesterday afternoon in the courthouse. Thirty-eight of the 57 chairmen attended. A general discussion of conditions was engaged in, and I learned for the first time the extent of the distress and the alarming magnitude of the loss from hog cholera. Under existing conditions every hog possible should be saved for its food or money value. In order to save the hogs they must be inoculated. In the areas where inoculation is most needed the farmers haven't the money with which to pay for the serum. I have conferred with our county agent, Mr. J. Ward McLendon, who manifests the keenest interest in this situation and who has written me, as per copy inclosed. His own information and observation corroborates the extent of the ravages from cholera and the vital necessity of prompt and effective action. In our dilemma we, naturally, turn to you for help. I am exceedingly anxious to know if there is any way for your department to supply the quantity of serum necessary to carry on an intensive, intelligent, county-wide hog-inoculation campaign, with the school district as the unit; and, if this quantity of serum is available, how many men you can put in the field to do this work for us. I understand that we have to pay for the serum, but that you furnish the veterinarians without cost. In addition to the immediate and vital needs in this direction, the opportunity is apparent for an educational campaign that will be of untold value in the future. Of course, I expect nothing less than your heartiest and most sympathetic cooperation.

I am sending a copy of this letter to Doctor Sikes and Doctor Long at Clemson College, inclosing copies of Mr. McLendon's letter, and am also writing to Senator BLEASE, inclosing to him copies of the record and urging his assistance in the financing of this undertaking.

Will you please let me hear from you at your earliest possible convenience.

Very truly yours,

PHILIP H. ARROWSMITH.

FLORENCE, S. C., *October 13, 1928.*

Hon. P. H. ARROWSMITH,
Florence, S. C.

DEAR SENATOR ARROWSMITH: I regret very much that I was unable to attend your meeting on yesterday of the chairmen of the 57 school dis-

tricts board of trustees in this county. I was unavoidably prevented from attending.

I learned with interest the reports that were made to you as to the hog cholera condition in this county. I do not think that it has been overstated and I feel sure that it is true that a high percentage of the farmers who have hogs that are not inoculated haven't the money with which to buy the serum at this time. I hope that you will continue your interest in this matter and make some arrangement whereby the needy farmer with hogs which have not been inoculated may be assisted. I am convinced that the hog crop is an important factor in the life, health, and welfare of our farming population. The ravages from cholera are tremendous and are the greatest drawback that we face in putting over our livestock program. If there is anything that I can do, do not hesitate to call upon me.

In this connection, I suggest that you write to Dr. W. K. Lewis, Columbia, who is the inspector in charge of this department of Clemson College Extension activities. Of course you know that where a State veterinarian can be obtained he makes no charge for inoculating, the farmer having only to pay for the serum and the cost of the serum is dependent upon the size of the hog, ranging from 50 cents to $1.

Very truly yours,

J. WARD MCLENDON, *County Agent.*

DEPARTMENT OF AGRICULTURE,
Washington, October 24, 1928.

Hon. COLE L. BLEASE,
United States Senate.

DEAR SENATOR BLEASE: Receipt is acknowledged of letter from your secretary of October 17 asking that the department arrange to furnish the necessary serum to inoculate the hogs of Florence County, S. C., so as to protect them from cholera.

While the department is very sympathetic with the citizens of the county in their present condition, there is, as you are probably aware, no fund available from which it could pay for serum to be used for the purpose suggested. The appropriation act for this department specifies the uses to which the moneys provided therein are to be put, and it is not legal to use any of those funds for any other purposes than the ones stipulated in the law. I am sorry, therefore, that the department is powerless to aid the citizens of Florence County in the manner outlined.

The two letters inclosed with your secretary's communication are returned as requested.

Sincerely yours,

C. V. MARVIN, *Acting Secretary.*

(Copy mailed October 25, 1928. John D. Long.)

COMMISSIONERS' OFFICE, HORRY COUNTY,
Conway, S. C., October 5, 1928.

Senator COLE L. BLEASE,
Washington, D. C.

DEAR SIR: I herewith send you a copy of resolution passed by the county commissioners at their last meeting asking your cooperation in securing relief for the sufferers from the recent West Indian hurricane.

We feel assured that you will do all you can to help in this cause.

Yours respectfully,

GEO. OFFICER, *Clerk.*

OFFICE OF COUNTY COMMISSIONERS, HORRY COUNTY, S. C.,
Conway, S. C., October 2, 1928.

STATE OF SOUTH CAROLINA,
County of Horry:

Whereas it has been called to the attention of the county board of commissioners that several sections of Horry County have been flooded during the recent flood and many farms have been completely overflowed with water still standing on same, and all of the crops and provisions of many of the people in the county have been completely destroyed and lost; and

Whereas it appears that this condition has existed along the Waccamaw, Lumber, and Little Pee Dee Rivers and in a part of Socastee Township and over a great part of Bucks Township; and

Whereas several families are now homeless by reason of the flood and many families where the water has receded are left destitute and without provisions; and

Whereas it is necessary that some immediate relief be given to those in this condition: Now, therefore, be it

Resolved by the county board of commissioners, That the honorable Senators from South Carolina in the United States Senate and the honorable Congressman from the sixth congressional district of South Carolina be, and they are hereby, requested and petitioned to render such assistance and secure such relief from the Government as they may be able to secure; be it further

Resolved, That the press of Horry County be requested to render such assistance as it may in securing this relief; be it further

Resolved, That the Red Cross of Horry County be requested and petitioned to render such assistance and aid as it may be able to render in securing provisions for needy families and those suffering in this calamity.

G. W. KING,
Chairman County Commissioners,
S. C. DAVIS,
Commissioner, Horry County.
J. F. HARPER,
Commissioner, Horry County.

Attest:

GEO. OFFICER, *Clerk of Board.*

I, George Officer, clerk of the county board of commissioners of Horry County, do hereby certify that the foregoing resolution is a true copy of the resolution duly adopted by the county board of commissioners of Horry County on the 2d day of October, A. D. 1928.

[SEAL.] GEO. OFFICER, *Clerk of the Board.*

Mr. WHEELER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from South Carolina yield to the Senator from Montana?

Mr. BLEASE. I yield.

Mr. WHEELER. If the Senator will pardon an interruption, I would suggest, as the Senator from Arkansas [Mr. CARAWAY] suggested, that he should push his resolution to investigate the bank in South Carolina. If he does so, I will gladly join with him, and I would like to see it include also the Federal land bank in Spokane, as well as the one which the Senator from Arkansas suggested, the Federal land bank in St. Louis.

Mr. BLEASE. I will assure the Senator from Montana that as soon as the resolution is reached on the calendar I shall certainly ask the Senate for a vote on it and shall be glad to accept any amendment that the Senator from Arkansas or the Senator from Montana or any other Senator might see fit to offer.

The PRESIDENT pro tempore. The clerk will state the next committee amendment.

The next amendment of the Committee on Appropriations was, on page 15, lines 2 and 3, to strike out the words "Assistant Treasurer" and insert in lieu thereof "two Assistant Treasurers," so as to make the sentence read:

Salaries: For Treasurer of the United States, two Assistant Treasurers, and for other personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Internal Revenue," on page 16, line 23, after the word "agents," to strike out "$34,500,000" and insert "$34,703,870," so as to read:

Collecting the internal revenue: For expenses of assessing and collecting the internal-revenue taxes, including the employment of a Commissioner of Internal Revenue at $10,000 per annum, a general counsel for the Bureau of Internal Revenue at $10,000 per annum, an assistant to the commissioner, a special deputy commissioner, three deputy commissioners, one stamp agent (to be reimbursed by the stamp manufacturers), and the necessary officers, collectors, deputy collectors, attorneys, experts, agents, accountants, inspectors, clerks, janitors, and messengers in the District of Columbia, the several collection districts, and the several divisions of internal-revenue agents, to be appointed as provided by law, telegraph and telephone service, rental of quarters outside the District of Columbia and not to exceed $219,250 for rental of quarters in the District of Columbia, postage, freight, express, necessary expenses incurred in making investigations in connection with the enrollment or disbarment of practitioners before the Treasury Department in internal-revenue matters, expenses of seizure and sale, and other necessary miscellaneous expenses including stenographic reporting services, and the purchase of such supplies, equipment, furniture, mechanical devices, law books and books of reference, and such other articles as may be necessary for use in the District of Columbia, the several collection districts, and the several divisions of internal-revenue agents, $34,703,870, of which amount not to exceed $8,904,860 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

Mr. WARREN. I send to the desk a committee amendment for which I ask consideration at this point.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 21, line 7, after the word "warehouses," to insert a colon and the following additional proviso:

Provided further, That moneys expended from this appropriation for the purchase of narcotics and subsequently recovered shall be deposited in the Treasury to the credit of the appropriation for enforcement of narcotic and national prohibition acts current at the time of the deposit.

The amendment was agreed to.

The next amendment was, under the subhead "Mints and assay offices," on page 34, line 12, after the name "Louisiana," to insert "and Carson City, Nev."; in line 14, after the name "Montana," to insert "Salt Lake City, Utah"; and at the end of line 23, to strike out "$1,635,500" and insert "$1,646,440," so as to make the paragraph read:

For compensation of officers and employees of the mints at Philadelphia, Pa., San Francisco, Calif., Denver, Colo., New Orleans, La., and Carson City, Nev., and assay offices at New York, N. Y., Boise, Idaho, Helena, Mont., Salt Lake City, Utah, and Seattle, Wash., and for incidental and contingent expenses, including traveling expenses, new machinery and repairs, cases and enameling for medals manufactured, net wastage in melting and refining and in coining departments, loss on sale of sweeps arising from the treatment of bullion and the manufacture of coins, not to exceed $500 for the expenses of the annual assay commission, and not exceeding $1,000 in value of specimen coins and ores for the cabinet of the mint at Philadelphia, $1,646,440.

The amendment was agreed to.

The next amendment was, under the subhead "Office of Supervising Architect—Public buildings, construction, and rent," on page 40, line 9, after the words "post office," to insert "courts"; in line 10, after the word "offices," to strike out "except for the courts"; in the same line, after the word "of," to strike out "$220,000" and insert "$335,000"; and in line 12, after the figures "1928," to strike out the colon and "*Provided*, That the building shall be so constructed that accommodations for the courts may be added later," so as to read:

Lubbock, Tex., post office, etc.: For continuation under an estimated total cost for site and building for the accommodation of the post office, courts, and other Government offices, of $335,000, in lieu of $160,000 fixed in act of May 29, 1928.

The amendment was agreed to.

The next amendment was, on page 42, line 16, after the word "of," to strike out "$1,600,000" and insert "$1,950,000," so as to read:

Portland, Oreg., courthouse, etc.: For continuation, under limit of cost of $1,950,000 in lieu of $1,500,000 fixed in act of March 5, 1928.

The amendment was agreed to.

The next amendment was, on page 65, line 21, after the word "service," to strike out "$19,300,000" and insert "$19,500,000," so as to read:

For vehicle allowance, the hiring of drivers, the rental of vehicles, and the purchase and exchange and maintenance, including stable and garage facilities, of wagons or automobiles for, and the operation of, screen wagon and city delivery and collection service, $19,500,000.

The amendment was agreed to.

The next amendment was, under the subhead "Office of the Second Assistant Postmaster General," on page 67, at the end of line 18, to strike out "$59,000,000" and insert "$59,500,000," so as to make the paragraph read:

Railway Mail Service: For 15 division superintendents, 15 assistant division superintendents, 2 assistant superintendents at large, 1 assistant superintendent in charge of car construction, 121 chief clerks, 121 assistant chief clerks, clerks in charge of sections in the offices of division superintendents, railway postal clerks, substitute railway postal clerks, joint employees, and laborers in the Railway Mail Service, $59,500,000.

The amendment was agreed to.

The next amendment was, on page 68, at the beginning of line 18, to strike out "$23,000,000" and insert "$23,250,000," so as to read:

For transportation of foreign mails by steamship, aircraft, or otherwise, including the cost of advertising in connection with the award of contracts authorized by the merchant marine act of 1928 (45 Stat., pp. 689–698), $23,250,000.

The amendment was agreed to.

The next amendment was, on page 68, line 19, after the word "exceed," to strike out "$4,000,000" and insert "$4,400,000," and in line 22, after the words "excess of," to strike out "$4,800,000" and insert "$5,200,000," so as to make the proviso read:

Provided, That not to exceed $4,400,000 of this sum may be expended for carrying foreign mail by aircraft under contracts which will not create obligations for the fiscal year 1931 in excess of $5,200,000.

The amendment was agreed to.

The reading of the bill was concluded.

The PRESIDENT pro tempore. Are there any other amendments from the committee?

Mr. WARREN. There were two committee amendments passed over.

The PRESIDENT pro tempore. Two committee amendments were passed over. Is it the desire of the Senator in charge of the bill that the two amendments be taken up and considered now?

Mr. WARREN. I think so. My colleague on the committee the Senator from Utah [Mr. SMOOT] wishes to address the Senate on the matter of the two amendments that were passed over. Before any vote is taken I think we should summon a quorum, however.

Mr. SMOOT. Mr. President, the two committee amendments passed over were on page 2 and page 13.

The PRESIDENT pro tempore. Under the unanimous-consent agreement the Senate returns to the consideration of the amendment on page 2, which will be stated.

The CHIEF CLERK. On page 2, line 3 strike out "$10,000" and insert "$12,000," so as to read:

Undersecretary, $12,000.

Mr. FLETCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	McNary	Smith
Barkley	Frazier	Metcalf	Smoot
Bayard	George	Moses	Steck
Bingham	Glass	Neely	Steiwer
Black	Glenn	Oddie	Swanson
Blaine	Greene	Overman	Thomas, Idaho
Blease	Hale	Phipps	Thomas, Okla.
Borah	Harris	Pittman	Trammell
Bratton	Hastings	Ransdell	Tyson
Brookhart	Hawes	Reed, Mo.	Vandenberg
Bruce	Hayden	Reed, Pa.	Wagner
Capper	Heflin	Robinson, Ark.	Walsh, Mass.
Caraway	Johnson	Robinson, Ind.	Walsh, Mont.
Couzens	Jones	Sackett	Warren
Dale	Kendrick	Schall	Watson
Deneen	Keyes	Sheppard	Wheeler
Dill	King	Shipstead	
Edge	La Follette	Shortridge	
Fess	McKellar	Simmons	

The PRESIDENT pro tempore. Seventy-three Senators having answered to their names, a quorum is present. The question is on agreeing to the first amendment of the committee passed over, which is on page 2, line 3. The Senator from Utah is recognized.

Mr. McKELLAR. I ask for the yeas and nays.

The PRESIDENT pro tempore. The Senator from Utah has the floor.

Mr. SMOOT. What amendment is now pending?

The PRESIDENT pro tempore. The amendment on page 2, the first amendment.

Mr. SMOOT. I ask that the Senate disagree to that amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. McKELLAR. I ask for the yeas and nays.

The PRESIDENT pro tempore. The yeas and nays are demanded. Is the demand seconded?

Mr. FLETCHER. I suggest to the Senator from Tennesese that the Senator from Utah has asked that the amendment be disagreed to.

Mr. McKELLAR. Very well.

The PRESIDENT pro tempore. The question is on the amendment.

The amendment was rejected.

The PRESIDENT pro tempore. Without objection, the amendment proposing to increase the total on line 5, on the same page, will also be disagreed to. The Senate now recurs to the amendment on page 13, line 8, which will be stated.

The CHIEF CLERK. Under the subhead "Bureau of the Budget," on page 13, line 8, after the word "Director," it is proposed to strike out "$10,000" and insert "$12,000," and at the end of line 15 to strike out "$171,000" and insert "$173,000," so as to make the paragraph read:

Director, $12,000; for the Assistant Director, and all other necessary expenses of the bureau, including compensation of attorneys and other employees in the District of Columbia; contract stenographic reporting services, telegrams, telephone service, law books, books of reference, periodicals, stationery, furniture, office equipment, other supplies, traveling expenses, street-car fares, $161,000; in all $173,000.

The PRESIDENT pro tempore. The question is on the amendment in line 8. Does the Senator from Utah request that that amendment be disagreed to?

Mr. SMOOT. Mr. President, I hardly feel like doing so. The amendment refers to the salary of a man who gives more hours to his work than does any other man in the Government service, and he holds a most responsible and important position. It does seem to me the amendment should be adopted,

and I ask Senators to allow it to be agreed to, in order to put this official on a footing with many others to whom I have called attention.

The same thing could not be said of General Lord that was said of Mr. Mills. General Lord is not a wealthy man; all he has is what he gets from his position here. I hope that the Senate will agree to the amendment. I ask the Senator from Montana, in all fairness, not to object to the amendment but to allow it to be adopted, for if there is any man in the Government service who earns this amount of money it is General Lord, the head of the Budget Bureau.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the committee.

Mr. WHEELER. Mr. President, I am going to oppose an increase of the salary of this official. In the first place, I feel that increases in salary should not be made in this manner. While there are men in the Government service, as has been suggested by the senior Senator from Utah [Mr. SMOOT], who are not, in my judgment, earning their salaries, and probably their salaries should be diminished, yet there are many other men holding positions in the Government who are not getting anywhere near the compensation they should be receiving for the work which they are doing. We have in this instance the head of the Budget Bureau, who is the dictator of all governmental expenses, the great economist who is making all the savings for the Government, as he claims, and objecting to every single solitary bill that comes up which does not meet with his approval, on the ground that it is not in accordance with the economy program of the President, coming in here and approving, of course, an increase of his own salary by $2,000 a year. It seems to me it places him in a very ridiculous position when he is advocating cutting down other salaries or keeping someone else from getting an increase in salary to be himself coming here and asking for an increase in salary.

I know that my friend, the senior Senator from Utah, will say that General Lord is not asking for this increase, but the fact of the matter is that it had to be approved by the Budget Bureau; otherwise it would not be in order and it could not be here; yet we have this man constantly coming here and telling the committees of the Senate and House of Representatives, "You must not do this, you can not pass this law, because of the fact that it is not in accord with the economy program of the administration." I say, therefore, that we certainly should not increase his salary to $12,000 a year.

The Senator from Utah has suggested that General Lord is a very hard-working man, and I have not any doubt at all about it; but there are many other very hard-working men who are in the service of the Government of the United States and yet who are not receiving $10,000 a year. Some of the commissioners of the Interior Department and some of the commissioners of other departments work just as hard, in my judgment, as General Lord, and yet are not receiving one-half the salary that he is receiving at the present time. I feel that it would be a mistake for us to increase General Lord's salary. I think also that he is the last person who should come before the Senate of the United States asking for an increase of his own salary while at the same time putting a veto on the request of every other person who desires an increase in salary from the Government of the United States.

It is all right, of course, for General Lord to come here and say, "I want an increase of salary," and for us to give it to him, and many Senators may not want to vote against the proposition because of the fact that they know he is absolute dictator at the Budget Bureau; and whenever they have a bill coming before the Senate involving an appropriation it has to go before General Lord, and he has to say as to whether or not it accords with the economy program of the administration. As a matter of fact, the committees of the Senate and the Senate itself have abdicated, so to speak, and allowed General Lord to tell us what legislation we may consider here and what legislation we may pass here and what legislation we may not pass. When, for instance, the Indians on some of the reservations came here with claims against the Government of the United States, it was General Lord who said that they should not even be permitted to go into court to have their claims adjusted, not on the ground that they were unjust claims, not on the ground that they were not proper, but on the ground that it was going to cost the Government too much to try their cases. So on the ground that it was against the economy program of the administration, this dictator, to whom the committees of Congress have abdicated, refused to approve the legislation giving those poor unfortunate Indians an opportunity to go into court. Then we find him coming here and asking for an increase of his salary to the extent of $2,000 for a Christmas present from the Government of the United States.

In the first place, I am opposed to the raising of salaries in this fashion; and, secondly, I am opposed to this official getting an increase until the salaries of all other employees of the Government shall have been adjusted in a proper manner.

Mr. WARREN. Mr. President, the Senator from Montana evidently has much feeling regarding this case. I am not certain that the Senator was a Member of the Senate at the time when we were called upon to pass the Budget law. At that time I, with some other members of the Appropriations Committee, felt that the enactment of such a law would restrict that committee too closely, and we failed to support it. Since that time, however, I have been very glad that the law was enacted, as it has had great effect in way of damming back the great stream of requests which have been coming to Congress from day to day ever since the war. The war gave everyone the idea of billions, because we appropriated billions—at one time twenty-eight billions and some odd millions, almost at one sitting—for the expenditures of one year.

The head of the Budget is the President of the United States. The director is merely, as we might say, a secretary to him in a sense. I dare say that the Director of the Budget will, as he has done in the past, confer often with the President. It was the thought of the Congress, and especially was it the thought of the Senate, that by placing the President at the head of the Budget Bureau the responsibility would be lodged in the highest possible place, and that then the President, as head of the Budget, in cooperation with the Director of the Budget, might lay before Congress measures which were worthy of consideration, and at the same time Congress would be protected in doing what was right without going too far in expenditures.

I have no idea that this Budget request for $2,000 additional for General Lord originated with him at all. I do not know that he is even aware at this day that the item is here. It is a matter of form. He has a very large number of men operating under him, some of whom formerly were our employees. The Director of the Budget is quite the hardest worked man in the employ of our Government, and he has the hardest and most unpopular job, I think, of any officer of the Government, in Washington or elsewhere.

I do not believe and can not believe that there is foundation for the assertion that the Director of the Budget decides matters according to his own liking in the case of one Senator or another Senator as favors may have been received or may be expected. I have no idea that the Director of the Budget is not as fair as any man could be, as fair as would be the Senator from Montana himself, who, I am sure, would undertake to decide on the law and the circumstances surrounding a particular case without regard to who might be hit.

I think it is a matter of knowledge with us that the Budget Bureau has been very popular. I think it has taken from every Senator and every Member of the House of Representatives more or less subtle and pressing solicitations for various items of appropriation. Instead, they have occupied the time of the Director of the Budget. The Budget Bureau has accomplished in that direction much of what has been accomplished by the Civil Service Commission. I imagine there is no institution in the Government, perhaps, which is more unpopular at times than is the Civil Service Commission, but when we talk to Senators, especially those from the larger States, we find that they are greatly pleased that there is a governmental organization able to stop some of the flood pointed toward them whenever Congress is in session. I refer, of course, to the flood of requests and demands for Government positions. Prior to the time of the establishment of the Civil Service Commission positions under the Government were supposed to change with the change of administration. If a Republican administration was replaced by a Democratic one, the Republican employees would go out; and if a Democratic administration was succeeded by a Republican administration, the Democrats would go out.

The Director of the Budget, as the Senator from Montana undoubtedly recognizes, and as I have heretofore said, has one of the most difficult and arduous places in the Government service. The very fact that he has to decide against Members of the House and Senate who may have items of appropriation which they desire but which do not meet with approbation is, in a way, a tribute to his ability.

He has before him and his assistants, continuously, the estimates coming from the various department heads, which are studied by the director all during the year. There is not at the Budget Bureau quick action such as sometimes occurs in the Senate in the case of legislation. We are oftentimes too quick about legislative action, and perhaps we legislate too much.

Under the present system estimates, of course, go to the Bureau of the Budget and the Budget is then made up. For-

merly the estimates were often taken to the President and the President might say, "Cut it in two; give them half, or give them a quarter." Of course, I am speaking merely in a general way as to that. Under the present conditions the estimates of the department, through their appointive heads—the Cabinet officers—and all other items from other sources are presented to the Budget Bureau early, and that bureau spends the entire season considering them before submitting a report to Congress. Then the Budget estimate comes before us for approval or disapproval. Sometimes we disapprove, and probably we shall continue to do so. Perhaps as to every bill which may pass at this session we shall disapprove of some of the items; but such action can hardly be construed as disapproval of the head of the bureau.

Mr. President, since the action which the Senate has taken in regard to the one matter in dispute—and the only one, I believe, so far—and because of certain amendments which are going to be offered on the floor of the Senate, and which I feel we ought to deal with and conclude before the hour when the Boulder Dam bill shall be taken up, if I may be permitted to do so, I ask to withdraw this amendment entirely from this bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment reported by the committee.

The amendment was rejected.

The PRESIDENT pro tempore. Without objection, similar action will be taken regarding the second amendment in the same paragraph, on page 13, line 15.

The bill is before the Senate, as in Committee of the Whole, and open to amendment.

Mr. EDGE. Mr. President, I understand that the committee amendments have been disposed of.

The PRESIDENT pro tempore. They have been.

Mr. EDGE. I desire to offer an amendment and make a brief explanation of it.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. On page 12, line 8, it is proposed to strike out "$21,415,000" and to insert in lieu thereof "$21,736,000."

Mr. EDGE. Mr. President, this is an amendment to the section providing appropriations for the employees of the Bureau of Customs. It raises the total amount appropriated by $321,000.

The justification for the presentation of the amendment may be summed up in a very few words.

At the last session we passed what was known as the Bacharach bill. It passed each House, as I recall, unanimously. The bill was the result of an investigation on the part of a subcommittee of the Committee on Ways and Means of the House into the status of salaries of custom employees. The chairman of that committee was the Congressman from New Jersey, Mr. BACHARACH, and the bill afterwards was introduced by him and bears his name.

The bill passed as a result of this investigation provided slight increases in the salaries of, I think, six classes of employees. In other words, it was the will of Congress, as evidenced by the passage of the bill, that these employees should be paid this slightly increased salary. The Budget Director, in estimating for the increases under the Bacharach bill—and I believe, at the same time, increases called for by the Welch bill, which was subsequently passed—allowed a sum which it is estimated is $321,000 under the amount called for by the terms of the Bacharach bill.

It appeals to me that these men in the Customs Service are entitled to the full salaries that have already been awarded to them through the action of Congress a few months back. I realize that under the increased appropriation a portion of the employees provided for under the Bacharach bill have been taken care of; but, I repeat, they are not all fully included in the sum that has been appropriated. My understanding is that but two classes have been given the average salary, while some of the classes have been given only the minimum salary.

My amendment will provide that all classes shall receive the average salary permitted under the Bacharach bill rather than a few of them the average salary, and others only the minimum salary. The amendment appeals to me as simply carrying out the intention of Congress, and I trust it may be permitted to go to conference.

Mr. WARREN. Mr. President, I feel that we can not permit this amendment to be adopted without further consideration of the matter. I should think, from observing what has been done, as a matter of fact, that the House has undertaken to provide for the 60 per cent that was provided for, just before the close of Congress last year, by the Bacharach bill. It has also proposed to go as far as it can go under the Welch law, so that every one of those left, included in the 40 per cent, is also provided for.

I will read from the report. This is the language of the House committee:

The amount for the collection of customs is increased from $19,483,560 to $21,415,000, or by $1,931,440. Of this sum $1,468,912 is brought about by increases in compensation of employees under the provisions of two acts passed at the last session—the act of May 28, 1928 (Welch Act), and the act of May 29, 1928 (Bacharach Act). Subdividing this sum, $926,489 is due to the Bacharach Act covering approximately 60 per cent of the force and $542,423 is due to the Welch Act affecting 40 per cent. The remainder of the increase covers $3,360 on account of reallocations of positions in the Washington bureau, $329,390 to provide 4 additional employees in Washington and 150 additional employees in the field, and $129,778 of increase very largely accounted for by cartage at New York in connection with the new appraisers' stores. The general increase in force is specifically accounted for in detail to the committee but in the main is created by the increase in customs business, the maintenance of 24-hour inspection service at a number of new international bridges and highways, and the opening of new airports of entry.

I must make the point of order against the amendment as not having been estimated for, which fact I regret.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. MCKELLAR. Mr. President, I offer an amendment, which I ask to have stated.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. On page 18, line 7, after the word "each," it is proposed to strike out the period and insert a comma and the following:

Said reports to be made at each regular session of the Congress after May 29, 1928, and no part of the appropriation herein made for tax refunds shall be paid out until said report is filed.

Mr. MCKELLAR obtained the floor.

Mr. WARREN. Mr. President, I desire to make a point of order against that amendment on the ground that it is legislation.

The PRESIDENT pro tempore. The Senator from Tennessee was recognized.

Mr. WARREN. I beg pardon. I hope the Senator will allow us to complete the bill before the expiration of the morning hour.

Mr. MCKELLAR. I will do my best. It will not take long.

I desire to call the attention of the Senate to page 17 of the bill, under the head of "Refunding taxes illegally collected":

For refunding taxes illegally or erroneously collected, as provided by law, including the payment of claims for the fiscal year 1930 and prior years, $130,000,000: *Provided*, That a report shall be made to Congress by internal-revenue districts and alphabetically arranged of all disbursements hereunder in excess of $500 as required by section 3 of the act of May 29, 1928 (45 Stat., p. 996), including the names of all persons and corporations to whom such payments are made, together with the amount paid to each.

My amendment simply adds to that:

Said reports to be made at each regular session of the Congress after May 29, 1928, and no part of the appropriation herein made for tax refunds shall be paid out until said report is filed.

The reason for that amendment is found in the act approved May 29, 1928, which I shall now read:

SEC. 3. Section 3220, Revised Statutes (title 26, sec. 149, p. 737, U. S. C.), as amended, is amended to read as follows:

"Refundments; taxes and penalties: The Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, is authorized to remit, refund, and pay back all taxes erroneously or illegally assessed or collected, all penalties collected without authority, and all taxes that appear to be unjustly assessed or excessive in amount, or in any manner wrongfully collected; also to repay to any collector or deputy collector the full amount of such sums of money as may be recovered against him in any court, for any internal-revenue taxes collected by him, with the cost and expense of suit; also all damages and cost recovered against any assessor, assistant assessor, collector, deputy collector, agent, or inspector, in any suit brought against him by reason of anything done in the due performance of his official duty, and shall make report to Congress, by internal-revenue districts and alphabetically arranged of all refunds in excess of $500, at the beginning of each regular session of Congress of all transactions under this section."

I call special attention to this language:

Shall make report * * * at the beginning of each regular session of Congress of all transactions under this section.

Mr. President, since that act was passed another session of Congress has convened. Reports have been made by the Commissioner of Internal Revenue and by the Secretary of the Treasury, but that law has not been complied with in such reports; and yet, without complying with that law, they come in and ask for $130,000,000 for tax refunds for the year 1930. Besides that, there is an additional report——

Mr. WARREN. Mr. President, I understand that those reports were presented, and were examined and passed upon.

Mr. McKELLAR. There are no reports here. There are no reports before Congress. This law has not been complied with.

Mr. WARREN. The report came, of course, in the recess of Congress, as expected.

Mr. McKELLAR. If the report is here then the amendment can be agreed to without any further trouble, because as soon as it is done they can use this money.

Mr. SMOOT. Mr. President, do I understand the Senator's amendment to apply to 1929?

Mr. McKELLAR. Oh, yes; every session of Congress after the passage of the law in 1928 is specifically included, of course.

Mr. SMOOT. Of course for 1929, under the existing law, they are to file the report before June 30, 1929.

Mr. McKELLAR. I know; that is under another provision of law, but what is required by this act is that these reports, setting out certain specific facts, shall be filed, and that bill was passed for the very purpose that I am urging now—namely, that Congress should have some knowledge of these claims in excess of $500.

Mr. SMOOT. That report can not be filed until the close of the year because these appropriations are made from July 1 to June 30.

Mr. McKELLAR. Yes; it can be filed for the year. The law specifically requires it. This appropriation applies not only to this year but to previous years, and there is no reason in the world why they can not give the Congress the facts as required by this act.

Mr. SMOOT. Mr. President——

Mr. McKELLAR. Mr. President, I am very anxious to get through by 2 o'clock. I hope I may be allowed to continue.

Mr. SMOOT. So am I.

Mr. McKELLAR. There are some things to which I want, very briefly, to call the attention of the Senate and the attention of the country.

We have, according to the newspapers, the greatest Secretary of the Treasury since Alexander Hamilton.

Mr. SMOOT. And it is true.

Mr. McKELLAR. The Senator says it is true. I am not passing on that question now. I am not here now to gainsay it, and I am not going to argue it with the Senator; but I find that the "greatest Secretary of the Treasury since Alexander Hamilton" has made mistakes in the collection of taxes during the eight years that he has been Secretary of the Treasury in the enormous sum of $1,180,612,356.33. I say that any financier who, in the course of eight years, collects from the people by mistake or accident $1,180,612,356.33 is not infallible. Surely the paying out of such an enormous sum is in itself sufficient to challenge the attention of the Congress, and especially so when there is now no real supervision by anyone over the Treasury Department's acts in paying out these enormous sums of money. Every dollar paid out may have been properly paid out or refunded; on the other hand some, or much, may have been improperly refunded. We should have the facts.

Mr. WHEELER. Mr. President, does not the Senator know that that is what makes him great in the eyes of our Republican friends across the aisle?

Mr. McKELLAR. That may be so. I am not going to discuss that question now; but here is what I want to call attention to, namely, that these refunds are increasing by leaps and bounds. I have been calling attention to it all during the last two administrations, because I want to show how these refunds are mounting up.

Mr. WHEELER. Will the Senator pardon a further interruption?

Mr. McKELLAR. Yes.

Mr. WHEELER. Does not the Senator know that that is why all the great newspapers of the country are afraid of the present Secretary of the Treasury—because he can make these mistakes?

Mr. McKELLAR. I am not advised as to that; and just now, in the short time that I have—because I want this bill to pass, and if this amendment is agreed to it can be passed instantly; if they will accept this amendment, I am perfectly willing to let the bill be passed so far as I am concerned, but I want to call attention to what is being done under this administration of the tax laws in reference to tax refunds.

In 1917 the refunds of the Government amounted, in round numbers, to $887,000.

In 1918 they amounted to $2,000,000.

In 1919, $8,000,000.

In 1920, $15,000,000.

In 1921, $28,000,000.

In 1922, $48,000,000.

In 1923, $123,000,000.

In 1924, $137,000,000.

In 1925, $151,000,000.

In 1926, $174,000,000.

In 1927, $103,000,000.

In 1928, $142,000,000.

In 1929 they have amounted to $37,000,000 already. This appropriation carries $130,000,000 and another request for an appropriation has already been submitted by the Budget Director and the President for $75,000,000 more, making a total, in round numbers, at the present session of Congress of $262,000,000 of refunds of taxes by clerks in the Department of the Treasury, with no supervision from the outside at all, with no knowledge upon the part of Congress as to why these tremendous refunds are made, with no facts before the Congress.

Mr. President, these figures are taken from a table placed in the hearings on the Treasury Department appropriation bill before the Committee on Appropriations of the House on November 30 of this year. The table is as follows:

Statement showing total internal-revenue receipts, total amount of additional assessments and collections resulting from office audits and field investigations, and total amount of refunds of taxes illegally collected for the fiscal years 1917 to 1928, inclusive, and first three months of the fiscal year 1929

Fiscal year	Total internal-revenue receipts	Amount of additional assessments and collections resulting from office audits and field investigations	Amount of refunds of taxes illegally collected
1917	$809,393,640.44	$16,597,255.00	$887,127.94
1918	3,698,955,820.93	29,984,655.00	2,088,565.46
1919	3,850,150,078.56	123,275,768.00	8,654,171.21
1920	5,407,580,251.81	466,889,359.00	15,639,952.65
1921	4,595,357,061.95	416,483,708.00	28,656,357.95
1922	3,197,451,083.00	266,978,873.00	48,134,127.83
1923	2,621,745,227.57	600,670,632.00	123,992,820.94
1924	2,796,179,257.06	577,710,044.00	137,006,225.65
1925	2,584,140,268.24	312,667,876.00	[1] 151,885,415.60
1926	2,835,999,892.19	404,537,468.00	[2] 174,120,177.74
1927	2,865,683,129.91	383,965,350.00	103,858,687.78
1928	2,790,535,537.68	368,565,764.00	142,393,567.17
First quarter 1929	662,586,273.02	93,442,457.91	37,695,158.41
Total, 12 years 3 months	38,715,757,522.36	4,061,769,209.91	975,012,356.33

[1] Includes $17,777,642.45 refunded taxes under provisions of section 1200 of the revenue act of 1924 (25 per cent refunds of 1923 individual income taxes).

[2] Includes $206,115.29 refunded taxes under provisions of above section of law.

We have been coming up here blindly every year, and sometimes twice a year—because they come up on deficiency bills also—appropriating these enormous sums of money, this session amounting to $262,000,000, and there is not a man in the Senate, there is not a man in this country, outside of some of the employees and officials of the Treasury Department, who can tell where a dollar of it has gone and whether it has been justly and fairly expended or not.

Mr. DILL. Mr. President, will the Senator yield?

Mr. McKELLAR. I yield.

Mr. DILL. Are the mistakes which make necessary these refunds the same kind of mistakes each year?

Mr. McKELLAR. So far as known, they are. So far as is known, they are mistakes of this kind, that taxes are refunded, but an error was made by the taxpayer, and he finds he has paid too much.

Mr. SMOOT. Mr. President, I know the Senator wants to be correct in the matter.

Mr. McKELLAR. Indeed, I do; and I am going to be correct. Under no circumstances would I want to be incorrect or make an incorrect statement.

Mr. SMOOT. That is all right. I want to say to the Senator that during the early years there were jeopardy assessments put upon many of the big concerns, and the Treasury Department, in placing those jeopardy assessments, did not know what the taxes would be; there was no examination; but they did determine that the amount would be enough so that it would cover every emergency. The taxpayer paid the tax, and if he had not, under the law he would have had to pay interest. When the final adjustment has taken place, if the assessment is shown to have been more than was actually

owing by the company, the excess is refunded. That is what the refunds are.

Mr. DILL. But it is over such a long series of years.

Mr. SMOOT. Certainly; from the beginning of the war, when there had to be valuations of the property. There were excess profits, there were all of the complications in the tax bills, such as had never before been experienced in the history of this country or of any other country. It is very natural that it should be so.

Mr. McKELLAR. Mr. President, if it is very natural, if it is very fair, if it is very honest, if it is very just, why can not the Congress have the facts? Why are the facts withdrawn from the scrutiny of the Congress? This body and the body at the other end of the Capitol have passed a solemn law providing that where the tax refund amounts to more than $500 the Secretary must give all the facts to the Congress at the beginning of the session. That law was passed last May. It has not been complied with, and, notwithstanding the fact that that law has been treated with the utmost disrespect by the Secretary of the Treasury, he blandly comes in, and messages are here demanding $205,000,000 to be continued to be paid out without any knowledge on the part of Congress at all.

Senators, we should not permit it; it should not be done; it is not the right method of legislation. We are not acting up to our duty as trustees of this Government. We should not permit it for a moment. The amendment I have to offer would do nothing but require the Treasury to comply with the law. I will read it, and I ask Senators to adopt it. It simply provides that—

Said reports to be made at each regular session of the Congress after May 29, 1928—

The date the law was passed—

and no part of the appropriation herein made for tax refunds shall be paid out until said report is filed.

Is there anything unfair or unjust about that? If these claims have been properly paid, is there any reason why we should not have the Secretary of the Treasury comply with that law? Is he above the law? Is he to treat the laws we pass with disrespect, and are we to continue to appropriate these vast sums without his complying with the law? I say that if we do we are violating our duty as trustees of the Government, and I for one do not intend to do it.

Mr. President, I ask that there may be printed as a part of my remarks a communication from the President and the Director of the Budget on the matter of these refunds, and an article appearing December 12, 1928, in the New York Times under the caption "President asks $75,000,000 more."

The PRESIDENT pro tempore. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

REFUNDING OF TAXES

Communication from the President of the United States transmitting a supplemental estimate of appropriation for the Treasury Department for the fiscal year 1929 and prior years for refunding internal-revenue taxes illegally or erroneously collected, $75,000,000

THE WHITE HOUSE,
Washington, December 11, 1928.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: I have the honor to submit herewith for your consideration a supplemental estimate of appropriation for the Treasury Department for the fiscal year 1929 and prior years, for refunding internal-revenue taxes illegally or erroneously collected, $75,000,000.

The purpose of this estimate, the necessity therefor, and the reason for its submission at this time are set forth in the letter of the Director of the Bureau of the Budget, transmitted herewith, with whose comments and observations thereon I concur.

Respectfully,

CALVIN COOLIDGE.

BUREAU OF THE BUDGET,
Washington, December 10, 1928.

SIR: I have the honor to submit herewith for your consideration a supplemental estimate of appropriation for the Treasury Department for the fiscal year 1929 and prior years for refunding internal-revenue taxes illegally or erroneously collected, as follows:

INTERNAL REVENUE SERVICE

For an additional amount for refunding taxes illegally or erroneously collected, as provided by law, including the payment of claims for the fiscal year 1929 and prior years, $75,000,000: *Provided*, That a report shall be made to Congress by internal-revenue districts and alphabetically arranged of all disbursements hereunder in excess of $500 as required by section 3 of the act of May 29, 1928 (45 Stat. p. 996), including the names of all persons and corporations to whom such payments are made, together with the amount paid to each, $75,000,000.

The amount already appropriated for this purpose for the fiscal year 1929 and prior years is $130,000,000. This supplemental estimate is intended to provide the Bureau of Internal Revenue with the necessary additional funds to refund to taxpayers all overassessments or erroneous payments of internal-revenue taxes which it is expected will be allowed by the Commissioner of Internal Revenue under the provisions of section 3220, Revised Statutes, as amended, up to and including June 30, 1929, or to the close of the present fiscal year. The amount of the supplemental estimate submitted at this time is also intended to cover the necessary funds to pay during the remainder of the present year judgments rendered by the Federal courts against the United States, or against an internal-revenue officer where taxes are involved, such judgments being payable from current appropriations for "Refunding taxes illegally collected" in accordance with a decision of the Comptroller General of the United States dated December 31, 1925 (A–12287).

The above estimate is required to meet contingencies and conditions which have arisen since the transmission to Congress of the Budget for the fiscal year 1929.

I recommend the transmission of the estimate to Congress.

Very respectfully,

H. M. LORD,
Director of the Bureau of the Budget.

The PRESIDENT.

Supplemental estimate of appropriation required for the service of the fiscal year ending June 30, 1929, and prior years, by the Treasury Department

INTERNAL REVENUE SERVICE

Refunding taxes illegally collected:	
For an additional amount for refunding taxes illegally or erroneously collected, as provided by law, including the payment of claims for the fiscal year 1929 and prior years, $75,000,000: *Provided*, That a report shall be made to Congress by internal-revenue districts and alphabetically arranged of all disbursements hereunder in excess of $500 as required by section 3 of the act of May 29, 1928 (45 Stat., p. 996), including the names of all persons and corporations to whom such payments are made, together with the amount paid to each (U. S. C. p. 1014, sec. 602; p. 1963, sec. 149; p. 1964, sec 157; p. 2003, sec. 1065; p. 2015, sec. 1120; p. 2032, sec. 284; acts Mar. 5, 1928, vol. 45, p. 169; May 29, 1928, vol. 45, p. 996; May 29, 1928, vol. 45, pp. 861–862, 865–866, 871, 874, 876–878, 882)------	$75,000,000
Amount appropriated for the fiscal year ending June 30, 1929----------	130,000,000

[From the New York Times, December 12, 1928]

PRESIDENT ASKS $75,000,000 MORE—TELLS CONGRESS THE ADDITIONAL SUM IS NEEDED FOR PAYMENT OF TAX REFUNDS—AGAIN WARNS OF DEFICIT—LORD SAYS THAT THE ESTIMATED SURPLUS MAY NOW SHIFT TO SHORTAGE OF $18,000,000

(Special to the New York Times)

WASHINGTON, December 11.—President Coolidge to-day sent a recommendation to Congress for an additional appropriation of $75,000,000 for tax refunds, which, if acted upon at this session, would create an actual deficit of more than $18,000,000 in the current fiscal year ending June 30. He expressed fear to-day that unless the revenues increased greatly in the tax payments next March and June the incoming administration would begin with a deficit facing it.

The additional amount, the President explained, became necessary because of court decisions and unexpected adjustments in the last few months.

The Treasury originally estimated that $130,000,000 would be sufficient for tax refunds. Including this additional estimate of $75,000,000, the amount sought for tax refund in this fiscal year would be $205,000,000. Since the Budget Bureau in forecasting the probable surplus estimated that $150,000,000 might be required, the supplemental estimate to-day would swell the estimated expenditures $55,000,000 above the total estimates.

General Lord, Director of the Budget, informed the President to-day that the estimated surplus at the end of this fiscal year, exclusive of this supplemental estimate, was $36,990,000. Therefore, if the entire amount of $205,000,000 is appropriated by this Congress, he pointed out to the President that the paper deficit would be around $18,000,000.

An actual deficit, General Lord said, might be averted by heavy income-tax payments on March 15 and June 15 next before the end of the fiscal year.

However, the income-tax payments may fall below the estimates and there is a possibility that the deficit may be greater than the paper figure of $18,000,000.

PRESIDENT SEES WAY OUT

President Coolidge to-day discussed the situation at length in his conference with newspaper men. He observed that some fears were ex-

pressed that the Government's revenues would be too small next year adequately to run the Government. This, he thought, was impossible as reductions could be made to overcome such a contingency.

He said that the difficult problem the incoming administration would face might be a deficit which now, with the tax refund demands, was becoming more real than speculative.

In order to prevent a deficit the President suggested that Congress should proceed with the utmost scrutiny over appropriations this session. He thought that some of the tax-refund money perhaps need not be expended in this fiscal year and that this procedure might avert a deficit.

In his comments to-day he emphasized several times that Congress should cooperate with the executive departments and reduce expenditures wherever possible so that the deficit, if one appears, would be so small as to be easily handled.

In submitting his recommendations to the House the President did not mention the possibility of a deficit. This discussion occurred subsequently in his biweekly conference with the newspaper men.

TEXT OF PRESIDENT'S LETTER

The President's letter to Speaker LONGWORTH was as follows:

THE WHITE HOUSE,
Washington, December 11, 1928.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: I have the honor to submit herewith for your consideration a supplemental estimate of appropriations for the Treasury Department for the fiscal year 1929 and prior years, for refunding internal revenue taxes illegally or erroneously collected, $75,000,000.

The purpose of this estimate, the necessity therefor, and the reason for its submission at this time are set forth in the letter of the Director of the Bureau of the Budget transmitted herewith, with whose comments and observations thereon I concur.

Respectfully,

CALVIN COOLIDGE.

GENERAL LORD'S LETTER

General Lord's letter to the President reads as follows:

BUREAU OF THE BUDGET,
Washington, December 10, 1928.

SIR: I have the honor to submit herewith for your consideration a supplemental estimate of appropriations for the Treasury Department for the fiscal year 1929 and prior years, for refunding internal revenue taxes illegally collected by the Internal Revenue Service.

For an additional amount for refunding taxes illegally or erroneously collected as provided by law, including the payment of claims for the fiscal year 1929 and prior years, $75,000,000; provided, that a report shall be made to Congress by internal revenue districts and alphabetically arranged of all disbursements hereunder in excess of $500 as required by section 3 of the act of May 29, 1928 (45 Stat. p. 996), including the names of all persons and corporations to whom such payments are made, together with the amount paid to each—$75,000,000.

The amount already appropriated for this purpose for the fiscal year 1929 and prior years is $130,000,000. This supplemental estimate is intended to provide the internal revenue for the necessary additional funds to refund to taxpayers all overassessments or erroneous payments of internal revenue taxes which it is expected will be allowed by the Commissioner of Internal Revenue under the provisions of section 3220, Revised Statutes, as amended, up to and including June 30, 1929, or to the close of the present fiscal year.

The amount of the supplemental estimate submitted at this time is also intended to cover the necessary funds to pay during the remainder of the present year judgments rendered by the Federal courts against the United States or against an internal revenue officer where taxes are involved, such judgments being payable from current appropriations for "refunding taxes illegally collected," in accordance with a decision of the Comptroller General of the United States dated December 31, 1925 (A-12287).

The above estimate is required to meet contingencies and conditions which have arisen since the transmission to Congress of the Budget for the fiscal year 1929. I recommend the transmission of the estimate to Congress.

Very respectfully,

H. M. LORD,
Director of the Bureau of the Budget.

Mr. McKELLAR. Mr. President, we collect, all told, something more than $2,000,000,000 of income taxes, and we are paying out one-tenth of it in tax returns, without the Congress having any knowledge as to whether those refunds are just or not.

Mr. WARREN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Tennessee yield to the Senator from Wyoming?

Mr. McKELLAR. I will yield in a moment. Under what facts could the Secretary of the Treasury pay back one-tenth of all that is collected in tax refunds, why or how we know nothing about?

I now yield to the Senator.

Mr. WARREN. Will the Chair rule?

Mr. McKELLAR. The Senator certainly has not interrupted me to get a ruling on a point of order he has not made. I will proceed until I finish, and then I will yield.

Mr. WARREN. I wanted to know if the ruling of the Chair on my point that this is legislation is against me. If so, I wanted to know if the Senator is ready to have a vote without taking any further time.

The PRESIDENT pro tempore. The Chair holds the point of order made by the Senator from Wyoming not valid. The Chair holds that the amendment presented by the Senator from Tennessee is in the nature of a limitation upon an appropriation and is in order.

Mr. McKELLAR. Mr. President, I ask for a vote on the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Tennessee.

The amendment was agreed to.

Mr. WARREN. Mr. President, I ask that the totals may be corrected by the clerks.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BLEASE. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. On page 14, line 24, under the heading "Federal farm loan bureau," add the following:

That said board shall instruct the officials of all banks under their control not to foreclose any lien or mortgage held by them upon any real estate which is or will become due and payable prior to October 1, 1929.

Mr. WARREN. Mr. President, I am sorry, but I shall have to make the point of order against the amendment as being legislation.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. BARKLEY. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The clerk will report the amendment.

The CHIEF CLERK. In the item for study of rural sanitation, on page 32, line 23, strike out the figures "$215,000" and insert in lieu thereof the figures "$247,825."

Mr. WARREN. Mr. President, will the Senator allow this amendment to come to a vote and let the matter go to conference, or does he desire to address the Senate?

Mr. BARKLEY. I do not desire to address the Senate if the Senator will agree to the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Kentucky.

The amendment was agreed to.

The PRESIDENT pro tempore. The bill is still in Committee of the Whole and open to amendment. If there be no further amendment to be proposed, the bill will be reported to the Senate.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. BRUCE. Mr. President, did the Treasury appropriation bill pass?

The PRESIDENT pro tempore. The bill has just passed.

Mr. BRUCE. Mr. President, I move a reconsideration of the vote by which the bill was passed. I called the attention of the chairman of the committee to the fact that I had an amendment on the table which I desired to offer. He will recollect that fact. I happened to leave the Chamber for a moment.

Mr. WARREN. I had assumed that the Senator had abandoned the idea because he was not here to offer the amendment.

Mr. BRUCE. I happened to be out of the Chamber for a moment. I did not suppose the bill would come to a vote so quickly. I took pains to tell the Senator that I proposed to offer the amendment. I ask unanimous consent for a reconsideration of the vote.

The PRESIDENT pro tempore. The Senator from Maryland asks unanimous consent for a reconsideration of the vote by which the Treasury and Post Office Department appropriation bill was passed. Is there objection?

Mr. WARREN. I object.

The PRESIDENT pro tempore. Objection is made.

Mr. BRUCE. I move that the vote be reconsidered.

The PRESIDENT pro tempore. The Senator from Maryland moves that the Senate reconsider the vote whereby the appro-

priation bill for the Post Office and Treasury Departments was passed. The question is on the motion of the Senator from Maryland.

Mr. KING. Is that debatable?

The PRESIDENT pro tempore. Oh, yes.

Mr. KING. I appeal to the Senator from Wyoming, and to others who may feel constrained to vote in the negative, to change their attitude. It does seem to me that when a Senator in good faith is here during the progress of discussion, when a bill is under consideration, waits here for perhaps hours for the purpose of offering an amendment, and mentions to the chairman of the committee that he purposes offering an amendment, but steps out of the Chamber for a moment, and during his absence the bill is passed, the chairman of the committee ought, upon the facts being presented, voluntarily move to set aside the action of the Senate and permit the Senator to offer the amendment. I beg the chairman to do that. It will be a bad precedent if he does not. The Senator will not make anything by objecting.

Mr. WARREN. Is the Senator from Utah undertaking to accuse me of intentional discourtesy?

Mr. KING. Nothing of the sort. I am appealing to the Senator.

Mr. WARREN. Then please appeal respectfully.

Mr. KING. I have done so.

Mr. WARREN. If I may do so, I ask that the bill be reconsidered and that the amendment be now put to a vote.

The PRESIDENT pro tempore. Without objection, the vote by which the bill was passed will be reconsidered, and the order that the amendments be engrossed and the bill read a third time vacated. The bill is now in the Senate and open to amendment. The Senator from Maryland proposes the following amendment, which will be read.

The CHIEF CLERK. On page 19, on the last line, under the item "Bureau of Prohibition," strike out "$13,500,000" and substitute therefor "$270,627,384."

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The PRESIDENT pro tempore. The pending amendment is the amendment of the Senator from Colorado [Mr. PHIPPS], on page 3, line 11, to strike out "$125,000,000" and to insert in lieu thereof "$165,000,000."

Mr. JOHNSON. I ask the Senator from Colorado if he will not separate his amendment, so that the first part of it and the last part of it may be first considered, and then the portion allocating a certain sum to flood control may be considered. On page 3, line 11, he moves to strike out the numerals "$125,000,000" and insert "$165,000,000," and on page 4, line 21, to strike out the numerals "$125,000,000" and insert "$165,000,000." I ask the Senator if he will first take up those two items.

Mr. PHIPPS. Mr. President, it seems to me that there are two questions involved, and Senators might be favorable to one proposition and object to the other. Under the circumstances, they are not necessarily coupled together in one amendment. I am perfectly willing to have a separate vote on those two portions of the amendment printed, as suggested by the Senator from California.

Mr. JOHNSON. So far as I am able, I accept those two amendments.

The PRESIDING OFFICER (Mr. FESS in the chair). Any Senator can ask for a division of the amendment.

Mr. KING. Let the clerk state the amendment.

The PRESIDING OFFICER. The clerk will report the amendment as divided.

The CHIEF CLERK. On page 3, line 11, strike out "$125,000,000" and insert "$165,000,000."

Mr. JOHNSON. That is the end of that part of the amendment.

Mr. KING. Mr. President, I confess I do not understand the proposed amendment now. Is it an amendment to the amendment offered by the Senator from Colorado?

Mr. JOHNSON. I am asking, if the Senator from Utah will permit me, the segregation so that we may first pass upon the authorization and subsequently pass upon the proposed allocation of a sum to flood control.

Mr. McKELLAR. It is simply an increase in the authorization from $125,000,000 to $165,000,000.

Mr. JOHNSON. That is all; a mere authorization.

Mr. ASHURST. Mr. President, there are some Senators absent from the Chamber who are very much interested in this question. I have sent for one or two of them, and my colleague has likewise sent for others. However, I think we should have a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Fess	McMaster	Smith
Barkley	Fletcher	McNary	Smoot
Bayard	Frazier	Metcalf	Steck
Bingham	George	Moses	Steiwer
Black	Glass	Neely	Swanson
Blaine	Glenn	Nye	Thomas, Idaho
Blease	Goff	Oddie	Thomas, Okla.
Borah	Greene	Overman	Trammell
Bratton	Harris	Phipps	Tyson
Brookhart	Hastings	Pittman	Vandenberg
Bruce	Hawes	Ransdell	Wagner
Capper	Hayden	Reed, Pa.	Walsh, Mass.
Caraway	Heflin	Robinson, Ind.	Walsh, Mont.
Couzens	Johnson	Sackett	Warren
Curtis	Jones	Schall	Watson
Dale	Keyes	Sheppard	Wheeler
Deneen	King	Shipstead	
Dill	La Follette	Shortridge	
Edge	McKellar	Simmons	

Mr. WALSH of Montana. I desire to announce that the Senator from Nebraska [Mr. NORRIS] and the Senator from Colorado [Mr. WATERMAN] are detained from the Senate on committee work.

Mr. WAGNER. I wish to announce that my colleague [Mr. COPELAND] is necessarily detained from the Senate by reason of illness in his family.

The PRESIDING OFFICER. Seventy-three Senators having answered to their names, a quorum is present. The question is on the first part of the amendment submitted by the Senator from Colorado [Mr. PHIPPS].

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the second part of the amendment, which the clerk will report.

Mr. JOHNSON. It is on page 4, line 21. Was that included in the question just stated? The segregation which I proposed included lines 1 and 2 to the period on line 2, and then lines 11 and 12 of the printed amendment of the Senator from Colorado.

The PRESIDING OFFICER. The Chair will state the question again.

Mr. ROBINSON of Arkansas. Mr. President, let us have a statement explaining the amendment.

Mr. JOHNSON. The suggestion I have presented, if the Senator from Arkansas will permit me, is to the amendment of the Senator from Colorado segregating the two distinct portions thereof, the first segregation being of lines 1 and 2 increasing the authorization, and lines 11 and 12, with a like increase of authorization, leaving the remainder of it then as a separate amendment to be determined subsequently.

Mr. ROBINSON of Arkansas. The question is now on which amendment?

Mr. JOHNSON. On the two, lines 1 and 2 to the period in line 2, and lines 11 and 12.

Mr. ROBINSON of Arkansas. I observe that there is an increase of $40,000,000 proposed in that item.

Mr. JOHNSON. Yes.

Mr. ROBINSON of Arkansas. I think a statement should be made explaining the necessity for it.

Mr. JOHNSON. The reason for it is because in the report of the board of engineers appointed under the resolution adopted by the Congress at the last session, endeavoring to be overconservative as to the amount which might be required for the entire project, that amount was increased, and that increase constitutes the $40,000,000 to which the Senator has just adverted. It is an authorization alone, and therefore, in order to meet the computation of the board of engineers, we increased the authorization accordingly.

Mr. ROBINSON of Arkansas. How is so great a difference in the estimate accounted for?

Mr. JOHNSON. The difference is, first, in the cost of the all-American canal; and, secondly, in the cost of additional improvements, as it were, to the construction of the dam.

Mr. ROBINSON of Arkansas. Has the committee considered the amendment and reported it?

Mr. JOHNSON. No; the committee has not considered the amendment, because the report was only handed to the Congress at the beginning of the present session.

Mr. ROBINSON of Arkansas. The report was received after the committee had reported?

Mr. JOHNSON. Yes.

Mr. ROBINSON of Arkansas. There was no reference of the amendment to the committee?

Mr. JOHNSON. No.

The PRESIDING OFFICER. The Chair will ask the Senator from California to read that part of the amendment of the Senator from Colorado which constitutes the first segregated part of the amendment.

Mr. JOHNSON. On page 3, line 11, strike out the numerals "$125,000,000" and insert "$165,000,000."

The PRESIDING OFFICER. That has been voted on and agreed to.

Mr. JOHNSON. The other portion is on page 4, line 21, to strike out the numerals "$125,000,000" and insert "$165,000,000."

Mr. ROBINSON of Arkansas. Does not that follow from the adoption of the first amendment?

Mr. JOHNSON. In the bill in two different places those figures are used.

Mr. ROBINSON of Arkansas. Yes; I understand.

The PRESIDING OFFICER. Without objection, the second part of the amendment is agreed to. The question now is on the remaining part of the amendment of the Senator from Colorado.

Mr. KING. Mr. President, the questions asked by the Senator from Arkansas are timely. The amendment before us corroborates the statements heretofore made by some Senators that the estimates made by the Reclamation Service as to the cost of the enterprise are inadequate and inaccurate.

The engineers in the Reclamation Service have been referred to by some Senators and by organizations which have supported the pending measure as almost infallible. Efforts have been made to prove that the reclamation projects have been wisely selected, and that they will prove successful. The fact is that a number of such projects have been failures, and millions of dollars have been wasted in attempts to develop irrigation projects which never can be made successful. The report of the fact-finding commission, appointed by the Secretary of the Interior several years ago, is a challenge to the statements concerning the efficiency of the Reclamation Service. Many of the projects inaugurated under the reclamation law have cost a great deal more than the estimates called for, and thousands of individuals have entered upon the lands with such projects, relying upon the statements of reclamation officers as to the feasibility of the enterprises and the maximum cost which would have to be paid to the Government. There have been many sad experiences in the lives of some who have gone upon reclamation projects and whose sacrifices have been too great to be described.

Reports made by some of the engineers of the Reclamation Service as to the cost of the Boulder Dam project have been, in my opinion, misleading, and have failed to state all the facts. The estimates have been imperfect and far below what the project will cost. I can not believe there has been a conscious purpose upon the part of some of the engineers and some of the officers of the Government to color the facts or to overemphasize various factors. It is certain, however, that factors have not been considered in the estimates submitted and that difficulties and problems certain to be encountered have either been overlooked or their seriousness minimized. Of course, in a project so stupendous, and one involving so many considerations, it is to be expected that in the preliminary studies and in the plans formulated every contingency could not be anticipated, and that errors of judgment would arise and mistakes of fact would occur.

There have been sharp conflicts between some of the reclamation engineers and engineers of the Army and the Federal Power Commission. My recollection is that some of the engineers of the two branches of the Government last referred to stated that the cost of the project would be at least $200,000,000. That was the statement made by Mr. W. Kelley, chief engineer of the Federal Power Commission.

Various figures have been submitted from time to time by engineers of the Reclamation Service as to the cost of the completed project provided for in the pending bill; but finally the Interior Department settled upon $125,000,000 as the total cost of the Boulder Dam, the power plant, and the all-American canal.

Upon a number of occasions I have stated that these figures were entirely too low; that the project might, and probably would, cost more than $200,000,000. So unsatisfactory were the reports submitted by the Government and so contradictory and confusing was the testimony which has been given before the two committees of Congress with respect to this project, that just before Congress adjourned in June, of this year, a resolution was passed directing that a board be appointed to examine the proposed site of the dam to be constructed and review the plans and estimates made therefor. Unfortunately, the authority of the commission appointed under the action of Congress was limited to an examination of the proposed dam at Boulder and Black Canyons. A number of other sites have been suggested by engineers upon which to construct dams, and the advantages of some of these sites have been urged with zeal and ability. We are denied the opinion of the commission referred to as to the advantages, whether superior or otherwise, of these various sites, and as to the feasibility and wisdom of selecting some other site upon which to build a dam.

It is to be observed that the commission or board of engineers appointed by the Secretary of the Interior, with the approval of the President, did not approve of Boulder Canyon as a site for the building of the dam, but gave the preference to Black Canyon. The estimates of the Interior Department and its engineers were not followed by the board, who state that the project will cost $165,000,000; and, further, that if the all-American canal should be completed to the Coachella Valley, $11,000,000 additional should be added to the cost, making the total $176,000,000. The report, however, does contain reassuring features and will remove from the minds of many some of the doubts and fears heretofore entertained. If the report is sound and may be relied upon there is reason to believe that a dam at Black Canyon is feasible and can be so constructed as to be safe. That is an important finding, particularly in view of the many fears felt and expressed both in Congress and throughout the country, that a dam of the height contemplated was not feasible and presented many elements of danger.

I think an impartial examination of the report justifies the view that a reasonably safe dam can be constructed, and that it will be effective in controlling the floods and will materially diminish the amount of silt carried to the lower regions of the Colorado River and to the canal which conveys water to the Imperial Valley. While it confirms the statement that an all-American canal can be constructed, the report demonstrates that the cost will be much larger than estimated.

The report of the commission, however, is not in harmony with the views of the Interior Department and the advocates of the bill before us with respect to the revenue to be derived from power and the sale of storage water. It has been contended by Government officials and organizations in California, that the revenue to be derived from the sale of power would repay the cost of the project within 25 years. The bill calls for the amortization of the entire $125,000,000 within 50 years. The commission, however, reports that—

> if the income from storage can be reasonably increased and the capital invested reduced by the cost of the all-American canal, together with a reduction of all but a part of the cost properly chargeable to the flood protection, it will be possible to amortize the remaining cost with the income from power.

My recollection is that the Secretary of the Interior estimated that the receipts from storage service would be $1,500,000 per annum. I repeat when I state that the bill, following the recommendation of the Interior Department, provides for the construction of the all-American canal and the dam and the power plant, the aggregate cost being $125,000,000, and that the entire cost is to be met from the sale of power and storage water from the reservoir, presumably to the coastal cities of California. We are told by the report, that the cost of the all-American canal must be eliminated and a portion of the cost of the dam charged to flood protection, and subtracted from the amount of capital invested; and that with these two important deductions made from the total cost of the enterprise, it is possible that the residue can be amortized from the income from power.

Mr. President, we are not quite frank in invoking the reclamation act and seeking to bring the all-American canal within all of its terms. Reclamation projects are built from reclamation funds, and are not obtained from the Treasury of the United States. The reclamation fund is a revolving fund produced from the sale of public lands, oil royalties, and so forth. By this bill we propose to appropriate directly from the Treasury of the United States the entire amount necessary for the construction of the all-American canal which the commission estimates to be $38,500,000, not including the interest and not including the continuation of the canal to Coachella Valley at a cost of $11,000,000. It is true that the Secretary of the Interior is required to make contracts with those whose lands are to be irrigated from the canal for the repayment to the Government of the cost of the canal, covering a period of 40 years, but without interest. It seems, therefore, that the Government derives no interest whatever from the $38,500,000, or the $11,000,000 should the canal to the Coachella Valley be constructed.

If we should follow the commission's recommendations, it would be necessary to determine what would be a reasonable and fair proportion of the cost of the dam to be allocated to

flood control, and deduct that amount from the cost of the dam which the commission declares will be $70,600,000. I would be very much gratified if the estimates of the reclamation engineers are found to be correct; and if the revenues to be derived from the sale of power and stored water are as great as estimated by the champions of this bill, then there will be additional grounds for satisfaction.

It is to be hoped that the project will prove a success and that the Government will be almost wholly reimbursed for the costs of the enterprise and that profits will be realized from the sale of power and stored water which may be devoted for the further development of the Colorado River and for the construction of irrigation projects in the upper basin. If the theory of this bill is to be adopted and is to govern in dealing with this most important part of the Colorado River system, then provision should sooner or later be made for the comprehensive development of the river and the utilization of its resources. If the Federal Treasury is to be called upon to develop the lower part of the river and principally for the benefit of California, then, in justice to the upper States which furnish more than 80 per cent of the flow of the river, plans should be formulated and executed for the development of the water and power resources of the river and its tributaries in New Mexico, Utah, Colorado, and Wyoming.

The Government should, in cooperation with the States, investigate the feasibility of erecting water-storage projects and related problems in the upper Colorado River Basin, with the object in view of developing a plan under which the waters of the Colorado River can be put to the greatest possible beneficial use.

If this bill shall become a law the seven States within the Colorado River Basin should enter into a compact or agreement, supplemental to and in conformity to the Colorado River compact, in order to form a comprehensive plan for the development of the river, and to accomplish this end they should authorize the creation of an interstate commission and, perhaps, the creation of corporations or other agencies to carry out the terms of the compact.

The PRESIDING OFFICER. The clerk will state the second part of the amendment.

The CHIEF CLERK. The second part of the divided amendment reads as follows:

Of this amount the sum of $25,000,000 shall be allocated to flood control and shall be repaid to the United States out of 62½ per cent revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization, as provided in section 4 of this act. If said sum of $25,000,000 is not repaid in full during the period of amortization, then 62½ per cent of all net revenues shall be applied to payment of the remainder.

Mr. JOHNSON. Mr. President, I promised at this point to yield for a brief ceremony which it is desired to hold.

RECEPTION TO LADY HEATH, OF ENGLAND

Mr. JONES. Mr. President, I move that the Senate take a recess for five minutes in order to receive Lady Heath, of England.

The VICE PRESIDENT. The question is on the motion of the Senator from Washington.

The motion was unanimously agreed to, and the Senate took a recess for five minutes.

The Senate being in recess,

Lady Heath, escorted by Mr. JONES and Mr. CARAWAY, entered the Chamber, and Mr. JONES said:

Senators, I introduce to you Lady Heath, the celebrated woman aviator of England. She will be glad to meet Senators if they will pass by and shake hands with her.

Lady Heath having been introduced to the Vice President, she stood in front of his desk and greeted the Members of the Senate as they were introduced to her by the Vice President.

At the expiration of the recess the Senate reassembled.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. JOHNSON. Mr. President, the amendment that is now presented becomes of some importance to those who have sponsored this measure, and for that reason a personal attitude respecting it I desire to express.

The amendment allocates the sum of $25,000,000 to flood control. It provides:

Of this amount the sum of $25,000,000 shall be allocated to flood control and shall be repaid to the United States out of 62½ per cent revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization, as provided in section 4 of this act. If said sum of $25,000,000 is not repaid in full during the period of amortization, then 62½ per cent of all net revenues shall be applied to payment of the remainder.

The reason for that insertion, I assume, of 62½ per cent of the revenues is because in the bill 37½ per cent of what I may term the excess revenues or what I think might be designated as profits are allotted to the two States of Arizona and Nevada in equal shares; and I assume the purpose of the amendment is, out of the remainder of this 62½ per cent, to pay, if it can be paid, the allocation of $25,000,000 for flood control.

Mr. President, I speak in personal vein, as I have already indicated. I have lived with this bill now for some years; I have lived with the bill because I deem the structure that is provided for by this proposed enactment to be the greatest constructive work of our generation, and because I believe that great constructive work can be accomplished without in any way burdening the Treasury of the United States.

From the inception of this endeavor upon our part to erect the Boulder Dam there has never been a time when its proponents have not insisted that no raid upon the Treasury ever could be predicated upon the provisions of this bill; that it was an impossibility, indeed, for the charge so often hurled at us to be substantiated, that we were seeking to tax the rest of the United States in order that the Colorado River might be harnessed and this monumental work might be consummated. During the acrimonious discussion concerning this bill outside of the Chamber, in which for some years I have participated, I have been berated by a portion of the press of the United States for endeavoring to take for southern California and for a part of Arizona, indeed, a large sum from the Treasury of the United States, and I have been accused of the desire to go into the Public Treasury and take from the taxpayers of this country money for the particular benefit of a small section of the country. I have ever answered, within the absolute facts, that there was not a word, a scintilla, of truth in that charge; and I pointed always with pride to the provision of the bill found upon page 5 which justified me in the continuous assertion that never under any circumstances would we go into the Treasury for this project, that meant so much to us, and under no circumstances would it ever cost the taxpayers of this land a single penny. I read to you, sir, that provision. It is to me one of the strongest provisions in the bill, and one of the provisions upon which any man could stand in any section of this Nation and answer any criticism of any character leveled against the great expenditure contemplated.

On page 5 of the substitute bill it is provided:

(b) Before any money is appropriated or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues, by contract, in accordance with the provisions of this act, adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of the project, of all amounts advanced to the fund under subdivision (b) of section 2, together with interest thereon, made reimbursable under this act.

Thus, sir, in plain import we have said to the people of the United States, "Before a shovelful of earth is turned, before a single dollar shall be expended in behalf of this project, there shall be in the hands of the Secretary of the Interior the means by which every contemplated expenditure shall be repaid, with interest upon this expenditure."

This, sir, has been my position from the beginning to the end. It is my position to-day. I neither ask nor want any allocation to flood control or for any other purpose that will fall upon the Treasury of the United States or upon the taxpayers of the United States of America. I repeat that. As the author of this substitute bill, I neither ask nor want any moneys to come from the Treasury of the United States, save in the manner provided by the bill, and from which repayment is provided under the very terms of the bill, as I have just indicated.

I feel, sir, and I know, that out of the revenues from this project there can be sufficient realized to meet by amortization in the period of 50 years—every penny, no matter whether it be computed under the estimates of the reclamation engineers or under the estimates of the Board of Engineers which has just reported to the Congress. I care not what others may do, nor do I ask anyone to follow in my footsteps; but for me, sir, to stand here and take any other position after the contest that I have waged and the theory upon which I have wage it during all these years would seem, sir—although, of course, it is not—a species of bad faith of which I can not, and I will not, be guilty. I repeat that either under the esti-

mates of the reclamation engineers or under the estimates made by the engineers recently reporting to the Senate and to the Government, the full sum can be readily met. These figures in remarks to the Senate a couple of days ago I presented; and then I demonstrated, I think, and demonstrated conclusively, the fact of what I say.

If it shall be desired that there be any further elucidation in that regard, the figures are before me, and that elucidation can be made; but I assume that what has been said in that regard in the Senate heretofore and what I said the other night respecting it is more or less familiar to the Members of this body, and that they understand that there is no difficulty in the amortization of the full amount under either the one estimate or the other.

So, sir, I feel constrained personally to vote against the particular amendment.

Mr. PHIPPS. Mr. President, the Sibert report, made in accordance with a resolution adopted by the Congress, shows very careful work on the part of the most competent men in their professions. Some attention should be given to their findings. The amendment now under discussion is one which I proposed, predicated in part upon the recommendations of the Sibert commission. I thought it my duty as chairman of the committe which reported the bill to bring to this body the points that had been suggested by that commission.

Personally, I had always felt that there was a duty resting upon the Government to provide flood control in the Colorado River, particularly in the lower reaches, just as it provides flood control on the Mississippi River. I based the figure of $25,000,000 upon estimates that had been made by engineers as to the cost of proposed flood-control dams on the lower reaches of the Colorado River. One figure I had in mind, which is the one for a dam located at the most appropriate site on the river, showed a total of $28,000,000 for the purposes of that dam construction. I therefore used the figure of $25,000,000.

It seemed to me that the Government could at least waive the interest on that amount of money until it had been repaid. Of course, interest is charged on the moneys to be advanced unless exceptions are made thereto. This is an exception which in my judgment would apply only to the matter of interest, because eventually, granted that this amendment were adopted, of the $165,000,000, if it were all expended—which I do not believe it will be—$25,000,000 is set aside, leaving $140,000,000 to be repaid with interest. After that had been repaid the $25,000,000 would be repaid; but concurrently, out of excess earnings, 62½ per cent of such earnings would be applied to the repayment of this allocation. Assuming that there were no surplus earnings, however, after the $140,000,000 had been repaid with interest, then this $25,000,000 would be repaid out of earnings.

I desire to point out that the difference is one merely of interest. If the project earns, as I believe it will, a sufficient amount over a period of time to repay its cost of installation and upkeep, then the money would be returned. No other provision being made, the surplus revenues go into the Treasury of the United States.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Utah?

Mr. PHIPPS. I do.

Mr. KING. Is not the Senator in error in stating that the Government receives interest upon the entire amount of $140,000,000? According to the amendment of the Senator, $25,000,000 is deducted for the moment. Then the Government makes the advancement for the construction of the all-American canal, and that is not to draw interest. That is to say, we are to pay it out of the fund, but the Government does not get back interest for the amount which is utjilized in the construction of the canal.

Mr. PHIPPS. No; that would come under the reclamation act under the provisions of this bill.

Mr. KING. The Senator knows that while we label it as coming under the reclamation act, as a matter of fact the amount needed for the construction of the all-American canal does not come from the reclamation fund, but comes from this $165,000,000, and no payment is made to the Government of interest upon the advance. In other words, the all-American canal will be constructed with moneys taken from this fund, and no interest whatever will be paid to the Government by those who get that enormous sum.

Mr. PHIPPS. The Senator is correct.

Mr. KING. So that the $140,000,000, then, does not draw interest.

Mr. PHIPPS. No; it does not all draw interest. The Senator is correct in that regard.

Mr. President, I hope my statement has been clear, so that there is no misunderstanding. I think it is a matter for the Senate to consider and decide. Of course, this provision is not in the House measure, and necessarily it would have to meet with the approval of the House if adopted here.

Mr. VANDENBERG. Mr. President, I feel bound to submit an observation at this point.

While the primary interest affected by this great structural project are exclusively localized in the West, there has been a distinct and an emphatic interest in the project in the East and the Middle West, and there has been an emphatic discussion revolving primarily around this fundamental question, namely, Is this a self-contained project financially, as the distinguished Senator from California has insisted from the moment the project was born?

We have had that discussion in Michigan; we have had it in Illinois; we have had it all through that area of the Nation; and we have persistently answered that under the terms of the bill the Treasury of the Nation is called upon for not one single penny in order to produce this great flood-control result.

As the situation stands up to the moment that the amendment of the distinguished Senator from Colorado appears, this still is the warrant in the proposed law. As a matter of factual net result, even if the amendment be adopted, the Treasury still will be reimbursed for every penny that is involved in the project. It is the testimony of the distinguished Senator from Colorado, although he is the author of this pending amendment, that in his judgment the Treasury will be fully reimbursed in spite of the latitude in his amendment; and it is the emphatic testimony of the Senator from California, who knows more about this measure than any other Senator, and who unhesitatingly declares that the Treasury will be reimbursed, and who presents eloquent and decisive figures to prove it. Therefore, we confront this option—either to leave the warrant for the payment of the whole sum in the bill or to remove the warrant upon the last $25,000,000, although we fully expect the payment to be made whether the warrant is there or not.

Mr. President, in view of the nature of the discussion up and down America upon this bill, and in view of the promise that has been made to millions and millions of people who are not related primarily to the project but emphatically are related to the tax rolls of the Nation, and in view of the promises that have been made to them that this bill does not involve a drain upon the Treasury, I respectfully submit that at this final moment, when this great enterprise is finally coming to fruition, it is tragic that the warrant should be withdrawn in any degree and any loophole or chance left for anybody to say that the bill has ceased to live up to its original prospectus and now does involve a drain upon the Treasury. Such action would seem to deny that we possess the courage of our convictions. I refuse to accept any such misleading classification. It but invites still more misunderstanding.

I feel that the amendment of the Senator from Colorado should be defeated in the interest of consistency with the theory upon which this entire project has been erected and in consistency with the theory upon which it has been defended up and down this Nation by Senators who have no relation to the States that are involved, who are willing and eager to assist in the great enterprise that is entailed but who want to remain in the same position they always have occupied, namely, that of defending a project which is fiscally self-contained and which continues to be fiscally self-contained even though the warrant be partially withdrawn.

I hope the warrant will stay in the bill.

Mr. PITTMAN. Mr. President, I think that under the report of the commission there may be some doubt in the future, not at present, but in the future, as to whether this power could pay the costs, including the $25,000,000. It is true that it has been estimated by the Department of the Interior, and I think the estimates are largely sustained by the commission, that within 50 years, by selling the power at the switchboard at 3 mills per kilowatt-hour, the cost could be amortized in 50 years. But suppose that, considering the competitive price of steam in Los Angeles, you can sell it for but 2 mills per kilowatt-hour. Two mills per kilowatt-hour would not amortize the total amount in 50 years, according to the report of the commission. So you are taking chances as to whether they can sell it at the switchboard for 3 mills, and if, peradvanture, the competitive price of steam power in Los Angeles reached a figure so that no one could afford to pay over 2 mills per kilowatt-hour for electricity at the switchboard, then you could not pay.

This is the situation: If you do not believe it is the duty of the Congress of the United States to protect the Imperial Valley and western Arizona against floods, you have no right

to vote for this bill under any consideration. This is not a power scheme, because we have a law regulating that. This is not a reclamation scheme, because we have a separate law covering that. There is but one excuse for this bill in this form, and that is that it is the constitutional duty of Congress to regulate interstate commerce, to protect and improve navigation on rivers, and so on.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. VANDENBERG. Admitting that the only justification for this act is in its flood protection character, what is the justification for linking a power project with a flood project, except for the purpose of making the power project finance the flood project?

Mr. PITTMAN. The Senator is entirely right; that is the only excuse for it. But the question is, suppose the power that can be generated there can not pay back all this money in 50 years. Then does the Senator think we should not have any flood control because of that fact.

Mr. SHORTRIDGE. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. SHORTRIDGE. Indulging that supposition, suppose that after 50 years have come and gone and the Government has not been fully, as of that remote time, reimbursed, should it cause us to hesitate to pass this bill?

Mr. PITTMAN. No; it should not cause us to hesitate to pass this bill. I do not think the duty of Congress to provide for flood protection should be affected by the consideration of whether the Government is going to lose any money or not. It is an obligation that has been imposed on Congress by the Constitution of the United States. It is an exclusive power of Congress that has been taken away from the States. There is no body except the Congress of the United States that can protect against flood destruction in such a case as now confronts us in southern California and western Arizona. It is no use discussing whether or not the power from that dam will pay the cost in full or not. The question is, should the dam be built, and at what price can the power be sold? The bill now provides that it shall be sold at a competitive price.

This is the trouble: This amendment of the Senator from Colorado does not provide that the $25,000,000 shall not be paid. All it provides is that the Government may commence this work when they have contracts that will insure the repayment of all except $25,000,000 in 50 years, and that the $25,000,000 will either be paid during the 50 years or after the 50 years. That is all there is to it.

I think we are careless, very careless, if we state that this dam shall not be built if the Department of the Interior can not contract for the sale of this power at a price that will return $140,000,000 in 50 years. All we do by this amendment is this, we say that if the Government can contract for the disposal of power that will pay back all of this advancement for the dam in 50 years, then it can start to build; and then, if there is any surplus during the period of amortization 67½ per cent will apply to the $25,000,000, and if it is not all paid off during the period of amortization, then 67½ per cent of all net revenues after amortization shall be applied.

What will be the net revenues after amortization? After amortization the net revenues will be nearly $10,000,000 a year. That would pay off in three or four years after amortization the whole $25,000,000 if it had not already been paid off before the end of the time. There is only one thing in this. It does not excuse the repayment of the $25,000,000; it provides that the $25,000,000 shall not be considered in the contract as a factor in determining when this dam shall be started.

I think we are taking serious chances, very serious chances, when we require that the Secretary of the Interior has to find that the returns from power within 50 years will pay the larger sum. It should be only based on the sum less $25,000,000, with the same provision the Senator has made, that payment will be during amortization if possible, and if not possible, that it will be after amortization. I think it is very careless to take a chance on that.

The PRESIDING OFFICER. The question is on agreeing to the second division of the amendment offered by the Senator from Colorado, which the clerk will report.

The CHIEF CLERK. On page 3, line 11, after the figures "$165,000,000," insert the following:

Of this amount the sum of $25,000,000 shall be allocated to flood control and shall be repaid to the United States out of 62½ per cent revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization, as provided in section 4 of this act. If said sum of $25,000,000 is not repaid in full during the period of amortization, then 62½ per cent of all net revenues shall be applied to payment of the remainder.

Mr. VANDENBERG. I ask for the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. FESS (when his name was called). I have a pair with the junior Senator from Maryland [Mr. TYDINGS], who is absent. Not knowing how he would vote if present, I withhold my vote.

Mr. MOSES (when his name was called). I have a general pair with the junior Senator from Louisiana [Mr. BROUSSARD]. He being absent, and I being unaware as to how he would vote if present, I withhold my vote.

The roll call was concluded.

Mr. ROBINSON of Arkansas. I desire to announce that the senior Senator from Mississippi [Mr. HARRISON] is necessarily absent. He has a pair on this question with the Senator from South Dakota [Mr. NORBECK].

Mr. WAGNER. I wish to announce that my colleague the senior Senator from New York [Mr. COPELAND] is necessarily detained from the Senate by illness in his family. On this question he has a pair with the junior Senator from New Jersey [Mr. EDWARDS].

Mr. SHEPPARD. I desire to announce that my colleague the junior Senator from Texas [Mr. MAYFIELD] is detained from the Senate by illness.

Mr. EDGE. I wish to announce that my colleague the junior Senator from New Jersey [Mr. EDWARDS] is necessarily detained from the Senate. I will let this announcement stand for the day.

The result was announced—yeas 49, nays 19, as follows:

YEAS—49

Ashurst	Fletcher	McNary	Steck
Barkley	George	Oddie	Steiwer
Bayard	Glenn	Overman	Stephens
Bingham	Goff	Phipps	Swanson

So the second division of Mr. PHIPPS's amendment was agreed to.

The VICE PRESIDENT. The Chair calls the attention of Senators to the fact that the hour of 3 o'clock having arrived, debate is now limited to 15 minutes under the unanimous-consent agreement.

Mr. PHIPPS. Mr. President, I call the attention of the Chair to an amendment which I have had printed and lying on the table, and which I now offer.

The VICE PRESIDENT. The Senator from Colorado proposes an amendment, which will be stated.

The LEGISLATIVE CLERK. On page 2, line 22, after the word "purposes," strike out the period and insert a colon, and the following:

Provided, That such hydroelectric plant and incidental structures shall not be constructed by the Secretary of the Interior if a satisfactory contract or contracts can be entered into with a State or States, or public subdivisions thereof, or individuals, associations, or corporations, in the order of their priority, for the construction of such plant and for the fullest economic development of electrical energy.

Mr. PHIPPS. Mr. President, I desire to say that this proposal was discussed and considered by the Committee on Irrigation and Reclamation, and it was left out on a very close vote. Since that time expressions from the President of the United States indicate his very strong opposition to a project in the form provided for in the House bill, which would be limited to construction by the Federal Government alone.

The proposed amendment would put it in the alternative so that in the event that the States themselves, municipal governments, or political subdivisions of a State, or private enterprise,

did not present to the Secretary of the Interior a proposal which, under the terms of the bill, he considered satisfactory in that it would insure return of the investment within the time and within the terms prescribed in the bill, then the Secretary of the Interior would have authority to construct at Government expense, with Government money, the power plant, provided he could satisfy himself that contracts made for the sale of the power or the leasing of the plant would bring the terms which would reimburse the Government for the outlay.

Mr. President, I do not care to speak and can not speak more than once on the bill, but I shall be glad to answer any questions Senators may desire to propound.

Mr. BORAH. Mr. President, I would like to ask the Senator a question.

Mr. PHIPPS. I shall be glad to answer the Senator if I can.

Mr. BORAH. Do I understand the Senator's amendment is to strike out certain portions of the bill?

Mr. PHIPPS. No; it is to add to the clause which authorizes the Secretary of the Interior to construct a plant at Government cost, a proviso that will authorize him to contract with States or municipalities or political subdivisions or with private enterprise for the construction of such plant.

Mr. BORAH. Does it leave it discretionary with the Secretary of the Interior as to which he shall do?

Mr. PHIPPS. It does, in the order of their priority.

Mr. JOHNSON. Mr. President, if the Senator will yield to me, I think I can put it in a word.

Mr. PHIPPS. I yield.

Mr. JOHNSON. This is one of the most important amendments presented to the bill and determines the much-discussed question in reference to power and possibly determines the policy which the United States Government shall now determine to be the policy of the Government in reference to works of this sort where power may be generated. The amendment of the Senator from Colorado postpones, as I understand it, the rights of the Government to erect a generating plant until every other conceivable possibility may have been exhausted. That is correct, is it not?

Mr. PHIPPS. I do not think it goes quite to that extent.

Mr. JOHNSON. We will not put it that broadly; but it postpones the right of the Government to construct a generating plant until there shall have been exhausted all efforts with the State, with the political subdivisions thereof, with individual associations, and with corporations in the order of their priority. Here is one of the controversial questions in relation to the bill and in relation to the policy which shall be pursued by the United States hereafter in the development of its water power. When the Senator from Colorado has concluded I desire to be heard.

Mr. BORAH. I will wait until the Senator gets through.

Mr. JOHNSON. I did not mean to interrupt the Senator from Colorado, but I thought perhaps I could make the situation clear in a word.

Mr. McKELLAR. Mr. President, I want to ask a question of the Senator from Colorado.

Mr. PHIPPS. I yield.

Mr. McKELLAR. The amendment provides:

> If a satisfactory contract or contracts can be entered into with a State or States, or public subdivisions thereof, or individuals, associations, or corporations, in the order of their priority.

What priority is referred to?

Mr. PHIPPS. The priority there would be between political entities and private enterprise.

Mr. McKELLAR. Which would have the prior right? I do not understand that expression.

Mr. PHIPPS. A State would have priority over a municipality, for instance.

Mr. McKELLAR. Does the Senator mean in the order of the priority as stated in the amendment?

Mr. PHIPPS. It could be so construed.

Mr. McKELLAR. It ought to be stated clearly if that is so. I do not agree with the Senator's amendment at all.

Mr. BORAH. As I understand the amendment, in the first place no construction of the power proposition is to be made by the Government until the Government has undertaken to have it done either through the State, a municipal organization, or private association. Secondly—and this is a very important part of it, it seems to me—it is provided—

> That such hydroelectric plant and incidental structures shall not be constructed by the Secretary of the Interior if a satisfactory contract or contracts can be entered into—

And so forth.

Who is to determine whether it is a satisfactory contract?

Mr. PHIPPS. The Secretary of the Interior. In the paragraph referred to we give him the power to construct, and this is a proviso amending that authority.

Mr. BORAH. In all probability that is the same as if there was no authority at all to construct on the part of the Government.

Mr. PHIPPS. No; I do not agree with the Senator in that, because it does not take away from the Secretary of the Interior his authority. It simply gives the Secretary the authority to determine for himself whether or not the works can be satisfactorily constructed through contracts with a State or private enterprise before he resorts to construction out of the funds in the Public Treasury.

Mr. EDGE. Mr. President, as I understand the amendment, in effect it expects the Secretary of the Interior to exhaust all other possible efforts to construct before the Government itself constructs.

Mr. PHIPPS. In other words, to satisfy himself that the provisions of the bill for repayment and other things can not be met by a contract with a municipality or private enterprise. Have I given full answer to the Senator's question?

Mr. EDGE. Not entirely. I have not compared the amendment with the section it proposes to amend, so I am not entirely familiar with the authority granted there. As I analyze the amendment, whatever the power given in the section which it proposes to amend, that power is waived or temporarily laid aside until the Secretary of the Interior exhausts any one of these possibilities to have a power plant constructed.

Mr. PHIPPS. That is substantially correct. He must determine first whether or not his authority to construct can be complied with through these various sources before he resorts to expenditure of Federal money.

Mr. BORAH. The Secretary of the Interior is to be the sole judge of whether it is to be more satisfactory to construct privately than publicly?

Mr. JOHNSON. That is quite true.

Mr. BORAH. Yes; it is true. It can not be otherwise under the proposed amendment.

Mr. BRATTON. Mr. President, I had intended to ask the Senator from Colorado a question, but I think it has been answered by the statements just made. The power of the Government to construct a plant is completely suspended and inert until the Secretary of the Interior negotiates with the State first. If he fails there, then it is with the subdivision; if he fails there, then it is with the private concerns; and if he fails from any of those sources to get an offer that he considers satisfactory, until that time the power of the Government to act is completely suspended.

Mr. PHIPPS. With reference to the power plant.

Mr. BRATTON. Yes; and the operation of it.

Mr. PHIPPS. Yes.

Mr. JOHNSON. Mr. President, I hope the Senate will give me its attention for just a few moments, so that there may be a thorough understanding of exactly what the situation is with reference to power. The Senate bill contains three options. Necessarily the matter has been left in an elastic state because of the size of the project and because of the necessity for financing such a tremendously enormous sum; but the three options provided by the Senate bill are, first, that the Government may lease the water at the dam for power purposes; secondly, that the Government may erect a generating plant and wholesale the power; and, thirdly, that the Government may erect a generating plant and lease units of power of such generating plant.

We have sought to arm the Government in every way that it is possible for the Government's protection and for the protection of our people. Originally, before this bill crystallized into its present shape, there were not the three options embraced within it, but the Government itself, after considering the bill and considering it at length and with great care, finally suggested the matter respecting the construction of a generating plant. I read the language of the Secretary of the Interior under which the amendment was made which authorizes the Government to erect that generating plant. He said:

> The building of a unified power plant by the Federal Government in the place of allocating power privileges as proposed in the bill, is regarded as more efficient and cheaper. It will obviate controversies between applicants, and long delays in their adjustment. In the end, results will, I believe, be superior to those possible under an allocation of privileges. The area for the location of separate power sites is restricted. Allotments would not be equal in value. Some allottees would, therefore, have an advantage over others. It would result in the creation of operation and administration controversies to be avoided and which a unified development will avert.

In pursuance of that direction the bill was amended, in order that the Government might have all three of the options, which

might be exercised as the situation developed and as the circumstances demanded.

Now, what is proposed by the Senator from Colorado [Mr. PHIPPS]? That the Government be postponed in doing the very thing that the Government demanded of the proponents of this bill until every other method has been exhausted in the matter of the allocation of power or the making of contracts for power. The question arises, then, whether we shall now tie the hands of the Government of the United States in this bill in relation to the generation of power by others than the Government, or whether we shall leave the Government free to protect the people. That is the point that is involved. It is not a question of Government ownership at all; it is not a question of Government operation at all; it is not a question of the Government distributing power, nor a question of the Government retailing power, nor of the Government going into business in the slightest degree. The only question is whether we shall take from the Government the right, where power is generated in an amount greater than ever before contemplated by any works, to protect itself and its people and relegate it to the postponement of its right and its duty.

Mr. PHIPPS. Mr. President, will the Senator from California yield for a question?

Mr. JOHNSON. I yield.

Mr. PHIPPS. I wish fully to understand whether the Senator from California is opposed to having in this bill a clause which will permit construction by the States, by municipalities, or by private enterprise?

Mr. JOHNSON. Of course not. The bill so provides. I am saying that the Federal Government shall have the power—that is all—to protect itself if it shall be necessary, and the option and the right to erect a power plant, and that that option and that right shall not be taken from the Government by any act of Congress.

Mr. PHIPPS. Mr. President, I ask the Senator if he will be good enough to indicate the section and line in the bill where that is made clear?

Mr. JOHNSON. Where what is made clear?

Mr. PHIPPS. Where it is made clear that these plants may be constructed by States, by municipalities, or by private enterprise.

Mr. JOHNSON. The leasing clauses make that clear. The fact that the Secretary of the Interior has the right under the provisions of the bill either to lease the power, to lease the water, to lease units of power, or to construct a generating plant. That is where and how.

Mr. PHIPPS. I call the Senator's attention to the fact that the only place in the bill where, I believe, he will find that a lease is provided for is on page 11, beginning in line 16, where the language reads:

> or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy as herein provided.

Is not that correct?

Mr. JOHNSON. But the entire proviso reads:

> The Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of any Government-built plant, with right to generate electrical energy, or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy as herein provided.

Mr. PHIPPS. That relates to the main dam itself beyond question.

Mr. JOHNSON. Of course, it relates to the main dam itself.

Mr. ODDIE. Mr. President——

The VICE PRESIDENT. Does the Senator from California yield to the Senator from Nevada?

Mr. JOHNSON. I yield.

Mr. ODDIE. I should like to ask the Senator a question. He referred to the statement made by the Secretary of the Interior in regard to the clause on which he just commented. Does not the Senator believe that the President had knowledge of and sanctioned that statement of the Secretary of the Interior?

Mr. JOHNSON. Most assuredly I do. On what theory can it be maintained that one of the distinctive arms of the Government in a matter of grave consequence and great importance adopts a policy and then that the head of the Government is at variance with that policy? I can not for a moment tolerate any such suggestion.

Mr. FESS. Mr. President, will the Senator yield?

Mr. JOHNSON. I yield.

Mr. FESS. I understand from the Senator's interpretation, that the Government can under the amendment offered by the Senator from California—that is, under the original Senate bill—proceed to contract for the erection of a plant by private enterprise?

Mr. JOHNSON. Certainly, or erect it itself. The elastic power is given to the Secretary of the Interior. It is necessary in the administration of the bill.

Mr. FESS. I should like to say if the Senator will permit me——

Mr. JOHNSON. Certainly.

Mr. FESS. That I should like to vote for a measure that will give the authority to the Government to contract with private enterprise. I should not like to vote for a bill that would make it compulsory and leave no other option except the Government doing the work itself. Yet, at the same time, I would not want the bill defeated because of an incident such as that.

Mr. JOHNSON. The difference between the House bill and the Senate bill is exactly what has been indicated by the Senator from Ohio. The House bill was amended upon the floor so that under the House bill which is before the Senate, as well as the substitute Senate bill, by what is known as the Davenport amendment the erection of a generating plant is made mandatory upon the Government, while under the Senate bill it is not made mandatory; it is merely an option which the Government may exercise as the circumstances may determine or warrant. The reasons presented for the Davenport amendment were cogent and persuasive.

Mr. FESS. As I understand the interpretation of the amendment of the Senator from Colorado, the Government might say, "We are not satisfied with the proposals and therefore will never construct the plant; we are wating to be satisfied by the proposals of various agencies."

Mr. JOHNSON. That may be so, but I think that it postpones any right of the Government until every other means has been exhausted.

Mr. FESS. That appears to be the case to me.

Mr. BORAH. It not only postpones, but it prohibits until the party in power in the Interior Department has made up his mind that it is better to go into it as a Government operation than as a private enterprise. It is left absolutely with him.

Mr. JOHNSON. That is true.

Mr. EDGE. Is not that true under the bill without the amendment?

Mr. BORAH. If we get a chance to vote on the so-called Davenport amendment, it may not be so.

Mr. EDGE. I am speaking of the bill as described by the Senator from California.

Mr. JOHNSON. In the Senate bill the matter is left optional with the Government, that is, with the Secretary of the Interior, who is the administrative officer under this plan; it is left optional with him whether or not he, for the Government, will build the plant, lease the units or wholesale the power.

Mr. ROBINSON of Arkansas. It is optional with him whether the plant shall be built by private or public effort.

Mr. JOHNSON. Yes, sir.

Mr. ROBINSON of Arkansas. That was not comprehended in the statement which the Senator made.

Mr. JOHNSON. Yes, sir; that is so.

Mr. ROBINSON of Arkansas. Under the Senate bill the Secretary of the Interior would have the power to determine whether the power plant shall be constructed by private or public agencies.

Mr. JOHNSON. Exactly; and if the Senator will turn to the bill, the Davenport amendment, in order to make it mandatory on the part of the Government, struck out in line 16, page 11, the words:

> or alternatively to enter into contracts of lease for the use of water for the generation of electrical energy.

Mr. STEIWER. Mr. President, will the Senator yield?

Mr. JOHNSON. I yield.

Mr. STEIWER. May I ask the Senator from California if the authority to permit private enterprise to build hydroelectric works is to be found in the language just alluded to on page 11 of the substitute bill commencing in line 13?

Mr. JOHNSON. Yes, sir.

Mr. STEIWER. Further answering the question just propounded by the Senator from Arkansas [Mr. ROBINSON], it occurs to me that I should call attention to the language there used. It is there provided—

> That the Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of any Government-built plant.

Mr. JOHNSON. Yes.

Mr. STEIWER. With the right to do certain things. Is it not worthy a moment's consideration of the Senator from California as to whether the words "Government-built plant" shall remain in the bill?

Mr. JOHNSON. They ought to remain. There follows, however, the alternative, if the Senator will read a little further, which is:

or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy.

Mr. BORAH. If this amendment should be defeated, then the Senate bill would be before us?

Mr. JOHNSON. Yes, sir.

Mr. BORAH. And if we chose to do so we could offer the Davenport amendment, which would raise the question directly?

Mr. JOHNSON. Exactly.

Mr. PITTMAN. Mr. President, I think the objection, if there is any, to the language in the bill as it now stands is this:

In one place in the bill it provides that the Government may construct this plant and contract with regard to the sale of electricity at the switchboard, or that it may contract for the use of the water for the generation of electricity. But, sir, on page 2, at line 16, we find this apparently contradictory statement:

Also to construct and equip, operate, and maintain at or near said dam a complete plant and incidental structures suitable for the fullest economic development of electrical energy from the water discharged from said reservoir.

I think if we were to insert, on line 17, after the word "dam," the words "or cause to be constructed" the whole bill would then be in perfect harmony.

Mr. JOHNSON. The Senator may be correct in that; but, at the same time, I deem it wholly unnecessary, because the authorization on page 2 is a mere authorization—that is all—for the construction of a plant. It is nothing more than that. If you will observe, the Secretary of the Interior is hereby authorized to do thus and so—to construct, equip, operate, and maintain. After he is authorized to construct a plant he is authorized to enter into contracts for the lease of a unit or units of any Government-built plant, or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy. It is merely that he is given an authorization to erect a plant, then to lease it wholesale, to lease it in units, or, alternatively, to lease the water; but he does not have to construct the plant at all.

Mr. PITTMAN. No; he may not. He is only authorized to build a dam, but it is taken as an instruction that he shall build it.

Mr. JOHNSON. No; he is only authorized to build the dam and he is only authorized to build the plant. That is quite so.

Mr. PITTMAN. And he is authorized to build the plant.

Mr. JOHNSON. Exactly.

Mr. PITTMAN. Now, at a later place in the bill it states that he may, if he sees fit, lease the water instead of building the plant.

Mr. JOHNSON. Certainly. What is the provision that the Senator suggests? If it will make it any plainer, I have not the slightest objection to it.

Mr. PITTMAN. I would suggest inserting, after the word "dam," on line 17, page 2, the words "or cause to be constructed."

Mr. JOHNSON. All right.

Mr. PITTMAN. I think if that is done, even from the viewpoint of the Senator from Colorado, his amendment is entirely unnecessary.

Mr. JOHNSON. If there is no objection I will accept the amendment of the Senator from Nevada and insert it. Is there any objection to that?

Mr. KING. Mr. President, has the Senator from California the floor? I do not desire to take him from the floor.

Mr. JOHNSON. No; I want to dispose, first, of the suggestion of the Senator from Nevada. I accept it; and if there is no objection, Mr. President, I ask that the amendment be made as suggested—that is, that after the word "dam" in line 17, page 2, there be inserted the words "or cause to be constructed."

Mr. KING. That is to say, as I understand the Senator from California, we are not considering in the suggestion just made by him the amendment offered by the Senator from Colorado [Mr. PHIPPS].

Mr. JOHNSON. It came up in conjunction with the consideration of that amendment, of course.

Mr. KING. I ask so that there may be no misunderstanding; I have no objection to that amendment.

Mr. PHIPPS. Mr. President——

Mr. KING. I yield to the Senator from Colorado.

Mr. PHIPPS. This being a separate amendment from the one we are talking about in a sense, and yet virtually the same thing, it seems to me that with his usual facility the able Senator from Nevada has found a solution for a difficulty. The bill was inconsistent, to my mind and to the minds of some others, in that the first section does not correspond with the language of the later section to which I called attention. If it is satisfactory to accept this amendment, which the author of the substitute amendment now under consideration is willing to do, that will be acceptable to me, and I shall thereupon ask permission to withdraw the amendment I have offered.

Mr. JOHNSON. All right, sir.

Mr. BORAH. Mr. President, that makes it interesting to know what the effect of this amendment will be if it is accepted. Does it accomplish the same thing that the amendment of the Senator from Colorado will accomplish?

Mr. PHIPPS. No; it does not.

Mr. JOHNSON. I do not so understand it at all. I do not understand that the amendment in the slightest degree alters the options to which I have adverted, which the Government has; and that, I take it, is the understanding of the author of the suggestion.

Mr. PITTMAN. That is the idea, except that it makes it harmonious in both places.

Mr. KING. Mr. President, I think I have the floor; and I will conclude what I have to say.

Mr. JOHNSON. Mr. President, will the Senator yield for a question? Do I understand that the Senator from Colorado now has withdrawn his amendment?

Mr. PHIPPS. That is what I was about to ask leave to do. That is predicated, of course, upon the acceptance of the amendment of the Senator from Nevada.

Mr. JOHNSON. That is adopted.

Mr. PHIPPS. If that is adopted, then I desire to withdraw my amendment.

Mr. KING. Mr. President, let me ask the Senator from Colorado, then, in view of his statement, whether he understands that the amendment which has just been accepted compels the Secretary of the Interior, before the Government shall construct the power plants, to afford to municipalities or to the States or to private individuals the opportunity to build the plant?

Mr. PHIPPS. No; it does not. It does not impose any order of priority in which proposals may be considered.

Mr. KING. Does it require him to make the offer at all? Does the bill, as it is now perfected by the acceptance of the amendment offered by the Senator from Nevada, compel him to seek any outside agency for the construction of the dam; or may he not, in the exercise of authority conferred upon him, proceed and build the dam without giving any opportunity to Los Angeles or to any municipality or to any State to bid upon the project?

Mr. PHIPPS. That is my understanding.

Mr. KING. That is my understanding; and if the Senator is under the impression that there is any obligation upon the part of the Secretary of the Interior as the bill now stands, without the Senator's amendment, to make the offer to Los Angeles or any municipality or any corporation or individual to enter into a contract for the construction of the power plant, then the Senator would be mistaken, for no such requirement exists now.

Mr. PHIPPS. No.

Mr. KING. And he may, as I say, construct a power plant without giving to any organization or city or State the option to construct it.

Mr. PHIPPS. I am perfectly aware of that. The Senator is correct.

Mr. EDGE. Then, Mr. President, may I ask why the Senator from Colorado withdraws his amendment?

Mr. PHIPPS. I withdraw it because I believe we can safely leave the matter to the department. I do not believe the department is going to resort to the expenditure of Federal money for the purpose of constructing a power plant without finding out whether or not the requirements may be met by private enterprise. I believe private enterprise will ask for the opportunity to present proposals or offers to construct and use this plant.

Mr. ROBINSON of Arkansas. In all probability the head of the department, following the suggestion of his chief, would prefer to have the plant constructed at private expense if a satisfactory arrangement could be made.

Mr. PHIPPS. That is my belief.

Mr. PITTMAN. Mr. President, I wish to correct an error. At least, as I understood both the Senator from Utah and the Senator from Colorado, they have made a misstatement with regard to the effect of this bill.

The bill expressly provides, in subdivision (c) of section 5, commencing on the bottom of page 8:

Contracts for the use of water and necessary privileges for the generation and distribution of hydroelectric energy or for the sale and delivery of electrical energy shall be made with responsible applicants therefor who will pay the price fixed by the said Secretary with a view to meeting the revenue requirements herein provided for. In case of conflicting applications, if any, such conflicts shall be resolved by the said Secretary, after hearing, with due regard to the public interest, and in conformity with the policy expressed in the Federal water power act as to conflicting applications for permits and licenses—

Under the Federal water power act, States and municipalities are given a priority over corporations and individuals in the event of conflicting applications.

The bill goes on further to say:

Except that preference to applicants for the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy, or for delivery at the switchboard of a hydroelectric plant, shall be given, first, to a State for the generation or purchase of electric energy for use in the State, and the States of Arizona, California, and Nevada shall be given equal opportunity as such applicants.

I mean to say that no matter which of the options the Secretary of the Interior sees fit to utilize, the priority of States and municipalities to license rights or to buy the power at the switchboard is still maintained in the bill.

Mr. JOHNSON. I want to make that emphatically plain—that the preferential rights that are accorded at the present time under the law are preserved by this act, and that those preferential rights are exactly as indicated by the Senator from Nevada.

The VICE PRESIDENT. The question is on the amendment of the Senator from Nevada to the substitute bill.

The amendment to the amendment in the nature of a substitute was agreed to.

Mr. JOHNSON. Mr. President, that vote was on the amendment suggested by the Senator from Nevada?

The VICE PRESIDENT. Yes. The Senator from Colorado withdrew his amendment, as the Chair understands.

Mr. PHIPPS. Yes; I withdraw my amendment.

Mr. PITTMAN. Mr. President, are amendments now in order?

The VICE PRESIDENT. The amendment of the Senator from Colorado having been withdrawn, the original amendment, in the nature of a substitute, is now open to further amendment.

Mr. PITTMAN. Mr. President, I desire to offer two amendments. I should like to have them read first together; then I will offer them separately.

The VICE PRESIDENT. The amendments will be stated.

The LEGISLATIVE CLERK. On page 5 it is proposed to strike out all of subdivision (b) and to insert:

Before any money is appropriated for the construction of said dam or power plant, or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues by contract, in accordance with the provisions of this act, adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of said works, of all amounts advanced to the fund under subdivision (b) of section 2 for such works, together with interest thereon made reimbursable under this act.

Also insert, at the bottom of page 5:

Before any money is appropriated for the construction of said main canal and appurtenant structures to connect the Laguna Dam with the Imperial and Coachella Valleys in California, or any construction work is done upon said canal or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, for the storage of water in said reservoir and for the delivery thereof through said main canal for irrigation, in accordance with the provisions of the reclamation law, adequate in his judgment to insure payment of all expenses of construction, operation, and maintenance of said main canal and appurtenant structures in the manner provided in the reclamation law.

Mr. PITTMAN. Does the Senator from California desire to have that printed and that it go over?

Mr. JOHNSON. This is the first time I have heard it. The latter amendment is one which I do not think ought to be adopted, but I say that only after listening to the reading of it. These have just been offered?

Mr. PITTMAN. Yes; just offered.

Mr. JOHNSON. They have not been printed?

Mr. PITTMAN. No.

Mr. JOHNSON. I desire that they shall be printed, so that I may look at them hereafter.

Mr. PITTMAN. Let me say this to the Senator: On page 6 is subdivision (b), which is in the same language as each one of these amendments, except that in that are grouped not only the dam and the power house but the all-American canal; and it is required that no appropriations can be made, or any construction work started, on the dam or the power house or the canal, or anything, until contracts have been obtained to repay the cost not only of the dam and the power house but the canal.

I have just separated them; that is all. In one case I state that no appropriation shall be made and no construction started on the dam or power house until contracts have been obtained that will guarantee the repayment of the cost of the building of the dam and the power house within 50 years. Then I provide exactly the same thing with regard to the canal. I require in that amendment that no appropriation shall be made or construction started on the all-American canal until the Secretary of the Interior has made provision by contract or otherwise for the repayment of the expenses incurred in building that canal by the sale of water.

Mr. JOHNSON. I ask that those amendments be printed so that we may have them before us.

Mr. PITTMAN. I will present one other amendment and have it printed. I will not offer it to-day. I ask that it be read and then printed. I call the particular attention of the Senator from California to this amendment.

The VICE PRESIDENT. The clerk will read.

The LEGISLATIVE CLERK. On page 2, line 13, after the word "law," insert the words "and shall not be paid out of revenues derived from the sale or disposal of water power or electric energy or for water for potable purposes outside of the Imperial and Coachella Valleys."

Mr. PITTMAN. My reason for that, of course, is that, as has been stated by the Senator from California and others familiar with this bill, there is no tax upon the hydroelectric power for the building of the all-American canal.

Mr. JOHNSON. Let it lie upon the table and be printed, please.

The VICE PRESIDENT. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from California.

Mr. KING. Mr. President, I invite the attention of the Senator from California and the Senator from Nevada, as well as the other Senators who are interested in this bill, to the first page and the concluding part of the first sentence on the next page. I will read it, so as to make relevant the amendment which I shall offer.

That for the purpose of controlling the floods, improving navigation, and regulating the flow of the lower Colorado River, providing for storage and for the delivery of the stored waters thereof for reclamation of public lands and other beneficial uses exclusively within the United States—

I emphasize these words—

and for the generation of electrical energy as a means of making the project herein authorized a self-supporting and financially solvent undertaking.

The Secretary of the Interior, subject to the terms of the Colorado River compact, is authorized to undertake certain steps. It would seem that this language is somewhat contradictory to the general purpose as explained by the Senator from California and conceded by all, namely, not only to make the enterprise solvent but for the purpose of obtaining revenue from the sale of water and from the sale of power. I am not so sure that the words which I have just read would not limit the Secretary of the Interior if he saw fit to charge such rates only for the sale of power and the sale of water as would make it financially solvent.

What is a financially solvent enterprise? It may be financially solvent if it pays its debts. I think, perhaps, it may be said, technically speaking, that an institution is solvent financially though there are no profits derived from the execution of the purposes for which it was organized, and in view of the fact that there is no difference of opinion as to the object of the project, and no difference of opinion as to the desire that it shall not only be a solvent institution, in the sense of its capacity to pay its debts, but that it shall produce some revenue, I think the limitation expressed in the words which I have just read should be modified, and that may be done very readily by adding, after the word "energy" and before the word "as," on line 6, page 1, the words "together with revenues from the sale of power," so that it will read:

and for the generation of electrical energy, together with revenues from the sale of power, as a means of making the project herein authorized a self-supporting and financially solvent undertaking, and in order that it will yield reasonable profits.

I shall not ask a vote upon those two amendments, but I shall offer them for the consideration of the Senate to-morrow, and, if necessary, I shall have them printed. I believe that the words of the bill, without modification, would require the Secretary of the Interior only to make the enterprise solvent and would not require of him to make contracts that would meet the obligations of the Government and obtain profits, as I am sure it is desired shall be done from the power and from the sale of water.

Mr. HAYDEN. Mr. President, I have just listened to the reading of an amendment proposed by the Senator from Nevada [Mr. PITTMAN]. I have prepared an amendment of my own that will accomplish the same purpose, which I intend to offer now and ask to have printed. I think we are in entire accord and also in accord with the author of the bill, that the all-American canal should be considered a separate and distinct enterprise from the dam and the power plant.

As the bill now stands, the funds for three purposes are included in one lump sum, money to build the dam, money to build the power plant, and money to construct the all-American canal. The terms of repayment for the dam and the power plant, if constructed by the Federal Government, would be different from the terms of repayment in the case of the building of the all-American canal, which the bill specifies shall be repaid under the terms of the reclamation law. To make the distinction perfectly clear, I shall offer this amendment, which I ask to have read, and to have it lie upon the table.

The VICE PRESIDENT. The clerk will read.

The LEGISLATIVE CLERK. On page 6, line 23, after the words "section 4," insert the following:

Provided, That all such contracts to insure the repayment of all amounts advanced for the construction of the canals and appurtenant structures authorized by this act, and to insure the payment of all expenses of operation and maintenance of said canals and appurtenant structures incurred by the United States, shall conform to the requirements of the reclamation law and shall attach and relate solely to the lands coming under and benefited by such canals and appurtenant structures, and no obligation or burden for the repayment of the amounts advanced for the construction of such canals or appurtenant structures or for the payment of expenses of the operation and maintenance thereof shall be imposed upon the revenues derived from the use of water and appurtenant works and privileges necessary for the generation and distribution of hydroelectric energy and/or the sale of hydroelectric power and/or the storage of water as provided for in this act.

Mr. HAYDEN. There is another item to which I should like to direct the attention of the Senate at this time. The all-American canal is to be connected with the Laguna Dam. The Laguna Dam was originally constructed for the benefit of a Federal reclamation project, partly in California and partly in Arizona, the major portion of it being in the vicinity of Yuma, Ariz. The pending bill contemplates that the main canal leading from that dam shall be enlarged, and shall be jointly used by the Yuma project and the Imperial irrigation district and other lands to be served under the all-American canal.

The water users of the Yuma project are fearful of certain terms in the bill which authorize the Secretary of the Interior to transfer the title of the canal and appurtenant works to the districts which use it in proportion to their investment. It is felt by the people of the Yuma project that title to the Laguna Dam and the main canal, so far as they are jointly used, should remain in the United States.

There is also in existence a contract between the Imperial irrigation district and the United States authorizing a connection with the Laguna Dam, which contains, among its terms, a provision that power may be developed at a point known as Pilot Knob, and that the Yuma project shall enjoy a share of the advantage of the development of power at that point.

In order fully to protect the interests of the Yuma reclamation project, I offer the following amendment, which I ask to have read and to have it lie upon the table.

The VICE PRESIDENT. The clerk will read.

The LEGISLATIVE CLERK. On page 13, line 11, insert the following:

Provided, That title to the Laguna Dam and auxiliary works and the main canal from said dam down to and including the Syphon Drop shall remain in the United States until otherwise provided by Congress and all power possibilities on said main canal below Syphon Drop down to and including Pilot Knob shall be developed for the joint benefit of the Yuma reclamation project and districts or other agencies having a beneficial interest therein.

Mr. JOHNSON. Let that be printed and lie on the table, so that we may get it to-morrow.

Has the Senator from Arizona presented all of the amendments he desires to be heard upon?

Mr. HAYDEN. At this moment; yes. I have an amendment pending relating to power that we shall want to take up a little later.

Mr. JOHNSON. There is one pending in relation to taxation, is there not?

Mr. HAYDEN. Yes.

Mr. JOHNSON. Is the Senator ready to proceed with that?

Mr. ASHURST. Mr. President, I have an amendment which I present at this time.

Mr. JOHNSON. I suggest, if the amendment has not yet been presented, that it may be printed.

Mr. ASHURST. It has been printed. It is my amendment No. 35, and is as follows: On page 16 of the substitute, H. R. 5773, after the word "district," on line 23, insert the following language: "and the express consent of the Yuma County Water Users' Association."

Mr. President, section 10 empowers the Secretary of the Interior, with the consent of Imperial irrigation district, to modify the existing contract, dated October 23, 1918, authorizing the use of Laguna Dam for the diversion of water for the irrigation of Imperial Valley. That may appear reasonable enough to the casual observer, since the Secretary of the Interior and Imperial irrigation district are the parties of record to the contract in question. It should be understood, however, that the contract, in all of its details, relates to property rights and interests vital to the welfare and existence of Yuma project.

The Secretary of the Interior is a party to the contract merely in his capacity as an officer of the United States, in which the title to the Yuma project temporarily vests. The contract was the result of long negotiations, in which the negotiating parties were representatives of Imperial irrigation district on one hand and Yuma project on the other.

The protection to Yuma project, as embodied in the completed agreement, was the result of hard labor and determined effort over the attempts on the part of the California representatives seeking, as they now seek, every advantage for themselves. To disturb the status quo of this contract and agreement without the consent of the organization conducting the affairs of the landowners and water users of Yuma project, which originally confirmed its provisions, would constitute a violent outrage of the rights of those water users.

It may be asserted that the Secretary of the Interior will consult the interested project members, or their representatives, before modifying the contract, as did a previous Secretary of the Interior when the instrument was originally formulated. That does not necessarily follow. Secretaries come and Secretaries go. Secretaries have been known to be partisan. They are human and humanity is beset with frailty. The water users of Yuma project might, indeed, be consulted, but their protests might go unheeded. In any event, it is proposed to empower the Secretary, with the consent only of one party, namely, the Imperial irrigation district, to modify this contract in which Yuma project's very existence is bound up, and the peril that lurks in the provision is clearly shown by the alacrity with which a proposal made in committee for an amendment that would have required the consent of the Yuma County Water Users' Association, was rejected by champions of this bill. The suggestion that Yuma project has any interest in the contract was treated with contempt.

If there were any doubt as to the seriousness of the purpose intended in the authority extended by section 10, it would be removed by turning back to section 7.

By the agreement entered into on October 23, 1918 (appendix to House hearings on all-American canal in Imperial County, Calif., 1922, p. 245), it is declared that Laguna Dam was constructed "in connection with the Yuma project, Arizona-California"; that Imperial irrigation district desires to secure "the right to divert water at said dam"; that the said district is authorized to contract with the United States "for a supply of water"; that the district shall proceed to secure cost data "for the diversion of water" at Laguna Dam and thence "through the existing main canal of the Yuma project" and for a main canal to "connect with said main canal of the United States at a point described as Siphon Drop"; that "for the right to use the Laguna Dam, the main canal, and appurtenant structures, and the maintenance and operation thereof."

Mr. SHORTRIDGE. Mr. President——

Mr. ASHURST. I yield to the Senator from California.

Mr. SHORTRIDGE. The provision of section 10 speaks of the contract between the United States and the Imperial irrigation district, to which contract the Yuma irrigation district was not a party.

Mr. ASHURST. On the face of the paper—that is, on the face of the bill, it might appear that the Senator is correct; but the fact is the Secretary of the Interior acted as umpire or referee for the Yuma County Water Users' Association.

Amity and friendship have always existed between the Imperial Valley irrigation district and the Yuma County Water Users' Association and I respectfully insist that it is not fair, it is not just in legislation, when there is a contract existing between two parties, to say that the contract may be modified at the behest and suggestion of or upon the consent of but one of the parties thereto.

Senators, I simply propose that the contract shall not be modified without the consent of both irrigation districts. I appeal to the sense of fairness in men, that the contract should not be changed at the behest of one of the parties thereto.

It would be a grinning bit of irony if one of the counties in the State of Arizona, which has always been for this bill, should be singled out and penalized by the bill.

The PRESIDING OFFICER (Mr. MCNARY in the chair). The question is upon agreeing to the amendment submitted by the senior Senator from Arizona.

Mr. JOHNSON. Mr. President, may I suggest that I will take this up with the Imperial Valley people to-night and that we let it rest until to-morrow.

Mr. ASHURST. That is a sensible suggestion. Let it go over until to-morrow.

Mr. SHORTRIDGE. Mr. President, this is a contract entered into by two parties, the Government on the one side and the Imperial irrigation district on the other. The observations of the Senator seem to have been prompted by the thought that somebody is hostile to the Yuma County Water Users Association. It is new doctrine that a party not a party to a given contract must be consulted before that contract is modified. Of course, the Government in entering into this contract had a very lively regard, a kindly, sympathetic regard, for the people of Arizona; and if the Government was so actuated and had that regard for the people of Arizona, may not the Senator assume that the Government would not so modify the contract as to injure the people so directly interested?

Mr. ASHURST. Mr. President, I will say that I have no fear that the present Secretary of the Interior would do any injustice. I have imbibed a respect for the character and attainments of Mr. West, the present Secretary of the Interior, but we have had Secretaries of whom I could not say that.

Mr. SHORTRIDGE. Just this word, then, in conclusion: We did trust our Government, speaking through the Secretary of the Interior, in respect to entering into the contract in question.

Mr. ASHURST. May I interrupt the Senator?

Mr. SHORTRIDGE. Pardon me just a moment. I am perfectly willing to trust the present or future Secretary or Secretaries of the Interior. What the Senator from Arizona asks, out of his ardent love and devotion for his people, is that we must rely in the future upon the Yuma County Water Users' Association, and if they should be unreasonable, or what not, the Government nevertheless could not and the Imperial irrigation district nevertheless could not in any wise modify, even to any extent, the existing contract. In other words, the Senator is asking us to place implicit, irrevocable confidence in certain of his constituents, and for all time. However, let the matter rest, so far as I am concerned, until to-morrow.

Mr. ASHURST. I am willing that it may go over until to-morrow.

Mr. JOHNSON. Mr. President, the Senator from Utah [Mr. KING] has a number of amendments that I think can be disposed of very readily. If he will do me the kindness to offer them, we can take them up one by one and, I think, dispose of them within a very few minutes.

Mr. KING. Mr. President, I offer the following amendment, which has been printed and lying on the table.

Mr. JOHNSON. I am speaking of the printed amendments.

The PRESIDING OFFICER. Let the amendment be reported by the clerk.

The CHIEF CLERK. On page 20, after line 20, insert the following:

SEC. 15. In furtherance of any comprehensive plan formulated hereafter for the control, improvement, and utilization of the resources of the Colorado River system and to the end that this act may be administered as a unit in such control, improvement, and utilization, any commission or commissioner duly authorized under the laws of any ratifying State in that behalf shall act in an advisory capacity to and in cooperation with the Secretary of the Interior in the exercise of any authority under the provisions of sections 4, 5, and 14 of this act, and shall have at all times access to records of all Federal agencies empowered to act under said sections, and shall be entitled to have copies of said records on request.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

Mr. KING. I offer the amendment which I now send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 7, line 14, strike out the words "disposed of as may" and insert the words "kept in a separate fund to be expended within the Colorado River Basin as made," so as to make the paragraph read:

After the repayments to the United States of all money advanced, with interest, charges shall be on such basis and the revenues derived therefrom shall be kept in a separate fund to be expended within the Colorado River Basin as may hereafter be prescribed by the Congress.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from Utah.

The amendment was agreed to.

Mr. KING. Mr. President, I ask the attention of the Senator from Colorado to the amendment which I am about to send to the desk. I am inclined to think that it is at variance with an amendment which I have heretofore offered. Let the amendment be read, and then I shall explain it.

The PRESIDING OFFICER. The amendment proposed by the Senator from Utah will be stated.

The CHIEF CLERK. On page 2, line 15, it is proposed to strike out the words "irrigation or water for potable purposes," and to insert "use in Imperial Valley, or in said valley and additional areas served by said canal."

Mr. KING. Mr. President, when I first approached this subject it seemed to me that the lands in the Imperial Valley which are to receive such great benefit from the construction of the storage reservoir should be subjected to a reasonable payment annually for the benefit derived from the storage. I, therefore, offered an amendment proposing to strike out the provision which would exempt them from the payment of rentals for the use of the storage water. Upon consideration and upon further explanations made by persons living in the Imperial Valley, and by gentlemen representing what might be called the California side of the case, I reached the conclusion that perhaps it might not be just, in view of the fact that the Imperial Valley people would have to construct the canal, to impose upon them burdens for storage purposes and levy a charge upon them annually for water received from the reservoir. I reached that conclusion in part for the reason that the lands in the Imperial Valley which have been irrigated have, perhaps, a vested right, and it might be questionable whether we would have the power to impose a charge upon them for the use of water. At any rate, I gave them the benefit of all doubt, and I have offered this amendment, the effect of which, if adopted, will be that the Imperial Valley and the Coachella Valley will not be required to make payment for storage waters.

Mr PHIPPS. Mr. President, may I ask the Senator from Utah a question?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Colorado?

Mr. KING. I yield.

Mr. PHIPPS. Did the Senator hear read the amendment bearing on this same feature of the bill that has been proposed by one of the Senators, I believe the Senator from Arizona? The amendment was read and ordered to be printed and lie on the table.

Mr. KING. No; I did not hear the amendment read.

Mr. PHIPPS. I think the two amendments relate to the same feature of the bill. I will ask the Senator from Utah if the particular amendment he is now discussing has been printed?

Mr. KING. It has been printed in a different form.

Mr. PHIPPS. But not in the form in which it is now presented by the Senator.

Mr. KING. No.

Mr. PHIPPS. I will suggest to the Senator from California that it might be wise to allow this amendment to be printed and lie over with the others.

Mr. JOHNSON. If there is any objection to the amendment or any desire that that shall be done, it will be agreeable to me.

Mr. HAYDEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Arizona?

Mr. KING. I yield.

Mr. HAYDEN. Mr. President, there is no land under the all-American canal which should be required to pay any charge

for storage of water in the proposed Boulder Canyon Reservoir. One serious objection that those of us who speak for the State of Arizona have had to this bill in its original form has been removed by segregating the all-American canal from the power and the dam project.

It is quite obvious that the landowners in the Imperial Valley under the new arrangement are to be required to assume a very serious financial burden. It is my best judgment, from a knowledge of irrigation conditions in the Southwest, that the burden they are asked to assume is all that they should be required to bear. For that reason I heartily favor the suggestion made by the Senator from Utah that it be made perfectly clear in this bill that no charge for the storage of water shall be imposed upon any land within the Imperial Irrigation District or any other district which derives water from the all-American canal.

Mr. PHIPPS. Mr. President, will the Senator from Utah yield in order that I may ask the Senator from Arizona a question?

Mr. KING. I yield.

Mr. PHIPPS. I should like to ask the Senator if he is aware of the fact that many of the Senators have called attention to the practice under the reclamation law whereby every project that has been so far instituted has been required to pay not only for all canals for transporting the water but also for the dams which retain the water for storage purposes? To leave the matter open might, perhaps, be satisfactory in that the department could determine whether or not the lands to be irrigated could bear a burden in addition to their proportionate cost of the canals necessary to be constructed. Now, to write into a bill a declaration whereby lands to be irrigated under this project will be exempted from ever being taxed for any portion of the cost of the dam or for storage of water that is desilted might be establishing a precedent which should be very carefully considered before being finally adopted.

Mr. HAYDEN. I may say to the Senator that I have given very careful consideration to the matter. In the instance of the Salt River project the Federal Government constructed a dam. Later, with money obtained from the water users, power plants were developed. The water users' association uses the proceeds from the sale of power to aid in reimbursing the Government for the cost of the project.

There the storage of water and the development of power are all in one project, while in this instance the dam is located many, many miles above the point of diversion on the Colorado River, and the bill contemplates that the receipts from the sale of power will reimburse the United States for the cost of that dam. If the United States is to be reimbursed for the cost of the dam at Boulder Canyon from power, what is the necessity for securing a revenue from farmers in the Imperial and Coachella Valleys who, it is true, are benefited by the dam, but who likewise are required to expend large sums of money in the development of their own project?

Mr. PHIPPS. Mr. President, if the department is in position and finds itself able to enter into contracts that will guarantee the return of those advances, that is one thing; but suppose it is unable to do that unless it is in position to figure that revenue may be derived from waters that are stored for use on irrigation projects or for domestic supply as potable water, as expressed in one item of the bill?

Mr. HAYDEN. Mr. President, as to revenue from the latter source I think it is entirely feasible to obtain it and entirely proper that it should be obtained, because an essential service is to be rendered to the municipalities in southern California not only in impounding but in desilting potable water. In the second place, a charge of that kind would be spread so thinly over the consumers of domestic water that they would never notice it; but when there is added a substantial charge for storage on top of the other reclamation charges the cost would be made so high that the farmers in the Imperial and Coachella Valleys could not bear it. That is my judgment upon this subject.

Mr. JOHNSON. Does the Senator from Colorado object to the consideration of the amendment?

Mr. PHIPPS. I would prefer that it go over until to-morrow, because I think there are other Senators interested in that feature who would like to consider it.

Mr. JOHNSON. Let the amendment go over until to-morrow, then.

The PRESIDING OFFICER. The amendment will be passed over.

Mr. KING. Mr. President, I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 20, line 16, it is proposed to strike out the word "headwater."

Mr. JOHNSON. There is no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. KING. I offer another amendment, and I will say in explanation that undoubtedly in the committee in following the language of another bill, a power bill, there was left out the word "recapture." I present this amendment in order to conform to the language in the other bill which has been followed in this bill.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 12, line 6, after the comma following the word "profits," it is proposed to insert the words "recapture and/or."

Mr. JOHNSON. I have no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. KING. I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 1, line 2, before the word "Colorado," it is proposed to strike out the word "lower."

Mr. JOHNSON. I have no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. KING. I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 10, at the beginning of line 13, it is proposed to strike out the words "others similar" and to insert the words "any other."

Mr. JOHNSON. I have no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. JOHNSON. That constitutes all the amendments the Senator from Utah has to offer, does it not?

Mr. KING. I have presented one which has only been printed to-day and Senators have not had an opportunity to examine it. Then, I have suggested two other amendments which have not been printed and which are very brief.

Mr. JOHNSON. The one to which the Senator refers as having been printed to-day relates to what matter, may I inquire? I do not ask the Senator to reply in detail.

Mr. KING. I hope the Senator will permit me to read it, because I regard it as very important, and I think that is in the interest of the constructive development of the river and the bringing together in harmonious relations of all the States. If I may be permitted in my own time, I will read it. It is as follows:

That the consent of Congress is hereby given to the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming to negotiate and enter into compacts or agreements, supplemental to and in conformity with the Colorado River compact for a comprehensive plan for the development of the Colorado River and providing for the storage, diversion, and use of the waters of said river. Any such compact or agreement may provide for the construction of dams, headworks, and other diversion works or structures for flood control, reclamation, improvement of navigation, division of water, or other purposes and/or the construction of power houses or other structures for the purpose of the development of water power and the financing of the same; and for such purposes may authorize the creation of interstate commissions and/or the creation of corporations, authorities, or other instrumentalities.

Such consent is given upon condition that a representative of the United States, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

No such compact or agreement shall be binding or obligatory upon any of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

Mr. President, may I say, perhaps repeating what I said a moment ago in a little different phraseology, that it looks as though the dove of peace is going to rest upon those who have participated in this long struggle. I think that it is eminently wise for the States to enter into a compact that will draw them more closely together for the comprehensive development of the river and for the purpose of utilizing all of its potentialities. That will not, of course, interfere with this project. It may be denominated as supplemental to it; and I am sure that, upon examination of this amendment, it will commend itself to the judgment of all Senators interested as well as to the judgment of other Members of this body.

Eastern States, such as Pennsylvania, New Jersey, and New York, have recently entered into a compact for the division and utilization of the waters of the Delaware River. I am sure that that will be productive of amicable relations between the States. More and more, because of the character and importance of interstate streams, the States are going to form

compacts and enter into agreements dealing with the rights of States, respectively; and this is in harmony with the development of interstate arrangements with regard to matters connected with themselves, and for the purpose of relieving them of Federal bureaucracy and the intrusion of the Federal Government into matters that ought to be determined and handled solely by the States.

The PRESIDING OFFICER. The question is upon the adoption of the amendment offered by the Senator from Utah.

Mr. PHIPPS. The Senator from Utah did not ask for its present consideration.

Mr. KING. I should be glad to have it adopted, but Senators will want to give it more thought.

Mr. JOHNSON. I shall be very glad to study it; but I confess that personally I shrink from making another compact.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Utah will be passed over for the day.

Mr. HAYDEN. Mr. President, I should like to inquire of the Senator from California whether he prefers that I give notice of an intention to move to strike out subsection (c) of section 8 of the bill, which relates to the constitution of Arizona, and do that to-morrow, or whether we can dispose of it this evening.

Mr. JOHNSON. The constitution of Arizona is a rather bulky tome, and it is a very important matter. I shall be very glad to listen to an exposition concerning it to-night if the Senator desires. I leave it with him whether he would like to present his constitution to-day or save it for another day, for our delectation and pleasure then.

Mr. HAYDEN. The Senator is in charge of his own bill. I am willing to proceed or I am willing to wait another day, just as he pleases.

Mr. KING. Let it go until to-morrow.

Mr. CURTIS. Mr. President, it is desired to have an executive session; but we are perfectly willing to stay a half hour longer if the Senator wishes.

Mr. KING. We have made such good progress that I suggest we proceed with the executive session and take up that matter to-morrow.

Mr. JOHNSON. I shall be very glad to do that because I have the assurance of all of our brethren here that we probably may conclude the consideration of the bill to-morrow; and all of us are striving to that end.

PAYMENT OF SALARIES OF OFFICERS OF CONGRESS

Mr. WARREN. From the Committee on Appropriations I report back favorably House Joint Resolution 346, providing for payment of compensation to the employees of Congress for the current month on the 20th instant; and I ask unanimous consent for its immediate consideration.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. J. Res. 346) authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month, which was read, as follows:

Resolved etc., That the Secretary of the Senate and the Clerk of the House of Representatives are authorized and directed to pay to the officers and employees of the Senate and House of Representatives, including the Capitol police, the office of legislative counsel, and employees paid on vouchers under authority of resolutions, their respective salaries for the month of December, 1928, on the 20th day of that month.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After three minutes spent in executive session the doors were reopened.

RECESS

Mr. CURTIS. I move that the Senate take a recess until to-morrow at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 35 minutes p. m.) the Senate took a recess until to-morrow, Friday, December 14, 1928, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES

THURSDAY, *December 13, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Once more, our blessed Heavenly Father, Thou hast dispelled the thickened shadows and brought us to a new day, which tells of Thy mercy that never fails. Yes, it is a glad new day, with its stretch of open sky, its golden light, and its crystal air. For every embrace of Thy love the doors of our hearts are thrown open in gratitude. Upon all peoples, from sea to sea, let Thy blessing come. Bring them closer and closer together. O gather them about one altar, that they may worship one Father and live together as brothers. Unite all lands and inspire them to make the old earth a happier dwelling place for all Thy children. With ready hearts may we do Thy will and love the greater truths of God. We pray in the name of Jesus, the world's Redeemer. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS

Mr. SPEARING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing an address delivered by R. P. Putnam, lieutenant colonel, United States Marine Corps, at the Broad Street Methodist Church, Richmond, Va., on Armistice Day, November 11, 1928. There are a great many historical facts stated in the address, and I think it would be of general interest.

The SPEAKER. The gentleman from Louisiana asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

Mr. UNDERHILL. Mr. Speaker, reserving the right to object, I think it is due my colleagues to know why I have offered some objections to encumbering the RECORD with matters which are not of particular concern, or which do not have their origin in or any connection with the Congress. When the late Hon. James R. Mann was a Member of the House, and up to the time of his death, he had the task, self-imposed, I suppose, of protecting the RECORD. After his death we began the practice of inserting in the RECORD so many editorials, speeches, magazine articles, and even advertisements, that those of you who are Members of long standing will remember that it soon reached such proportions as to become a scandal. As the practice of ignoring the rules, which are very clear on the subject of extraneous matter in the RECORD, I felt that somebody might take a position which would not be unwelcome or embarrassing to those who were burdened with the responsibility of conducting the affairs of the House, so I have objected from time to time to my colleagues' requests for unanimous consent for leave to print in the RECORD. I recognize that this is a very disagreeable task, that it brings me no friendships or credit, but I feel that somebody ought to do it even at a sacrifice. If I am going to be consistent, I have got to be fair; I shall have to object to those on my own side of the House as well as to those on the other side of the House placing in the RECORD matters which have no connection whatever with the Congress, although they may sometimes be very interesting, sometimes informative, sometimes entertaining. I do not know otherwise just where the line can be drawn.

In justification of my position, I feel that this explanation is due to the Members of the House, and also the notice that I shall, whenever I am on the floor, object to such matters as have really no business in the CONGRESSIONAL RECORD. [Applause.]

Mr. Speaker, I object.

The SPEAKER. Objection is heard.

ADDRESS OF PRESIDENT COOLIDGE BEFORE THE INTERNATIONAL CIVIL AERONAUTICS CONFERENCE

Mr. WARREN. Mr. Speaker, I ask unanimous consent to insert in the RECORD as a part of my remarks the very excellent speech delivered by the President of the United States yesterday before the International Civil Aeronautic Conference.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. WARREN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the very excellent speech delivered by the President of the United States yesterday before the International Civil Aeronautics Conference, which is as follows:

Members of the conference: This year will mark the first quarter century of the history of human flight. It has been a period of such great importance in scientific development that it seems fitting to celebrate it with appropriate form and ceremony. For that purpose this conference has been called, and to the consideration of the past record and future progress of the science of aeronautics, in behalf of the Government and people of the United States, I bid you welcome.

Twenty-five years ago, at Kitty Hawk, N. C., occurred an event of tremendous significance. It was the first extended flight ever made by man in a power-driven heavier-than-air machine. How more appropriately could we celebrate this important anniversary than by gathering together to consider the strides made throughout the world in the science and practice of civil aeronautics since that day, and to discuss ways and means of further developing it for the benefit of mankind.

Others, whose names will long be remembered, had done much to solve the problem, but it remained for the able, persistent, and modest brothers from Dayton to demonstrate completely the possibility of a machine raising itself by its own power and carrying a man in sustained flight.

Human flight with wings, which had intrigued the imagination since the beginning of time, became a practical reality on the day that the airplane of Wilbur and Orville Wright rose from the wind-swept dunes of the Atlantic coast. The elder brother lives with us only in memory, but Orville Wright, who piloted that first plane, is still actively interested in that science. We are glad to have him as one of our delegates to this conference.

CITES RAPID EXPANSION

No achievement of man in the progress of civilization has had a more rapid expansion. In the early days the ability to fly was ascribed to gods and demigods, to spirits and supernatural and mythical beings, both of the human and animal family.

Pegasus, the winged horse, and Daedalus and Icarus are two of the innumerable examples which come readily to mind. The yearning to fly probably always has been in the human breast. But for centuries its fulfillment was considered as visionary, unattainable. Even within our memory utter impossibility was expressed by saying "Might as well try to fly."

There is a wide difference between the romance of flying and aeronautics as a science. Archytas, Greek mathematician and mechanician of the first half of the fourth century B. C., made a flying pigeon. This seems to be the earliest authentic record of mechanical flying.

Leonardo da Vinci, artist and scientist extraordinary, who lived in Italy over 400 years ago, left some interesting treatises and drawings on the principles of human flying. It was not until 1783, however, that a man was actually lifted from the ground and carried along in the air for a considerable distance. The vehicle was a hot-air balloon, devised by the Montgolfier brothers, paper makers of Auvergne, France.

One of them was invited to address the Royal Academy of Science, and ascents were made for the King and Queen. In 1852 a Frenchman built a dirigible balloon propelled by steam, but further progress was delayed until the development of the internal-combustion engine. Alberto Santos Dumont, brilliant young Brazilian, began in Paris in 1898 to construct a navigable balloon. About the same time, in Germany, Count von Zeppelin started to work out his rigid airship. Only recently have we welcomed here the latest example of his skill.

In the meantime—beginning with Cayley, Englishman and "father of aerodynamics," who died in 1857, and continuing down through Henson and Stringfellow, Maxim, Ader, Lilienthal, and Langley (of Washington)—scientists were gradually, with gliders and other devices, working out the problem of a heavier-than-air machine.

LAUDATION FOR WRIGHTS

With genius, indomitable perseverance, and a will to overcome obstacles, the Wrights, mindful of what had gone before, applied themselves to the solution of the problem. They experimented at Kitty Hawk for three seasons, and in the fourth, on December 17, 1903, success crowned their efforts. I understand the delegates to this conference will visit this historic spot on Monday, the exact day of the anniversary, to pay tribute to their achievement. The first flight lasted only 12 seconds.

Three more were made the same day. One of 59 seconds carried the plane a distance of 852 feet. It was wrecked by the wind and tests ended for the time. Further experiments were made in Dayton in 1904 and 1905.

In the latter year a Wright plane traveled for 24 miles at the rate of 38 miles an hour. Three years later one was bought by the War Department, our Government being the first to utilize this new device.

Other countries took up the idea and for a period rather outstripped us in flying. The crossing of the English Channel by the Frenchman Bleriot, considered an astounding feat, was made in 1909. Demands of the World War brought about the rapid advance in both the science and the practice, and in the production of equipment. After the armistice one after the other came the daring flights to annihilate space and time, including the thrilling and solitary journey from New York to Paris by our own Lindbergh in 1927.

It is to the development of aeronautics as an aid to the peaceful pursuits of transportation, of commerce, and of trade that this conference is to direct its attention. We are making a reality of the wonderful vision of Tennyson, who, in his Locksley Hall, wrote in 1842:

"For I dipt into the future, far as human eye could see,
Saw the vision of the world, and all the wonder that would be;
Saw the heavens fill with commerce, argosies of magic sails,
Pilots of the purple twilight, dropping down with costly bales."

After the war European nations began to develop aeronautics as a part of their transportation systems. Passenger lines with heavy government subsidies were established between principal cities.

In America, during the war, 10,000 pilots were taught to fly; hundreds of aeronautic engineers and designers were trained; nearly 17,000 planes were manufactured by thousands of artisans who became skilled in aircraft production in many new factories.

All of this was an important foundation for building up of civil aeronautics. Prior to this period our attention had been directed to the use of the airplane as a carrier of mail. From 1912 the Postoffice Department sought money to establish air-mail lines, but not until 1918 was a special appropriation secured.

GROWTH OF MAIL ROUTES

In May of that year, between Washington and New York, the first regular route was established. This service has been rapidly expanded, until now we have more than 22 mail routes with a daily mileage of nearly 31,000 miles. The air-mail poundage for January, 1926, was 23,000 pounds. In October, this year, 467,422 pounds were carried, as compared with 423,838 in the previous month. Reduction in the postal rates last July doubled the amount carried inside of 30 days.

In 1926 this Government officially recognized the importance of flying by establishing the post of Assistant Secretary for Aeronautics in each of the War, the Navy, and the Commerce Departments. Since then we have made remarkable progress. Then the value of the aeronautic industry in the United States was placed at less than $5,000,000.

To-day it is said to be in excess of $150,000,000. In 1925 the production of aircraft was valued at about $13,000,000; for 1928 the estimate is over $50,000,000.

For the air activities of the Department of Commerce, we spent in 1927 more than $800,000; this year over $3,500,000; and the estimate for 1929 is just under $5,500,000.

Aeronautics have been rapidly advanced in other parts of the world as well. Nearly half of the 70,000 miles of air routes regularly operated in the world are in international air services connecting important cities. Approximately 10,500 are in Latin America, and about 5,000 in Australia. Some have been in operation for several years.

Among the new services opened in 1928 are the Peruvian Navy line over the 6,000 miles between Lima and Iquitos, between Lima and Talara, and the Barranquilla-Guayaquil, Nueve-Laredo, Dakar-Buenos Aires, and Montreal to New York lines. Additional routes are being planned between the United States and the West Indies, South America and Mexico, and Australia and Canada. Important routes being considered are between the Netherlands and the Netherland East Indies and between Great Britain and Australia.

From incomplete reports, it is indicated that about 15,000,000 miles were flown on European air services alone in 1927, more than 200,000 passengers carried, and 10,000,000 pounds of luggage and goods and 3,000,000 pounds of mail. An average of nearly 75,000 miles daily were flown.

It is estimated that these figures will be increased from 25 to 33 per cent for 1928. Most of the European lines have government subsidies. The efficient way in which they are operated has resulted in increasingly better financial reports.

Regular flying in the United States, beginning with a short mail line, has increased, until this year there are approximately 15,500 miles of airways, on which during the first six months of the year nearly 3,250,000 miles were flown on regular schedule.

The daily mileage is estimated at 52,000 miles. We have three important international lines—New York to Montreal, Seattle to Vancouver, and Miami to Habana. Plans to extend the latter to the Isthmus and South America are under way. The transportation companies have been taxed far beyond their equipment. A recent and important development has been the linking of the airplane and the transcontinental railways, providing a rapid journey between distant points. The airplane is used for fast day travel, with a transfer to a railroad for the night journey.

AGE OF AIR TRANSPORT

The nineteenth century was the railroad and steamboat age. The twentieth century will be known for the development of aeronautics and air transport. The airways of the world now have a greater mileage than the railways did in 1850, the twenty-fifth anniversary of the opening of the first railroad built by Stephenson.

Attention has recently been called to the safety of air passenger service, compared with that of railroads in the early days. In 1927 the Imperial Airways (Ltd.) carried 52,000 passengers over 2,500,000 miles without injury to a single passenger. In 1842, 8 English railways, carrying 10,503 passengers over 3,562,338 miles, killed 22 and injured 34 others.

The country-wide tour of Lindbergh in the United States, following his wonderful and spectacular flight to Paris, did much to make America air-minded. A large amount of civil flying is now being done here, and the civilian-owned aircraft number over 6,000.

The aeronautic branch of our Department of Commerce is vigilant, resourceful, and progressive. It has inaugurated a comprehensive system of regulation and control of aircraft manufacture as well as operation. Airways are laid out over the best flying country, and aids to flying, such as beacons and weather reports, are furnished.

Our transcontinental airway from New York to San Francisco is over 2,600 miles long. More than 5,000 additional miles of airways are under the jurisdiction of the Department of Commerce.

An air-information service is maintained and aeronautic research carried on through the Bureau of Standards.

COOPERATION ON AIRPORTS

Valuable cooperation is rendered in the establishment and equipment of airports. On October 1, 1,387 ports were available for the use of the Army, Navy, and commercial flyers. Municipalities and communities in all parts of the country, realizing that air contacts mean more and better business, are planning airports. Nearly 900 more are now in prospect.

Air transport means much to the United States, divided as it is in the west by lofty mountain ranges and deserts. In the early days it took six months to go from Missouri to the Pacific coast. An airplane has traveled across the continent in less than 24 hours.

We are stretching out our arms through the air to Canada and to our other friends and neighbors in the South.

All nations are looking forward to the day of extensive, regular, and reasonably safe intercontinental and interoceanic transportation by airplane and airship. What the future holds out even the imagination may be inadequate to grasp. We may be sure, however, that the perfection and extension of air transport throughout the world will be of the utmost significance to civilization. While the primary aim of this industry is and will be commercial and economic, and the prosperity of the world will be immeasurably advanced by it, indirectly, but no less surely, will the nations be drawn more closely together in bonds of amity and understanding.

This conference, I know, will have far-reaching results in the advancement of a science and industry which appeals both to the spirit and the reason of man and which as the years go by will cement more and more firmly the bonds of international brotherhood.

PRESENTATION OF DISTINGUISHED FLYING CROSS TO ORVILLE WRIGHT

Mr. JAMES. Mr. Speaker, I ask unanimous consent for the present consideration of the bill H. R. 13990, to authorize the President to present the distinguished flying cross to Orville Wright, which I send to the desk and ask to have read.

Mr. GARNER of Texas. Mr. Speaker, before the Clerk begins the reading of the bill, reserving the right to object, does this come with a unanimous report from the gentleman's committee?

Mr. JAMES. Yes.

The SPEAKER. The Clerk will report the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to present the distinguished flying cross to Orville Wright, who met and overcame the earliest dangers in aviation and as its pioneer made possible the achievements which are now stirring the emotions and pride of our people.

With the following committee amendments:

Page 1, line, 4, after the word "Wright," insert "and to Wilbur Wright, deceased," and in line 6, strike out the words "its pioneer" and insert "pioneers."

Line 8, after the word "people," insert: "The posthumous presentation to Wilbur Wright, deceased, shall be made to such representative of the said Wilbur Wright, deceased, as the President may designate."

Amend the title.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. TILSON. Mr. Speaker, reserving the right to object, I wish to say that usually the Speaker has refused to recognize for bills to be called up under unanimous consent except on those days when such requests are in order and has adhered to that policy except where there is an emergency. I think the nature of this bill—that is, its application to the subject matter of the aviation conference being held here this week, and the important anniversary that is coming next Monday—puts it in the class of an emergency and makes it very appropriate that it should be considered and passed at this time.

Mr. JOHNSON of Washington. Mr. Speaker, further reserving the right to object, I suggest to the chairman that he further amend the bill by striking out the word "pioneers" in the proposed amendment. As it would read now if amended it would be:

That the President be, and he is hereby, authorized to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased, who met and overcame the earliest dangers in aviation and as pioneers—

And so forth.

I would like to suggest the advisability of striking out after the word "aviation," in line 18 down to the period in line 8, and I so move.

The SPEAKER. Consent has not been given yet for the consideration of the bill. Is there objection?

Mr. COOPER of Wisconsin. Mr. Speaker, I could not hear the amendment offered by the gentleman.

Mr. JOHNSON of Washington. I am only proposing an amendment; consent has not yet been given. The bill as amended reads:

Authorized to present the distinguished flying cross to Orville Wright, and Wilbur Wright, deceased, who met and overcame the earliest dangers in aviation and as pioneers made possible the achievements which are now stirring the emotions and pride of our people.

I think this bill should read, "Who met and overcame the earliest dangers in aviation."

Mr. COOPER of Wisconsin. And leave out the word "pioneers"?

Mr. JOHNSON of Washington. Yes.

Mr. COOPER of Wisconsin. Why?

Mr. JOHNSON of Washington. Well, it calls upon Congress absolutely to recognize the Wrights as the pioneers.

Mr. BLANTON. Were not they?

Mr. JOHNSON of Washington. Overlooking the efforts of the then distinguished Secretary of the Smithsonian Institution, who was himself a pioneer.

Mr. COOPER of Wisconsin. I object to that amendment if there is a request for unanimous consent. The Wright brothers were the inventors and pioneers.

Mr. JOHNSON of Washington. I shall not object to the consideration of the bill.

The SPEAKER. Is there objection to the consideration of the bill? [After a pause.] The Chair hears none. The Clerk will report the bill.

The Clerk read as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to present the distinguished flying cross to Orville Wright, who met and overcame the earliest dangers in aviation and as its pioneer made possible the achievements which are now stirring the emotions and pride of our people.

The committee amendments were read as follows:

Page 1, line 5, at the beginning of the line insert the words "and to Wilbur Wright, deceased."

Page 1, line 6, strike out the words "its pioneer" and insert in lieu thereof the word "pioneers."

Page 1, line 8, after the word "people," insert the words "the posthumous presentation to Wilbur Wright, deceased, shall be made to such representative of the said Wilbur Wright, deceased, as the President may designate."

The committee amendments were agreed to.

Mr. JOHNSON of Washington. Now, I move an amendment to the bill as amended on line 6, after the word "aviation," strike out the words down to the period in line 8 and put a period after "aviation."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 6, after the word "aviation," insert a period and strike out the remainder of the sentence.

Mr. JAMES. Mr. Speaker, I would like to talk on this.

Mr. MAPES. May we have the language read as stricken out?

The SPEAKER. Without objection, the Clerk will again report the amendment.

The Clerk read as follows:

and as pioneers made possible the achievements which are now stirring the emotions and pride of our people.

Mr. JOHNSON of Washington. As read by the Clerk, the word "its" was dropped.

The SPEAKER. And as amended by the committee amendment it reads "and as pioneers."

Mr. JOHNSON of Washington. In that case I withdraw the amendment offered by me.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended.

On motion of Mr. JAMES, a motion to reconsider the vote by which the bill was passed was laid on the table.

LEAVE OF ABSENCE

Mr. DICKINSON of Missouri. Mr. Speaker, I ask unanimous consent for indefinite leave of absence for my colleague Mr. ROMJUE, who has been called to his home on account of the serious illness of his son.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. COOPER of Wisconsin. Mr. Speaker, a parliamentary inquiry, if it is in order. In this vicinity we did not understand what was done with the amendment offered by the gentleman from Washington.

Mr. JOHNSON of Washington. Mr. Speaker, I withdraw that, finding that the word "its" was stricken out by the committee amendment.

LEAVE TO ADDRESS THE HOUSE

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to address the House next Thursday for one hour, immediately after the reading of the Journal and the disposition of business on the Speaker's desk.

The SPEAKER. The gentleman from New York asks unanimous consent that he may have the privilege of addressing the House next Thursday, immediately after the reading of the Journal and the disposition of matters on the Speaker's table, for one hour. Is there objection?

Mr. CLARKE. Reserving the right to object, Mr. Speaker, on what subject?

Mr. SIROVICH. On the subject of old-age pensions.

Mr. TILSON. Mr. Speaker, reserving the right to object, it is quite possible that on next Thursday an appropriation bill will be taken up, on which there will be general debate. Thus far, I believe, that every request that has been made for time under general debate has been granted. General debate is the vehicle which the House furnishes for such discussion of public questions as my friend from New York wishes to make, and it is much to be preferred to the practice of getting unanimous consent to address the House.

Mr. O'CONNELL. Does the gentleman say that all the time has been allotted?

Mr. TILSON. No; on the contrary, such time as has been asked for on general debate has been granted, so far as I know, in full measure. I believe that all the time asked for thus far on general debate has been granted. I think there will be no difficulty whatever in the gentleman from New York getting time, but it is much preferable to have it granted under general debate than under leave to address the House. The latter practice is rather dangerous at the short session when a number of special orders of this kind are made for time that may be sorely needed for something else. I shall be glad to see the gentleman from New York get such time as he may wish, but I wish he would take it under general debate.

Mr. O'CONNELL. The gentleman from New York says that will be satisfactory to him.

Mr. TILSON. Very well.

INTERIOR DEPARTMENT APPROPRIATION BILL, 1930

Mr. CRAMTON. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089, the Interior Department appropriation bill.

The SPEAKER. The gentleman from Michigan moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089. The question is on agreeing to that motion.

The motion was agreed to.

The SPEAKER. The gentleman from Illinois, Mr. CHINDBLOM, will please take the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089, the Interior Department appropriation bill for 1930, with Mr. CHINDBLOM in the chair.

The CHAIRMAN. The committee will be in order. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15089) making appropriations for the Interior Department for the fiscal year 1930, and for other purposes.

The CHAIRMAN. When the House rose on Tuesday the first paragraph on page 12 had been read.

Mr. BLANTON. Mr. Chairman, with the assurance of the chairman in charge of the bill that it will not be objectionable to him, I offer the following amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BLANTON: Page 12, line 5, after the sum "$600,000," strike out the balance of the line and lines 6, 7, and 8 and insert in lieu thereof the following: "*Provided*, That hereafter no appropriation for this purpose shall be used in payment for any service except bill therefor is rendered within one year from the time the service is performed."

Mr. BLANTON. Mr. Chairman, I ask for recognition.

Mr. STEVENSON. Mr. Chairman, I want to reserve a point of order on it.

Mr. BLANTON. The committee thought it was a salutary provision.

Mr. STEVENSON. That may be; but we have no right to enact legislation on an appropriation bill. I make the point of order on the amendment.

Mr. BLANTON. I want to be heard on the point of order.

Mr. STEVENSON. I also wish to be heard on the point of order. I reserve it.

Mr. BLANTON. I would like to be heard on the point of order, Mr. Chairman.

The CHAIRMAN. The Chair will first hear the gentleman from Texas.

Mr. BLANTON. Mr. Chairman, the point of order, except for one reason, would be good, because it is legislation. But the point of order is not good in this particular instance for the reason that the proviso already in the bill is legislation itself, and it was passed for amendment without any point of order having been made against that proviso. The proviso being itself legislation without a point of order being made against it, it is subject to amendment. That has been held time and time again in this House. It has been held by such parliamentarians as our distinguished floor leader, the gentleman from Connecticut [Mr. TILSON], and numerously by our distinguished Speaker, and by other distinguished parliamentarians.

Mr. CRAMTON. Mr. Chairman, if I may be recognized on the point of order, although I may get a little outside the scope of it, I would not want to admit that the language in the bill is subject to a point of order. In my judgment it is a limitation. The language proposed by the gentleman from Texas, I would feel sure, is clearly subject to a point of order because it relates to all the future, while the language of the bill, even if subject to a point of order, is confined to one year. I wish particularly to have the position of the committee understood.

The language in the bill has been carried for several years and, in my judgment, is a proper limitation and in order. The committee has no objection to the suggestion of the gentleman from Texas, that instead of carrying it in the bill each year it be disposed of as he suggests, so that it will not have to be repeated hereafter. The committee is satisfied whichever way the matter goes.

Mr. STEVENSON. Mr. Chairman, the proviso in the bill is a limitation and, as I understand, is not subject to a point of order—that is, the proviso that is in the bill itself—but this is general legislation attempted to be engrafted upon the proviso, which proviso is at least questionable, but I think is defensible. I object to that kind of legislation. The proposition that we sit here and allow them to legislate for all time on these appropriation bills is one that is attempted to be guarded against by every rule of this House, and especially since the adoption of the Budget system. Therefore I insist upon my point of order.

The CHAIRMAN. The Chair is of the opinion that no matter whether the proviso in the bill originally was subject to a point of order or not, the amendment offered by the gentleman from Texas [Mr. BLANTON] goes beyond the scope and purpose of the proviso in the bill itself. The proviso in the bill itself refers only to the appropriation contained in the bill, while the amendment offered by the gentleman from Texas will operate as a permanent limitation upon all appropriations of this character. It therefore goes beyond the purport of the bill. The Chair will merely refer to a well-known decision by Chairman Frederick C. Hicks, of New York, on January 8, 1923. The Chair believes that decision is ample authority in the present situation, and the Chair sustains the point of order.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to return to the bottom of page 6 of the bill, a paragraph having to do with the making available of other appropriations in the bill for the purchase of books for the various services in order that I may offer an amendment to increase the allowance for that purpose for the Reclamation Service. In explanation of this request to return I would say that Tuesday, while I was engaged on the floor in the discussion of the bill, a letter from the Assistant Secretary of the Interior was handed to me, and glancing at it hurriedly I thought it had to do with the reclamation appropriation much later in the bill. Then when I had more leisure I examined it and found the item in question had really been passed.

Mr. WINGO. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. WINGO. The gentleman suggests that we return to the bottom of page 6. I can not understand the gentleman's discussion with reference to the bottom of page 6.

Mr. CRAMTON. It is the top of page 6. It begins at the bottom of page 5 and the amendment will be offered to the top of page 6.

Mr. WINGO. I suggest that the amendment be reported.

Mr. CRAMTON. It is to increase the allowance for the Bureau of Reclamation from $1,500 to $2,000.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to return to the paragraph in the bill beginning on page 5, line 19. Is there objection? [After a pause.] The Chair hears none. The gentleman from Michigan offers an amendment to that paragraph which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 6, line 3, after the word "Reclamation," strike out "$1,500" and insert in lieu thereof "$2,000."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The Clerk read as follows:

For pay of Indian police, including chiefs of police at not to exceed $70 per month each and privates at not to exceed $50 per month each, to be employed in maintaining order, and for purchase of equipments and supplies, $163,000.

Mr. BANKHEAD. Mr. Chairman, I reserve a point of order against that paragraph for the purpose of making an inquiry of the chairman of the committee. I would like to ask the chairman if there is any law authorizing this appropriation. I note in Cannon's Procedure there is a precedent cited where a point of order made against this item was held to be good because there is no legislation authorizing such an appropriation.

Mr. CRAMTON. I will say to the gentleman from Alabama that that was probably several years ago and before the Snyder Act was passed. Congress in 1921 passed the Snyder Act which included this provision in its terms for the appointment of inspectors, supervisors, and so forth, Indian police, Indian judges, and so forth. So there is specific authority.

Mr. BANKHEAD. But the employment of inspectors and supervisors does not necessarily mean that there is provision for the employment of police.

Mr. CRAMTON. I will read the entire subsection.

For the employment of inspectors, supervisors, superintendents, clerks, field matrons, farmers, physicians, Indian police, Indian judges, and other employees.

Mr. BANKHEAD. Well, if the chairman is satisfied that it is covered by legislation I will withdraw the reservation.

Mr. CRAMTON. It is clear that it is specifically covered.

Mr. BANKHEAD. Then I will withdraw the reservation.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word.

I would like to ask the gentleman from Michigan [Mr. CRAMTON] a question. Going back to the preceding paragraph with respect to the pay of judges of Indian courts where tribal relations now exist and the rates to be fixed by the Commissioner of Indian Affairs, $18,000, how many judges are there?

Mr. CRAMTON. There are quite a number. The salaries are quite low.

Mr. COOPER of Wisconsin. But these are left entirely to the discretion of the Commissioner of Indian Affairs, who may discriminate very greatly. He can, in his discretion, give one judge two or three times as much as another.

Mr. CRAMTON. I may say to the gentleman from Wisconsin that until two or three years ago these Indian judges were all paid the same, and while I may be a little inaccurate, it seems to me it was only something like $15 or $20 a month. At the suggestion of this committee, this was changed and I think the language of the item was changed so as to make it possible to do just exactly what the gentleman from Wisconsin says is possible, and that is to vary the pay, for this reason. As the gentleman from Wisconsin knows, the conditions surrounding these Indians vary greatly. One Indian judge, we will say, is in a Hopi village in Arizona, where all of his people are gathered within a little space and where his work is limited and is performed on his own doorstep without inconvenience or any great amount of time. On the other hand, up in South Dakota on a Sioux Reservation that is many miles in extent, where the Indians are large in number and greatly scattered, where the State laws do not reach many crimes, and where there is no other provision for maintaining order, those judges have to travel maybe 50 miles or 75 miles to get to the place where they hold court and have to spend a considerable amount of time and clearly they are entitled to more pay than a judge giving a limited amount of his time. Still, none of them gets what seems to be a high salary.

The gentleman will be interested in the detailed information which has just been handed me. There are at present, it is stated by Mr. Meritt in the hearings, 32 Indian judges employed at a compensation of $30 per month and 36 at $15 per month. It is not a large amount in any event.

Mr. COOPER of Wisconsin. No; but on general principles it seems to me wrong to give to an executive officer like the Commissioner of Indian Affairs a lump sum of $18,000 to expend absolutely in his discretion in the appointment and compensation of judges for Indians. We would not do that for judges for white people.

All of the conditions spoken of by the gentleman from Michigan, which in some localities differ very materially from those in others, were known to the committee reporting this bill; and the Congress could by law provide that the judges shall receive so much as salary and so much as allowance for transportation, depending upon the locality. We should not give to an executive officer thousands of dollars to spend in his discretion absolutely as to the number of persons he may employ and the compensation each is to receive, and thus afford an opportunity for the greatest sort of discrimination.

Mr. CRAMTON. Mr. Chairman, there are many items in various bills where even greater discretion is given to executive officers. I think it is very possible that there is no other place where the pay of a judge is left in the discretion of a bureau. If Congress were to act and fix their pay formally, it would probably be a good deal larger than it is. It would certainly be larger if we are to judge by the pay of the judges of the whites.

But so far as any danger of abuse of discretion is concerned, the gentleman should understand that the Indian Bureau comes before our committee, which is an appearance before Congress, and states exactly what it is going to do with the money; and there is a moral understanding that the bureau has made with Congress because when we hold these hearings, it is not as much, perhaps, for the committee's benefit as it is for the benefit of the House, and a statement is made in that hearing that the money will be spent in a certain way and that certain salaries will be paid, and then a report comes to us a year later as to what has been done, and if there is a difference then the committee takes action.

It does not seem feasible to itemize all of these details. We accomplish the same results by trusting the officials to carry out their statements.

Mr. COOPER of Wisconsin. Mr. Chairman, I ask for three minutes to reply to that statement.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent to address the committee for three minutes. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. It does not seem to me that the taking of money out of the Public Treasury to be paid to Government employees should be left to the discretion of an executive officer except in most extraordinary circumstances. These are not extraordinary circumstances. The committee knows what each of these employees ought to receive, because the witnesses come before the committee and say so. This could be put into the law, and, in my judgment, it ought to be done.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For the suppression of the traffic in intoxicating liquors and deleterious drugs, including peyote, among Indians, $22,000.

Mr. LAGUARDIA. Mr. Chairman, I offer an amendment to strike out "$22,000" and insert in lieu thereof "$100,000."

The CHAIRMAN. The gentleman from New York offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. LAGUARDIA: Page 12, line 22, strike out "$22,000" and insert in lieu thereof "$100,000."

Mr. LAGUARDIA. Mr. Chairman, I would like to refer to page 716 of the hearings, in which Mr. Meritt appeared before the committee and stated definitely that he needed at least $100,000 to partially control the traffic in liquor among the Indians. He received a very attentive hearing from the distinguished chairman of the subcommittee, the gentleman from Michigan [Mr. CRAMTON], more than whom no one is drier.

Formerly $150,000 was allotted for this service, and Mr. Meritt made a plea, stating that $22,000 was insufficient.

Now, this is typical of the feeble efforts for the control of the traffic in alcohol.

Mr. O'CONNELL. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. O'CONNELL. Why was not this item put in the Treasury Department bill that we passed several days ago, which provided several million dollars for the enforcement of prohibition?

Mr. LAGUARDIA. The control of alcoholic traffic among the Indians dates way back, previous to the eighteenth amendment being adopted.

Mr. O'CONNELL. Fire water?

Mr. LAGUARDIA. Yes; and it was easier to control in pre-prohibition days than it is to-day.

Mr. O'CONNELL. Much easier, I would say to my colleague.

Mr. LAGUARDIA. I would like to know why there has been this letting down. Mr. Meritt made a complete case. The evidence stands uncontradicted. In the hearing the distinguished gentleman from Michigan did not see the necessity of appropriating the sum of $100,000, and I submit they ought to have the amount asked for by Mr. Meritt, and there is no reason why the amount should be reduced.

Mr. SCHAFER. Perhaps the gentleman from Michigan is not so strongly in favor of the enforcement of the law now as in the past. Otherwise he would be in favor of the amendment.

Mr. LAGUARDIA. The gentleman from Michigan did not vote with us the other day.

Mr. CRAMTON. Mr. Chairman, I was about to say—and I did not say it sooner because the gentleman from Wisconsin would have been deprived from displaying his wit—but I have no objection to the amendment.

Mr. LAGUARDIA. Fine! Let it go. [Laughter.]

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent that all debate upon this paragraph and all amendments thereto close in five minutes, and I would like to use some of that time.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that all debate upon this paragraph and all amendments thereto close in five minutes. Is there objection?

There was no objection.

Mr. TILSON. Mr. Chairman, I ask unanimous consent to proceed for two minutes out of order.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent to proceed for two minutes out of order. Is there objection?

There was no objection.

RECEPTION TO LADY HEATH

Mr. TILSON. Mr. Chairman, in response to a request from representatives of the National Woman's Party, I have the honor to present to the House to-day a distinguished representative of a foreign nation. We are honored to-day by having in the Speaker's row in the gallery Lady Heath, one of the world's famous flyers. [Applause.] My information is that Lady Heath holds the altitude record for light planes of all flyers, men and women, although she has been a licensed flyer only since 1925. Last year she flew alone without mechanic or passenger over 11,000 miles from Cape Town, South Africa, to London.

She has made two parachute jumps in England, and was the first person to visit all four countries of the British Isles by air in one day and return to London. She holds the Olympic high-jump record of all women of all nations and the altitude record for light seaplanes in all-metal boat for all persons. Lady Heath is regarded as the leading exponent of the usage of light planes. Finally, she is the only woman delegate to the International Aeronautical Conference. [Applause.]

I ask unanimous consent to extend my remarks regarding Lady Heath in the RECORD by inserting therein a brief statement prepared by her manager setting forth more in detail the achievements of this distinguished aviatrix and some of her impressions of this country.

The CHAIRMAN. The gentleman from Connecticut asks unanimous consent to extend his remarks by the insertion of the matter referred to. Is there objection?

There was no objection.

The matter referred to is as follows:

Lady James Heath comes to America as delegate from the Air League of the British Empire (she is chairwoman of the woman's section) to attend the International Aviation Conference at Washington, D. C., on December 12.

Although only learning to fly in 1925 Lady Heath has one or two interesting flights to her credit. She has put in about 1,200 flying hours since that date. On May 19, 1927, she put up the first world's record in the light airplane class on an Avro Avion with her pupil the Hon. Lady Bailey as passenger. On July 19 of that year she flew in the same machine solo 1,300 miles in one day between dawn and dusk, making a landing on every airdrome in England, to draw public attention to the need for more municipal airdromes. Two days later she made a landing in one day in England, Ireland, Scotland, and Wales. In May this year she completed an 11,000-mile flight from Cape Town to London, this being the first solo flight organized in any overseas colony or dominion to any mother country, and it is the longest solo flight ever done by any woman with one machine. She proposes to lecture in America on this flight and also to technical bodies on the light aircraft of Great Britain and the light airplane club movement, which is so well developed in that country.

Lady Heath holds the British seaplane altitude record and also the British altitude record open to any land planes. She was the first woman in the world to hold a commercial license for seaplanes and land planes, it being owing to her efforts that the international law on this subject was changed.

Lady Heath hopes to learn a great deal from America in aviation during her stay in which she will demonstrate and use for her transport between towns a British light airplane, the Moth which is being constructed under license by the Moth Aircraft Corporation of New York. This machine is awaiting her. Her personal maid, who comes from her own home county, Limerick, will accompany her, and she will act as her own mechanic.

She also hopes to connect up with the woman's branch of the National Amateur Athletic Federation, as she is vice president of the international body controlling woman's athletics, and looks forward to renewing the pleasant friendships she made with the officials and members of the American Olympic team at Amsterdam this year, where she acted as referee.

These games were the first international meeting since the inception of women's athletics in Europe in 1922 in which she has not taken part as an active athlete having represented Great Britain each year in track and field events. Until 1926 she held the world's record for the high jump, together with Miss Voorhees, an American athlete.

Lady Heath proposes to make a prolonged stay in the States, as her visit fulfills a long-felt ambition.

Lady Heath, who is 31, is southern Irish, and after a number of years of war work in Great Britain and France she took a degree in agriculture in Dublin in 1921. Thereafter she lectured on that subject, leaving this to undertake voluntary organization of women in athletics and other sporting movements of national importance. Her knowledge of agriculture was put to practical use from 1922 onwards on her coffee farm in Kenya Colony, East Africa, in which country she has done considerable big-game shooting.

She is strongly opposed to any stunt flying (except the ordinary acrobatics and parachute descents, which she considers should be a part of every pilot's training), especially long-distance flights over water in anything except a multiengined flying boat or seaplane.

In Europe her work has been in every country to bring flying to an every-day level and within the reach of all classes. With this end in view she has devoted, in the past two years, her commercial earning to founding 10 scholarships for women with the light airplane clubs of Great Britain and South Africa. Much of these earnings have been obtained in air racing, which Leady Heath is very fond of, and in the light airplane competitions, in which she has been very lucky. In August, this year, she took first place in the international light airplane competitions in Holland with a Moth airplane and fourth place out of 26 competitors in French international competitions with an Avro Avion.

Lady Heath is the author of the first textbook on women's athletics, How to be an Athlete and Why, which has been translated into many languages, and also of a small volume of poems, East African Nights, which has had a large sale in Europe and Africa. The proceeds of the sales of these books have been given to aviation and to charities.

During her many visits to Africa Lady Heath has covered well over 50,000 miles of sea transport in every type of vessel from the small native thew upwards, and she feels that she can honestly say she has never had such a pleasant voyage or such a comfortable one as this trip to America. If America is going to be half as good as the United States Lines seem to promise, she does not see how she can get away.

Lady Heath believes very forcibly in the future of women in aviation, not alone for their own sakes but also for the good of the industry. Any woman can look after, manage altogether, a light airplane of the moth type, which in England costs about $3,250 and about $100 a month for all upkeep, garage, and insurance charges.

Women make excellent teachers and good demonstrators of aircraft; they learn to fly a little more slowly than men, as they have less confidence in themselves, due, probably, to their heritage of house and home work rather than business and active sport.

Lady Heath is strongly against trans-Atlantic flying in the present stage of airalun, although she gives a great deal of herô worship to those who have made this gallant effort. She believes that our job now is to "make airalun safe for democracy."

She landed on November 9 and is already in love with this country. She hopes to extend her prearranged 6 months' visit into 12 months. Everyone is so amazingly kind and there is so much to be learned about American aviation.

She is specially interested to find that, although fewer individuals fly habitually in this country, there is much more general knowledge among the public about aviation than in Europe, so that she predicts a huge future for the industry in this country, where modern aviation had its birth (once it has been consolidated and made a necessity instead of the luxury it is to-day).

Women's entry into any sport or business is the hall mark on it and shows that not alone has it come to stay but it is safe, easy, and reliable.

INTERIOR DEPARTMENT APPROPRIATION BILL, 1930

The House in Committee of the Whole House on the state of the Union resumed consideration of the Interior Department appropriation bill.

Mr. CRAMTON. Mr. Chairman, the gentleman from Arkansas [Mr. WINGO] himself has set up quite a bit of discussion. I agree with nearly everything that he said except when he put in my mouth theories that I have not expounded myself and do not believe in. We have not time in the consideration of these appropriation bills to go over the recent campaign or even to solve the question of national prohibition. Suffice to say that I have never said that the Federal Government should confine itself to those limited activities that have been mentioned. I did try to emphasize the fact that the States and the cities can not put the whole responsibility upon the Government. There must be cooperation.

As to the particular item before us, there is this to say: In handling these appropriation bills we are not influenced by partisan consideration. Republicans and Democrats work together. I am not going to indulge in any partisanship. The item before us had particularly careful consideration by our committee.

We were interested; otherwise the statement would not have been in the hearings that has been read as to the need for more money. That statement came on the invitation of the committee because of our interest and we discussed the item, but did not see our way clear to including the increase. We have been glad to yield to the manifest sentiment of the Committee of the Whole and accept the amendment.

Just one more observation that applies to this bill and to every appropriation bill. The responsibility is on every Member of the House alike. Our committee are but the servants of the House. We are working under a rule of the Committee on Appropriations that every appropriation bill shall be kept within the total submitted by the Budget. Working within that rule on this bill it has not been possible for the committee to recommend all of the increases in various items that we think ought

to be provided. We have done the best we know how and keep within the Budget total.

And so as the bill goes along we can not always raise the items as we would like, and the House can not always raise the items as the House may want to do unless you are prepared to overrule that policy of keeping within the Budget estimates. Under the present pronouncement of the President as to the relationship between probable revenues and expenditures it is not going to be safe to overthrow that policy and make these bills greater than the Budget estimates—I mean the totals of the bills. I now yield to the gentleman from Massachusetts.

Mr. LUCE. Does the gentleman desire to have the committee understand that when in the judgment of the Committee on Appropriations, who represent the law-making body of this country, a larger appropriation should be made he believes it is consistent with the Constitution that the committee subordinate its judgment to that of an official of an executive department?

Mr. CRAMTON. Not at all. The law-making body itself has the right under the Constitution to go above the Budget or below the Budget, and it has therefore the right to say as a matter of policy "We will change the estimates within the bill as we like, reduce some, increase others, but we will not increase the total above the Budget." There is in that no abdication of authority, but simply the exercise of the authority in the manner desired so as not to overrun or embarrass the Executive.

Mr. LUCE. Has not the House the right to an honest judgment of every committee that it creates?

Mr. CRAMTON. And it will always get ours to the best of our ability. But a man who has a salary of $40 a week can not spend $50 or $60 a week without coming to grief, and while there may be many an expenditure that he and his family would like and which could be used to good advantage, if they are not going to run him into bankruptcy he will not make the expenditure. So when the President, from the gentleman's own State, says we are facing a deficiency for the current year, then it is time for us to heed that warning.

Mr. LAGUARDIA. But the committee has accepted the amendment, I understand.

The CHAIRMAN. All debate upon this paragraph and amendment has expired under the consent agreement. The question is on the amendment.

The amendment was agreed to.

The Clerk read as follows:

For lease, purchase, repair, and improvement of agency buildings, exclusive of hospital buildings, including the purchase of necessary lands and the installation, repair, and improvement of heating, lighting, power, and sewerage and water systems in connection therewith, $175,000; for construction of physical improvements, exclusive of hospitals, $75,000; in all, $250,000: *Provided*, That this appropriation shall be available for the payment of salaries and expenses of persons employed in the supervision of construction or repair work of roads and bridges on Indian reservations and other lands devoted to the Indian Service: *Provided further*, That no money shall be expended for new construction at any one agency except as follows: Not to exceed $30,000 for an additional water supply, Southern Navajo Agency, Ariz.; not to exceed $7,000 for water and sewage disposal systems, Turtle Mountain Agency and Hospital, N. Dak.; not to exceed $13,100 for water-filtration plant, with storage reservoir, at the Standing Rock Agency, N. Dak.; for two employees' cottages, Chotaw Agency, Miss., $5,500; for employee's cottage, Blackfeet Agency, Mont., $3,500; for office building, Rosebud Agency, S. Dak., $7,500; for employee's cottage, Warm Springs Agency, Oreg., $3,500; for office building, Tomah Agency, Wis., $3,500. for electric system, Consolidated Ute Agency, Utah, $2,500.

Mr. CRAMTON. In line 17 is a misspelled name—the word "Choctaw"—and I ask unanimous consent that the Clerk be authorized to correct any misspelled words and typographical errors.

The CHAIRMAN. And also the totals?

Mr. CRAMTON. Yes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent the Clerk have authority to correct misspelled words, wrong titles, and typographical errors in the bill. Is there objection? [After a pause.] The Chair hears none.

Mr. ARENTZ. Mr. Chairman, I move to strike out the last word. I rise to my feet for the purpose of calling to the attention of the chairman an item at the bottom of page 13, line 22, for the electric system, consolidated Ute Agency, Utah, $2,500. Now, I have no objection in the world to this item. I think it is justified. I have gone through the hearings and find this electrict-light plant is needed. Take the case of the Walker River Reservation at Schurz, Nev. Those Indians live 28 miles from a town. They are at least that far from an electric-light system. The Indians there are working hard trying to develop their allotments. They have an area of land under cultivation. The church there is absolutely bare of any apparatus for the entertainment of these Indians. At night in driving through this agency everything appears dark, except a few lighted lamps here and there. I think if there is any agency or any reservation within the confines of the United States that deserves consideration in the way of electric lights it is the Walker River Reservation. We have reached a point in our civilization where electric lights are a plain necessity. I have risen on my feet for the purpose of calling to your attention not only this Consolidated Ute Reservation electric lights but other Indian reservations scattered through the West that should have the same thing, because I think you have got to give the Indians on the reservations some of the things which the rural white settlers have in their communities, such as weekly or semiweekly moving pictures, electrically lighted homes, and so forth. They ought to have the same means of civilization and consideration in the way of electric lights which other communities have.

I hope the subcommittee of the Committee on Appropriations will take this into its consideration. I also want to draw their attention, while I am on my feet, to another consideration, and that is the condition of these allotted lands. The superintendent of the Walker River Agency could bring in Indians from different sections of the States of Nevada and California and sell to them allotments. Indians, full-bloods and half-breeds, would come with their families and buy these allotments if there were not piled against the allotments an ever-increasing sum of back payments for operation and maintenance.

This is an important thing, gentlemen of the committee, and serious consideration should be given to it, so that a certain amount of accumulated operation and maintenance and construction charges could be stricken off these allotments to bring the price down to a point where the buyer would have some assurance of paying out in due time from crops raised. If something can be done toward wiping out the operation and maintenance charges most of these allotments can be sold.

The CHAIRMAN. Without objection, the proforma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

For salaries and expenses of such attorneys and other employees as the Secretary of the Interior may, in his discretion, deem necessary in probate matters affecting restricted allottees or their heirs in the Five Civilized Tribes and in the several tribes of the Quapaw Agency, and for the costs and other necessary expenses incident to suits instituted or conducted by such attorneys, $34,500: *Provided*, That no part of this appropriation shall be available for the payment of attorneys or other employees unless appointed after a competitive examination by the Civil Service Commission and from an eligible list furnished by such commission.

Mr. HOWARD of Oklahoma. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Oklahoma moves to strike out the last word.

Mr. HOWARD of Oklahoma. I want to ask the gentleman from Michigan if that item concerning competitive examinations by the Civil Service Commission and appointments from an eligible list furnished by the commission has been carried out? It has been carried in this bill, I think, several times.

Mr. CRAMTON. They have been under the Civil Service Commission for several years, ever since that has been in the bill.

Mr. HOWARD of Oklahoma. Mr. Chairman, I withdraw the pro forma amendment.

The CHAIRMAN. The pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

For the survey, resurvey, classification, and allotment of lands in severalty under the provisions of the act entitled "An act to provide for the allotment of lands in severalty to Indians," approved February 8, 1887 (U. S. C., p. 711, sec. 331), and under any other act or acts providing for the survey or allotment of Indian lands, $35,000: *Provided*, That no part of said sum shall be used for the survey, resurvey, classification, or allotment of any land in severalty on the public domain to any Indian, whether of the Navajo or other tribes, within the State of New Mexico and the State of Arizona, who was not residing upon the public domain prior to June 30, 1914.

Mr. WILLIAMSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from South Dakota moves to strike out the last word.

Mr. WILLIAMSON. Mr. Chairman and gentlemen of the committee, this bill carries the most liberal appropriations for the education, health, and industrial training and development of the Indians of any bill reported or passed since I became a Member of Congress. If the Indians are to be brought to a state of self-support within a reasonable length of time, even

more liberal appropriations must be provided, and the intensive campaign for their advancement already under way must be augmented.

Since my earliest recollection the Indian Bureau has always been the target for criticism, sometimes by honest people who were trying to do something constructive, and not infrequently by dishonest rogues who were seeking to exploit the Indians. Honest criticism, though sometimes unjust, should be welcomed. Dishonest criticism is always unjust and rarely constructive. There are some half dozen Indian welfare societies organized in the United States, and many societies and clubs maintain sections or divisions that specialize on Indian welfare. All but a few of these societies and units carry on helpful and constructive work. Two or three, however, under the cloak of friendship for the Indians, have for the past few years carried on a most vicious, mendacious, and abominable propaganda, wholly destructive in character and which has greatly hampered a proper functioning of the Indian Bureau. This propaganda has been directed not only at the Indian Bureau but at Members of Congress whose only offense has been their refusal to join in the hue and cry against the bureau and to carry out the pet schemes and projects of the proponents.

Some of the proposals advanced have been of the most visionary and impractical character and such as would make of the Indians paupers and public charges in a short time. A number of these pseudo friends of the Indians, by means of false representations, have induced Indians, already pitifully poor, to part with their money in order to enable the recipients to protect the donors against some great wrong which has its existence solely in the brain or tongue of the money collectors. Not only that but while acting in the presumptive capacity of special investigators these artists have seized the opportunity to carry on political propaganda against the Bureau of Indian Affairs and Members of this House.

There has been much talk of the investigation of lobbyists and their activities, both in and outside of Washington. Nothing could be more wholesome than the appointment of a committee fully empowered to make a thorough and searching examination into the activities of some of these self-constituted Indian welfare lobbyists and the character of their propaganda. Such an investigation would enable Congress to give proper weight and consideration to their activities and establish the necessary facts upon which to base remedial legislation.

For the past eight years there has been at the head of the Indian Bureau Hon. Charles H. Burke, one of the distinguished citizens of my own State. For some 14 years he was a Member of Congress. During that time he was a member of the Indian Affairs Committee and for several years its chairman. He knows and understands the Indian problem as few know it. His friendship for the Indians is deep and sincere. During his years of service he has done his best to improve their condition. His efforts have not satisfied himself nor many of the friends of the Indians, but, considering the appropriations available, he has accomplished much. Despite all criticism, I am confident that the discriminating and impartial student of Indian matters will say that his administration has been characterized by fidelity to the Indians and ability and vigor in defending their rights. That errors have been made few will deny, but that he has conducted his difficult task with the best interests of the Indians as his constant goal will be admitted by those who have the most intimate knowledge of Indian affairs and who are honestly seeking to aid in working out a practical program.

The CHAIRMAN. The time of the gentleman from South Dakota has expired.

Mr. O'CONNELL. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for two minutes more. I want to ask him a question.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. O'CONNELL. Why does not the gentleman disclose the source of this propaganda, if it is malicious?

Mr. WILLIAMSON. If the House will authorize a committee of investigation, I shall be pleased to furnish not only the source of the propaganda but the names of the individuals involved. [Applause.]

Mr. LEATHERWOOD. Would it not be well for the committee of Congress in appointing a committee of investigation to have it go out and investigate both sides?

Mr. WILLIAMSON. Certainly. Some of the "investigations" that have come to my attention have been decidedly one-sided. I am not referring to investigations made personally by Members of Congress.

A most interesting résumé of accomplishments during his term as Commissioner has been prepared by Assistant Commissioner E. B. Meritt, and I ask leave to insert it as a part of my remarks. I also ask leave to insert an editorial from the Daily Santa Fe New Mexican under date of December 5, 1928, which, I believe, will be of interest to the Members of this House and the country.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Following is the statement and editorial referred to:

OUTSTANDING CONSTRUCTIVE ACCOMPLISHMENTS DURING COMMISSIONER BURKE'S ADMINISTRATION OF INDIAN AFFAIRS

Statement by E. B. Meritt, Assistant Indian Commissioner, before the Appropriations Committee of the House of Representatives, November 19, 1928

It seems a proper time to bring to the attention of your committee some of the more important accomplishments of the Indian Service during the administration of Commissioner Burke. For more than seven years he has served as Commissioner of Indian Affairs, and, notwithstanding the fact that during that time the service has been greatly handicapped because of inadequate funds, much has been done for the advancement of the Indians and the improvement of the Indian Service.

The entire wealth of the Indians of this country in the fiscal year 1921 was estimated to be $716,705,500. For the fiscal year 1928 the estimated Indian wealth is $1,648,075,274.

The Indian population in 1921 was 340,838. The Indian population compiled from data during the fiscal year 1928 is 355,901, an increase of approximately 15,000.

Over the period of seven years between 1921 and 1928 consolidations of jurisdictions have been made throughout the service resulting in estimated savings under such consolidations of $300,000. The consolidations were made as follows:

The Salt River and Camp Verde Agencies in Arizona were placed under the jurisdiction of the Phoenix nonreservation boarding school.

The Bishop Agency in California was consolidated with the Walker River Agency with headquarters at Schurz, Nev.

The Digger Agency in California was placed under the Reno Agency in Nevada, this latter agency being transferred subsequently to Sacramento Agency in California.

The affairs of the Indians of the Greenville, Tule River, and Round Valley Agencies in California are now being handled under the direction of the Sacramento Agency.

There were in California two jurisdictions known as the Northern and Southern Mission Agencies, and these have been combined into what is known as the Mission Agency.

In Colorado the Ute Mountain and Southern Ute Agencies have been combined into what is now the Consolidated Ute Agency.

The Potawatomi Agency, Kans., has been placed under the direction of the superintendent of Haskell Institute.

In Minnesota the Leech Lake and White Earth jurisdictions have been consolidated, and the affairs of these two agencies are now being handled by the Consolidated Chippewa Agency, with headquarters at Cass Lake, Minn.

In Nebraska the Omaha and Winnebago Agencies have been consolidated, with headquarters now at Winnebago, Nebr.

The Moapa River Agency in Nevada was made a subagency under the Paiute Agency (formerly the Kaibab), with headquarters at Cedar City, Utah.

The Nevada and Fort McDermitt Agencies in Nevada were also placed under the Reno Agency, and with the abolishment of the latter agency the handling of the affairs of these two jurisdictions were taken over by the Carson nonreservation boarding school.

The Fallon Agency in Nevada has been placed under the Walker River Agency, with headquarters at Schurz, Nev.

The Seger and Cantonment jurisdictions in Oklahoma were placed under the Cheyenne and Arapaho Agency, with headquarters located at Concho, Okla.

The affairs of the Indians of the Ponca Agency in Oklahoma are now being handled under the direction of the Pawnee superintendent.

The Seneca School in Oklahoma has been placed under the direction of the superintendent of the Quapaw Agency.

The Siletz Agency in Oregon was placed under the jurisdiction of the Salem nonreservation boarding school.

In South Dakota the Lower Brule Agency is now under the direction of the superintendent of the Crow Creek Reservation.

The Goshute and Shivwitz Agencies in Utah have been consolidated with the Paiute Agency.

The Spokane Agency in Washington has been consolidated with the Colville Agency.

In Wisconsin the Grand Rapids jurisdiction has been placed under the Tomah nonreservation school, and the Laona and LaPointe Agencies in Wisconsin and the Mackinac Agency in Michigan have been placed under the Lac du Flambeau superintendency.

To-day there are 104 superintendencies, which include nonreservation and tribal boarding schools.

Appropriations for the Indian Service for the fiscal year 1921 totaled $10,028,722.22. For the fiscal year ending June 30, 1928, the appropriations for the Indian Service totaled $12,654,685. The foregoing totals of appropriations are for the amounts contained in the annual appropriation bills and do not include the items which were provided for in deficiency appropriation acts. During the last session of Congress more than four and one-half million dollars were appropriated on account of the Indian Service in deficiency acts, $3,800,000 of which was for the construction of the Coolidge Dam in Arizona. Many of the other items provided in the deficiency act were in fulfillment of special authorizations by Congress.

Education: In 1921 the total number of Indian children in all schools was 62,764, of whom 33,250 were attending public schools. During the fiscal year 1928 there were 68,881 pupils enrolled in all schools, and of that number 34,163 were enrolled in the public schools.

The following improvements have been made at the schools classed as nonreservation boarding schools or schools receiving specific appropriations in the annual appropriation bills:

Albuquerque School, New Mexico: A new gymnasium and assembly hall have been constructed, the academic building has been enlarged, several sleeping porches have been added to dormitories, a new hospital has been constructed, the sewer system has been improved and enlarged, additional land is authorized to be purchased, and the capacity has been increased from 474 to 850, an increase of 376 pupils. The grades at this school have been increased from 10 to 12.

Bismarck School, North Dakota: The capacity of this school has been increased from 80 to 115; an employees' cottage has been provided, and through a deficiency appropriation additional land is being purchased.

Carson School, Nevada: The domestic and irrigation water supply have been improved, a new dining hall provided, an assembly hall and an employees' cottage constructed, additions constructed to the boys' dormitory and the school building, central heating plant has been enlarged, and during the fiscal year 1929 a new dormitory is being constructed. The capacity of the school has been increased by 100—from 375 to 475—and the grades have been increased from 8 to 9.

Charles H. Burke School, New Mexico: This school was formerly the Fort Wingate military post and was transferred to the Interior Department from the War Department for Indian educational purposes in 1926. Extensive repairs and improvements to the buildings and the construction of new buildings was necessary before the plant could be put into operation and Congress provided an appropriation of $334,000, which included $100,000 for the new school buildng and assembly hall, extension of water, sewer, and light systems. The capacity has been increased from 500 to 700, an increase of 200 pupils.

Cherokee School, North Carolina: Additional land has been purchased, a concrete reservoir has been constructed, a hydroelectric system has been installed, an annex has been constructed to the boys' dormitory, and a new school building and girls' dormitory provided. The dining room has been enlarged and the old school building converted into a dormitory. As a result of these improvements the capacity of this school has been increased by 200.

Chilocco School, Oklahoma: The water and engineering systems have been improved; an employees' cottage, new hospital, domestic science building, and barn have been constructed; and the gymnasium and shop building destroyed by fire have been constructed. The capacity of the school has been increased from 500 to 800 and the grades increased from 10 to 12.

Fort Bidwell School, California: A new school building and hospital are under construction at this school.

Fort Mojave School, Arizona: The school irrigation system has been developed; the dining hall enlarged, new electric-light plant installed; and a new school has been constructed. A steel water tank and tower and new water mains have also been provided. The capacity of the school has been increased by 50.

Flandreau School, South Dakota: A new central heating plant has been installed, a dairy farm constructed, and the old boys' dormitory remodeled. The capacity of the school has been increased from 360 to 375.

Haskell Institute, Kansas: The heating and power systems of this school, the water system and farm drainage, have been remodeled and improved. The teachers' quarters have been enlarged and remodeled and the office building has been enlarged. Further improvements to the sewer system are being made during the fiscal year 1929 and the boys' dormitories are being remodeled. The capacity of the school has been increased from 750 to 850, and the grades were increased September, 1921, from 10 to 12.

Genoa School, Nebraska: The water, light, and sewer systems have been improved, a gymnasium constructed, and a new heating and power plant installed. The capacity of the school has been increased from 400 to 500.

Mount Pleasant School, Michigan: A new heating and power system and water-softening system have been installed, an old building has been remodeled for use as a hospital, and the old hospital remodeled for dormitory purposes. The capacity has been increased from 350 to 400 and the ninth grade added.

Phoenix School, Arizona: Sleeping porches have been added, new buildings have been constructed, additional land has been purchased, and the heating plant has been enlarged and improved. The capacity of the school has been increased from 700 to 900 and the eleventh and twelfth grades have been added.

Pierre School, South Dakota: Through slight repairs and additions the capacity has been increased by 25 pupils, and the ninth grade has been added.

Pipestone School, Minnesota: The water and steam heating systems have been improved, a new bake oven installed, and the academic building and assembly hall have been enlarged. The capacity of the school has been increased by 88 and the eighth and ninth grades added.

Rapid City School, South Dakota: A new school building has been completed, an assembly hall has been constructed, the hospital has been enlarged and improved, a new laundry building has been constructed, the capacity has been increased by 15, and the ninth grade added.

Salem School, Oregon: The entire heating system has been remodeled and high-pressure steam installed. A new boys' dormitory, small girls' dormitory, dining hall, kitchen, and employees' quarters have been constructed; repairs have been made to the water system; and a new septic tank and improved sewerage facilities provided. The capacity has been increased by 250 and the eleventh and twelfth grades have been added.

Santa Fe School, New Mexico: Additional land has been purchased, the heating system has been enlarged and improved, sleeping porches have been added to buildings, the dining hall has been enlarged, a new dormitory has been constructed and one of the old dormitories remodeled, and a new hospital is now in course of construction. The capacity of this school has been increased by 100 pupils.

Sequoyah Orphan Training School, Oklahoma: A new school building and assembly hall, dining hall, and hospital have been constructed; a new water tower and tank erected; the school building has been enlarged; additional land has been purchased; and the primary schoolroom has been converted into dormitory space. The capacity of this school has been increased by 140 pupils and the ninth and tenth grades have been added.

Sherman Institute, California: Additional sleeping porches have been added, and this, together with other miscellaneous remodeling and repairing, has increased the capacity of this school by 250 pupils. Twenty-six acres of land were purchased; a new horse and dairy barn have been constructed. The grades have been increased from 10 to 12.

Theodore Roosevelt School, Arizona: This school was formerly the Apache military post and was secured by the Interior Department for Indian educational purposes in 1924. It has a capacity of 450.

Tomah School, Wisconsin: The barn and shops at this school have been rebuilt, the dining hall enlarged and improved, and additions made to the school building and the girls' building. The capacity has been increased by 50 pupils.

Truxton Canon School, Arizona: The capacity of this school has been increased by 85 pupils through the construction of a new dormitory and improvement of school space and the addition to the assembly hall. A new ice plant, laundry machinery, and pumping machinery for irrigation purposes have also been provided.

Wahpeton School, North Dakota: The capacity of this school has been increased by 125 pupils and the ninth grade added. A shop building and employees' cottages have been constructed; additions have been made to classrooms, dormitories, and dining hall; and the old school building has been remodeled into an employees' dining room and kitchen.

In addition to increasing the grades in a number of the reservation day schools, grades have also been added to the reservation boarding schools at Blackfeet, Mont.; Bloomfield, Cheyenne and Arapahoe, Euchee, and Eufaula, Okla.; Fort Belknap, Mont.; Fort Sill and Jones, Okla.; Keshena, Wis.; Leupp, Ariz.; Pawnee, Okla.; Pine Ridge, S. Dak.; Red Lake, Minn.; Rice Station, Ariz.; Rosebud, S. Dak.; Seneca, Okla.; Shoshone, Wyo.; and Standing Rock, N. Dak.

CONSERVATION OF HEALTH

Appropriations for health work for the fiscal year 1921 totaled $350,000, and for the fiscal year 1928, $948,000 was specifically authorized for this purpose. In addition to this amount, other funds have been allotted for conservation of health. The total number of hospitals in the Indian Service in 1921 was 81, with a total bed capacity of 2,411. This number has been increased over the period of seven years to 92, with a bed capacity of 3,150. The medical personnel of the service has been increased gradually, and in 1928 there were 195 physicians of all kinds, 170 nurses, 31 field nurses, and 31 field matrons, as compared with 174 physicians, 81 nurses, and 70 field matrons in 1921. The field matrons are being gradually replaced by graduate nurses trained in public-health work.

Between the seven-year period, 1921 to the close of the fiscal year 1928, the following new hospitals have been constructed or established:

Albuquerque School Hospital, with a capacity of 60 beds, the total cost of which was $65,000.

Pyramid Lake Sanatorium, Nevada, 84 beds were provided through the conversion of dormitories for sanatorium purposes at a cost of $30,000.

Charles H. Burke School Hospital, capacity 45 beds. This building was converted into a hospital at a cost of approximately $15,000.

At the Chilocco School, Oklahoma, a 50-bed hospital has been constructed at a cost of $24,750.

For the Choctaws, in Mississippi, a 25-bed hospital has been erected at a total cost of $14,567.

The Consolidated Chippewa Sanatorium, with a capacity of 82 beds, was provided through the conversion of school dormitories for sanatorium purposes.

A small 10-bed hospital has been provided at the Euchee School through the remodeling of an existing building.

A 60-bed hospital has been constructed on the Fort Apache Reservation, Ariz., at a cost of $50,000.

The superintendent's quarters at Fort Belknap, Mont., was converted into a 15-bed hospital.

A 14-bed hospital, costing $11,500, was constructed at the Fort Hall Agency, Idaho.

A small 6-bed hospital or infirmary has been constructed at the Havasupai Agency at a cost of $5,000.

The Keshena Hospital, in Wisconsin, which was destroyed by fire, is being replaced at an approximate cost of $44,000, with a capacity of 50 beds.

A 30-bed hospital, costing $43,000, has been constructed on the Klamath Reservation.

At Laguna, N. Mex., a 30-bed general hospital was added to the existing 36-bed tuberculosis hospital.

The Leupp Hospital, with a capacity of 50 beds, was constructed at a cost of approximately $25,000.

A new hospital at Soboba, under the Mission Agency in California, is in process of construction. This building will furnish approximately 30 beds and will cost $30,000.

A 12-bed hospital has been provided for the Taos Indians under the northern Pueblos Agency at a cost of approximately $15,000.

A 12-bed hospital has been constructed at the Sequoyah Orphan Training School at a cost of $10,000.

The boarding school at Shawnee, Okla., was converted into an 80-bed tuberculosis sanatorium at a cost of approximately $40,000.

Hospitals of 15-bed capacity each were provided at the Chin Lee and Tohatchi Schools in Arizona and New Mexico, respectively, at a cost of $15,000 each. An old officers' quarters at the Theodore Roosevelt School was converted into a 20-bed hospital.

An 18-bed hospital has been established through the conversion of employees' quarters on the Tongue River Reservation.

A 36-bed hospital has been constructed on the Western Navajo Reservation at a cost of $29,972.

A 60-bed tuberculosis sanatorium, costing approximately $40,000, has been provided on the Yakima Reservation, Wash.

The Zuni Boarding School plant, New Mexico, has been converted, at a cost of approximately $10,000, into an 80-bed tuberculosis sanatorium.

Aside from the hospitals above mentioned, new hospitals are now under construction at Fort Berthold, N. Dak.; Claremore, Okla.; San Carlos, Ariz.; and Southern Navajo, Ariz.

The former Marsh Pass Boarding School at Kayenta, Ariz., is being converted into a hospital to provide 40 beds for tuberculosis cases and 10 beds for general cases. The approximate cost of this conversion will be $7,000.

Hospital facilities have been improved and increased at a number of other points in the service; X-ray machines have been provided in a number of these hospitals. During the fiscal year 1928 over 34,100 patients were treated, with over 626,300 days of hospital treatment.

The death rate of Indians in 1921 was approximately 24.8 per thousand, and the death rate during the fiscal year 1928 has been reduced to 21.8 per thousand.

The Indian medical service has been reorganized and the country divided into four medical districts with a medical director in charge of each. Four medical officers of the United States Public Health Service were detailed to the Indian Service, one of whom was assigned to the position of chief medical director and the other three were assigned as district medical directors. The establishment of these positions of district medical director has been of material assistance in improving general health conditions throughout the service as to operation of hospitals, care and treatment of the sick, development of disease-prevention measures, and the better reporting of morbidity and mortality statistics.

Special efforts have been made to cure and prevent the spread of trachoma among the Indians. To this end the Navajo Boarding School at Fort Defiance, Ariz., with a capacity of 450 pupils, and the Tohatchi Boarding School at Tohatchi, N. Mex., with a capacity of 250 pupils, and the San Juan Boarding School, with a capacity of 200, have been designated as "trachoma" schools. The Chin Lee Boarding School in Arizona, with 160 capacity, the Charles H. Burke School in New Mexico, with 600 capacity, and the Theodore Roosevelt School in Arizona, with 450 capacity, have been designated as trachoma-free schools. By this method of segregation it is believed that much progress can be made in the elimination of this disease among the Indians. Trachoma clinics have also been held in various sections of the Indian country, and since the establishment of a more detailed campaign against trachoma in 1925—10,782 surgical and 11,485 medical treatments have been given for the amelioration of this disease and the incidence of trachoma has fallen from an estimated figure of 30 per cent in 1921 to 17.2 per cent at the end of March, 1928.

Efforts are being made also to check the widespread prevalence of tuberculosis among the Indian population, and to this end increased sanatorium facilities have been provided and special emphasis has been placed on preventive measures both in schools and in the ordinary reservation activities. Sanatorium schools for the benefit of children suffering from tuberculosis have a bed capacity of 874. There is not adequate provision for the care and treatment of this disease among the adult Indian population. As hospitals are enlarged, facilities are being provided for the care of adult Indians suffering with this disease, and some progress is being made in the fight against it. However, because of the unwillingness of the Indians to leave home for hospital treatment, it is not anticipated that there will be a considerable showing of results under this activity.

INDUSTRIAL ACTIVITIES

The outstanding work in connection with the individual development of the Indian has probably been the inauguration of what is known as the 5-year industrial program, which had its inception on the Blackfeet Reservation in Montana in 1922. This 5-year program proved to be quite successful, and industrial surveys were made on other reservations, and to-day these industrial programs have been inaugurated on 35 different reservations. The reservations are divided into farm chapters, and in 1928 there were 408 such chapters with a total membership of 6,761, in addition to 278 4–H Clubs, with a membership of 3,284. These chapters vie with each other in making and breaking records for work and production. Campaigns are put on along special lines to see which chapter can hold the record for the largest percentage of newly broken land and which chapter will have the largest number of members owning pigs, chickens, sheep, or cattle. As a result of these increased industrial activities Indians have been exhibiting their products in State and county fairs, and in the fiscal year 1928 the adult Indians won 281 prizes and the 4–H Club members won 198 county prizes and 101 State prizes in competition with whites.

During the fiscal year 1921 there were 47,191 Indians engaged in farming and stockraising. For the fiscal year 1928, 52,287 Indians are engaged in this work.

INDIAN LEGISLATION—JURISDICTIONAL ACTS

During the period between February 6, 1921, and May 18, 1928, 26 separate acts of Congress have been enacted authorizing the adjudication of claims against the United States by certain Indian tribes. The following is a list of these jurisdictional acts:

Conferring jurisdiction on the Court of Claims to hear, determine, and render judgment in the Osage civilization-fund claim of the Osage Nation of Indians against the United States, approved February 6, 1921 (41 Stat. 1097).

For the relief of certain nations or tribes of Indians in Montana, Idaho, and Washington, approved March 13, 1924 (43 Stat. 21).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Cherokee Indians may have against the United States, and for other purposes, approved March 19, 1924 (43 Stat. 27).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Seminole Indians may have against the United States, and for other purposes, approved May 20, 1924 (43 Stat. 133).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Creek Indians may have against the United States, and for other purposes, approved May 24, 1924 (43 Stat. 139).

To amend an act entitled "An act for the relief of the Saginaw, Swan Creek, and Black River Band of Chippewa Indians in the State of Michigan, and for other purposes," approved May 24, 1924 (43 Stat. 137).

Authorizing the Wichita and affiliated bands of Indians in Oklahoma to submit claims to the Court of Claims, approved June 4, 1924 (43 Stat. 366).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Choctaw and Chickasaw Indians may have against the United States, and for other purposes, approved June 7, 1924 (43 Stat. 537).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Stockbridge Indians may have against the United States, and for other purposes, approved June 7, 1924 (43 Stat. 644).

Conferring jurisdiction on the Court of Claims to determine and report upon the interest, title, ownership, and right of possession of the Yankton Band of Santee Sioux Indians to the red pipestone quarries, Minnesota, approved January 9, 1925 (43 Stat. 730).

Authorizing the Ponca Tribe of Indians residing in the States of Oklahoma and Nebraska to submit claims to the Court of Claims, approved January 9, 1925 (43 Stat. 729).

To refer the claims of the Delaware Indians to the Court of Claims, with the right of appeal to the Supreme Court of the United States, approved February 7, 1925 (43 Stat. 812).

For the relief of the Omaha Indians of Nebraska, approved February 9, 1925 (43 Stat. 820).

Authorizing certain Indian tribes, or any of them, residing in the State of Washington to submit to the Court of Claims certain claims growing out of treaties or otherwise, approved February 12, 1925 (43 Stat. 886).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any and all claims, of whatever nature, which the Kansas or Kaw Tribe of Indians may have or claim to have, against the United States, and for other purposes, approved March 3, 1925 (43 Stat. 1133).

Authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims, approved May 14, 1926 (44 Stat. 555).

Authorizing the Cherokee Indians, the Seminole Indians, the Creek Indians, and the Choctaw and Chickasaw Indians to prosecute claims, jointly or severally, in one or more petitions, as each of said Indian nations or tribes may elect, approved May 10, 1926 (44 Stat. 568).

To amend the act of June 3, 1920 (41 Stat. L. p. 738), so as to permit the Cheyenne and Arapahoe Tribes to file suit in the Court of Claims, approved June 24, 1926 (44 Stat. 764).

Authorizing the Citizen Band of Pottawatomie Indians in Oklahoma to submit claims to the Court of Claims, approved July 2, 1926 (44 Stat. 801).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and render judgment in claims which the Crow Tribe of Indians may have against the United States, and for other purposes, approved July 3, 1926 (44 Stat. 807).

Conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment in any claims which the Assiniboine Indians may have against the United States, and for other purposes, approved March 2, 1927 (44 Stat. 1263).

Authorizing the Shoshone Tribe of Indians of the Wind River Reservation in Wyoming to submit claims to the Court of Claims, approved March 3, 1927 (44 Stat. 1349).

To grant the right and time for appeal to plaintiffs in suit numbered 33731 in the Court of Claims of the United States, approved March 4, 1927 (44 Stat. 1847).

For the relief of the Arapahoe and Cheyenne Indians, and for other purposes, approved March 29, 1928 (45 Stat. 380).

To confer additional jurisdiction upon the Court of Claims under an act entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims," approved May 18, 1928 (45 Stat. 601).

Authorizing the attorney general of the State of California to bring suit in the Court of Claims on behalf of the Indians of California, approved May 18, 1928 (45 Stat. 602).

OTHER LEGISLATION

Other important acts enacted over a 7-year period cover the following:

To amend section 3 of the act of Congress of June 28, 1906, entitled "An act for the division of the lands and funds of the Osage Indians in Oklahoma, and for other purposes," approved March 3, 1921 (41 Stat. 1249).

Providing for the allotment of lands within the Fort Belknap Indian Reservation, Mont., and for other purposes, approved March 3, 1921 (41 Stat. 1355).

Amending section 26 of leasing act of June 30, 1919 (41 Stat. 31), to include leasing for additional minerals as "metalliferous minerals" on certain Indian reservations, approved March 3, 1921 (41 Stat. 1231).

To authorize the leasing for mining purposes of unallotted lands on the Fort Peck and Blackfeet Indian Reservations in the State of Montana, approved September 20, 1922 (42 Stat. 857).

To authorize the Secretary of the Interior to issue to certain persons and certain corporations permits to explore, or leases of, certain lands that lie south of the medial line of the main channel of Red River, in Oklahoma, and for other purposes, approved March 4, 1923 (42 Stat. 1448).

To provide for the payment of claims of Chippewa Indians of Minnesota for back annuities, approved April 14, 1924 (43 Stat. 95).

For the relief of dispossessed allotted Indians of the Nisqually Reservation, Wash., approved April 28, 1924 (43 Stat. 111).

For the enrollment and allotment of members of the Lac du Flambeau Band of Lake Superior Chippewas, in the State of Wisconsin, and for other purposes, approved May 19, 1924 (43 Stat. 132).

An act granting citizenship to all Indians, approved June 2, 1924 (43 Stat. 253).

Providing for the final disposition of the affairs of the Eastern Band of Cherokee Indians of North Carolina, approved June 4, 1924 (43 Stat. 376).

For the continuance of construction work on the San Carlos Federal irrigation project in Arizona, and for other purposes, approved June 7, 1924 (43 Stat. 475).

Authorizing the Secretary of the Interior to investigate and report to Congress the facts in regard to the claims of certain members of the Sioux Nation of Indians for damages occasioned by the destruction of their horses, approved June 7, 1924 (43 Stat. 477).

To quiet the title to lands within Pueblo Indian land grants, and for other purposes, approved June 7, 1924 (43 Stat. 636).

To compensate the Chippewa Indians of Minnesota for timber and interest in connection with the settlement for the Minnesota National Forest, approved February 28, 1925 (43 Stat. 1052).

Appropriating money for the relief of the Clallam Tribe of Indians in the State of Washington, and for other purposes, approved March 3, 1925 (43 Stat. 1102).

To pay Chippewa of Minnesota $1,787,551.36 for lands taken under free homesteads act of May 17, 1900 (31 Stat. 179), approved March 3, 1926 (44 Stat. 173).

To authorize the leasing for mining purposes of land reserved for Indian agency and school purposes, approved April 17, 1926 (44 Stat. 300).

To provide for allotting in severalty lands within the Northern Cheyenne Indian Reservation in Montana, and for other purposes, approved June 3, 1926 (44 Stat. 690).

Amends the act of June 30, 1919 (41 Stat. 31), for leasing unallotted lands for metalliferous minerals to include nonmetalliferous minerals (exclusive of oil and gas) on Indian reservations in certain States, approved December 16, 1926 (44 Stat. 922).

To authorize the cancellation, under certain conditions, of patents in fee simple to Indians for allotments held in trust by the United States, approved February 26, 1927 (44 Stat. 1247).

To authorize oil and gas mining leases upon unallotted lands within Executive-order Indian reservations, approved March 3, 1927 (44 Stat. 1347).

To amend the act entitled "An act for the survey and allotment of lands now embraced within the limits of the Fort Peck Indian Reservation, in the State of Montana, and the sale and disposal of all the surplus lands after allotment," approved May 30, 1908, as amended, and for other purposes, approved March 3, 1927 (44 Stat. 1401).

Appropriates $463,732.49 to pay loyal absentee Shawnee Indians of Oklahoma for Civil War depredations, approved December 22, 1927 (45 Stat. 18).

To amend section 1 of the act of June 25, 1910 (36 Stat. L. p. 855), "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes," approved March 3, 1928 (45 Stat. 161).

To provide for the acquisition of rights of way through the lands of the Pueblo Indians of New Mexico, approved April 21, 1928 (45 Stat. 442).

Authorizing and directing the Secretary of the Interior to investigate, hear, and determine the claims of individual members of the Sioux Tribe of Indians against tribal funds or against the United States, approved May 3, 1928 (45 Stat. 484).

Authorizing the Secretary of the Interior to execute an agreement with the Middle Rio Grande Conservancy District providing for conservation, irrigation, drainage, and flood control for the Pueblo Indian lands in the Rio Grande Valley, N. Mex., and for other purposes, approved March 13, 1928 (45 Stat. 312).

To extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes, approved May 10, 1928 (45 Stat. 495).

To provide for the protection of the watershed within the Carson National Forest from which water is obtained for the Taos Pueblo, N. Mex., approved March 27, 1928 (45 Stat. 372).

In connection with the foregoing special mention should be made of the amount which has been obtained for the Chippewa Indians in Minnesota. One of their long standing claims was for the value of lands and timber taken by the Government for the Minnesota National Forest under the act of May 23, 1908. A commission was appointed pursuant to the provisions of this act and its finding was that the Indians were entitled to the sum of $1,490,195.58 as the value of this property. This finding was approved by the President and on May 31, 1923, the amount was placed to the credit of the Chippewa Indians in the United States Treasury, the same to draw interest at the rate of 5 per cent per annum. Another claim of these Indians was for the value of certain lands in the vicinity of the Red Lake Reservation in Minnesota, taken by settlers under what was known as the free homes act of May 17, 1900 (31 Stat. 179), and never paid for by the Government as provided for in the act. By the act of March 3, 1926 (44 Stat. 173), without the necessity of a suit in the Court of Claims, $2,091,669.03 was appropriated covering both principal and interest on this claim, and by the same act interest amounting to $422,939.01 was appropriated on the Minnesota National Forest claim. In all, the sum of $4,074,907.15 was added to the Chippewa in Minnesota fund in settlement of these claims without any charges accuring for attorney fees.

Another of the outstanding pieces of legislation enacted during this time was the act of June 7, 1924 (43 Stat. 363), authorizing the crea-

tion of the pueblo lands board for the purpose of adjusting controversies in connection with title to lands within the 20 pueblo grants. Approximately one-half of this work has been completed and more than $150,000 awarded to the Pueblo Indians by the action of this board.

In connection with the act authorizing the settlement of the affairs of the eastern band of Cherokee Indians in North Carolina, more than 16,000 person applied for enrollment and the tribe has initiated contests respecting the rights of 1,216 enrollees.

Under the act of February 26, 1927, authorizing the cancellation of fee patents, more than 200 patents have been canceled.

OTHER ACCOMPLISHMENTS

During the calendar year 1918 a disastrous fire swept the town of Fond du Lac, Wis., and destroyed a number of Indian homes. This fire had its origin, so it was alleged, in sparks flying from engines of the Great Northern Railway during the period of Government operation. The matter of damages for these Indians was taken up with the United States Railroad Administration, and in 1925 settlement for 245 claims, aggregating $222,968.77, was effected.

Over a period of seven years the receipts from timber sales have increased from approximately $1,400,000 to approximately $2,500,000 annually. The cost of timber sale administration has been less than 21 cents per thousand feet or 5⅛ per cent of the gross receipts.

A total of 4,894 allotments have been made on the Gila River Reservation in Arizona covering 97,880 acres. On the Blackfeet Reservation, Mont., 4,301 allotments were made covering 554,613 acres. Allotment work on the Flathead Reservation was completed and a total of 920 allotments made covering 123,457 acres. The act of June 4, 1920, authorized allotments on the Crow Reservation, in Montana, and 2,126 such allotments were made covering a total acreage of 1,654,412. On the Fort Belknap Reservation, in Montana, 540,000 acres were divided into 1,171 allotments. There were 1,402 allotments made on the public domain in different States embracing 208,817 acres.

In connection with the purchase of Indian goods and supplies, there has been established, through authority of Congress, the Indian Service supply fund, which has enabled the office to make prompt payments for goods purchased, thereby obtaining lower prices and taking advantage of discounts. Purchasing procedure has been improved wherever possible and a large amount of surplus property suitable for use in Indian schools and agencies has been obtained.

Between January 1, 1921, and January 1, 1928, 271 banks having deposits of $6,357,911 were closed by reason of insolvency. Recovery has been effected in all but four of these cases.

Legislation was obtained authorizing an appropriation of $5,500,000 for the construction of the Coolidge Dam in Arizona. Under this authorization, appropriations have been obtained and the dam has been completed, thus making it possible to irrigate 80,000 acres of additional lands, 40,000 of which are on the Pima Indian Reservation.

The foregoing are a comparatively few of the thousands of constructive accomplishments during the last seven years under the administration of Commissioner Burke. It will be noted that during this time the Indian population has increased approximately 15,000, the total wealth of the Indians has increased approximately $925,000,000, approximately $300,000 has been saved by consolidations of schools and agencies, appropriations for the Indian Service have been materially increased and there are over 6,000 more Indian children in school now than seven years ago.

The appropriation for health work for the fiscal year 1929 is $1,440,000, or four times the amount that was appropriated for this same work seven years ago. The number of doctors, nurses, and hospitals have been materially increased during the past seven years, there being now 17 more hospitals than we had in the Indian Service seven years ago. The medical service has been reorganized, the salaries of employees have been materially increased, the Indians are now doing more farming than ever before, there being 5,000 more Indians engaged in industrial activities now than at the beginning of the administration of Commissioner Burke.

There have been 26 jurisdictional bills passed during the administration of Commissioner Burke permitting Indians to go before the Court of Claims to adjudicate their claims against the United States. This is a larger number of jurisdictional bills than ever before passed in a similar period of time.

The Indian citizenship bill was passed by Congress during the administration of Commissioner Burke, extending citizenship to all Indians in the United States, and some of the most important legislation in the history of the Indian Service has been enacted during that time. For example, the passage of the act extending the trust period on the lands of the Five Civilized Tribes, which will save the property of at least 10,000 Indians of those tribes, which property is valued at millions of dollars.

I do not believe that there has ever been any other period of seven years in the history of the 100 years of the jurisdiction of the Indian Bureau over Indian affairs when so many constructive things have been accomplished as during the past seven years under the administration of Commissioner Burke.

However, I want to make it perfectly clear that many things need to be done that can not now be done with the limited appropriations available. While we are not asking for appropriations other than appear in the estimates, and we are not permitted to do so under the Budget system, it is my belief that instead of annual appropriations of between $12,000,000 and $15,000,000 as now authorized by Congress we need approximately $25,000,000 a year for several years to come if we are to meet the actual requirements of the situation. We need more doctors, more medical experts on trachoma and tuberculosis, more sanatoria and sanatorium schools, and at least 200 more nurses are needed at once for our field service. We need at this time at least 25 additional hospitals for Indians now without adequate hospital facilities.

We need better school facilities, with a minimum per capita allowance of $300, which amount is necessary for the conduct of our schools if we are to operate them along modern standards of education. Our present school dormitories, schoolrooms, and shops need better equipment, and we need an increased appropriation to provide dairy cows so that our school children can have more milk. Our present school system needs to be reorganized and placed on a more modern and efficient basis with college and university graduates trained along modern educational lines and with experience in educational work in supervisory educational positions, such as supervisors, principals, and principal-teachers.

We need a much larger reimbursable appropriation to improve bad home conditions among Indians. More money is needed to provide for at least 100 trained women with social service ideals as field demonstration agents to improve home and living conditions.

We need at least 50 more trained agricultural and industrial leaders to teach Indians to make better use of their industrial opportunities. We need more funds to provide a larger variety and better balanced food for our Indian school children.

We need an increased trained force of well-paid employees to bring the Indians generally to a better realization that after all the Indian problem is their problem and that it is the duty of the Indians of this country to become by their own efforts industrious, progressive, self-supporting, and law-abiding citizens of this great Republic.

While frankly acknowledging the foregoing needs of the Indian Service in order to bring about an ideal administration of Indian affairs, we recognize that these increased appropriations must be obtained gradually, but we are working to a definite aim and with the cooperation of the Bureau of the Budget, the Congress, and the friends of the Indians generally, which has been so generously extended in the past, we hope to reach this goal within the next three or four years. In the meantime, we have a feeling of pride in what has already been accomplished under the administration of Commissioner Burke, and we feel that the foundation has been laid for a more rapid progress in the promotion of the welfare of the American Indian during the next few years than has ever before been possible in a similar period of time in the history of the administration of Indian affairs by the Federal Government.

Much of the unprecedented progress of the Indians of this country during the last seven years is due to the able and wise leadership of Commissioner Charles H. Burke, who has made his home practically his entire adult life in South Dakota among the Sioux, who by reason of his long and close contact understands the Indians and has an intimate knowledge of their needs and problems, who spent 14 years in Congress representing their interests as a member of the House Committee on Indian Affairs, and part of the time as chairman of that important committee, and who for more than 7 years has served the Indians of this country honestly, faithfully, and well as their Commissioner of Indian Affairs. Commissioner Burke is recognized by practically all fair-minded people who know the Indian problem as the best informed and equipped and the most efficient Commissioner of Indian Affairs who has ever served in that high, responsible, and exceedingly difficult position. No honest man can or will question his integrity, his high Christian character, his sterling worth as a citizen or as an official of our Government, or his loyalty and devotion to the cause of the American Indian.

[From the Santa Fe New Mexican, December 5, 1928]

THE INDIAN BUREAU

The new Secretary of the Interior recommends a more definite and improved policy for administration of Indian affairs.

With all due regard to the well-known century of dishonor and the fumblings and inefficiencies and bureaucracies of the Indian Bureau, this moves us at this time to utter a word of defense. The New Mexican has done its full share of denunciation of the mistakes and injustices laid at the door of this bureau, and it would be highly unfair not to tender a few brief words of praise for the things it has been doing recently in the Southwest. Certainly it will not receive any such praise from the agencies of highly personal malice which chiefly motivate the present drive against the bureau.

It should be explained that there are two sets of organizations now concerning themselves with Indian affairs. The one has sought

by cooperation and stimulation to get things done, with very gratifying success. The other is out frankly and solely to get the scalps of the commissioner and his assistant by fair means or foul.

It may be that the Indian Bureau and its personnel are cruel, brutal, rapacious, oppressive, unscrupulous, dishonest, and thievish, as alleged, in Oklahoma, California, and other seaports where instances of alleged beating of boys with cats-o'-nine-or-more-tails are viewed with alarm.

However, in the States of Arizona and New Mexico we have seen the Navajos and Pueblos organize, at the suggestion of the bureau, into councils to have a voice in their own government and negotiate their grievances with Uncle Sam.

Santa Fe has had an opportunity to watch the village Indians discussing their affairs with the Government amicably and with satisfaction to themselves.

These two States have seen various expensive dormitories, hospitals, and other improvements built, have watched expert nurses hired by private organizations work with the approval and aid of the bureau, have seen world-noted experts called in to lead a fight on trachoma, have read lengthy recommendations by the assistant commissioner for a hundred reforms in educational methods, medicine, hospitalization, sanitation, and whatnot. The public knows such men as Faris, McCormick, Perry, Burton Smith, Crandall, and finds them more or less typical of the fine general run of local Indian officials. We find the assailants of the bureau making no mention of the monumental work of the Pueblo lands board or the record of Hagerman in putting the Navajos on a basis of semiautonomy. The Pueblo ceremonial dances are proceeding undisturbed, and the Pueblos themselves so far from being herded by an inhumane Government, are allowed the run of the whole country to such an extent that you see more dances in Los Angeles than in Tesuque.

Of course, the Indian Bureau has been steeped in an archaic point of view; it has been the apothesis of bureaucracy, the product of an ancient system. Knowing that fact, we should give it the greater credit for every progressive step. We say unhesitatingly that it is deserving of high praise for the improvement it has brought about in administration in the Southwest. Settling the Pueblo land controversy alone is a most remarkable achievement. Whoever deserves the credit for creating the machinery of settlement, it was done finally with the cooperation of the bureau.

This is no brief for the Indian Bureau in perspective or as a whole. It needs a new and broader human viewpoint. It got the way it is, incidentally, through the necessity of doing business with a Congress full of politicians. It has done petty and oppressive things inside its organization, and it has not been sufficiently responsive to public sentiment. Through habituation to bitter and often irresponsible attacks from every quarter, it has become too casehardened often to pay attention to constructive suggestions.

Yet in the past two or three years, we in the Southwest have seen it make an honest, earnest effort to meet constructive criticism, and have witnessed a tremendous improvement in policy and method.

We insist that this record be not excluded from the picture, and in particular that Assistant Commissioner Meritt receive a well-earned bouquet.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

For purchase of additional land and water rights for the use and benefit of Indians of the Navajo Tribe, title to which shall be taken in the name of the United States in trust for the Navajo Tribe, $200,000, as authorized by the act of May 29, 1928 (45 Stat. 899), payable from funds on deposit in the Treasury of the United States to the credit of the Navajo Tribe: *Provided*, That in purchasing such lands title may be taken, in the discretion of the Secretary of the Interior, for the surface only.

Mr. BLANTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Texas moves to strike out the last word.

Mr. BLANTON. Why is there an invitation here in the language of this proviso, in selling these lands, to retain the mineral rights?

Mr. CRAMTON. Is this the Navajo land item?

Mr. BLANTON. Yes; on lines 16, 17, and 18. In other words, in purchasing these lands for them with their funds, the Government is permitted to take for them title only to the surface. It occurs to me it is an invitation to owners selling the lands to retain the mineral rights. Frequently the mineral rights are most valuable.

Mr. CRAMTON. The Indians are very anxious to acquire those lands. They are not acquiring them for speculative purposes or the possibility of obtaining minerals, but in connection with their flocks and herds. They can be bought from the railroads. In one case they are owned by the railroads; and in other cases they are owned by companies. They can be bought for around $1.25 an acre if the mineral rights are not included; but if we insist on the mineral rights as well as the land the price will be materially greater.

Mr. BLANTON. Well, in selling land as between individuals the custom is now to have some limitation on the reservation. For instance, where parties reserve mineral rights, they frequently reserve them only for a number of years. Does the gentleman think it wise to cut these Indians off from all of mineral values?

Does the gentleman think it wise to cut these Indians off from all valuables that may be under their lands?

Mr. CRAMTON. It is within the discretion of the administrative authorities to make such contracts as they can, but we open the way so that if they can not get the lands at that low price they have authority to make any contract they think is desirable. I agree with the gentleman it is nicer to have the mineral rights with the lands, but if we required them to acquire the mineral rights it might increase very greatly the cost of the lands.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

INDUSTRIAL ASSISTANCE AND ADVANCEMENT

For the purposes of preserving living and growing timber on Indian reservations and allotments other than the Menominee Indian Reservation in Wisconsin, and to educate Indians in the proper care of forests; for the conducting of experiments on Indian school or agency farms designed to test the possibilities of soil and climate in the cultivation of trees, grains, vegetables, cotton, and fruits, and for the employment of practical farmers and stockmen, including $50,000 for the employment of agricultural college graduates scientifically trained and qualified to direct the agricultural activities of the Indians, in addition to the agency and school farmers now employed; for necessary traveling expenses of such farmers and stockmen and for furnishing necessary equipment and supplies for them; and for superintending and directing farming and stock raising among Indians, $435,000: *Provided*, That this appropriation shall be available for the expenses of administration of Indian forest lands from which timber is sold to the extent only that proceeds from the sales of timber from such lands are insufficient for that purpose: *Provided further*, That not to exceed $100,000 of the amount herein appropriated may be used for the prevention of forest fires on Indian reservations: *Provided further*, That not to exceed $20,000 of the amount herein appropriated may be used to conduct experiments on Indian school or agency farms to test the possibilities of soil and climate in the cultivation of trees, cotton, grain, vegetables, and fruits, and for producing and maintaining a supply of suitable plants or seed for issue to Indians: *Provided further*, That not to exceed $10,000 of the amount herein appropriated may be used for obtaining remunerative employment for Indians and when necessary for payment of transportation and other expenses to their place of employment, such expenditures to be refunded when practicable: *Provided also*, That the amounts paid to matrons, foresters, farmers, physicians, nurses, and other hospital employees, and stockmen provided for in this act shall not be included within the limitations on salaries and compensation of employees contained in the act of August 24, 1912 (U. S. C. p. 692, sec. 58).

Mr. BLANTON. Mr. Chairman, I make a point of order against the last proviso as a change in the law unauthorized in an appropriation bill. It seeks to take the limitation off that was prescribed in the act of 1912.

Mr. CRAMTON. Mr. Chairman, I feel sure it is subject to a point of order, otherwise there would be no occasion for it. It is a proviso that has been carried for a number of years. I have forgotten just what the act of 1912 provides, and hence I do not recall how important this is.

Mr. BLANTON. It fixed the maximum of these payments, and to take the maximum limit off and just leave it to the discretion of the Indian Office I do not think is salutary. I think we ought to retain these limitations.

Mr. CRAMTON. I will read the section that this refers to. I will say to the gentleman it has been carried for a number of years, but my recollection is not clear as to the situation or what the effect would be if the point of order is sustained. However, I will admit it is subject to a point of order.

Mr. BLANTON. I will state to the gentleman that I intend to make it.

Mr. CRAMTON. I would like to make clear just what it is that we are doing.

Mr. BLANTON. We are taking these limitations off too frequently, in my judgment.

Mr. CRAMTON. Section 58 provides:

Not more than $15,000 shall be paid in any one year for salaries or compensation of employees regularly employed at any one agency, except the Osage, for its conduct and management, and the number and kind of employees at each agency shall be prescribed by the Secretary

of the Interior, and none other shall be employed: *Provided*, That where two or more Indian agencies have been or may be consolidated the expenditure of such consolidated agencies for regular employees shall not exceed $20,000: *Provided further*, That salaries or compensation of agents, Indians, school employees of every description, and persons temporarily employed, in case of emergency, to prevent loss of life and property, in the erection of buildings, the work of irrigation, and making other permanent improvements, shall not be construed as coming within the limitations fixed by the foregoing paragraphs.

It appears that the purpose of the paragraph is to limit the amount of money that can be paid for employees within one reservation. It limits the amount that can be paid for certain classes of employees at one reservation. Now, the gentleman appreciates the great difference in reservations, and if this is stricken out it will limit the expenditure but not the salary of any employee. It limits the total amount that could be spent for matrons, foresters, farmers, physicians, nurses, and so forth, at any one reservation.

Mr. BLANTON. And very effectually thereby limit salaries.

Mr. CRAMTON. It is subject to a point of order if the gentleman insists on it.

Mr. BLANTON. I intend to make it.

Mr. COLTON. Will the gentleman withhold his point of order for a moment?

Mr. BLANTON. It will only waste time.

The CHAIRMAN. Gentlemen speaking in the committee should rise.

Mr. BLANTON. Mr. Chairman, I insist on the point of order.

The CHAIRMAN. The gentleman from Texas makes a point of order against the proviso. The point of order is conceded by the chairman of the subcommittee, and in the opinion of the Chair the point of order is well taken. The Chair, therefore, sustains the point of order.

The Clerk read as follows:

In all, for irrigation on Indian reservations, not to exceed $160,000, together with the unexpended balance of the appropriation for this purpose for the fiscal year 1929, which is hereby reappropriated, reimbursable as provided in the act of August 1, 1914 (U. S. C. p. 716, sec. 385): *Provided*, That no part of this appropriation shall be expended on any irrigation system or reclamation project for which public funds are or may be otherwise available: *Provided further*, That the foregoing amounts appropriated for such purposes shall be available interchangeably, in the discretion of the Secretary of the Interior, for the necessary expenditures for damages by floods and other unforeseen exigencies, but the amount so interchanged shall not exceed in the aggregate 10 per cent of all the amounts so appropriated: *Provided further*, That the costs of irrigation projects and of operating and maintaining such projects where reimbursement thereof is required by law shall be apportioned on a per acre basis against the lands under the respective projects and shall be collected by the Secretary of the Interior as required by such law, and any unpaid charges outstanding against such lands shall constitute a first lien thereon which shall be recited in any patent or instrument issued for such lands.

Mr. ARENTZ. Mr. Chairman, I move to strike out the last word.

The last words read by the Clerk refer to just the things I tried to bring to the attention of the chairman of the committee a few moments ago—

any unpaid charges outstanding against such lands shall constitute a first lien thereon, which shall be recited in any patent or instrument issued for such lands.

I want the members of this subcommittee of the Appropriations Committee to bear in mind the fact that we have charged off on reclamation projects a large sum of money, and it is going to be necessary for this committee to do something toward charging off, for the same reasons, charges placed against these allotted lands of Indians. Who is going to do this unless this committee becomes cognizant of the fact that such conditions exist, and I hope when Mr. Meritt comes before this committee the next time you will ask him some questions along this line, because, surely, you do not want these lands burdened with these excess costs.

Some of these irrigation projects were constructed 15, 20, and 30 years ago, the woodwork has rotted, the ditches have filled up with sand, and water has not been through them for a generation. The lands that have been allotted to these Indians scattered over the project have never received water and the charges accumulated by this construction work are still pending against the lands.

I hope something will be done, and I am speaking of this to-day so that it will be brought to the attention of the officials of the Bureau of Indian Affairs.

Mr. CRAMTON. Will the gentleman yield?

Mr. ARENTZ. Gladly; yes.

Mr. CRAMTON. I am well satisfied there is a great deal in what the gentleman from Nevada is saying, and that there are places where some adjustments are very desirable. Of course, the gentleman realizes the danger that is always encountered when we start in to clean up a thing of this kind. It gets to be that everybody thinks they are entitled to an adjustment, and because you give it to A, for instance, B, C, D, and E are all on the job.

Mr. ARENTZ. A, B, C, D, and E, my friends, should all be heard. Every one of them should at least be heard.

Mr. CRAMTON. Yes; but just because A is given an adjustment, it does not follow that B is entitled to one. If this matter could be taken up and checked up carefully and the right thing done in each case standing on its own merits, it would be fine; but if we were to bring together a bill that would be a kind of pork-barrel adjustment, of course, that would be undesirable. I would be pleased to see a study made of the subject so that the desirable cases may be taken care of.

Mr. ARENTZ. And that is just exactly why I am bringing it to the gentleman's attention, so that justice will be rendered in each individual case and a study made of each individual case. Surely by suggesting an adjustment on the Walker River Indian Reservation, I am not suggesting you should include other reservations where such an adjustment is not necessary, and I hope the gentleman will bear this in mind when the time comes, and I hope that time may come soon and that an adjustment will be made so we can bring in the Indians from Inyo County, Calif., who have the money and would buy these allotments and settle this land.

The pro forma amendment was withdrawn.

The Clerk read as follows:

To reimburse R. E. Hansen for destruction of crops, $2,480.65, payable out of funds received from the sale of stored water in the Blackfoot Reservoir, Fort Hall irrigation project, Idaho, as authorized by the act of May 29, 1928 (45 Stat. pt. 2, p. 327).

Mr. CRAMTON. Mr. Chairman, I offer an amendment as a new paragraph.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: On page 32, after line 16, insert a new paragraph, as follows:

"For the purpose of carrying out the provisions of the act approved May 29, 1928 (45 Stat. 938), to provide reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of drainage districts that may be benefited by drainage works of such districts, $114,000, reimbursable as provided for and subject to the provisions and conditions of such act."

Mr. CRAMTON. Mr. Chairman, I will only state that this is to carry out a recent act of Congress and is in accordance with a supplemental estimate that has just come to the Congress and was not before us when we made up the bill.

I ask unanimous consent to extend my remarks by putting in the RECORD a paragraph from the Budget statement in reference to it.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The matter referred to follows:

The act of May 29, 1928, authorized the Secretary of the Interior to enter into an agreement with drainage districts in Idaho for the drainage and reclamation of certain Kootenai Indian allotments at a cost of not exceeding $114,000. It is believed the act intended to provide for the completion of the drainage work at a relatively early date, with the cost of the work to be covered by an advance of funds from the Treasury, such advance of funds to be repaid to the Treasury from proceeds of leases in not less than 20 annual installments. The Budget for 1930 contains an estimate of $5,700, representing one-twentieth of the estimated cost of the work, which was submitted by the Department of the Interior in the thought that the act provided for the advance of funds, as well as for their repayment, in not less than 20 annual installments. The estimate of $108,300 now submitted by the department, together with the $5,700 carried in the 1930 Budget, is recommended by the department in order to provide the necessary amount to be advanced to the drainage districts for the early completion of the work as contemplated by the above-cited act.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The Clerk read as follows:

EDUCATION

For the support of Indian day and industrial schools not otherwise provided for, and other educational and industrial purposes in connection therewith, $2,850,000: *Provided,* That not to exceed $10,000 of this appropriation may be used for the support and education of deaf and dumb or blind or mentally deficient Indian children: *Provided further,* That $3,500 of this appropriation may be used for the education and civilization of the Alabama and Coushatta Indians in Texas: *Provided further,* That hereafter all reservation and nonreservation boarding schools with an average attendance in any year of less than 45 and 80 pupils, respectively, shall be discontinued on or before the beginning of the ensuing fiscal year. The pupils in schools so discontinued shall be transferred first, if possible, to Indian day schools or State public schools; second, to adjacent reservation or nonreservation boarding schools, to the limit of the capacity of said schools: *Provided further,* That hereafter all day schools with an average attendance in any year of less than eight shall be discontinued on or before the beginning of the ensuing fiscal year: *Provided further,* That hereafter all moneys appropriated for any school discontinued pursuant to this act or for other cause shall be returned immediately to the Treasury of the United States: *Provided further,* That not more than $400,000 of the amount herein appropriated may be expended for the tuition of Indian children enrolled in the public schools under such rules and regulations as the Secretary of the Interior may prescribe, but formal contracts shall not be required, for compliance with section 3744 of the Revised Statutes (U. S. C., p. 1310, sec. 16), for payment of tuition of Indian children in public schools or of Indian children in schools for the deaf and dumb, blind, or mentally deficient: *Provided further,* That not less than $6,500 of the amount herein appropriated shall be available only for purchase of library books.

Mr. BLANTON. Mr. Chairman, I make the point of order against the following words in this paragraph: In line 17, page 38, against the word "hereafter." On page 39, line 1, against the word "hereafter." On the same page, line 4, against the word "hereafter." On the same page, line 11, against the following language: "But formal contract shall not be required for compliance with section 3744 of the Revised Statutes (U. S. C., p. 1310, sec. 16) for payment of tuition of Indian children in public schools or of Indian children in schools for the deaf, dumb, blind, or mentally deficient," all of the above being a change of existing law unauthorized on an appropriation bill.

Mr. CRAMTON. Mr. Chairman, the word "hereafter" where it occurs several times in this paragraph is, of course, subject to a point of order. It really is not very material whether the word goes out or remains in. The language putting a limitation on the continuation of certain schools requiring schools to be closed when less than a certain number of pupils are present has been carried in the bill ever since I have had anything to do with it, and I do not know how long before. By reason of that fact the Budget recommended this change that the gentleman objects to. I admit the point of order is good against the words "hereafter," and if the gentleman cares to insist upon the point of order I do not appeal to him to withdraw it.

Mr. BLANTON. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. I was trying to keep the committee consistent. A while ago there was a very salutary amendment offered that prevented accounts from being filed against the Government, 3, 4, 5, or 10 years after the amounts had been expended. I offered an amendment and the chairman of the committee acceded to it, but the point of order was made, and the point of order was sustained. I am trying to keep the committee consistent. You have to carry the language every year when you can stop it by inserting the word "hereafter." I want the committee to be consistent.

Mr. CRAMTON. The committee has been consistent——

Mr. BLANTON. I mean the Committee of the Whole House on the state of the Union.

Mr. CRAMTON. I want the gentleman to distinguish carefully between the two.

Mr. BLANTON. I meant the Committee of the Whole House on the state of the Union as distinguished from the committee that handles the bill.

Mr. CRAMTON. The committee in charge of the bill has been consistent, and we favored the elimination of the language for two reasons. First, we think it is desirable, although not enough of importance to press it, to save a little in the cost of printing the bill; and then there is the other fact that when you have long paragraphs with a lot of provisos in the bill, repeated year after year, there is less likelihood of giving attention to other provisions. But it is subject to the point of order, and if the gentleman from Texas sees fit to join with the gentleman from South Carolina, who made the point of order, against his amendment, I do not appeal to him to withdraw it.

Mr. BLANTON. I will have to insist on it.

The CHAIRMAN. The Chair understands that the gentleman from Texas directs his point of order to the word "hereafter" where it occurs in the paragraph, page 38, line 17, page 39, line 1, and page 39, line 4, the point of order being directed against the word "hereafter." That word will be stricken out and the point of order sustained.

Mr. CRAMTON. Mr. Chairman, as for the other point of order, that language has also been carried for some time, and in the hearings will be found a statement from the Assistant Commissioner of Indian Affairs pointing out that better contracts are secured, and why, doing business with these public schools and other public agencies, it is desirable to free them from that provision of the statute. It is subject to the point of order. Personally, I hope the gentleman from Texas will not make the point of order, but if he insists upon it, I admit that it is good.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. The gentleman is aware of the fact that the House has a very active legislative Committee on Indian Affairs and a very active chairman who works his members nearly to death all of the time keeping up with the business. Whenever the gentleman from Michigan wants a change of legislation affecting Indian affairs, I suggest that he take the matter up with our distinguished chairman of the Committee on Indian Affairs. I am sure that he can get the proper legislation and will not be compelled to have the Committee on Appropriations seek to take away all of the duties of the Indian Affairs Committee.

Mr. CRAMTON. If the gentleman will yield, I think this language referred to, although I can not speak positively, is language that the Committee on Appropriations inherited from the Committee on Indian Affairs when that committee had legislative jurisdiction. I think this proviso has been carried for probably 10 years.

Mr. BLANTON. But it does seek to change existing law.

Mr. CRAMTON. Yes.

Mr. BLANTON. Mr. Chairman, I insist on the point of order.

The CHAIRMAN. How much of the language does the gentleman include in his point of order?

Mr. BLANTON. I make the point of order only to that language which seeks to change the law, beginning in line 11, page 39, with the words "but formal contracts shall not be required," and ending with the word "deficient" in line 16.

The CHAIRMAN. It stops at the colon.

Mr. BLANTON. Yes.

The CHAIRMAN. The gentleman from Texas makes the point of order against the language occurring on page 39, in lines 11 to 16, inclusive—

but formal contracts shall not be required, for compliance with section 3744 of the Revised Statutes (U. S. C., p. 1310, sec. 16), for payment of tuition of Indian children in public schools or of Indian children in schools for the deaf and dumb, blind, or mentally deficient:

The point of order is sustained. That language will be stricken from the bill. The Clerk will read.

The Clerk read as follows:

For lease, purchase, repair, and improvement of school buildings, including the purchase of necessary lands and the installation, repair, and improvement of heating, lighting, power, and sewerage and water systems in connection therewith, $275,000; for construction of physical improvements, $275,000; in all, $550,000: *Provided,* That not more than $7,500 out of this appropriation shall be expended for new construction at any one school or institution except for new construction authorized as follows: Chimopovy day school, Hopi Reservation, Ariz.: For new schoolhouse, dining hall, kitchen, wash room, and toilet, $7,500; for electric-light plant, $1,000; in all, $8,500; Hoopa Valley school, California: For remodeling and improving girls' and boys' dormitories, $10,000; Choctaws in Mississippi: For day-school plant, $10,000; Kiowa (Fort Sill) school, Oklahoma: For additions to girls' and boys' dormitories, including heating, toilets, and baths, $15,000; Cheyenne and Arapahoe school, Oklahoma: For enlarging girls' and boys' dormitories, including equipment, $21,500; Uintah boarding school, Utah: For dining hall and equipment, $15,000; Tulalip boarding school, Washington: For new dining hall and kitchen, including equipment, $13,500; Western Navajo boarding school, Arizona: For construction and equipment of a boys' dormitory, central heating plant, and mess hall, $125,000.

Mr. TAYLOR of Colorado. Mr. Chairman, I offer the following amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. TAYLOR of Colorado: Page 42, line 5, after the figures "$10,000" insert:

"Ignacio Boarding School, Colorado: For enlargement, including equipment, $90,000."

Mr. TAYLOR of Colorado. Mr. Chairman, this is in accordance with the supplemental estimate that was sent up by President Coolidge yesterday after we had written up the bill. The hearings at pages 1005 to 1010 described this matter fully. In connection with it I ask unanimous consent to extend my remarks by inserting the President's statement. This appropriation is for a new school building and auditorium and for a girls' dormitory at the Ignacio Indian school in my district in southern Colorado. I am providing for doubling the capacity of that school.

The CHAIRMAN. The gentleman from Colorado asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Colorado.

The amendment was agreed to.

The statement of the Budget Bureau follows:

THE WHITE HOUSE,
Washington, December 12, 1928.

The SPEAKER OF THE HOUSE OF REPRESENTATIVES.

SIR: I have the honor to transmit herewith for the consideration of Congress supplemental estimates of appropriations for the Department of the Interior, Bureau of Indian Affairs, for the fiscal year 1930, amounting to $198,300.

The details of the estimates, the necessity therefor, and the reasons for their submission at this time are set forth in the letter of the Director of the Bureau of the Budget transmitted herewith, with whose comments and observations thereon I concur.

Respectfully,

CALVIN COOLIDGE.

BUREAU OF THE BUDGET,
Washington, December 12, 1928.

SIR: I have the honor to submit herewith for your consideration supplemental estimates of appropriations for the Department of the Interior, Bureau of Indian Affairs, for the fiscal year 1930, as follows:

Reclamation of Kootenai Indian allotments, Idaho (reimbursable): For the purpose of carrying out the provisions of the act approved May 29, 1928 (45 Stat., p. 938), to provide reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of drainage districts that may be benefited by drainage works of such districts, $108,300, reimbursable as provided for and subject to provisions and conditions of said act (act May 29, 1928, vol. 45, p. 938)-- $108,300

The act of May 29, 1928, authorized the Secretary of the Interior to enter into an agreement with drainage districts in Idaho for the drainage and reclamation of certain Kootenai Indian allotments at a cost of not exceeding $114,000. It is believed the act intended to provide for the completion of the drainage work at a relatively early date, with the cost of the work to be covered by an advance of funds from the Treasury, such advance of funds to be repaid to the Treasury from proceeds of leases in not less than 20 annual installments. The Budget for 1930 contains an estimate of $5,700, representing one-twentieth of the estimated cost of the work, which was submitted by the Department of the Interior in the thought that the act provided for the advance of funds, as well as for their repayment, in not less than 20 annual installments. The estimate of $108,300 now submitted by the department, together with the $5,700 carried in the 1930 Budget, is recommended by the department in order to provide the necessary amount to be advanced to the drainage districts for the early completion of the work as contemplated by the above-cited act.

Enlargement, Ignacio School, Colorado: For enlargement of the Ignacio Boarding School, Colorado---------- 90,000

The Indian boarding school at Ignacio, Colo., near the border of the Navajo Reservation, accommodates 100 Navajo boys. With existing boarding-school facilities on the Navajo Reservation fully utilized, and with a considerable number of Navajo children unprovided with school accommodations, the Secretary of the Interior recommends an enlargement of the Ignacio School to accommodate 100 Navajo girls. The school is conveniently located for such pupils, possesses ample grounds for the additional buildings required, and has an excellent water supply. It is believed that accommodation for these girls can be secured at a lower cost through the enlargement of the Ignacio School than by building on a new location elsewhere. This estimate would provide for a girls' dormitory at a cost of $40,000 and for a new school building at a cost of $50,000.

Total---------- 198,300

The foregoing estimates of appropriations are to meet contingencies which arose since the preparation of the 1930 Budget, and their approval is recommended.

Very respectfully,

R. O. KLOEBER,
Acting Director of the Bureau of the Budget.

The PRESIDENT.

Supplemental estimates of appropriations required for the service of the fiscal year ending June 30, 1930, by the Department of the Interior

BUREAU OF INDIAN AFFAIRS

For the purpose of carrying out the provisions of the act approved May 29, 1928 (45 Stat. p. 938), to provide reclamation of Kootenai Indian allotments in Idaho within the exterior boundaries of drainage districts that may be benefited by drainage works of such districts, $108,300, reimbursable as provided for and subject to provisions and conditions of said act (act May 29, 1928, vol. 45, p. 938)---------- $108,300

Enlargement, Ignacio School, Colorado: For enlargement of the Ignacio boarding school, Colorado (submitted)-------- 90,000

Total---------- 198,300

The Clerk read as follows:

For aid to the common schools in the Cherokee, Creek, Choctaw, Chickasaw, and Seminole Nations and the Quapaw Agency in Oklahoma, $250,000, to be expended in the discretion of the Secretary of the Interior, and under rules and regulations to be prescribed by him: *Provided*, That this appropriation shall not be subject to the limitation in section 1 of the act of May 25, 1918 (U. S. C., p. 708, sec. 297), limiting the expenditure of money to educate children of less than one-fourth Indian blood.

Mr. SCHAFER. Mr. Chairman, I make the point of order against the proviso beginning in line 24, page 49, and ending with line 4 on page 50. It is legislation unauthorized on an appropriation bill.

Mr. CRAMTON. Mr. Chairman, the proviso in question if stricken out will not affect the Treasury. There will be no money saved to the Treasury by striking out the proviso. It is subject to a point of order. Of course, there would be no occasion to put it in if it did not change the existing law. To what extent it is desirable to carry the proviso or to eliminate it I do not know. Nevertheless, I urge the gentleman not to make the point of order for this reason. There are two paragraphs in the bill that provide for the payment of tuition of Indian students in public schools. There is one which I think has already been read. That applies elsewhere than among the Five Civilized Tribes. The one now before us applies only to the Five Civilized Tribes. The rates of tuition paid out of this item are far lower apparently than the rates of tuition paid out of the other item. There has been some unrest about that in the State of Oklahoma. Our committee gave some consideration to that. Because 40 cents a day is paid in one place it does not mean that 40 cents a day is necessarily a fair rate in Oklahoma. It depends upon how many children in the district go to school and what the expense of education is in that locality. Just the fact that 40 cents is being paid in some other States and 10 or 15 cents is being paid in Oklahoma does not mean that the Oklahoma rate is unfair. Still our committee did not have before us all of the information that we would like to have before passing finally on that question. We went into the question very carefully and considered such information as was before us. As a result of that information we recommended an increase in this item from $150,000, as it was last year, to $250,000. That is an increase of $100,000 in this item above the current year, and $75,000 above the Budget estimate. That action of our committee was as far as we felt justified in going in the light of present information.

I may say we felt perfectly safe in going that far, but before going further, and how much further, we wanted more information. It is the purpose of the committee, and I want this of record, to make a real study of this problem of tuition for Indian children in Oklahoma during the coming year, so that when another bill comes in we may be in a position to say definitely what we ought to do.

Mr. SCHAFER. Will the gentleman yield?

Mr. CRAMTON. I will.

Mr. SCHAFER. Should not the legislative committee of the House handling Indian affairs make an inspection and bring forth legislation in regard to this matter if it may be required?

Mr. CRAMTON. If there is legislation required, that would be a question for the legislative committee. The bulk of the questions hereafter would not be of a legislative character and would be purely within our jurisdiction. Now, the questions that will come into that—and we work very closely in connection with the legislative committee—but the questions that will come into that, one of them is, How many children are now having their tuition paid for that ought not to be paid? How many of less than one-fourth Indian blood are the occasion of tuition, and what are the conditions to-day; and is it better to let those conditions stand now rather than change the situation? As for myself, I would rather let it stand until the Indian Affairs Committee or my committee have definite knowledge. There are

other questions, and one of them is, How many children are we paying tuition for who are not restricted Indians? If they are not restricted the lands they own, generally speaking, are subject to taxation. In Oklahoma they say there is a little complication even in that; but, generally speaking, the unrestricted Indian is subject to taxation, and hence there does not obtain the same reason for paying tuition as otherwise. Another question for consideration would be the amount of taxes that are to go to the State or its subdivisions as a result of oil leases of the Indians.

The restriction bill which just passed provided that certain leases should have the proceeds taxed, and so forth. Now, this is a matter of great importance to Oklahoma, and it ought to be settled fairly and squarely, and that can only be done by carefully developing the facts, and hence I urge the gentleman not just suddenly here to change the situation that has obtained for several years and let the matter go along for another year.

Mr. SCHAFER. In reserving the right to object, I just wanted to hear from some of the Members from Oklahoma as to whether or not in their judgment this proviso was proper.

Mr. HASTINGS. In answer to the gentleman from Wisconsin, whom I thank for permission to answer, let me say this in addition to what the gentleman from Michigan has so well said in reference to this item of appropriation. This provision is put in for the reason that we realize the situation is different from that of other Indian tribes in other States where a certain degree of blood makes the lands of Indians exempt from taxation. Now that is not correct in Oklahoma. Now permit me to say that the homesteads of Indians in the Cherokee Nation and the Seminole Nation, regardless of the degree of blood, regardless of whether restricted or unrestricted, are nontaxable. Now, Congress, by the act of May 27, 1908, attempted to make these homesteads taxable. The question went to the Supreme Court and the Supreme Court held that action on the part of Congress was unconstitutional and invalid. Now let me appeal to the gentleman from Wisconsin by further saying there are 16,000 Indian pupils in the public schools in Oklahoma. An appropriation has been made in aid of public schools in lieu of taxes not collected from lands exempt from taxes for a number of years. Under former appropriations the Government is only able to pay about 10 cents a day per pupil. The gentleman from Michigan well said the amount paid in other States is 40 cents a day. Now, the committee recognized that was an inequality. And the committee gave careful study to this question for the purpose of trying to do justice to the State of Oklahoma and be fair to the Indian pupils from other States. The record shows in excess of 16,000 Indian children in public schools in Oklahoma, some of whom are restricted and some are unrestricted, and the record further shows 7,900 restricted Indian children eligible to attend these public schools, and that there are actually 5,798 restricted Indian children in the rural public schools.

Now, as the gentleman from Michigan has said, if this proviso is knocked out it will not protect the Treasury; that is, it does not reduce the appropriation, because the amount will be expended anyway. The reason why I am appealing to the gentleman from Wisconsin to withdraw his point of order is that this appropriation is to supplement other funds of public schools in lieu of taxes not collected from lands exempt from taxation. The homesteads in the Cherokee and Seminole Nations are exempt under the law from taxation, regardless of the degree of blood. This item is very important to my State of Oklahoma.

Mr. CRAMTON. This item really originated with the Committee on Indian Affairs in connection with recent legislation for the extension of the restrictive period. Our action followed in consequence of the discussion in the Committee on Indian Affairs.

The CHAIRMAN. The Chair feels that he has sufficient information on the subject.

Mr. SCHAFER. Mr. Chairman, I withdraw the point of order, in view of the fact that the Committee on Appropriations takes the responsibility for the legislation.

Mr. BLANTON. Mr. Chairman, if this language remains in the bill, there is just one more restriction taken out of the law that Congress has placed around expenditures for the protection of the people's Treasury. I am not surprised that my friend from Wisconsin [Mr. SCHAFER] should be overwhelmed with the chairman firing at him from one side and his able lieutenant on this side of the Hall coming at him in the rear. I am not surprised at him; but I know of no other way to stop increasing appropriations than by retaining the restrictions that Congress places around expenditures.

This bill carries $283,000,000 plus. That is over $10,000,000 more than last year's bill carried. Yet last year's appropriation carried many million dollars more than the preceding bill, and so on back. Yet the members of the committee have already added to this bill from the floor $114,000 in one instance and $78,000 in another instance and $90,000 in still another instance, and in his hip pocket the chairman has an amendment, which he will offer pretty soon, to add another $250,000 to the bill. Now, if we do away with all of these restrictions, God knows what will become of the Treasury. Therefore I am going to make the point of order.

Mr. HOWARD of Oklahoma. Will not the gentleman withhold his point of order? He is not protecting the Treasury in this.

Mr. BLANTON. It removes a safeguard in behalf of the Treasury. I will not be blown hither and thither by arguments that can always be submitted by members of the committee in support of an item.

Mr. HOWARD of Oklahoma. In making this point of order the gentleman is not protecting the Treasury at all. He is bringing about a situation in Oklahoma where some school districts containing full-blood Indians will be paid for, while other school districts in the outskirts, having in them Indians of less than one-fourth blood, as homesteaders are exempt from taxation and will have no benefit from this appropriation. The gentleman is in no way helping the Government or limiting the amount of appropriations to be made by making this point of order, but is bringing a hardship on certain school districts in the State of Oklahoma that have the right to share in this appropriation by reason of the conditions that exist.

Mr. HASTINGS. I appeal to the gentleman from Texas to withhold for just one minute.

Mr. BLANTON. I am going to make the point of order.

The CHAIRMAN. Is the point of order made or is it reserved?

Mr. BLANTON. I have reserved it.

Mr. HASTINGS. I believe if I can have the gentleman's attention that he will withdraw his point of order. This is in aid of the common schools of Oklahoma in lieu of tax-exempt lands. The homesteads of the Cherokees, regardless of the quantum of Indian blood, are exempt from taxation by act of Congress; an act which the Congress has tried to repeal, and which the Supreme Court has held to be unconstitutional. But Congress itself did that, and the same is true as to the Seminoles. One may be only one-one hundred and twenty-eighth degree of Cherokee blood, and yet that homestead is not taxable. I am sure if the gentleman from Texas fully understood the provisions of these two agreements and knew what they were intended to cure—and this is not a new provision——

Mr. BLANTON. Here, with a bill carrying $283,000,000, we have only 60 Members attending here. That condition exists because the Committee on Appropriations has taken over the functions of the entire Congress and the Members will not stay any more. What good can they do if this committee is to do all the legislating?

The bills are all cut and dried. I am a member of the Committee on Indian Affairs. I will vote for the gentleman's amendment in the next meeting.

Mr. HASTINGS. This language is not new. It was carried last year and has been carried for a number of years past.

Mr. BLANTON. We just try to hold the gentleman and his committee to appropriation matters so that the legislative committees may function. You are going to have all the legislative committees dying of inactivity if you do not leave something for them to do.

Mr. HASTINGS. If the gentleman understood the conditions, he would not take the attitude he takes. This is intended to correct, as I have tried to explain, the situation and it does correct the situation in Oklahoma. I ask the gentleman to withdraw his point of order until next year.

Mr. BLANTON. I make the point of order now. I will not make it next year.

The CHAIRMAN. The gentleman from Texas [Mr. BLANTON] makes a point of order against the proviso in the item on page 49, line 24, on the ground that it is legislation on an appropriation bill. The Chair sustains the point of order. The Clerk will read.

Mr. O'CONNELL. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from New York moves to strike out the last word.

Mr. O'CONNELL. Mr. Chairman, I want to ask the chairman of the subcommittee, who is very gracious, very patient, and always willing to give information, about this item on page 48, lines 21, 22, and 23. The gentleman from Oklahoma just

said there are 16,000 pupils in the schools provided for in this section of the bill.

Mr. HASTINGS. No; that provision begins with line 19, page 49.

Mr. O'CONNELL. Well, we are appropriating $3,850,000 in all for the schools hereinbefore enumerated in the bill, and it is provided that not less than $6,000 of this amount shall be available for library books. I want to ascertain how the committee reaches that particular figure and what kind of a library these schools can get for that amount of money?

Mr. CRAMTON. The item of $3,850,000 is the total for all the nonreservation boarding schools. I think there are 19 of them. As I have visited those schools I have been impressed by the lack of library facilities in many of the Indian schools, day schools, reservation boarding schools, and nonreservation boarding schools. Particularly, I had in mind the kind of books that children would like to read, and I found that at schools in which they did have a supply of books that the modern child cares to read the Indians made a great deal of use of them. So I made the suggestion to the Indian Service that we would like to apply some of this money to that purpose.

Mr. O'CONNELL. It is not limited to $6,000, though, is it?

Mr. CRAMTON. No. We provide that not less than $6,000 out of this item shall be for the purchase of books and not less than $6,500 is spent from the general education item that was up earlier in the bill. It is the minimum to require them to buy some of these books.

Mr. O'CONNELL. They ought to have reasonably good libraries.

Mr. CRAMTON. This was the amount the Indian Service suggested we put in as the minimum.

Mr. O'CONNELL. I know the chairman has practically been all over these places and knows their needs better than anybody else. I thank the chairman.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

For support and maintenance of day and industrial schools among the Sioux Indians, including the erection and repairs of school buildings, in accordance with the provisions of article 5 of the agreement made and entered into September 26, 1876, and ratified February 28, 1877 (19 Stat. p. 254), $310,000, of which amount $10,000 shall be immediately available.

Mr. McKEOWN. Mr. Chairman, I move to strike out the last word. Gentlemen of the committee, my good friend from Texas, for whom I have a great deal of admiration, in his point of order, of course, was seeking to conserve the Treasury of the United States, but my good friend by that action has done a very serious injustice to the people of the State of Oklahoma.

Seminole County and the Seminole Nation, where part of this money goes to reimburse them for their expenditures on schools, is pouring from 450,000 to 500,000 barrels of oil every day from sunrise to sundown, and from that property revenue comes into the Treasury of the United States to the extent of millions of dollars. The full-blood Indians or restricted Indians whose lands are being developed, pay no part of the tax and no part of the oil tax. Worse than that, the oil companies which take the oil out of the ground, under the claim of being instrumentalities of the United States, pay no tax. Yet the Indians' white neighbors in Oklahoma have to pay a tax. They are glad to have the Indian children in their schools. They are delighted to have them, and it has been proven beyond question that the greatest advancement made by Indian children is when you put them in the white schools. The full-blood Indian is a little reticent and backward. He does not push himself, but when you put him in competition with the children of his neighbors, when he goes to the same school and learns the English language, he makes advancement. And you do him a great injustice when you create a prejudice against the Indian in his white neighbor, because his white neighbor has to pay taxes on his horses and on his land, while the Indian who is wealthy in land and oil pays no tax. Yet the Indian children, whose parents pay no taxes, go to the same schools attended by white children whose parents do pay taxes.

Magnificent paved roads are being built throughout that county and they are being built alongside of restricted homesteads which pay no taxes. So I say to you, my friend, this is a just provision. It does, in a way, reimburse and give back to the State of Oklahoma and to the taxpayers of the State of Oklahoma a certain amount which they put up.

Mr. TAYLOR of Colorado. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. TAYLOR of Colorado. I call the gentleman's attention to the fact that we are only paying for the per diem teaching and education of children in Oklahoma about 10 cents a day, while in all the other States we are paying from 30 cents to 40 cents a day for the education of these children. So Oklahoma and the taxpayers of Oklahoma are getting the worst of this thing, and we are trying to put it in shape so that they will be treated fairly. That is the purpose of it.

Mr. HOWARD of Oklahoma. Will the gentleman yield?

Mr. McKEOWN. Yes.

Mr. HOWARD of Oklahoma. I want to call the committee's attention to the fact that a survey made by the Bureau of Education of the Department of the Interior disclosed that in 1924, if a school tax in Oklahoma had been collected against nontaxable Indian lands, that Oklahoma would have collected $1,200,000 that year, and this only calls for $250,000.

Mr. McKEOWN. I am not criticizing my good friend from Texas, because he and I have been good friends since we entered Congress together, but I am taking these few minutes to show him the justice of this proposition, because he is a pretty reasonable fellow. I just wanted to show him that he is doing my State and the people of my State a great injustice, no doubt unintentionally, but he is really doing my State a great injustice.

In my State where we pay these taxes we do not want any ill feeling between the Indians and the white citizens. We do not want the white man to feel that the Indian is getting the best of it. We want good feeling between them, and we want these children to go to the schools.

Mr. BLANTON. Will the gentleman yield?

Mr. McKEOWN. I yield to the gentleman.

Mr. BLANTON. Does not the gentleman remember a few years ago when he stood on the floor of the House here with tears in his eyes and asked this committee to appropriate the small amount of $500 for something that every Member of the Congress wanted to give, and yet this hard-boiled committee said, "No; that is legislation and we will not let you put it in the bill." Does not the gentleman feel that the committee ought to be held to its own rulings and ought to be held to dealing with appropriations and not with legislative matters? This is what I have in mind.

Mr. McKEOWN. I agree with the gentleman relative to the procedure, but one wrong does not justify another wrong.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For aid of the public schools in Uintah and Duchesne County school districts, Utah, $6,000, to be paid from the tribal funds of the Confederated Bands of Ute Indians and to be expended under such rules and regulations as may be prescribed by the Secretary of the Interior: *Provided*, That Indian children shall at all times be admitted to such schools on an entire equality with white children.

Mr. WATSON. Mr. Chairman, I move to strike out the last word.

I want to ask the chairman of the subcommittee a question. I have been receiving quite a number of letters from those who are interested in the education of Indian children, and one society writes me that 11 cents a day only is allowed for food for the Indian children, and the writer further states if it is the purpose of the Government to starve these children in the schools it would be far better to close the schools and let the children die of natural starvation. It seems to me that in the interest of the public this matter should be cleared, and I do not know of anyone who is better able to make an explanation of the situation than the gentleman in charge of the bill.

Mr. CRAMTON. Mr. Chairman, in view of the gentleman's question, I am sure he would be interested in my statement on Tuesday when I presented this bill to the House, and when I devoted some time to charges and misrepresentations of the character the gentleman has referred to, and particularly my statement on page 433 of the RECORD.

The gentleman will find that I referred to this particular misrepresentation, namely, that we are starving the children in the schools and that the average per capita cost per day is 11 cents for food. That statement is absolutely unfounded and untrue. The amount is 24.7 cents.

As a matter of fact, no Indian children are starving in our public schools; as a matter of fact, no Indian children have been suffering from lack of sufficient food in our schools; as a matter of fact, further, no Indian children have been suffering from an undesirable character of food being given to them.

We have made provision for them and in a great many cases they are one hundred times better off in the schools than they

are when they are at home. Many cases that I have seen in the schools of Indian children suffering from malnutrition have been because the children have not long been in the school. As a matter of fact, we not only provide for them in the boarding schools but in many cases where day schools are conducted we provide for a hearty meal at noon, so that these children coming from homes where the food supply is limited and uncertain, get at least this one meal a day at the school.

Mr. WATSON. I thank the gentleman for such a forceful and correct statement as far as this matter is concerned, and I shall therefore send the gentleman's statement to my inquirer and I am quite sure he will be fully satisfied with it.

Mr. CRAMTON. I thank the gentleman.

Mr. KNUTSON. Mr. Chairman, will the gentleman state to the House what organization it is that is putting out all this false propaganda with reference to the care of the Indians?

Mr. WATSON. I have no objection to stating that this comes from the Indian Rights Association, Philadelphia, Pa.

Mr. CRAMTON. I will say to the gentleman from Minnesota that that statement appears to have originated, or at least has been given its widest currency, by the report of the Bureau of Governmental Research which has recently completed a desirable survey of the situation, and in many respects has performed an excellent work; but they did do a great injustice to their Government when they gave currency to that particular statement.

I am reminded by my colleague that this amount of 24.7 cents does not include any allowance for interest on the investment in our plant, machinery, stock, and all similar things.

Mr. WATSON. I have received quite a number of letters relative to the same subject, probably from members of this association, and I am grateful to the chairman of the committee for clearly explaining the matter.

Mr. CRAMTON. In my statement of Tuesday the gentleman will find further details in respect of the matter.

The pro forma amendment was withdrawn.

The Clerk read as follows:

CONSERVATION OF HEALTH

For conservation of health among Indians (except at boarding schools supported from specific appropriations other than those named herein), including equipment, materials, and supplies; repairs and improvements to buildings and plants; compensation and traveling expenses of officers and employees, and renting of quarters for them when necessary; transportation of patients and attendants to and from hospitals and sanatoria; returning to their former homes and interring the remains of deceased patients; not exceeding $3,000 for expenses (not membership fees) of physicians and nurses when officially detailed, in the interest of health work among the Indians, to attend meetings of medical and health associations; and not exceeding $1,000 for circulars and pamphlets for use in preventing and suppressing trachoma and other contagious and infectious diseases, $2,646,600, including not to exceed the sum of $1,508,100 for the following-named hospitals and sanatoria.

Mr. LEAVITT. Mr. Chairman, I move to strike out the last word. I want to call the attention of the House to the fact that in this item the Appropriation Committee has increased by $1,206,600 the item for general relief and hospitalization, under the head of the conservation of health among the Indians, making the total $2,646,600.

That is in response to a thorough study made in the field by members of the committee under the leadership of the gentleman from Michigan [Mr. CRAMTON], and conforms closely to the opinion, I believe, of everyone who has made any study of Indian affairs—that the amount spent for health work has been inadequate and that constructive study would inevitably lead to a great increase in the appropriation.

It is proper for me to say that the study of the subcommittee has gone on in cooperation with the legislative Committee on Indian Affairs and those in authority in the Indian Bureau. And I am sure we shall certainly find that a similar increase is justified in connection with the appropriation for the industrial work among the Indians, teaching them ways of becoming self-supporting, and in addition there will prove to be a similar increase needed in the matter of education. I call this to the attention of the House that this committee has responded so well to the demonstrated need of increased appropriations for health work by almost doubling the appropriation available to meet the needs of the Indians.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Nevada: Carson Hospital, $18,100; Pyramid Lake Sanatorium, $28,000.

Mr. ARENTZ. Mr. Chairman, I rise again to call attention of the committee to another situation that I think deserves consideration. The Walker River Indian Reservation has a resident doctor located 28 miles away at Yerington. He lives there because there is no accommodation at the reservation for him. Strange as it may seem, after all these years that this reservation has been in existence, there is neither living quarters, an office, nor first-aid facilities for this doctor, who is primarily employed by the Government for the care of the Indians of this region. There is no place where first aid can be given or where a sick or injured Indian can be examined and placed upon a cot for attention or comfort. If an Indian working on the reservation happens to be hurt in any way, he is given such aid as possible without hygienic conditions and then carted off to a city 28 miles away where there is a hospital.

I am bringing this to your attention, gentlemen of the committee, for the purpose of acquainting you with the facts, and the Government officials as well, for I know how thoroughly read the RECORD is by officials of the Government. I am making this statement to-day with the hope that it will come under the scrutiny of the Commissioner of Indian Affairs and such officials in his bureau as have this in charge and whom I know have the welfare of the Indian at heart.

Mr. CRAMTON. Will the gentleman yield?

Mr. ARENTZ. Certainly.

Mr. CRAMTON. May I ask the gentleman if he has called the need of this matter to the attention of the Indian Office?

Mr. ARENTZ. Not this year, I have not; but it has been brought to the attention of the Indian Service many times. They have been out there many times. I trust that this will be sufficient to direct their attention to this vitally important thing, a humanitarian thing, something which certainly should be taken care of at the first opportunity, and I trust will be taken care of before this bill is enacted into law.

The pro forma amendment was withdrawn.

The Clerk read as follows:

For construction of an addition to the hospital building, including refrigerating and other equipment; for employees' quarters; and for general repairs and improvements at the Kiowa Hospital, Lawton, Okla., $60,000, payable from funds on deposit in the Treasury to the credit of the Kiowa, Comanche, and Apache Indians of Oklahoma.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 54, line 21, after the figures "$60,000," strike out the remainder of line 21 and all of lines 22 and 23 and insert in lieu thereof the following: "Out of the Federal Treasury."

Mr. BANKHEAD. Mr. Chairman, I reserve the point of order on that amendment. I do not know that I shall make the point of order, but I do this to inquire of the gentleman if such an amendment as that is authorized by law under the Indian statute?

Mr. JOHNSON of Oklahoma. Mr. Chairman and gentlemen of the committee, I have offered this amendment for the purpose of protecting the rights of the Indians of my district whom I have the honor to represent. The purpose of the pending amendment is evident upon the face of it. I simply propose, gentlemen of the committee, that this item of $60,000, which you propose to take out of the tribal funds of these Indians for the improvement of the Kiowa Hospital at Fort Sill, Okla., be paid out of the Federal Treasury instead.

The CHAIRMAN. Let the Chair make this statement: The Clerk had read a little further than the paragraph which the gentleman from Oklahoma seeks to amend; in fact, he had read the succeeding paragraph; but the gentleman from Oklahoma was on his feet, and the Chair therefore recognizes him for the purpose of offering the amendment.

Mr. JOHNSON of Oklahoma. Mr. Chairman, the purpose of the amendment, as I started to say, is to pay out of the Federal Treasury the sum of $60,000 for improvements to the Kiowa hospital at Lawton rather than to have it paid out of the tribal funds. I understand that the policy of the committee is to pay out of the tribal funds for all such improvements where the Indians are wealthy or are able to pay.

Permit me to say in this connection, Mr. Chairman, that these Indians do not have the wealth they are sometimes pictured. In fact, they are poor as compared with many other tribes over the country and it just seems to me a bit unfair to say to them that they must pay for this much-needed improvement for the purpose of caring for the many unfortunate Indians who are suffering at this time from ill health.

Mr. BANKHEAD. Mr. Chairman, if the gentleman will permit, I have no particular interest in this matter, but I thought it was rather an unusual procedure. I desire merely to ask the chairman of the committee if it meets with the approval of the committee from the standpoint of the validity of the amendment under the rules of the House.

The CHAIRMAN. The Chair understands the gentleman from Alabama reserved the point of order before the discussion began?

Mr. BANKHEAD. Yes.

Mr. CRAMTON. Mr. Chairman, if the gentleman from Oklahoma will yield, I am not sure that the amendment is properly drafted, but in so far as the authority is concerned to spend the money out of the Federal Treasury to build the hospitals, such an amendment is in order. The committee is not in accord with the amendment, but in my judgment it is not subject to the point of order.

Mr. BANKHEAD. Mr. Chairman, under that statement I withdraw the reservation of the point of order.

The CHAIRMAN. The gentleman from Oklahoma will proceed.

Mr. JOHNSON of Oklahoma. Mr. Chairman and gentlemen of the committee, these tribes are not rich Indians. There are something like 4,000 of them on the reservation, and they have at this time considerably less than $1,000,000 to their credit. The item here is a desirable one, and I am very much in favor of it. The fact is, at the first session of the Seventieth Congress I introduced a special bill proposing to authorize the sum of $390,000 for this Indian hospital. This I did upon the request of many of the Indians and others interested in their welfare; so the item of $60,000 does not begin to take care of their immediate needs, in my opinion. The enlargement of their hospital is not only desirable but, if given them, will fill a pressing need.

It just occurs to me that my distinguished and very able colleague from Michigan [Mr. CRAMTON] has changed his policy somewhat with reference to these Indians. Last winter I secured the passage through this House of a most meritorious measure authorizing a small appropriation for a dormitory for the Riverside Indian School, which affects the same tribes of Indians. Permit me to suggest, gentlemen, that a hospital is just as meritorious, just as desirable as a dormitory. At that time the question was not raised concerning the money for school improvements being paid out of tribal funds, yet these Indians have less cash to their credit in the Treasury now than they had a year ago.

I know the Indians are much opposed to this raid on their sacred funds. I have to-day received a number of telegrams from some of their leaders over the reservation protesting against it. I believe in all fairness the amendment ought to be adopted, and I submit that it is the duty of the Government to take care of the health of our Indians, and that they should not be required to pay this item out of their tribal funds.

Permit me to add further that these funds are vanishing, and it will be only a few years before they will not have any money left at all and the Indians will be stranded if this policy is pursued. I urge you to accept the amendment and pay this out of the Federal Treasury, as our Government is doing in many other instances.

I desire to again impress on you, gentlemen, that the Kiowas, Comanches, and Apaches are not numbered among the wealthiest tribes of our State. I have been among these Indians. I know them personally, and I will say to you I feel that if you could see them in their poverty as I have, visit in their homes as I have done on many occasions, see the wonderful improvement they are making, and know their anxiety to have better homes and more desirable living conditions, you would not insist upon taking their money away from them to build hospitals. Unless these Indians' funds are protected there is no question but that their money will soon be entirely gone and they will be wards of charity upon the Government.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. CRAMTON. Mr. Chairman, simply because Uncle Sam seems to have been unduly generous with reference to the schools referred to, the gentleman from Oklahoma wants him to be unduly generous with reference to this hospital. The gentleman confirms the need of the hospital. Those Indians have to their tribal account in the Treasury, bearing interest at 4 per cent, $963,000. If we do not spend that money for some such wise purpose as a hospital, which will be for their exclusive use, and which they are asking for, one of these fine days the gentleman from Oklahoma will be coming in and wanting a per capita payment in cash distributing this $963,000, and when that has been distributed, those Indians will not have anything except a sore head, and then they will need this hospital for that purpose. I hope the amendment will not be agreed to.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma.

The amendment was rejected.

The Clerk read as follows:

GENERAL SUPPORT AND ADMINISTRATION

For general support of Indians and administration of Indian property, including pay of employees, $925,000: *Provided,* That a report shall be made to Congress on the first Monday of December, 1930, by the Superintendent of the Five Civilized Tribes, through the Secretary of the Interior, showing in detail the expenditure of all moneys from this appropriation on behalf of the said Five Civilized Tribes: *Provided further,* That the position of Superintendent of the Five Civilized Tribes is hereby included within the competitive classified civil service and shall be subject to civil service laws and rules.

Mr. BLANTON. Mr. Chairman, I make the point of order——

Mr. BANKHEAD. Mr. Chairman, I reserve a point of order to the last proviso.

Mr. BLANTON. But I want to make the point of order.

Mr. BANKHEAD. No; I reserve it.

Mr. CRAMTON. I hope the gentleman will not make it.

Mr. BLANTON. I will make it, though.

Mr. CRAMTON. I have expressed the hope——

The CHAIRMAN. The gentleman from Texas is not recognized.

Mr. BLANTON. I make the point of order.

The CHAIRMAN. The gentleman from Alabama has made a reservation of the point of order.

Mr. BANKHEAD. I am assuming there is some good reason for this proviso. I do not want this incoming legislative program stripped of all appointments. I will withdraw the reservation.

Mr. BLANTON. I renew the reservation. I understood the gentleman to withdraw it.

The CHAIRMAN. The gentleman from Michigan has the floor.

Mr. BLANTON. I did not want to lose the right to reserve the point of order.

The CHAIRMAN. The gentleman from Texas will not lose any right.

Mr. BLANTON. It is a new kind of rule where a man withdraws the reservation that another man can not renew it. I was just undertaking to preserve my right under the rule.

Mr. CRAMTON. As I understand, the gentleman from Texas has reserved the point of order.

Mr. BLANTON. Certainly.

The CHAIRMAN. The gentleman made the point of order.

Mr. BLANTON. I reserved it. I want to know who the gentleman from Michigan has in mind to displace by putting in this legislation?

Mr. CRAMTON. I will be glad to answer the question and I hope then I will have the entire approval of the gentleman from Texas. That position of Superintendent of the Five Civilized Tribes is a position of the highest importance, because those Indians—and there are a great number of them—have a great deal of money and property.

Mr. BLANTON. And it is now held by whom?

Mr. CRAMTON. The position is now vacant. I am not sure if it was the last one, but a recent superintendent was indicted or something of the kind.

Mr. BLANTON. Was he a Republican?

Mr. CRAMTON. He was a Republican——

Mr. BLANTON. I am not surprised.

Mr. CRAMTON. But so far as this committee is concerned we have not made any distinction as to party, as we do not regard that.

Mr. BLANTON. If there is a chance of getting a Democrat through the civil service, I will withdraw the point of order.

Mr. KNUTSON. Does the gentleman think he could get any that will pass?

Mr. BLANTON. Yes; if civil-service rules are observed. I withdraw the reservation of the point of order.

The CHAIRMAN. The reservation of the point of order is withdrawn, and the Clerk will read.

The Clerk read as follows:

Oklahoma: Ponca (Otoe, $1,200; Ponca, $2,600; Tonkawa, $700), $4,500; Sac and Fox, $3,000; Kiowa, Comanche, and Apache, $60,000; Cheyennes and Arapahoes, $17,100; in all, $84,600.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 59, in line 23, after the figures "$84,600," insert "out of the Federal Treasury."

Mr. JOHNSON of Oklahoma. Mr. Chairman and gentlemen of the committee, the purpose of this amendment simply proposes

for the Federal Government to pay for the upkeep of these Indian agencies rather than take the expense of their operation out of the tribal funds. You will note the Arapahoe and Cheyenne Indians are included, as well as Comanches, Kiowas, Apaches, and other tribes. I will tell you gentlemen, if there are any financially embarrassed Indians in Oklahoma, and there are many, the Arapahoes and Cheyennes are ahong those tribes. I would like for my good friend, the chairman of the committee, to tell us exactly how much money the Arapahoes and Cheyennes have to their credit, if he knows. I do not have the figures at this time, but I do believe it ought to be the policy of the Federal Government to pay for the upkeep of these agencies rather than call on these Indians, especially in case of those of so moderate circumstances as the 14 tribes who reside in the sixth congressional district in Oklahoma.

Mr. CRAMTON. I will say to the gentleman from Oklahoma that I have not those figures immediately at hand, but there is a tabulation in the hearings that shows the amount of money that there is in the Treasury for each of these tribes. I have not this particular item in mind, and have not that table right at hand, but I would be glad to call it to the attention of the gentleman. Otherwise this item would not have been placed here.

The gentleman will note that the paragraph in question is under the heading of the "General support of Indians and administration of Indian property under the jurisdiction of the following agencies, to be paid from the funds held by the United States in trust for the respective tribes." Preceding this is the paragraph that has to do with the expenditure from the Treasury for administrative purposes. The gentleman's amendment, providing it shall be paid from the Treasury, will not make any difference. It is in the Treasury, anyway, and the amendment would not accomplish what the gentleman desires. His amendment ought not to prevail, even if it did accomplish what he desires.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. JOHNSON].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

For general support, administration of property, and promotion of self-support among the Chippewa Indians in the State of Minnesota, $65,000, to be paid from the principal sum on deposit to the credit of said Indians, arising under section 7 of the act entitled "An act for the relief and civilization of the Chippewa Indians in the State of Minnesota," approved January 14, 1889 (25 Stat. 645), to be used exclusively for the purposes following: Not exceeding $50,000 of this amount may be expended for general agency purposes; not exceeding $15,000 may be expended in aiding indigent Chippewa Indians upon the condition that any funds used in support of a member of the tribe shall be reimbursed out of and become a lien against any individual property of which such member may now or hereafter become seized or possessed, the two preceding requirements not to apply to any old, infirm, or indigent Indian, in the discretion of the Secretary of the Interior.

Mr. KNUTSON. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. KNUTSON: Page 61, line 3, strike out "$65,000" and insert "$80,000"; in line 10, strike out "$15,000" and insert "$30,000."

Mr. KNUTSON. Mr. Chairman, I want to say in support of that amendment that I understood from the remarks of the chairman of this committee last Tuesday that hereafter there would be no more per capita payments made to the Chippewa Indians of Minnesota. If that is to be the policy, it would seem to be only the part of wisdom that we should increase the amount for the support of these indigent Indians to $30,000. I think that should be done.

Mr. CRAMTON. I would go so far as the gentleman does; I could not say what will be done by the Congress in the future. But I will say that our committee is strongly opposed to per capita payments, and will not recommend them to the House hereafter if there is any way of avoiding it.

Mr. KNUTSON. The gentleman knows that without the recommendation of the gentleman's committee we would never get into the House.

Mr. CRAMTON. I never feel as sure of that as I would like to feel; but the item that the gentleman offers can not do any harm, and it might do a great deal of good. I am very much in sympathy with that provision, under circumstances such as prevail there, to have a provision made to suitably care for the aged and helpless. If it is not needed, the money will not be expended.

Mr. SCHAFER. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. Certainly.

Mr. SCHAFER. Does the Director of the Budget approve of this increase?

Mr. KNUTSON. He will when it is called to his attention.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Minnesota.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

There is hereby authorized to be expended, out of any money now standing to the credit of the Choctaw and Chickasaw Nations of Indians, or to the credit of either of said nations, in the Treasury of the United States, the sum of not exceeding $30,000, to be paid, in the discretion of the Secretary of the Interior, to attorneys for said Choctaw and Chickasaw Nations of Indians, or to the attorneys for either of said Indian nations, employed under the authority of the act approved June 7, 1924 (43 Stat. p. 537), the payments to be made in such sums as may be necessary to reimburse said attorneys for such proper and necessary expenses as may have been incurred or may be incurred in the investigation of records and preparation, institution, and prosecution of suits of the Choctaw and Chickasaw Nations of Indians, or of either of said Indian nations, against the United States under the above-mentioned act of June 7, 1924: *Provided, however*, That the claims of the attorneys shall be filed by said attorneys with the Secretary of the Interior and shall be accompanied by the attorneys' itemized and verified statement of the expenditures for expenses and by proper vouchers, and that the claims so submitted shall be subject to the approval of the Secretary of the Interior: *Provided further*, That any sums allowed and paid under this act to the attorneys shall be reimbursable to the credit of the Choctaw and Chickasaw Nations of Indians, or to the credit of either of said Indian nations, as the case may be, out of any amount or amounts which may hereafter be decreed by the Court of Claims to said attorneys for their services and expenses in connection with the tribal claims and suits of the Choctaw and Chickasaw Nations of Indians, or of either of said Indian nations, under the above-mentioned act of June 7, 1924.

Mr. CRAMTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 63, after line 22, insert a new paragraph, as follows:

"There is hereby authorized to be expended, out of any money now standing to the credit of the Seminole Nation of Indians in the Treasury of the United States, the sum of not exceeding $5,000, to be paid, in the discretion of the Secretary of the Interior, to attorneys for said Seminole Nation of Indians employed under the authority of the act of Congress approved May 20, 1924 (43 Stat., pp. 133–134), the payments to be made in such sums as may be necessary to reimburse the attorneys for such proper and necessary expenses as may have been incurred or may be incurred in the investigation of records and preparation, institution, and prosecution of suits of the Seminole Nation of Indians against the United States under the above-mentioned act of May 20, 1924: *Provided further*, That the claims of the attorneys shall be filed by said attorneys with the Secretary of the Interior and shall be accompanied by the attorneys' itemized and verified statement of the expenditures for expenses and by proper vouchers, and that the claims so submitted shall be subject to the approval of the Secretary of the Interior: *Provided further*, That any sums allowed and paid under this act to the attorneys shall be reimbursable to credit of the Seminole Nation out of any amount or amounts which may hereafter be decreed by the Court of Claims to said attorneys for their services and expenses in connection with the Seminole tribal claims and suits under the above-mentioned act of May 20, 1924."

Mr. CRAMTON. Mr. Chairman, that item is entirely parallel to the preceding item in the bill. The other item relates to the expenses for carrying amounts for the Choctaw and Chickasaw Nations. The item just read has been recommended by the gentleman from Oklahoma [Mr. MCKEOWN] and has been approved by the Indian Office. It makes a similar provision for the Seminole Nation.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Not more than $4,000 of the unexpended balance of the appropriation for repair and maintenance of the road on the Santa Clara Indian Reservation, N. Mex., leading to the Puye Cliff Ruins, contained in the act of March 7, 1928 (45 Stat. p. 212), shall be available for repayment to the Harvey Co. for cost of construction of said road: *Provided*, That

an admission fee of not less than 50 cents each for all persons 16 years of age or over for the Puye Cliff Ruins is authorized, and the proceeds from such fee of admission, less the cost of protection and administration of the ruins, shall be deposited in the Treasury of the United States to the credit of the Santa Clara Pueblo and shall bear interest at the rate of 4 per cent.

Mr. LEAVITT. Mr. Chairman, I ask unanimous consent to return to page 39, line 18, for the purpose of offering an amendment.

The CHAIRMAN. The gentleman from Montana asks unanimous consent to return to page 39, line 18, for the purpose of offering an amendment. Is there objection?

Mr. SCHAFER. Reserving the right to object, what is the gentleman's amendment?

Mr. LEAVITT. The amendment is in connection with authorizing an appropriation not to exceed $10,000 of the amount appropriated in the bill. It does not increase the total amount. It makes it available for educating Indian youths in stock raising at the United States Range Livestock Experiment Station at Miles City, Mont.

Mr. BLANTON. Mr. Chairman, let us have the amendment read.

The CHAIRMAN. Without objection, the amendment will be reported for information.

Mr. BLANTON. With the reservation of a point of order.

The Clerk read as follows:

Amendment offered by Mr. LEAVITT: Page 39, line 18, after the word "books," add *"And provided further,* That not to exceed $10,000 of the amount herein appropriated shall be available for educating Indian youth in stock raising at the United States Range Livestock Experiment Station at Miles City, Mont."

The CHAIRMAN. Is there objection to the request of the gentleman from Montana to return to this paragraph for the purpose of considering the amendment?

There was no objection.

The CHAIRMAN. Is there a reservation by the gentleman from Texas?

Mr. BLANTON. There is none.

The CHAIRMAN. The amendment has been read for information. Without objection, it will be considered as having been read for consideration. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CRAMTON. Mr. Chairman, this is a matter which the committee had under consideration in the hearings and in view of further information the committee has no objection to the amendment.

The Clerk read as follows:

ANNUITIES AND PER CAPITA PAYMENTS

For fulfilling treaties with Senecas of New York: For permanent annuity in lieu of interest on stock (act of February 19, 1831, 4 Stat. 442), $6,000.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word. Will the gentleman from Michigan please explain the meaning of lines 15, 16, and 17, particularly the language appearing in line 16, "for permanent annuity in lieu of interest on stock (act of February 19, 1831)."

Mr. CRAMTON. That is carrying out a treaty entered into by which the Government agreed to pay in perpetuity $6,000 a year in lieu of our obligations as they then existed. The act of February 19, 1831, entitled "An act to provide hereafter for the payment of $6,000 annually to the Seneca Indians," reads as follows:

That the proceeds of the sum of $100,000, being the amount placed in the hands of the President of the United States in trust for the Seneca Tribe of Indians, situated in the State of New York, be hereafter passed to the credit of the Indian appropriation fund; and that the Secretary of War be authorized to receive and pay over to the Seneca Tribe of Indians the sum of $6,000 annually, in the way and manner as heretofore practiced, to be paid out of any money in the Treasury not otherwise appropriated.

I have not at hand any further information as to what that act of 1831 was based upon, and what that word "stock" refers to, I am frank to say, I can not state to the gentleman.

Mr. COOPER of Wisconsin. It is most unusual language, and I do not remember ever having seen it in any other bill, "permanent annuity in lieu of interest on stock."

Mr. CRAMTON. They evidently had some obligation against the Government and in lieu of that, in 1831, we agreed to pay them $6,000 a year. I can not, I am sorry to say, give the gentleman a more complete answer.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

For fulfilling treaties with Choctaws, Oklahoma: For permanent annuity (art. 2, treaty of November 16, 1805, and art. 13, treaty of June 22, 1855), $3,000; for permanent annuity for support of light horsemen (art. 13, treaty of October 18, 1820, and art. 13, treaty of June 22, 1855), $600; for permanent annuity for support of blacksmith (art. 6, treaty of October 18, 1820, and art. 9, treaty of January 20, 1825, and art. 13, treaty of June 22, 1855), $600; for permanent annuity for education (art. 2, treaty of January 20, 1825, and art. 13, treaty of June 22, 1855), $6,000; for permanent annuity for iron and steel (art. 9, treaty of January 20, 1825, and art. 13, treaty of June 22, 1855), $320; in all, $10,520.

Mr. BRIGGS. Mr. Chairman, I move to strike out the last word. I just want to ask the chairman of the subcommittee if the appropriation which was carried in the deficiency bill last year for the Alabama and Coushatta Indians for the acquisition of some additional land and equipment for them is being carried into effect.

Mr. CRAMTON. It is being carried into effect. The gentleman will find in the hearings a statement by Mr. Meritt that land has been acquired, and the Indian Service assured us it is desirable land and land which the Indians wish. The gentleman will find that was developed in the hearings.

Mr. BRIGGS. Is it also the purpose of the Indian Office to provide the additional equipment which is contemplated under the terms of the appropriation?

Mr. CRAMTON. That is in progress. As to the equipment I can not speak so definitely. They would necessarily need to make the investment in land first, because the balance is to go for the other purpose. They assured us that they sent their best expert there to study that land before making the purchase.

Mr. BRIGGS. And under the general agreement we had these Indians are now treated like other Indians.

Mr. CRAMTON. Well, the gentleman now is going into a more general field.

Mr. BRIGGS. I mean, they receive the same general treatment as other Indians receive.

Mr. CRAMTON. I doubt whether it was ever understood that these Indians were to receive the same treatment as other Indians, because that is a rather vague and indefinite field.

Mr. BRIGGS. What I understood the gentleman to say some time ago, when we had this matter before us, was that they would be placed upon the same basis as other Indians in their relationship with the Government.

Mr. CRAMTON. I do not think I have ever gone so far as to make that general and sweeping statement. However, we are showing a great deal of sympathy for them.

Mr. BRIGGS. That was my understanding, that they would share in certain general appropriations with reference to health and school matters.

Mr. CRAMTON. The best way will be for the gentleman to quote what I did say as shown by the RECORD. But I do not believe I ever made such a far-reaching and indefinite statement.

Mr. BRIGGS. That was my general understanding of the gentleman's assurance and that these Indians would be eligible to the general provisions of this bill and the appropriations which are made.

Mr. BLANTON. We have already passed the item in the bill providing for education.

Mr. BRIGGS. I know that.

Mr. CRAMTON. There was no assurance given that went to the extent that the gentleman suggests, so far as I know.

The CHAIRMAN. Without objection the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read down to and including line 23 on page 68.

Mr. HASTINGS. Mr. Chairman, we have concluded consideration of the items under the Bureau of Indian Affairs, and I ask unanimous consent to return to page 49 for the purpose of reoffering an amendment that was objected to a short time ago, being the proviso beginning with line 24, on page 49. I desire to reoffer that as an amendment.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent to return to page 49, line 24, for the purpose of offering an amendment. Is there objection?

There was no objection.

Mr. HASTINGS. Mr. Chairman, I offer that proviso as an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HASTINGS: On page 49, after line 23, insert: "*Provided*, That this appropriation shall not be subject to the limitation in section 1 of the act of May 25, 1918 (U. S. C., p. 708, sec. 297), limiting the expenditure of money to educate children of less than one-fourth Indian blood."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The amendment was agreed to.

The Clerk read as follows:

BUREAU OF PENSIONS

PENSIONS

Army and Navy pensions, as follows: For invalids, widows, minor children, and dependent relatives, Army nurses, and all other pensioners who are now borne on the rolls, or who may hereafter be placed thereon, under the provisions of any and all acts of Congress, $221,000,000, to be immediately available: *Provided*, That the appropriation aforesaid for Navy pensions shall be paid from the income of the Navy pension fund, so far as the same shall be sufficient for that purpose: *Provided further*, That the amount expended under each of the above items shall be accounted for separately.

Mr. NEWTON of Minnesota. Mr. Chairman, I move to strike out the last word.

I do this, Mr. Chairman, for the purpose of making an observation at this point in reference to the administration of our pension laws. The particular matter came to my attention just a few minutes ago.

The legislative power of the Government by the Constitution is vested in the Congress, but as our legislative work has increased and has become more complicated we have had to delegate, so to speak, what really amounts to legislative power to certain administrative officers who draw up regulations. These regulations amount to law. They are law.

Obviously, it ought to be the intent, thought, and purpose of the law officers in the department drafting these regulations not to circumvent the laws of Congress, but to promote them and to carry them out in their spirit and true intent.

When you go to the Commissioner of Pensions, a very fine gentleman, he tells you that he has nothing whatever to do with the drawing up of regulations; that that is a matter for the head of the department; and then, I presume, if I should go to the head of the department it will be entirely news to him that anybody has drawn up a regulation of such a character; and every now and then we find a regulation, here and there throughout the departments, that is perfectly absurd, and it is difficult to conceive the attitude or the state of mind upon the part of the individual drawing up the regulation.

I want to cite this instance showing the absurd steps which some of these regulations drafting officers will take. It is a man who served for over four years during the Civil War. At the close he received an honorable discharge. In 1866 he married. After 1890 he was given a pensionable status and received his pension. He died, and following his death his widow, who had been married to him since shortly following his discharge, received a pension as the widow of a Civil War veteran.

She received this pension for several years, and finally married again. She married a man who claimed to have been a Civil War veteran. After his death, which was some years ago, his widow, relying on her second husband's statements, endeavored to obtain a widows' pension by virtue of alleged service by him during the Civil War. He had done this work under an assumed name or something of that sort. Neither the soldier in his lifetime, nor his widow, was able to connect this service. So she was denied a pension from the marriage with the second husband.

Before my coming to Congress, a special bill had been introduced so that she might have a pensionable status. Some years passed and finally that bill became law, and she is now drawing a pension under a special law.

Mr. BLANTON. Will the gentleman yield?

Mr. NEWTON. In just a moment, when I get through with my statement.

She is now somewhat past 80 years of age, and she thought, in view of the fact that her first husband had rendered four years of honorable service, she ought to have the same pension that comes by general law to other widows with whom she is acquainted. So application was made on her first husband's service, and it was denied. No one questions these facts at all, but it was nevertheless denied. They said this woman having originally tried to recover a pension by virtue of her second marriage on the military service of her second husband—she did not establish the fact, but having alleged that service—that notwithstanding that fact, before she could receive this pension she would have to disprove her allegation that her second husband had rendered military service. She had tried for years to prove that he had done so. The department turned her claim down and said she had not done so, and now, when she comes in to get what is due her, they say, "Now you have got to disprove that which for 10 years you have failed to prove." In other words, they are impeaching their own decision.

Mr. BLANTON. Will the gentleman yield?

Mr. NEWTON. Yes.

Mr. BLANTON. What did the department do about the general law that holds that although when she remarried her pensionable status stopped, yet when that marriage ceased to exist at the death of her husband, her pensionable status could be resumed. That is the general law.

Mr. NEWTON. They brushed that aside. As I understand their position, and they say there is a possibility that she may be receiving a pension under an assumed name by reason of her having married the second time, and that because of that possibility, to save the Government from possibly paying her two pensions, she must establish the fact that her second husband rendered no military service and that she is receiving no pension from her second husband's service. Of course it is a perfectly absurd proposition to ask this woman to prove that her husband rendered no service, which would be proving a negative. Furthermore, they have already decided the other way.

I mention this at this time not only because it is interesting in connection with this particular bureau, but because it is illustrative of similar work elsewhere. You will find it in the Veterans' Bureau, you will find it in other departments and offices. Congress passes certain laws and then because some one in an administrative department of the Government thinks we ought not to have done that, we find them interpreting the law in their own way in the form of regulations.

Now, this particular regulation is an absurdity. Anybody who knows anything about pension legislation would not think of drafting a provision of that character if they wanted to carry out the will of Congress.

Mr. KNUTSON. Will the gentleman yield?

Mr. NEWTON. I will.

Mr. KNUTSON. Has the widow that the gentleman speaks of applied for a pension on account of widowhood of the first husband?

Mr. NEWTON. Recently she has made it.

Mr. KNUTSON. I have a case on all fours with that of the gentleman.

Mr. GARBER. Will the gentleman yield?

Mr. NEWTON. I will.

Mr. GARBER. Does the gentleman base his criticism on the law or a misconstruction of the law by the department?

Mr. NEWTON. Not on the law but a misconstruction of the law in drawing up regulations which the commissioner says bind him. The commissioner did not draw the regulation, but some one above him.

Mr. GARBER. It is not any maladministration on the part of the commissioner?

Mr. NEWTON. Not at all. I have the very highest regard for the commissioner. He disclaims responsibility. The regulations are evidently drawn in an utter disregard of the law as passed by Congress. It ought to be stopped.

The pro forma amendment was withdrawn.

The Clerk read as follows:

RETIREMENT ACT

To enable the Bureau of Pensions to perform the duties imposed upon it by the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, as amended (U. S. C., p. 1887, secs. 706a, 707a), including personal services, purchase of books, office equipment, stationery, and other supplies, traveling expenses, expenses of medical and other examinations, and including not to exceed $2,200 for compensation of one actuary, to be fixed by the Commissioner of Pensions with the approval of the Secretary of the Interior, and actual necessary travel and other expenses of three members of the Board of Actuaries, $81,000.

For financing of the liability of the United States, created by the act entitled "An act for the retirement of employees in the clasified civil service, and for other purposes," approved May 22, 1920, and acts amendatory thereof (U. S. C., p. 1887, sec. 707a), $20,500,000, which amount shall be placed to the credit of the "civil-service retirement and disability fund."

Mr. SCHAFER. Mr. Chairman, I make the point of order against the two provisos on page 70, lines 8 to 17, inclusive, because they are legislation on an appropriation bill, a change of existing law not authorized.

Mr. CRAMTON. Mr. Chairman, I wonder if the gentleman from Wisconsin would be willing to make his points of order separately to each proviso. There are two provisos, and that will be easier to handle.

Mr. SCHAFER. All right. I make the point of order against the first proviso and a separate point against the second proviso. I reserve both points of order.

Mr. BLANTON. I reserve a point of order to the whole paragraph.

The CHAIRMAN. Let the Chair get the parliamentary situation straight. The gentleman from Wisconsin reserves the point of order to both provisos.

Mr. CRAMTON. Yes; they are reserved against two provisos separately.

The CHAIRMAN. And the gentleman from Texas reserves the point of order to the whole paragraph.

Mr. CRAMTON. May I say this: To the second proviso the point of order is good. I do not contest that. But the point of order against the first proviso is not good, for the reason that while the language is legislative in character it is in order under the Holman rule, because by reason of that language a reduction appears on the face of the bill.

The item that came to the committee was $450,000 for this purpose. By reason of the first proviso we have reduced that item $150,000. If it had not been for the second proviso we could have made a greater reduction than the $150,000, but in the judgment of the committee it was desirable to carry on the second proviso along with the first.

The situation is this, if the gentleman will reserve his point of order and permit me to make some statement with regard to it, and then I hope the gentleman will withdraw his point of order.

At the present time the law provides for a board of pension examiners. The examinations are held by a board of three examiners. The law provides a fee of $3 for each member, for each examination, however many there may be conducted in any one day. In some places the bureau mentioned that at Los Angeles, for instance, there were 30 or more conducted in one day. That would mean that each member of the board would get $90, or $270 for the board. Our committee took up that question in a desire to bring about economy.

The Bureau of Pensions brought to us this suggestion and it has the entire approval of the Commissioner of Pensions, the medical examiner's staff, and other heads of the bureau, as framed here with the increase from $3 to $5, and with one examiner instead of the whole board. On the basis of the amount of business done last year there would be a saving of $177,000. But the committee did not go quite that far.

We reduced the item only $150,000. The bureau urged this. First, I emphasize economy in the matter of the expenditure of the public funds which is a responsibility of our committee, and the Holman rule was enacted to meet that kind of a case.

Mr. SCHAFER. Then I suppose the gentleman could reduce the number of Interstate Commerce Commissioners by making a similar appropriation and use the same sort of an alibi.

Mr. CRAMTON. I do not want to defend anything except this one item just at this time. The Holman rule does mean this, that where legislation results in the reduction of expenditures upon the face of the bill, it is in order, even though it be of a legislative character.

As to the merits, our committee would not want to blindly approve an item to reduce expenditures without checking it very carefully. What would be the effect on the service rendered by that reduction? The Bureau of Pensions insists that much better service will be secured, and the convenience of the pensioners will be better served and the interest of the Government better safeguarded with an examination before one physician with a fee of $5 than with a $3 fee before the board.

Mr. SCHAFER. The hearings do not so indicate. It must be private information.

Mr. CRAMTON. We went into the question in the hearings, and it will emphasize to the gentleman how carefully we work on these matters. The hearings show that we developed this matter as to the conduct of the examinations, and we got the approval of the bureau to certain other suggestions. In the hearings, it is shown that we asked the bureau to consider the question and give us information, and the bureau did so. After the hearings were closed, and after they had been printed, the bureau gave us the information as to difficulties in the way of what we had in mind doing at the time the hearings were held, and did make this suggestion and brought to us the table that I have in my hand showing the financial effect of this amendment.

The American Medical Association has adopted resolutions providing that $5 shall be the minimum fee for examinations for life-insurance companies and things of that sort, and I think some of those organizations even have a provision for suspending the member who would give such an examination for less than $5. The bureau says that they find difficulty in getting physicians of the best caliber in all communities to do this work at what the physician regards as a cut rate price of $3. Hence the bureau is very desirous of an increase in the fee from $3 to $5. At the same time they state that a better examination will be secured from a physician who is getting the proper fee than if we are paying this $3, which is really inadequate. Furthermore, that a more efficient examination will be made by one physician just as the examinations are made for life-insurance companies by one physician than is now made by a board where the work is actually done by one and the rest just give their acquiescence. Furthermore, under the language here, we do not abolish the old boards. Nobody loses his position. The commissioner will designate each physician to conduct a certain examination. Under the present system the board meets probably at the county seat. The doctors live at scattered places. The pensioner may have to go a number of miles to the county seat on the particular pension board day, whereas if the language stays as it is in the bill reported by the committee, the pensioner can go to the designated physician who may live in his own town, and not the county seat, and he can go any day that that physician is in his office and not the board day that the board might meet. We are advised by those most familiar with the situation that in addition to economy in the public funds better service will result to the Government and greater convenience to the pensioners.

Just one other consideration I desire to give and that is this. Suggestions have been made on this floor where increases are to be made. One was made to-day. It was one that we had debated about but felt that we really did not have the money, but we accepted the judgment of the Committee of the Whole. There are some others where increases need to be made, but if you are going to increase some items, others must be reduced. This committee has searched very carefully to find some places in the bill where reductions could be made without injury to the public service in order that we may at the same time increase items where more money is needed. Here is a case where we have found a place where better service can be secured with less expenditure of money. Hence we report it. Our committee is not desirous of legislating. We are careful not to legislate, and nothing reported at any place of a legislative character in this bill unless it is tied right up with the expenditure of money involved, and in this case, under the Holman rule, the first paragraph is not subject to the point of order. The second one is, but if the change is to be made and the first one is to be retained, in justice to the operation of the system we ought to have both provisos.

Mr. SCHAFER. Mr. Chairman, I disagree with the gentleman from Michigan [Mr. CRAMTON]. Under the act of July 25, 1882, as amended by various acts, including the act of September 22, 1922, and under the act of May 28, 1908, as amended by various acts, including the act of September 22, 1922, Congress specifically directs the Commissioner of Pensions to constitute these medical examining boards. Here is some of the language of the act of July 25, 1882, as amended:

> The Commissioner of Pensions is authorized to appoint surgeons who, under his control and direction, shall make such examination of pensioners and claimants for pension or increased pension as he shall require; and he shall organize boards of surgeons, to consist of three members each, at such points in each State as he shall deem necessary, and all examinations, so far as practicable, shall be made by the boards, and no examination shall be made by one surgeon excepting under such circumstances as make it impracticable for a claimant to present himself before a board.

The act of May 28, 1908, specifically designates the fee of the board members. Said fee is $3 for each board member, who must be present and assist in the examination. The language to which the point of order is raised clearly repeals the section of the act of July 25, 1882, which I have just quoted, which requires the examinations by boards of three, and is new legislation.

If we would follow the argument of the gentleman from Michigan to its ultimate conclusion a point of order could not be raised against any legislation on these appropriation bills. Using the same argument he is using the Committee on Appropriations could report a bill which would reduce the membership of the Interstate Commerce Commission or any other board or commission by reducing the amount of the appropriation for such board or commission. The cases are parallel.

Mr. CRAMTON. If the gentleman will permit, the gentleman will be interested in the ruling which can be applied even to the Interstate Commerce Commission if he likes. Section 815 of the Manual says:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

Mr. SCHAFER. Since the gentleman from Michigan has also laid stress upon the merits of the amendment, I want to call the attention of the Members of this Congress to the fact that there is something else to consider besides saving these few thousands of dollars. Members of Congress are familiar with the pension examining boards. There is hardly a Member of this House who does not have an examining board in his district. It is ridiculous for any gentleman to state that, because there are three members of the board you are not going to have as good an examination as you would have if only one physician conducted the examination. A board of three physicians will conduct a fairer and more satisfactory examination.

The membership should not permit this drastic change to be made by an amendment from the Appropriations Committee. If this change is to be made the legislative Committee on Pensions should hold hearings on the proposition so that those interested, particularly the representatives of the veteran organizations, can be heard.

Mr. WILLIAMSON. If the gentleman will yield for a moment, gentlemen who are conversant with examining boards in a district know that a $3 fee for these examinations is not sufficient. I find in my district members of these boards frequently resign, and I find it difficult to get physicians to act on the board. This provision would preserve the boards and increase the compensation to $5.

Mr. SCHAFER. I believe the veterans want the examinations made by a board of three members. In one breath the gentleman from Michigan says you can not obtain competent physicians for $3, and in another breath he indicates that the members of many of the boards receive too much where they examine 30 or 40 and receive $3 for each examination.

Mr. BLANTON. Mr. Chairman, will the gentleman yield for a question?

Mr. SCHAFER. Yes.

Mr. BLANTON. Suppose they appoint one physician, and he is hard boiled?

Mr. SCHAFER. Yes. Or he may be prejudiced. That is one of the reasons why we have a board of three under the present law. The judgment of three physicians is also better than one, and in many cases will be nearer correct and the veteran better satisfied. If the point of order is not sustained, we shall have to have a quorum so that the full membership of the House can have an opportunity to approve or disapprove of this drastic legislative change in an appropriation bill. Mr. Chairman, I make a point of order against the proviso.

The CHAIRMAN. While the gentleman from Wisconsin is making his point of order the Chair desires to inquire if the gentleman from Texas insists on the point of order he himself has reserved?

Mr. BLANTON. I withdraw my reservation.

The CHAIRMAN. The Chair assumes, then, that there is pending only the point of order made by the gentleman from Wisconsin. The Chair would like to know if there is pending a separate point of order as to the proviso?

Mr. CRAMTON. That is my understanding. The question now before us is on the first proviso.

The CHAIRMAN. The members of the committee are all doubtless quite familiar with the provision of the Holman rule which has been quoted by the gentleman from Michigan [Mr. CRAMTON], referring particularly to the second clause in it, reading as follows:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

It is a well-established principle that the reduction or retrenchment of expenditures by the reduction of the number or salaries of officials of the United States and by the other methods mentioned in the Holman rule must be apparent on the face of the bill. A point of order having been made, the Chairman of the Committee of the Whole must seek his information as to whether there would be a reduction or retrenchment of expenditures by examining the face of the bill.

In this instance it is clear, so far as the first proviso is concerned, that there will be some reduction in the fees paid where only one medical examiner is employed in each instance instead of three, as now required by the board of surgeons provided for under existing law. But the exception at the end of the proviso contains this provision—

except when in the judgment of the said commissioner the examination should be made by more than one.

It seems to the Chair that that leaves the matter entirely wide open so that the Commissioner of Pensions may operate under this proviso in such a way that he may save expenditures, and he may not.

Mr. CRAMTON. For the moment we are discussing but one proviso, just as if the second proviso were not there. Otherwise we could have a ruling of the Chair which would knock it all out, and then I would offer the first proviso again. So we are considering the second proviso as if the first one were not present. Under this amendment in some cases it would be doubtful how many the commissioner might order before a full board. It is uncertain. The bulk of them might be called before one. However, the rule does not distinguish as to the amount of reduction or stipulate how many are or are not called before the full board. To that extent there is to be a reduction in the expenditures, and the report of the committee shows that that reduction on the face of the bill is $150,000.

Mr. SCHAFER. Mr. Chairman, will the Chair allow another observation?

The CHAIRMAN. The Chair will hear the gentleman.

Mr. SCHAFER. According to the Chair's view in considering the language of the second proviso, looking on the face of the bill, there might not be one penny of reduction, because under the language of the first proviso the commissioner has discretionary authority to order every man before a board of three, and if he did there would be no reduction. There might possibly be an increase.

Mr. JOHNSON of Texas. Mr. Chairman, I would like to direct attention to the word "hereafter" and ask what effect that would have? Would it confine this rule to this appropriation, or would it extend the rule to subsequent acts of Congress? If so, would it not go beyond the scope of the Holman rule?

The CHAIRMAN. The Chair understands that the Holman rule relates specifically to legislation which is of a permanent character, providing that that legislation reduces expenditures. Before the remarks were made by the gentleman from Michigan and by the gentleman from Wisconsin, it seemed to the Chair that the last clause in the first proviso makes it very doubtful, at least, whether there would be any reduction or retrenchment of expenditures. The provision reads as follows:

Except when in the judgment of the said commissioner the examination should be made by more than one.

It might well be that a commissioner would take the position as a matter of policy that in all cases he would have an examination by the board of surgeons, and he could do that, it seems to the Chair, under that language.

Mr. CRAMTON. And if he did, the law in its effect has not been changed. But if in one single case he permitted the examination to be made by one instead of the board of three, the expenditure would be reduced.

The CHAIRMAN. As to that, the Chair would say that the retrenchment would be conjectural. It seems to the Chair that this language leaves it conjectural and problematical on the face as to whether there will be a permanent reduction of expenditures under this language. As the Chair understands the Holman rule there must be a definite reduction in the expenditures of the Government on the face of the legislation to bring the legislative proviso in an appropriation bill within the terms of that rule. The Chair can not hold that the first proviso with this language in it comes within the Holman rule. As to the second proviso, that raises the fees for ordinary examinations from $3 to $5, and the Chair thinks it clear that it is subject to the point of order, and the Chair therefore sustains the points of order as to both provisos.

Mr. CRAMTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 70, line 8, after the figures "$300,000," insert: *Provided*, That hereafter all necessary medical examinations of claimants or pensioners shall be made by one physician or surgeon, duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1194, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions."

Mr. CRAMTON. Mr. Chairman, with reference to that amendment, which the committee will recognize as the language of the bill, shorn of the language which the Chair pronounced not in order——

Mr. SCHAFER. Mr. Chairman, a point of order. We have no quorum here, and if we are going to adopt such a wide-sweeping proposition we should have a quorum.

Mr. WILLIAMSON. Will the gentleman from Wisconsin withhold his point of order?

Mr. SCHAFER. I will withhold it.

Mr. WILLIAMSON. Will the gentleman from Michigan yield for a question?

Mr. CRAMTON. If we are going to have a point of order made we might as well have it. We are not going to rise yet.

Mr. WILLIAMSON. I just wanted an explanation of what you are trying to do.

The CHAIRMAN. If the gentleman from Wisconsin makes the point of order of no quorum, proceedings will stop.

Mr. SCHAFER. Mr. Chairman, I make the point of order of no quorum.

The CHAIRMAN. The gentleman from Wisconsin makes the point of order of no quorum. The Chair will count. [After counting.] Seventy-nine Members of the committee are present, not a quorum.

Mr. SCHAFER. Mr. Chairman, I withdraw the point of order of no quorum.

The CHAIRMAN. The Chair will say that the Chair having made the announcement of no quorum, the thing to do is to go through the form of rising and go back into the House, unless the roll is to be called.

Mr. CRAMTON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, and had come to no resolution thereon.

Mr. CRAMTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of H. R. 15089, making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes.

Mr. BLANTON. Mr. Speaker, I make the point of order that the committee found itself without a quorum and came back into the House. If I remember the rules correctly, there must be developed a quorum before we can proceed with other business. The Chairman reported to the Speaker that the committee found itself without a quorum. Until a quorum is developed, the House is without a quorum, if I remember the rules correctly.

The SPEAKER. The Chair thinks that the motion to go back into the Committee of the Whole House on the state of the Union is in order. Of course, a point of order of no quorum could be raised on that motion, but the Chair thinks that motion is in order.

Mr. BLANTON. Mr. Speaker, I shall not obstruct the proceedings of the House, and will not make a point of no quorum, but I was trying to get the opinion of the Chair as to whether or not we could find ourselves without a quorum and then proceed with business.

The SPEAKER. The House has not found itself without a quorum.

Mr. TILSON. The rules of the House assume that when the eloquent gentleman from Texas, myself, and others rise and address the House, after the committee has risen there will be such an attraction that Members will come rushing in during that time so that we may have a quorum of the House.

Mr. BLANTON. We certainly have a full House now.

Mr. TILSON. Certainly.

Mr. BLANTON. And I will not make any point of order.

The SPEAKER. The gentleman from Michigan moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes, with Mr. CHINDBLOM in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089, which the Clerk will report by title.

The Clerk read the title of the bill.

The CHAIRMAN. When the committee rose the reading of the bill had proceeded to line 8, page 70.

Mr. CRAMTON. Mr. Chairman, I desire to withdraw the amendment just sent to the desk and offer in lieu thereof another amendment.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to withdraw the amendment which was reported just before the committee rose and to offer in lieu thereof another amendment. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Chairman, I move to strike out the paragraph and insert the language I have sent to the desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. CRAMTON moves to strike out on page 70 the paragraph beginning on line 5 and ending on line 8 and insert in lieu thereof the following:

"For fees and mileage of examining surgeons engaged in the examination of pensioners and of claimants for pension, for services rendered within the fiscal years 1929 and 1930, $300,000: *Provided*, That hereafter all necessary medical examinations of claimants or pensioners shall be made by one physician or surgeon duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1194, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions, except when in the judgment of the said commissioner the examination should be made by more than one: *Provided further*, That the fee paid any such physician making such examination shall be $5 for each examination, foreign or domestic."

Mr. BLANTON. Mr. Chairman, I renew the point of order, unless the gentleman from Wisconsin desires to make it himself.

Mr. CRAMTON. Mr. Chairman, that amendment was offered through a misunderstanding of the views of the gentleman from Wisconsin [Mr. SCHAFER]. It is, of course, subject to a point of order. I misunderstood the gentleman. I offer the amendment which I send to the desk as a substitute for it.

The CHAIRMAN. Without objection, the amendment just reported will be withdrawn and the Clerk will report the amendment now offered by the gentleman from Michigan.

There was no objection.

The Clerk read as follows:

Amendment by Mr. CRAMTON: Page 70, line 5, strike out the paragraph and insert in lieu thereof the following:

"For fees and mileage of examining surgeons engaged in the examination of pensioners and of claimants for pension, for services rendered within the fiscal years 1929 and 1930, $300,000: *Provided*, That hereafter all necessary medical examinations of claimants or pensioners shall be made by one physician or surgeon duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1195, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions. The fee to be paid any such physician making such examination, alone or otherwise, to be $5 for each examination, foreign or domestic."

Mr. CRAMTON. Now, Mr. Chairman, the amendment I have offered is the same paragraph that was in the bill as reported except it strikes out the provision permitting the examination to be made by the full board. At the request of the gentleman from Wisconsin [Mr. SCHAFER] I ask unanimous consent that further consideration of this paragraph and the amendments thereto may be passed over until the committee sits again to-morrow.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that further consideration of this paragraph and all amendments thereto be deferred until to-morrow's sitting of the committee. Is there objection?

There was no objection.

The Clerk read as follows:

For financing of the liability of the United States, created by the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts amendatory thereof (U. S. C., p. 1887, sec. 707a), $20,500,000, which amount shall be placed to the credit of the "civil-service retirement and disability fund."

Mr. KETCHAM. Mr. Chairman, I move to strike out the last word, for the purpose of getting some information from the chairman. Referring to the last paragraph, and the sum appropriated, $20,000,000, will the chairman discuss that and tell us what that is supposed to do with reference to the total amount placed in the retirement fund, including contributions made by the employees?

Mr. CRAMTON. Last year an appropriation was made for the first time of $19,950,000 for the purpose of financing our liability under the retirement act. The amount this year is increased somewhat, because it is based upon a certain percentage of the salary roll, and that salary roll is now increased, both because salaries were increased and because positions that were not formerly within the purview of the act have been brought under it. My recollection is that it is about 2½ per cent.

Mr. KETCHAM. About what will be the amount of this item in future appropriation bills?

Mr. CRAMTON. It is to be carried for a number of years and emphasizes the fact that the retirement payment to these employees is not all paid by the employees, as many Members have the impression. That will be realized when you remember that every employee that puts in any money, whether he lives or dies, whether he continues in the service or resigns, is bound to take out every penny that he put in with interest thereon. If he dies his estate gets it; if he resigns from the service he draws it out, every penny that he put in, with interest.

But there are many employeee that will draw down more than they put in. For instance, every employee comes under its provision; if he were to retire in six months he would have contributed only a few dollars, but he draws down under this retirement act just as much money as if he had been making payments for 40 years. In that case, where an employee gets more money than he put in, some one must pay it. It is not paid by the employees, because every employee is guaranteed every penny he puts in, with interest. The Treasury of the United States must share that.

Mr. KETCHAM. What I want to cover is whether or not the amount of that appropriation would be anywhere near $20,000,000 for each succeeding year.

Mr. CRAMTON. I may not be exact, but it seems to me that that amount is to continue for something like 40 years at least.

Mr. KETCHAM. At approximately this figure?

Mr. CRAMTON. Yes. Some liability had accumulated before we started in to finance the obligation. We were using up the money that the employees paid. Of course, the employees were paying in, but the liability was piling up all the time. That is what this is to meet.

The CHAIRMAN. The time of the gentleman from Michigan has expired. Without objection, the pro forma amendment is withdrawn.

Mr. HARE. Mr. Chairman, I move to strike out the last two words for the purpose of asking the chairman of the committee a question for information. I understood the gentleman to say that every employee who retires will receive the full amount that he has contributed to the retirement fund or more.

Mr. CRAMTON. Every employee receives, or his estate will receive after his death, every penny that he has contributed to the fund, with interest thereon.

Mr. HARE. I can best explain my question by an illustration. Suppose an employee has served 16 years and has contributed for 16 years and then retires. After retiring for one year, and drawing his allotted amount for that period, he dies, does his estate then draw or continue to draw the amount he would have been entitled to if he had lived?

Mr. CRAMTON. His estate gets the balance that he would have drawn. There is no contingency that the gentleman can imagine where the employee, or in the event of his death his estate, will not receive every penny he contributed, with interest thereon.

Mr. HARE. I thank the gentleman very much for that explanation. Just one more question, because there are many employees who do not understand or do not have the correct idea about this retirement fund. Does the $20,000,000 called for in this appropriation go into the general retirement fund, and is it a part of that fund, or is the retirement fund made up entirely of contributions by employees?

Mr. CRAMTON. This general retirement fund is made up of contributions from the employees and from the Treasury, and this $20,000,000 is a part of that fund. As I say, we have been using up the employees' money and obligations were being created that at some time would have to be met. So this money goes into that fund just as the employees' money goes into that fund, and that total fund, whether derived from the employees or from this appropriation annually by the Government, draws interest and that interest goes into the fund and the fund accumulates to meet these liabilities of the future.

Mr. HARE. Then the total retirement fund is not made up wholly of contributions from employees?

Mr. CRAMTON. This appropriation is to take care of the Government's share of that expense, and I might say in further answer to the gentleman from Michigan [Mr. KETCHAM], that in a statement in the hearings at page 1269 by Doctor Brown, a member of the Board of Actuaries to administer this act, he said:

> The question might be raised as to how long the Government will have to continue making these appropriations of 2.50 per cent of the pay roll in order to liquidate the accrued liability nearly $393,000,000? No definite answer can be made to that question. It will depend upon a number of things. The Board of Actuaries estimated last year that if the pay roll does not increase, contributions at the rate of 2.50 per cent of the pay roll may be expected to liquidate the accrued liability in about 71 years; if the pay roll increases by 1 per cent each year, the percentage will liquidate the accrued liability in about 42 years; if it increases by 2 per cent each year, about 35 years will be required to liquidate the accrued liability; while if the pay roll increases by 3 per cent each year, the period required to liquidate the accrued liability will be only about 28 years.

The fact is that the larger the pay roll the more rapidly will this mountain of liability be met, and so the gentleman can say that for from 35 to 70 years we must appropriate this amount of money.

Mr. KETCHAM. And that, of course, is based upon the theory that we do not increase the retirement allowance?

Mr. CRAMTON. Certainly.

Mr. KETCHAM. And if that should be, then we would have to multiply accordingly.

Mr. CRAMTON. Certainly. If we increase the retirement allowance or reduce the period of service required, then, of course, all this is thrown out of gear, and we will have to immensely increase our contributions.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

> Sun River project, Montana: For operation and maintenance, $20,000; continuation of construction, $213,000; in all, $233,000: *Provided*, That the appropriation for continuation of construction for the fiscal year 1929 shall remain available for the fiscal year 1930, for the purposes for which originally appropriated: *Provided further*, That on or before July 1, 1929, notice shall be given by the Secretary of the Interior requiring the water users to assume the control of the constructed works on January 1, 1931, and to commence payment of construction charges in accordance with the contract of June 22, 1926, between the United States and the Greenfields irrigation district.

Mr. BLANTON. Mr. Chairman, I reserve the point of order to ask a question. Is not this second proviso a change of the law in that it gives these water users until January 1, 1931, to make these payments that are required earlier under the law?

Mr. CRAMTON. No. It is not extending the time. It is making sure that they do not have any longer time than that.

Mr. BLANTON. But the law of June 22, 1926, required these payments earlier than January 1, 1931.

Mr. CRAMTON. No. The gentleman does not understand. It is not an act of June 22. It is a contract that they entered into.

Mr. BLANTON. But under a law. Is not this giving them an extension of time for making the payment?

Mr. CRAMTON. No; it is not.

Mr. BLANTON. Then I withdraw it.

The Clerk read as follows:

> North Platte project, Nebraska-Wyoming: Not to exceed $75,000 from the power revenues shall be available during the fiscal year 1930 for the operation and maintenance of the commercial system: *Provided*, That after the cost incurred by the Government in the construction of the North Platte project has been repaid all net revenues derived from the operation of the power system shall be covered into the reclamation fund, except that portion of said revenues which represents the part of said power system charged to and to be repaid by the water users of the North Platte project, which revenues shall be applied first on any operation and maintenance charges which may be due the United States, and thereafter as the water users may direct.

Mr. CRAMTON. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

> Amendment offered by Mr. CRAMTON: Page 77, line 18, after the word "system," strike out the colon, insert a semicolon, and strike out the balance of the paragraph.

Mr. CRAMTON. That strikes out the proviso. In connection with that I ask unanimous consent to extend my remarks in the RECORD by inserting a brief memorandum from the Commissioner of Reclamation with reference to that amendment.

The CHAIRMAN. Is there objection?

There was no objection.

The memorandum referred to is as follows:

UNITED STATES DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION,
Washington.

Referring to telephone conversation regarding the power situation on the North Platte project, the statement submitted, found on pages 494 and 495 of the hearings, I believe, gives a full explanation of the situation. You will note this statement expresses the belief that the situation is well covered by the present law. I believe this to be true and think that no material harm will be done should the special provision be omitted from the present bill.

ELWOOD MEAD, *Commissioner.*

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The Clerk read as follows:

Rio Grande project, New Mexico-Texas: For operation and maintenance, $250,000, together with $125,000 of the unexpended balances of the appropriations available for continuation of construction during the fiscal year 1929.

Mr. CRAMTON. Mr. Chairman, in reference to this item the gentleman from New Mexico [Mr. MORROW] and the gentleman from Texas [Mr. JOHNSON], who is representing the gentleman from Texas [Mr. HUDSPETH], have made inquiries about this appropriation and express a fear. The only question is the amount available for reappropriation. The statement which I send to the Clerk's desk is from the Commissioner of Reclamation, and which I ask unanimous consent to insert as an extension of my remarks, makes plain that the question is under investigation, so for the present we hope to let the item stand as it is until further information is received.

Mr. JOHNSON of Texas. If the gentleman will yield, do I understand if this information is received and if it is too late for action here or if the amount is increased in another body——

Mr. CRAMTON. The purpose is not to reduce the available amount below $375,000.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection? [After a pause.] The Chair hears none.

The statement is as follows:

The appropriation available for continuation of construction, fiscal year 1929, is $168,000. There has been allotted for work in progress $75,000. However, since that allotment was made further changes have been made in the construction program, and the project superintendent was requested by telegram of December 12 to advise whether $125,000 of the $168,000 available in 1929 will be unexpended on June 30, 1928, under the present construction program.

As soon as reply is received from the project superintendent further information will be sent to Mr. CRAMTON.

ELWOOD MEAD.

The CHAIRMAN. The pro forma amendment will be withdrawn, without objection.

There was no objection.

The Clerk read as follows:

Baker project, Oregon: The unexpended balance of the appropriation for this project for the fiscal year 1929 is reappropriated and made available for the same purpose for the fiscal year 1930.

Mr. JOHNSON of Texas. Mr. Chairman, I move to strike out the last word. In connection with the item just mentioned by the gentleman from Michigan I want in my time to have read, in reference to this item concerning the Rio Grande project, New Mexico and Texas, the telegram I send to the desk.

Mr. CRAMTON. Will not the gentleman be willing to insert it in the RECORD?

Mr. JOHNSON of Texas. Certainly. I will put it in the RECORD.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to extend his remarks in the RECORD by inserting a telegram to Congressman HUDSPETH about this project. Is there objection? [After a pause.] The Chair hears none.

The telegram is as follows:

EL PASO, TEX., *December 11, 1928.*

Hon. C. B. HUDSPETH,
House of Representatives.

Have newspaper report Committee on Appropriations cut Rio Grande maintenance and operation budget for 1929 from $300,000 to $250,000. This year $350,000 was appropriated and spent, which sum proved insufficient for proper maintenance of irrigation and drainage systems, and $40,000 additional was raised locally as an emergency measure. The amount recommended will not permit proper maintenance and operation and will cause serious crop loss to farmers by reason of lack of service. These funds are repaid annually by the water users and there is no reason to fail to provide efficient operation of the works in conformity with existing contracts. Will you please endeavor to secure amendment prior to passage of the bill?

EL PASO COUNTY WATER IMPROVEMENT DISTRICT NO. 1.

The Clerk read as follows:

Yakima project (Kittitas division), Washington: For operation and maintenance, $20,000.

Mr. CRAMTON. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. CHINDBLOM, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill H. R. 15089, had come to no resolution thereon.

Mr. CRAMTON. I move that the House do now adjourn. I withhold that request.

LINCOLN'S EMANCIPATION PROCLAMATION

Mr. McLEOD. Mr. Speaker, in view of the fact that January 1 next will be the sixty-sixth anniversary of the actual liberation of the slaves, I ask unanimous consent to extend my remarks in the RECORD by inserting Lincoln's emancipation proclamation.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

Mr. McLEOD. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the emancipation proclamation of President Lincoln, which is as follows:

Whereas on the 22d day of September, A. D. 1862, a proclamation was issued by the President of the United States, containing, among other things, the following, to wit:

"That on the 1st day of January, A. D. 1863, all persons held as slaves within any State, or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the executive government of the United States, including the military and naval authority thereof, will recognize and maintain the freedom of such persons, and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom.

"That the Executive will, on the 1st day of January aforesaid, by proclamation, designate the States and parts of States, if any, in which the people thereof, respectively, shall then be in rebellion against the United States; and the fact that any State, or the people thereof, shall on that day be in good faith represented in the Congress of the United States by Members chosen thereto at elections wherein a majority of the qualified voters of such State shall have participated, shall in the absence of strong countervailing testimony be deemed conclusive evidence that such State and the people thereof are not then in rebellion against the United States."

Now, therefore, I, Abraham Lincoln, President of the United States, by virtue of the power in me vested as Commander in Chief of the Army and Navy of the United States, in time of actual armed rebellion against the authority and Government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this 1st day of January, A. D. 1863, and in accordance with my purpose so to do, publicly proclaimed for the full period of 100 days from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof, respectively, are this day in rebellion against the United States, the following, to wit:

Arkansas, Texas, Louisiana (except the parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James, Ascension, Assumption, Terre Bonne, Lafourche, St. Mary, St. Martin, and Orleans, including the city of New Orleans), Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia (except the 48 counties designated as West Virginia, and also the counties of Berkeley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth), and which excepted parts are for the present left precisely as if this proclamation were not issued.

And by virtue of the power and for the purpose aforesaid I do order and declare that all persons held as slaves within said designated States and parts of States are, and henceforward shall be, free; and that the executive Government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of said persons.

And I hereby enjoin upon the people so declared to be free to abstain from all violence, unless in necessary self-defense; and I recommend to them that in all cases when allowed they labor faithfully for reasonable wages.

And I further declare and make known that such persons of suitable condition will be received into the armed service of the United States

to garrison forts, positions, stations, and other places, and man vessels of all sorts in said service.

And upon this act, sincerely believed to be an act of justice, warranted by the Constitution upon military necessity, I invoke the considerate judgment of mankind and the gracious favor of Almighty God.

ABRAHAM LINCOLN.

BILLS PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, bills of the House of the following titles:

H. R. 279. An act to amend section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867;

H. R. 7346. An act conferring jurisdiction upon the Court of Claims to hear, examine, adjudicate, and enter judgment thereon in claims which the Winnebago Tribe of Indians may have against the United States, and for other purposes;

H. R. 11983. An act to provide for issuance of perpetual easement to the Department of Fish and Game, State of Idaho, to certain lands situated within the original boundaries of the Nez Perce Indian Reservation, State of Idaho;

H. R. 12312. An act for the relief of James Hunts Along;

H. R. 12533. An act to authorize the Secretary of Commerce to dispose of certain lighthouse reservations and to acquire certain lands for lighthouse purposes; and

H. R. 13606. An act for the relief of Russell White Bear.

ADJOURNMENT

Mr. CRAMTON. I renew my motion that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 9 minutes p. m.) the House adjourned until to-morrow, Friday, December 14, 1928, at 12 o'clock noon.

COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Friday, December 14, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON AGRICULTURE

(10 a. m.)

To amend the packers and stockyards act, 1921 (H. R. 13596).

COMMITTEE ON APPROPRIATIONS

(10.30 a. m.)

Agriculture Department appropriation bill.

COMMITTEE ON INDIAN AFFAIRS

(10 a. m.)

A hearing of the subcommittee to consider H. R. 10741—a bill for the relief of J. F. McMurray.

COMMITTEE ON THE DISTRICT OF COLUMBIA—SUBCOMMITTEE ON HEALTH, CHARITIES, AND HOSPITALS

(10.30 a. m.)

To amend the act of February 9, 1907, entitled "An act to define the term 'registered nurse' and to provide for the registration of nurses in the District of Columbia" (13855) and other bills.

EXECUTIVE COMMUNICATIONS, ETC.

684. Under clause 2 of Rule XXIV, a letter from the Comptroller of the Currency, transmitting the text of the annual report of the Comptroller of the Currency covering activities of the Currency Bureau for the year ended October 31, 1928 (H. Doc. No. 361), was taken from the Speaker's table and referred to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GRAHAM: Committee on the Judiciary. H. R. 14659. A bill to provide for the appointment of two additional judges of the District Court of the United States for the Eastern District of New York; without amendment (Rept. No. 1952). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. LEAVITT: Committee on Indian Affairs. H. R. 8830. A bill to authorize the payment to Robert Toquothty of royalties arising from an oil and gas well in the bed of the Red River in Oklahoma; without amendment (Rept. No. 1953). Referred to the Committee of the Whole House.

Mr. HOWARD of Oklahoma: Committee on Indian Affairs. H. R. 13988. A bill for the relief of Peter Shapp; with an amendment (Rept. No. 1954). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOHN: A bill (H. R. 15323) to provide for the establishment of a Coast Guard station at or near Grand Island, Mich.; to the Committee on Interstate and Foreign Commerce.

By Mr. BULWINKLE: A bill (H. R. 15324) authorizing the attendance of the Marine Band at the Confederate Veterans' reunion to be held at Charlotte, N. C.; to the Committee on Naval Affairs.

Also, a bill (H. R. 15325) authorizing and directing the Secretary of War to lend to the Governor of North Carolina 9,000 blankets (olive drab, No. 4), 5,000 pillowcases, 5,000 canvas cots, 5,000 cotton pillows, 5,000 bed sacks, and 9,000 bed sheets, to be used at the encampment of the United Confederate Veterans to be held at Charlotte, N. C., in June, 1929; to the Committee on Military Affairs.

By Mr. COX: A bill (H. R. 15326) to amend paragraphs 1003, 1008, 1018, 1019, 1582, and 1651 of the tariff act of 1922, and to add a new paragraph to Schedule 10, immediately following paragraph 1019, to be known as paragraph 1019–A; to the Committee on Ways and Means.

By Mr. HOLADAY: A bill (H. R. 15327) authorizing the erection of a sanitary fireproof hospital and doctors' quarters at the National Home for Disabled Volunteer Soldiers at Danville, Ill.; to the Committee on Military Affairs.

By Mr. LEATHERWOOD: A bill (H. R. 15328) to authorize the exchange of 18 sections of Government land for an equal number of sections of State land located in Box Elder County, Utah, for experiments in sheep growing, and for other purposes; to the Committee on the Public Lands.

By Mr. McREYNOLDS: A bill (H. R. 15329) granting the consent of Congress to W. H. Monahan, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge and approaches thereto across the Tennessee River, at a point suitable to the interests of navigation opposite or near Chattanooga, Hamilton County, Tenn.; to the Committee on Interstate and Foreign Commerce.

By Mr. MORIN: A bill (H. R. 15330) authorizing the acceptance by the United States Government, from the Woman's Relief Corps, auxiliary to the Grand Army of the Republic, of proposed gift of bronze tablets to be placed in Andersonville National Cemetery in Georgia; to the Committee on Military Affairs.

By Mr. FULMER: A bill (H. R. 15331) to provide for the making of loans to drainage or levee districts, and for other purposes; to the Committee on Irrigation and Reclamation.

By Mr. LEATHERWOOD: A bill (H. R. 15332) to amend section 4 of the act of March 3, 1927, granting pensions to certain soldiers who served in the Indian wars from 1817 to 1898, and for other purposes; to the Committee on Pensions.

By Mr. CHINDBLOM: A bill (H. R. 15333) granting the consent of Congress to the South Park commissioners and the commissioners of Lincoln Park, separately or jointly, their successors and assigns, to construct, maintain, and operate, or cause to be operated, a bridge across that portion of Lake Michigan lying opposite the entrance to Chicago River, Ill., and granting the consent of Congress to the commissioners of Lincoln Park, their successors and assigns, to construct, maintain, and operate, or cause to be operated, a bridge across the Michigan Canal, otherwise known as the Ogden Slip, in the city of Chicago, Ill.; to the Committee on Interstate and Foreign Commerce.

By Mr. BERGER: A bill (H. R. 15334) to regulate the sale of securities, to prevent gambling in the same, to prevent the sale of cotton and grain in so-called future markets, and for other purposes; to the Committee on the Judiciary.

By Mr. FISH: A bill (H. R. 15335) to amend the World War veterans' act; to the Committee on World War Veterans' Legislation.

By Mr. JEFFERS: A bill (H. R. 15336) to authorize the erection of a United States veterans' hospital in the State of Alabama, and to authorize an appropriation therefor; to the Committee on World War Veterans' Legislation.

By Mr. CRAIL: A bill (H. R. 15337) granting pensions and increase of pensions to widows and former widows of certain soldiers, sailors, and marines of the Civil War, and for other purposes; to the Committee on Invalid Pensions.

By Mr. MOREHEAD: A bill (H. R. 15338) authorizing the Brownville Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Brownville, Nebr.; to the Committee on Interstate and Foreign Commerce.

By Mr. EDWARDS: A bill (H. R. 15339) to combat and prevent influenza in the United States; to the Committee on Appropriations.

By Mr. WOODRUM: Joint resolution (H. J. Res. 348) proposing a location for use of the President of the United States; to the Committee on Public Buildings and Grounds.

By Mr. MORIN: Joint resolution (H. J. Res. 349) for the appointment of a joint committee of the Senate and House of Representatives to investigate the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BERGER: A bill (H. R. 15340) for the relief of John Arquet; to the Committee on Military Affairs.

By Mr. BLAND: A bill (H. R. 15341) for the relief of the Consolidated Awning & Tent Co., of Newport News, Va., and the United States Fidelity & Guaranty Co., of Baltimore, Md.; to the Committee on Claims.

By Mr. BOHN: A bill (H. R. 15342) for the relief of Ralph W. Daggett, former lieutenant, Finance Department, United States Army; to the Committee on Military Affairs.

By Mr. COOPER of Ohio: A bill (H. R. 15343) to correct the military record of Clayton R. Miller; to the Committee on Military Affairs.

By Mr. DICKINSON of Missouri: A bill (H. R. 15344) granting a pension to James C. Long; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15345) granting an increase of pension to Lucy A. Wilson; to the Committee on Invalid Pensions.

By Mr. DOUGLAS of Arizona: A bill (H. R. 15346) granting an increase of pension to Elida A. Zook; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 15347) for the relief of Prof. William H. H. Hart, principal of the Hart Foreign School and Junior Republic for Dependent Children; to the Committee on Claims.

By Mr. EVANS of Montana: A bill (H. R. 15348) granting a pension to John W. Baker; to the Committee on Pensions.

Also, a bill (H. R. 15349) granting an increase of pension to Edward L. Schniedemann; to the Committee on Pensions.

By Mr. ROY G. FITZGERALD: A bill (H. R. 15350) granting an increase of pension to William Bartlett; to the Committee on Pensions.

By Mr. GOLDSBOROUGH: A bill (H. R. 15351) for the relief of Evelyn Harris; to the Committee on Claims.

By Mr. HALL of Indiana: A bill (H. R. 15352) granting an increase of pension to Mary C. Forlow; to the Committee on Invalid Pensions.

By Mr. HARRISON: A bill (H. R. 15353) for the relief of Samuel Irick; to the Committee on World War Veterans' Legislation.

By Mr. HAWLEY: A bill (H. R. 15354) for the relief of C. F. Beach; to the Committee on Claims.

Also, a bill (H. R. 15355) granting an increase of pension to Mary E. Webb; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15356) granting a pension to Anna W. Udell; to the Committee on Pensions.

By Mr. HOCH: A bill (H. R. 15357) granting a pension to Tessa Baugh; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 15358) granting an increase of pension to Mary E. Priddy; to the Committee on Invalid Pensions.

By Mr. KNUTSON: A bill (H. R. 15359) granting a pension to Ellen Batters; to the Committee on Pensions.

By Mr. KVALE: A bill (H. R. 15360) for the relief of Henry G. Young; to the Committee on Military Affairs.

By Mr. LEATHERWOOD: A bill (H. R. 15361) granting an increase of pension to Susan T. Sailor; to the Committee on Invalid Pensions.

By Mr. LEHLBACH: A bill (H. R. 15362) granting an increase of pension to Huldah W. Lentz; to the Committee on Invalid Pensions.

By Mr. LONGWORTH: A bill (H. R. 15363) granting a retirement annuity to Frederick R. Sparks; to the Committee on the Civil Service.

By Mr. LOZIER: A bill (H. R. 15364) granting an increase of pension to Julia McConkey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15365) granting an increase of pension to Martha A. Lawhorn; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN: A bill (H. R. 15366) granting an increase of pension to Lillian E. Plum; to the Committee on Invalid Pensions.

By Mr. McREYNOLDS: A bill (H. R. 15367) for the relief of Henry M. Weiser, administrator of the estate of Cora H. Weiser; to the Committee on Claims.

By Mr. MILLIGAN: A bill (H. R. 15368) granting a pension to Mary A. Reynolds; to the Committee on Invalid Pensions.

By Mr. STRONG of Kansas: A bill (H. R. 15374) granting an increase of pension to Etta Burns; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15375) granting an increase of pension to Alida A. Marshall; to the Committee on Invalid Pensions.

By Mr. TABER: A bill (H. R. 15376) granting an increase of pension to Harriet E. Fowler; to the Committee on Invalid Pensions.

By Mr. THOMPSON: A bill (H. R. 15377) granting a pension to Luvina Crawford; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7962. By Mr. BERGER: Memorial of Local No. 3, National Federation of Post Office Clerks, of Milwaukee, Wis., indorsing the proposal for a Saturday half holiday contained in Senate bill 3281 and in the La Follette-Mead Saturday short work day bill; to the Committee on the Post Offices and Post Roads.

7963. Also, memorial of Cigar Makers' Union Local No. 25, of Milwaukee, Wis., protesting in the name of the cigar makers, cigar manufacturers, tobacco-leaf growers, box makers, and tobacco strippers against the enactment of House bill 9195, known as the Cuban parcel post bill; to the Committee on Ways and Means.

7964. By Mr. CRAIL: Petition of American Legion Auxiliary, of San Pedro, Calif., urging appropriate legislation by Congress providing for 300 additional beds and an adequate appropriation for the Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Appropriations.

7965. Also, petition of Better America Federation, of Los Angeles, Calif., protesting against repeal of national-origins provision of immigration law; to the Committee on Immigration and Naturalization.

7966. Also, petition of Stanton Post No. 55, Grand Army of the Republic, of Los Angeles, Calif., favoring additional hospital facilities at the Soldiers' Home, Pacific Branch, Los Angeles County, Calif.; to the Committee on Military Affairs.

7967. By Mr. HALL of Indiana: Petition of Plainfield Quarterly Meeting of Friends, meeting in Indianapolis, urging the Congress to ratify the world treaties known as the "Pact of Paris"; to the Committee on Foreign Affairs.

7968. By Mr. HARRISON: Petition of Berryville Chamber of Commerce, in regard to Mount Weather as a summer White House; to the Committee on Appropriations.

7969. Also, telegram of Luray Chamber of Commerce, as to summer White House; to the Committee on Appropriations.

7970. By Mr. O'CONNELL: Petition of the Union Label Club of Kings County, Brooklyn, N. Y., opposing the passage of House bill 9195, Cuban parcel post bill, amending sections 2804 and 3402 of the Revised Statutes; to the Committee on Ways and Means.

7971. Also, petition of the Capt. Charles V. Gridley Chapter, No. 1, Dewey Congressional Medal Men's Association, San Francisco, Calif., favoring the passage of Senate bill 1265 and House bill 12247; to the Committee on Pensions.

7972. By Mr. ROBINSON of Iowa: Petition of Black Hawk Chapter, Daughters of American Revolution, Cedar Falls, Iowa,

in favor of the Kellogg multilateral treaty, submitted by Anna L. S. Wood, chairman of meeting, and Harriet S. Mentzer, secretary, Cedar Falls, Iowa; to the Committee on Foreign Affairs.

7973. By Mr. SWICK: Petition of Ellwood City Council, No. 182, Fraternal Patriotic Americans, G. S. Mook, secretary, Ellwood City, Pa., urging quota law for Canadian and Mexican immigrants, registration of all aliens, and enforcement of national origins clause; to the Committee on Immigration and Naturalization.

7974. By Mr. WHITE of Colorado: Petition of sundry citizens of Denver, Colo., protesting the enactment of legislation looking to the repeal of the so-called Pullman surcharge; to the Committee on Interstate and Foreign Commerce.

SENATE

FRIDAY, *December 14, 1928*

(Legislative day of Thursday, December 13, 1928)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed a bill (H. R. 13990) to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased, in which it requested the concurrence of the Senate.

FINAL ASCERTAINMENT OF ELECTORS

The VICE PRESIDENT laid before the Senate communications from the Secretary of State, transmitting, pursuant to law, certified copies of the final ascertainments of the electors for President and Vice President at the election held November 6, 1928, from the States of Alabama, Arizona, Arkansas, Delaware, Iowa, Kansas, Louisiana, Maine, Maryland, Minnesota, Missouri, Oregon, and Vermont, which were ordered to lie on the table.

SENATOR FROM WISCONSIN

The VICE PRESIDENT laid before the Senate the credentials of ROBERT M. LA FOLLETTE, Jr., chosen a Senator from the State of Wisconsin for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

UNITED STATES OF AMERICA,
THE STATE OF WISCONSIN,
DEPARTMENT OF STATE.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 6th day of November, 1928, ROBERT M. LA FOLLETTE, Jr., was duly elected by the qualified electors of the State of Wisconsin a Senator of the United States from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, 1929, as appears from the certificate of the State board of canvassers now on file and of record in the office of secretary of state.

In testimony whereof I have hereunto set my hand and caused the great seal of the State of Wisconsin to be affixed.

Done at the capitol, in the city of Madison, this 11th day of December, A. D. 1928.

[SEAL.] FRED R. ZIMMERMAN,
Governor.

By the governor:

THEODORE DAMMANN,

PETITIONS AND MEMORIALS

Mr. WALSH of Massachusetts. Mr. President, I present petitions from members of the faculty and hundreds of students of Smith College, of Northampton, Mass., praying for the prompt ratification of the multilateral treaty for the renunciation of war, which I request be referred to the Committee on Foreign Relations.

The VICE PRESIDENT. The petitions will be received and referred to the Committee on Foreign Relations.

Mr. VANDENBERG presented petitions of sundry citizens of Detroit and Kalamazoo, in the State of Michigan, praying for the prompt ratification of the so-called multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. KEYES presented a petition of sundry citizens of Conway and vicinity, in the State of New Hampshire, praying for the prompt ratification of the so-called multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

Mr. FRAZIER presented the petition of Mrs. Christine Elker and 40 other citizens of Surrey, N. Dak., praying for the prompt ratification of the so-called multilateral treaty for the renunciation of war, which was referred to the Committee on Foreign Relations.

He also presented the memorial of R. D. Bagley and 44 other citizens of Minot, N. Dak., remonstrating against the passage of the bill (H. R. 10304) authorizing the Secretary of War to erect headstones over the graves of soldiers who served in the Confederate Army and to direct him to preserve in the records of the War Department the names and places of burial of all soldiers for whom such headstones shall have been erected, and for other purposes, or any other legislation of similar character, which was referred to the Committee on Military Affairs.

Mr. JONES presented petitions numerously signed by sundry citizens of Tacoma, Winlock, Kelso, Sequim, Port Angeles, Kalama, Castle Rock, Longview, Spokane, Olympia, Vancouver, Bellingham, Monroe, Yakima, Pateros, Leavenworth, Ostrander, Centralia, Washougal, Menlo, Toledo, Tenino, Woodland, Goldendale, Chehalis, and Ryderwood, all in the State of Washington, praying for the prompt ratification of the so-called multilateral treaty for the renunciation of war, which were referred to the Committee on Foreign Relations.

Mr. WAGNER. Mr. President, I present a memorial to the Senate, transmitted to me by one of the leading scholars of our State, Dr. Stephen S. Wise, and signed by distinguished Americans throughout the country in favor of the Kellogg peace pact, which I ask may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the memorial was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

MEMORIAL TO UNITED STATES SENATE—PEACE PACT AND CRUISER BILL INCONSISTENT

We, the undersigned citizens, being in hearty favor of the ratification by the United States Senate of the general pact for the renunciation of war, look with grave apprehension upon the possibility of the authorization of 15 additional cruisers in the present session of the Senate.

We believe that the wholesome effect of the general pact for the renunciation of war upon the sentiment of nations and peoples will be largely nullified if the nation which first proposed the general pact expresses lack of confidence in its efficacy by increasing its own armament. It seems to us idle to insist that the naval program has been conceived without reference to the program of any other nation, since the cruisers to be authorized are clearly in the class of vessels which were the bone of contention in the abortive Geneva naval limitation conference. Whatever may be the merits of the American position as to the question of naval disarmament, it must be clear to every observer that the initiation of a new building program at this time will inevitably imperil the wholesome effect of the general pact for the renunciation of war and will give other nations occasion to question America's sincerity. We therefore urge our representatives in the Senate to vote against the cruiser bill and for the general pact for the renunciation of war.

Cornelia S. Adair, vice president National Education Association; Jane Addams; Clifford W. Barnes, vice president Chicago Association of Commerce; Rev. S. Parkes Cadman; Carrie Chapman Catt; John H. Clarke, ex-justice Supreme Court of the United States; Rev. Henry Sloane Coffin, president Union Theological Seminary; W. H. P. REPORT OF THE IMMIGRATION COMMITTEE

Mr. HARRIS, from the Committee on Immigration, to which was referred the bill (S. 1437) to subject certain immigrants, born in countries of the Western Hemisphere, to the quota under the immigration laws, reported it with an amendment and submitted a report (No. 1343) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. NEELY:

A bill (S. 4894) granting compensation to the next of kin of Carl E. Sturgeon; and

A bill (S. 4895) for the relief of Thomas Griffith; to the Committee on Claims.

By Mr. BRATTON:

A bill (S. 4896) for the relief of the heirs of Cristobal Ascarate; to the Committee on Claims.

By Mr. GREENE:

A bill (S. 4897) granting an increase of pension to Lucy Moulton; to the Committee on Pensions.

By Mr. McKELLAR:

A bill (S. 4898) granting an increase of pension to Samuel A. Holt; and

A bill (S. 4899) granting an increase of pension to Lucy Queen; to the Committee on Pensions.

A bill (S. 4900) to amend section 259 of the Judicial Code; to the Committee on the Judiciary.

By Mr. SACKETT:

A bill (S. 4901) granting a pension to Nannie G. B. Cook (with accompanying papers);

A bill (S. 4902) granting an increase of pension to James L. Graham (with accompanying papers);

A bill (S. 4903) granting a pension to Emeline Riddle (with accompanying papers);

A bill (S. 4904) granting an increase of pension to James W. Melton (with accompanying papers); and

A bill (S. 4905) granting an increase of pension to Annie P. Mercer (with accompanying papers); to the Committee on Pensions.

By Mr. LA FOLLETTE:

A bill (S. 4906) granting an increase of pension to James H. Barber (with an accompanying paper); to the Committee on Pensions.

A bill (S. 4907) for the relief of August Mohr; to the Committee on Claims.

By Mr. WALSH of Massachusetts:

A bill (S. 4908) for the relief of John W. Reardon; to the Committee on Naval Affairs.

By Mr. SHORTRIDGE:

A bill (S. 4909) to establish an aviation flag of the United States of America; to the Committee on Naval Affairs.

A bill (S. 4910) granting an increase of pension to William Casper; to the Committee on Pensions.

A bill (S. 4911) for the relief of Fred Helm;

A bill (S. 4912) for the relief of Robert E. Blair;

A bill (S. 4913) for the relief of Ira L. Duncan; and

A bill (S. 4914) for the relief of William M. Atchison; to the Committee on Military Affairs.

By Mr. DENEEN:

A bill (S. 4915) granting the consent of Congress to the South Park Commissioners, and the Commissioners of Lincoln Park, separately or jointly, their successors and assigns, to construct, maintain, and operate a bridge across that portion of Lake Michigan lying opposite the entrance to Chicago River, Ill., and granting the consent of Congress to the Commissioners of Lincoln Park, their successors and assigns, to construct, maintain, and operate a bridge across the Michigan Canal, otherwise known as the Ogden Slip, in the city of Chicago, Ill.; to the Committee on Commerce.

A bill (S. 4916) authorizing the President to appoint Edmund J. Engel a captain in the Regular Army of the United States;

A bill (S. 4917) providing for the appointment of Jacob M. Schollenberger as a warrant officer, United States Army; and

A bill (S. 4918) for the relief of James J. Lindsay; to the Committee on Military Affairs.

A bill (S. 4919) granting an increase of pension to Henry W. Kappes; to the Committee on Pensions.

By Mr. ROBINSON of Indiana:

A bill (S. 4920) granting a pension to Martha Eldora Arnett;

A bill (S. 4921) granting a pension to Eliza F. Moran (with accompanying papers); and

A bill (S. 4922) granting an increase of pension to Clarissa M. Heaston; to the Committee on Pensions.

By Mr. CAPPER:

A bill (S. 4923) granting an increase of pension to Mary V. Doyle (with accompanying papers); to the Committee on Pensions.

By Mr. HARRIS:

A bill (S. 4924) to provide for the advancement on the retired list of certain officers of the Navy; to the Committee on Naval Affairs.

By Mr. KING:

A bill (S. 4925) to prevent the use of the mails and other communication facilities in furtherance of margin or bucket-shop transactions; to the Committee on the Judiciary.

By Mr. CARAWAY:

A bill (S. 4926) to provide for the transfer of certain criminal prosecutions from the District of Columbia to the United States District Court for the District of Maryland; to the Committee on the Judiciary.

By Mr. THOMAS of Oklahoma:

A bill (S. 4927) for the relief of Peter Shapp; to the Committee on Indian Affairs.

By Mr. CAPPER (for Mr. HOWELL):

A bill (S. 4928) for the relief of Thelma Phelps Lester (with accompanying papers); to the Committee on Claims.

By Mr. WATSON:

A bill (S. 4929) to amend an act entitled "An act for the regulation of radio communications," approved February 23, 1927; to the Committee on Interstate Commerce.

By Mr. SHEPPARD:

A bill (S. 4930) for the relief of H. L. Roberts & Co. and Thomas C. Edwards; to the Committee on Claims.

By Mr. REED of Pennsylvania:

A bill (S. 4931) for the relief of D. B. Heiner; to the Committee on Claims.

By Mr. McNARY:

A bill (S. 4932) for the relief of Abe Blond; to the Committee on Naval Affairs.

By Mr. MOSES:

A bill (S. 4933) granting a pension to Annie M. Gibson (with accompanying papers);

A bill (S. 4934) granting an increase of pension to Catherine Ruddy; and

A bill (S. 4935) granting a pension to Lizzie K. Owens (with accompanying papers); to the Committee on Pensions.

By Mr. BLEASE:

A joint resolution (S. J. Res. 178) to instruct officials of Federal Farm Loan Board and subsidiaries not to foreclose any mortgage on real estate which is or will become due and payable prior to October 1, 1929; to the Committee on the Judiciary.

CHANGE OF REFERENCE

On motion of Mr. CAPPER, the Committee on Claims was discharged from the further consideration of the following bills, and they were referred to the Committee on Military Affairs:

H. R. 11181. An act for the relief of William Parish; and

H. R. 11343. An act for the relief of Frank C. Russell.

AMENDMENTS TO INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. JONES submitted an amendment intended to be proposed by him to House bill 15089, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 79, line 23, after the name "Washington" and the colon, to strike out the remainder of line 23 and all of line 24, and insert the following:

"For continuation of construction and operation and maintenance, $1,500,000: *Provided*, That the unexpended balance of the appropriation of $1,500,000 contained in the act making appropriations for the Department of the Interior for fiscal year 1929 (45 Stat. p. 227) shall remain available during the fiscal year 1930."

Mr. McNARY submitted an amendment intended to be proposed by him to House bill 15089, the Interior Department appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 79, line 1, insert the following:

"Vale project, Oregon: For operation and maintenance, $6,000; continuation of construction, $644,000, of which amount not more than $130,000 shall be available for the purchase of a proportionate interest in the existing storage reservoir of the Warm Springs project; in all, $650,000: *Provided*, That the unexpended balance of the appropriation of $744,000 for the continuation of construction for the fiscal year 1929 shall remain available during the fiscal year 1930."

ORVILLE WRIGHT, AND WILBUR WRIGHT, DECEASED

The bill (H. R. 13990) to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased, was read twice by its title and referred to the Committee on Military Affairs.

Mr. BINGHAM subsequently said: Mr. President, from the Committee on Military Affairs I report back favorably without amendment the bill (H. R. 13990) to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased, and I ask unanimous consent for its immediate consideration.

There being no objection, the bill was considered as in Committee of the Whole, and it was read as follows:

Be it enacted, etc., That the President be, and he is hereby, authorized to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased, who met and overcame the earliest dangers in aviation and as pioneers made possible the achievements which are now stirring the emotions and pride of our people. The posthumous presentation to Wilbur Wright, deceased, shall be made to such representative of the said Wilbur Wright, deceased, as the President may designate.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had concurred in the concurrent resolution (S. Con. Res. 24) providing for the appointment of a joint committee to make the necessary arrangements for the inauguration of the President elect of the United States, on March 4, 1929.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes; requested a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. WOOD, Mr. THATCHER, and Mr. BYRNS were appointed managers on the part of the House at the conference.

APPROPRIATIONS FOR THE TREASURY AND POST OFFICE DEPARTMENTS

The VICE PRESIDENT laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WARREN. I move that the Senate insist upon its amendments, that the invitation of the House for a conference be accepted, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. WARREN, Mr. SMOOT, Mr. MOSES, Mr. OVERMAN, and Mr. HARRIS conferees on the part of the Senate.

INAUGURATION OF PRESIDENT ELECT

The VICE PRESIDENT. Under the terms of Senate Concurrent Resolution 24, providing for the appointment of a joint committee to make the necessary arrangements for the inauguration of the President elect of the United States, on March 4, 1929, the Chair appoints the senior Senator from New Hampshire [Mr. MOSES], the senior Senator from Maine [Mr. HALE], and the junior Senator from North Carolina [Mr. OVERMAN] members of the joint committee on the part of the Senate.

CALL OF THE ROLL

Mr. HEFLIN. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Frazier	McKellar	Shortridge
Barkley	George	McLean	Simmons
Bayard	Gerry	McMaster	Smith
Bingham	Gillett	McNary	Smoot
Black	Glass	Metcalf	Steck
Blaine	Glenn	Moses	Steiwer
Blease	Goff	Neely	Stephens
Borah	Gould	Norris	Swanson
Bratton	Greene	Oddie	Thomas, Idaho
Brookhart	Hale	Overman	Thomas, Okla.
Broussard	Harris	Phipps	Trammell
Bruce	Harrison	Pine	Tyson
Capper	Hastings	Pittman	Vandenberg
Caraway	Hawes	Ransdell	Wagner
Couzens	Hayden	Reed, Mo.	Walsh, Mass.
Curtis	Heflin	Reed, Pa.	Walsh, Mont.
Dale	Johnson	Robinson, Ark.	Warren
Deneen	Jones	Robinson, Ind.	Waterman
Dill	Kendrick	Sackett	Watson
Edge	Keyes	Schall	Wheeler
Fess	King	Sheppard	
Fletcher	La Follette	Shipstead	

Mr. WAGNER. I desire to announce that my colleague the senior Senator from New York [Mr. COPELAND] is detained from the Senate on account of illness in his family. I ask that this announcement may stand for the day.

Mr. SMOOT. I desire to announce that the Senator from North Dakota [Mr. NYE] is engaged in the Committee on Public Lands and Surveys.

Mr. EDGE. I wish to announce that my colleague the junior Senator from New Jersey [Mr. EDWARDS] is necessarily detained for the day.

The VICE PRESIDENT. Eighty-six Senators having answered to their names, a quorum is present.

SENATOR FROM UTAH

The PRESIDENT pro tempore laid before the Senate the credentials of WILLIAM H. KING, chosen a Senator from the State of Utah for the term commencing March 4, 1929, which were read and ordered to be placed on file, as follows:

STATE OF UTAH,
EXECUTIVE DEPARTMENT.

To the PRESIDENT OF THE SENATE OF THE UNITED STATES:

This is to certify that on the 6th day of November, A. D. 1928, WILLIAM H. KING was duly chosen by the qualified electors of the State of Utah a Senator from said State to represent said State in the Senate of the United States for the term of six years, beginning on the 4th day of March, A. D. 1929.

Witness his excellency our governor, George H. Dern, and our seal hereto affixed at Salt Lake City, Utah, this 1st day of December, A. D. 1928.

By the governor: GEO. H. DERN, *Governor.*
[SEAL.] H. E. CROCKETT,
Secretary of State.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. JOHNSON. Mr. President, I ask that the Senator from Arizona [Mr. HAYDEN] take up his so-called tax amendment and present it at this time.

Mr. HAYDEN. Very well. I offer the following amendment.

The VICE PRESIDENT. The clerk will report the amendment.

The CHIEF CLERK. On page 11, line 22, after the word "apply," insert:

Provided further, That nothing in this act shall be construed or held to affect the rights of the States or other local authority to exercise any rights which they may have, including the right to levy and collect taxes upon improvements, output of electrical energy, or other rights, property, or assets of any lessee or contractee of the United States.

Mr. HAYDEN. Mr. President, I have stated to the Senate the position of Arizona with respect to taxation on so many occasions and with such detail that it is unnecessary for me to repeat all the argument.

In brief, Arizona has no objection to the Federal Government engaging in the business of producing hydroelectric power provided that fact is not used as an excuse to deprive the State of a revenue that it would otherwise receive if the power development were undertaken by private enterprise.

The State of Arizona and her sister State of Nevada would not be so much concerned in this particular instance if the benefits to come from the development of power were to be largely realized within their own borders. If a power plant is constructed at Boulder Dam and a large quantity of hydroelectric power is generated at that point, more than 95 per cent of that power will be transported into the State of California. We have the testimony of many citizens of California that they expect, as a result flowing from that supply of cheap power, that it will add at least a million to the population of that State and from twelve billion to fifteen billion dollars to its wealth. If a part of the taxable wealth which will be created by cheap power from Boulder Dam were included in Arizona and Nevada, the two States would be benefited, but it is impossible under the present arrangement to have that benefit occur to the two States.

My original idea was to provide that power might be developed at Boulder Canyon Dam under the terms of the Federal water power act, but after consultation with many able Senators, who are also able lawyers, I became convinced that such a plan would not be practicable. We are told by representatives of the city of Los Angeles—and have been repeatedly so told—that the city of Los Angeles expects, under the terms of this bill, to construct a power house at Boulder Canyon Dam to generate power and to transmit the power to Los Angeles and to the cities of southern California associated with that municipality which are now selling power to their inhabitants.

Mr. ODDIE. Mr. President, will the Senator from Arizona yield for an observation at that point?

Mr. HAYDEN. I yield.

Mr. ODDIE. Mr. President, it should be borne in mind that the State of Nevada has industries which will require quite a large amount of this power to be developed at the Boulder Canyon Dam. The development of our mining industry will warrant the erection of a copper refinery at or near Las Vegas, Nev., the closest city to the dam, in order that the large quantity of copper produced in Nevada and in the surrounding States may be refined on the ground. Other industries requiring hydroelectric power will also be encouraged to start in Nevada. The city of Las Vegas, Nev., will become a manufacturing center of great importance to the whole western country because of the quantity of cheap electric power that will be available there and great wealth of the undeveloped resources in that section of the country. The production of this large quantity of power at this place will encourage the coming of new and important industries, for which we are in need and for which we will be particularly grateful.

Mr. HAYDEN. Mr. President, I hope the State of Nevada will prosper by reason of the fact that cheap power will be produced within the boundaries of the State from the Colorado River. Nevertheless, I have yet to see any set of figures prepared that showed anything different than that nine-tenths or more of this power will be transmitted into California.

Let me repeat that commissioners representing the State of Arizona conducting negotiations with the State of California have repeatedly been assured by the representatives of the city of Los Angeles, which expects to acquire the right to build the power house at Boulder Dam, that that city was perfectly willing to pay and expected to pay taxes upon the power plant, upon the transmission lines and upon the values thus created thereby by that city; there is no dispute about that; the record is complete from beginning to end that the city of Los Angeles has assured the State of Arizona that such is the intention of the city; yet whenever the time comes to put down on paper something that will make that assurance doubly sure, we can not get any agreement with anybody in California to that effect. What I am seeking to do is to make certain that no contractee or lessee of the United States generating power at Boulder Canyon Dam will assert that it is an instrumentality of the United States, and, therefore, not subject to taxation.

Mr. SHORTRIDGE. Mr. President——

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from California?

Mr. HAYDEN. I yield.

Mr. SHORTRIDGE. As I understand, the amendment deals with "any rights which they may have"; that is to say, any

rights which the States may have. As a legal proposition, if the States have the rights claimed or asserted by them, can Congress divest the States of any of those rights?

Mr. HAYDEN. We desire an affirmative assertion by Congress that this bill will accomplish the purpose that I have stated. We know that when vast tracts of land were granted to the transcontinental railroads they immediately refused to pay taxes upon the land, claiming that there were certain conditions in the title that created a Federal interest. We know that the national banks, which were created under the national bank act, asserted that they were instrumentalities of the United States and not subject to taxation. In each instance the Supreme Court sustained those contentions, and in each instance an act of Congress was required to divest them of their right or authority to be exempted from State taxation.

Mr. SHORTRIDGE. An answer may be given categorically to my question. Does the Senator claim that the States referred to have certain rights? If so, does he maintain now that Congress could divest the States of those rights? What is the position of the Senator as a legal proposition?

Mr. HAYDEN. As a legal proposition we say that Congress should make it perfectly plain that, so far as concerns any contractees or lessees of the United States building a power plant at Boulder Dam, that they should not claim that they are instrumentalities of the United States and thereby escape taxation on the part of the States of Arizona and Nevada.

Mr. SHORTRIDGE. Could Congress divest them of any right if they have the right? What is the answer—if the Senator can answer it—yes or no?

Mr. HAYDEN. We do not know. There is so much vagueness about it. We want to make the right of taxation certain. We know that the city of Los Angeles has agreed that it would pay taxes; the city asserts that it will; but it will not agree to that on paper. What I have done, let me explain to the Senate very briefly, is to take a proviso found in section 32 of the general oil leasing act which reads—and I ask Senators to compare what I read from that act with the amendment which I have offered—

Provided, That nothing in this act shall be construed or held to affect the rights of the States or other local authority to exercise any rights which they may have, including the right to levy and collect taxes upon improvements, output of mines, or other rights, property, or assets of any lessee of the United States.

The only material change in the language I have read is that instead of using the words "output of mines," I use the words "output of electrical energy." In the instance of the oil leasing act the term "output of mines" was appropriate, because that act refers to the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain, and the general term, "output of mines," was necessary. In this instance the only difference is the use of the words "output of electrical energy."

Mr. SACKETT. Mr. President, will the Senator yield?

Mr. HAYDEN. I have only 15 minutes, but I will be glad to yield.

Mr. SACKETT. I should like to ask why the Senator put in the words "or contractee"?

Mr. HAYDEN. The bill as now pending before the Senate contemplates that contracts shall be let. The term "contracts" rather than "leases" is used throughout the bill. So I use the term "lessee or contractee."

Mr. SACKETT. That adds to the oil leasing act that word, does it not?

Mr. HAYDEN. The contractee under this bill will be in exactly the same status as a lessee under the oil leasing act.

Mr. SHORTRIDGE. Mr. President, may I ask the Senator a question before he passes from that?

Mr. HAYDEN. If the Senator will make his question brief, I shall yield. He understands, however, that the Senate is operating under the 15-minute rule.

Mr. SHORTRIDGE. I will take just a moment. According to the provisions of this bill, we have perhaps already conceded, if I may use that word, a great deal to the State of Arizona. I have understood that, in lieu of the right to tax, the State of Arizona was being given other considerable income derived from the operation of the electric power plant.

Mr. HAYDEN. That income may or may not exist; it will depend upon the profits of the business. What I am seeking to make fixed and certain here is the offer and assertion of the city of Los Angeles that if that city shall build the power plant at Boulder Dam it will be taxable. The city has said that it will agree to do that; it has assured us of that at all times; and I want to make that certain.

In connection with the amendment I have offered, I respectfully direct the attention of the Senate to these words from the message of the President of the United States, recently delivered to Congress:

It is unfortunate that the States interested in this water have been unable to agree among themselves. Nevertheless, any legislation should give every possible safeguard to the present and prospective rights of each of them.

The adoption of my amendment should satisfy the President of the United States that the rights of the States have been protected.

In respect to the right of the State of Arizona to receive an income of this nature, I desire to quote the statement made by the next President of the United States, Mr. Hoover, addressed to a representative gathering of citizens in Arizona at the Grand Canyon last August. At that time Mr. Hoover said:

He has no objection to the Federal Government agreeing that the State of Arizona might impose a tax on power produced on the Colorado River in the State of Arizona, and feels sure that the Federal Government will agree to the imposition of a reasonable tax of that kind.

Let me say further, so that the Senate may thoroughly understand Arizona's position, that the State of Arizona has never sought unduly to burden the project by excessive demands for revenue. Arizona has always agreed that the United States should be fully reimbursed during each and every year in which the payments are to be made, first, for the annual amortization payment of the construction cost; secondly, for interest on the money invested; third, for all operation and maintenance; and, fourth, for a reasonable payment into a reserve fund to meet emergencies. All of those things the United States of America is entitled to have first before Arizona receives any income; but we say that if the United States of America, after having made contracts—and contracts must be made or the dam can not be constructed—that will accomplish all of the four purposes, those who purchase the electrical current or who generate it at Boulder Dam should not be free of taxation by the State of Arizona with respect to any improvements or values which they may create at that place.

In the remarks which I have submitted to the Senate on previous occasions I have cited many instances where States have reimbursed localities for loss in taxes, such as by the creation of State parks. I have shown that the city of Los Angeles on all improvements owned by that city outside of its limits in the State of California now pays taxes the same as does any other taxpayer.

The VICE PRESIDENT. The time of the Senator from Arizona on the bill has expired.

Mr. KING. Mr. President, in my time, and for information, may I ask the Senator from Arizona—my attention was diverted while he was speaking, and I did not hear all that he said—whether the amendment offered by him contemplates that the provision for 18¾ per cent should not be operative?

Mr. HAYDEN. No.

Mr. KING. That is to say, if Arizona may tax the plant which may be constructed, or impose a reasonable license upon the power generated and transmitted beyond the State, then is the Senator asking that his State shall have, in addition to that, 18¾ per cent of the proceeds derived from the sale of power, and so forth?

Mr. HAYDEN. The State of Arizona and the State of Nevada should receive both incomes. We are advised by representatives of the city of Los Angeles that they expect to pay to the United States a price for power which will be in excess of the needs of the United States with respect to amortization, interest, operation, maintenance, and so forth, and that thereby the States may obtain some income from that excess profit. In addition to that, we are assured by the representatives of the city of Los Angeles that they will pay taxes upon any improvements erected by them at Boulder Dam. So that both propositions will be contained in the bill if my amendment is adopted.

Let me state to the Senator further that a precedent for that is found also in the general oil leasing act, which divides the royalties received by the United States by allowing the States to receive 37½ per cent of such royalties, and in addition thereto provides that the States may tax the oil in the hands of the private operator after it is severed from the ground. Every State operating under the oil leasing act obtains those two sources of revenue from oil produced upon the public domain.

Mr. KING. It is my view that States should be permitted to derive revenue from property within their borders acquired by the United States for industrial and business purposes and used for such purposes. If the United States should enter the State of Wyoming or the State of Utah and generate power which was used for business purposes, then those States should be permitted to derive revenue to the same extent just as if the business was owned and conducted by private persons. Governments enter-

ing into private business in competition with private persons should be subject to the same State regulations and burdens.

Mr. HAYDEN. The Senator is drawing the well-known distinction between governmental and nongovernmental activities.

In the instance of a State the most noted case is that of the State of South Carolina, which went into the liquor business by establishing dispensaries, and asserted that because the State was in that business it was not liable to pay the Federal revenue tax on liquor. The Supreme Court held that it was a nongovernmental function of the State, and therefore the Federal tax should be paid.

Mr. KING. I am familiar with that case.

Mr. HAYDEN. In that case I think the Chief Justice, in the dissenting opinion, very clearly pointed out that if the rule worked that way it should work the other way, and that if the United States engaged in a nongovernmental function the States should be entitled to their tax.

We are not asserting here so broad a doctrine as that at all. We are not asserting the right to tax Federal property. We ask that Congress make it clear and specific, so far as a licensee or contractee of the United States is concerned who goes to the Boulder Canyon Dam and builds a power plant and a transmission line, that that property—not of the United States but of the licensee or contractee—should be subject to State taxation.

Mr. McKELLAR. Mr. President, will the Senator from Utah yield to me to ask a question?

Mr. KING. Yes.

Mr. McKELLAR. As I understand, this amendment is drawn directly within the case that has been decided by the Supreme Court of the United States, upholding a tax made under a similar provision?

Mr. HAYDEN. It is.

Mr. KING. Mr. President, I am not yet quite certain as to the position of the Senator. If I understand him correctly, it is that Arizona now is asserting the right to obtain 18¾ per cent of the revenues that may be derived from the sale of power and water after the Government shall have been paid, and, in addition to that, is asserting the right to tax property—for instance, a power plant—that may be constructed in connection with the dam, and also the right to levy a tax or to impose a license upon the power which is developed and transmitted from the State into some other State.

Mr. HAYDEN. Limited strictly by the amendment to the erection of such a power plant or development by a contractee, or licensee of the United States.

Mr. DILL. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. DILL. Why the words "output of electrical energy"?

Mr. HAYDEN. Because in the oil leasing act, from which this amendment was copied, the term "output of mines" was used.

Mr. DILL. Does the Senator intend to tax the power? Is that the idea?

Mr. HAYDEN. We have been assured by the city of Los Angeles that we would have the right to levy, and they would be glad to pay, a tax upon any value created there. Now, it might be taxed in more than one way. It might be taxed by assessing the value of the power house and the transmission lines, or it might follow the California practice, and, instead of assessing the physical properties, assess the output from the properties.

Mr. DILL. That is, if they took 100,000 kilowatts—tax that amount of power?

Mr. HAYDEN. Yes. In other words, these are alternatives which may be applied in any other way. For example, I understand that private power companies in the State of California are subjected to a tax of either 6½ or 7½ per cent of their gross receipts, which is a tax upon the power, of course, because that is what they sell and obtain a revenue from.

Mr. DILL. Is not this, then, laying a burden on the private contractee or lessee as against the Government itself doing it?

Mr. HAYDEN. Will the Senator repeat his question?

Mr. DILL. I say, is not this amendment, therefore, laying upon the private contractee or lessee a burden—the right to tax—from which the Government is free; and does it not to that extent drive the Government to do this work, because it will not be on an equality with the private contractee or lessee?

Mr. HAYDEN. I do not think that would necessarily follow.

Mr. DILL. Well, you have the right to tax this electricity and these improvements if a private contractor or lessor handles the matter; but you could not do it if the Government did it, under this amendment.

Mr. HAYDEN. If the Government went in and extended its business to the construction of transmission lines and to the delivery of power to consumers, we would be estopped to the limit; but wherever the Government's function ceases, and the private contractor, or a municipality acting in that capacity, takes up the work, from there on we say that their business and their values and their property should be taxed.

Mr. DILL. The point I am trying to make is that the adoption of this amendment means that the Government would have an advantage that would not be had by any private contractor or lessor.

Mr. HAYDEN. It possesses that advantage by reason of the provisions of the Constitution of the United States which will not allow a State to tax any Government property.

Mr. DILL. But this amendment specifically makes that difference mandatory.

Mr. HAYDEN. Well, it should be.

Mr. KING. Mr. President, I am in favor of the States retaining the rights which they now have to impose taxes and liens upon the generation and distribution of power. If the Federal Government becomes a proprietor of business enterprises, and enters into competition with private enterprises, I see no reason why it should not be subject to taxation. If the Government takes money out of the Treasury and manufactures shoes or machinery, or engages in any other industrial pursuits, it seems to me that the States within which those activities are carried on ought to be permitted to derive revenue therefrom.

I can distinguish between the Government exercising sovereign and governmental power and the Government exercising what might be denominated proprietary powers. Where it becomes a business factor and engages in business pursuits in competition with private business, it seems to me that it ought not to hide behind its sovereignty and claim immunity from taxation.

I am not clear, though, that this amendment does not go further than that. I am entirely willing that Arizona should derive a reasonable revenue from the property which may be created as incidental to the building of that dam. If the amendment goes no further than that, I think it should be adopted. If it goes further than that, and in addition to conferring the right to tax confers authority to inhibit the transmission of power by the imposition of oppressive charges, then a different question is presented.

I confess, Mr. President, with the information which I now have that I have a good deal of dubiety as to how to vote upon this amendment. I shall be glad to have the question clarified by the senior Senator from Arizona [Mr. ASHURST] or by others who are familiar with its import and with the objects which are in view.

Mr. WALSH of Montana. Mr. President, if this amendment should prevail—and I think it should prevail—another feature should have some consideration; and I have put my views with respect to the matter in the form of an amendment or an additional paragraph.

As I understand the matter, this amendment purports to authorize only the taxation of private property constructed under contract with the United States. Obviously, that property should be subject to taxation; and I think everybody will agree that under established rules it would be subject to taxation by the States in which it was found. Some apprehension exists, however, lest it should be contended against the State authority that the property so constructed was an agency of the Government of the United States, a part of a general project of the United States to carry out governmental purposes; and so it would be the part of prudence and wisdom to enact that that contention could not be made.

The Government of the United States may grant to the States the right to tax its agencies. It has done so in the case of national banks. National banks are agencies of the Government of the United States; but the Government of the United States consents that the State shall tax those agencies. As has been suggested by the Senator from Arizona, when the leasing bill was passed, some apprehension was felt lest the works erected upon one of these leases by the lessee should escape taxation upon the ground that the lessee was a mere agency of the Government of the United States for the purpose of carrying out its purposes; and thus we forestalled any objection of that character by enacting the provision that the property should be subject to taxation.

Of course, so far as the property of the Government of the United States is concerned, it can not be made the subject of taxation; and whatever injustice there may be in that, I understand, is attempted to be corrected here by providing that the States of Arizona and Nevada shall get 37½ per cent of whatever profits there are in the operation. That, as I understand, is to take the place of taxation of so much of the property as belongs to the Government of the United States—the dam and other things of that character.

But, Mr. President, if this property should become subject to taxation, we would not want the taxes imposed upon the property by the State to be superior in character to claims of the Government of the United States under those contracts.

If the power plant, for instance, is constructed by a private corporation under a contract from the Government of the United States providing that it shall have water from the reservoir for the purpose of developing power, we do not want any tax imposed upon that property by the State of Arizona or the State of Nevada to take precedence over what is due from the power company to the United States under the contract which authorizes it to utilize these waters. So, Mr. President, an amendment of this character ought to be accompanied by another provision in the bill to the effect that the claims of the United States, under any contract authorized by the act, shall take precedence and priority over all other claims.

I think perhaps that such a provision is not absolutely in the bill, by reason of the provisions of section 191 of title 31 of the Code of Laws, giving priority to claims of the United States in case of insolvency and the administration of the assets of decedents. However, there might still remain the question as to whether that gives priority over the claim of a State for taxes. It might even then be asserted that it did not apply.

It has been held by one of the district courts that a claim of the United States for taxes is superior to another claim, but it has not been held yet that a claim of the United States not for taxes is superior to the claim of a State for taxes. And inasmuch as taxes usually rank higher than ordinary claims in distribution, it might still be contended that the claims of Arizona and of Nevada for taxes would be superior to the claims of the United States against the contractee for water delivered.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. WALSH of Montana. I yield.

Mr. HAYDEN. I will state positively that at no time and in no place, and by no one authorized to speak for the State of Arizona, has it ever been asserted that the State desires to collect taxes ahead of the payment to be made to the United States under these contracts.

Mr. WALSH of Montana. I desire to say in this connection, likewise, that I am not apprehensive that either of these two States is going to impose any confiscatory rates of taxation upon the property that thus is put upon the ground by a private corporation operating under contract with the United States, for the reason that if it imposes heavy burdens upon that particular property it must, under the rule of uniformity, impose exactly the same burden against every other producer of electricity in the State. So that is a reasonable safeguard as to that.

Accordingly, Mr. President, while this is not particularly appropriate to the amendment pending, I suggest that after line 20, on page 20 of the bill, there be inserted the following:

Claims of the United States arising out of any contract authorized by this act shall have priority over all others, secured or unsecured.

I put in "secured or unsecured" there because in all reasonable probability the private corporation, if one ever undertakes to build a power plant, will bond the property, and the claims of the United States for the water which the power company uses should be superior to any claim against that company, even though it is a secured claim.

The PRESIDENT pro tempore. Does the Senator submit that as an amendment to be printed and to lie upon the table?

Mr. WALSH of Montana. I will do so. So that if the pending amendment is adopted—and I hope it will be—I shall offer this amendment to the bill, to be inserted at the place indicated.

Mr. PITTMAN. Mr. President, there is another question; that is, the question of the uniformity of taxation of power companies. There is no doubt, under the report with regard to the Colorado River, that there will be a dam built at Bulls Head, about 50 or 60 miles south of the proposed dam. That, of course, will not be built by the United States Government, because there will be no necessity for it and no constitutional grounds upon which to build it. If built at all, it is bound to be built under the Federal power act. In that event, the lessee of the United States Government—that is, the lessee of the public land—will have to pay a tax not only on the dam, but a tax on its power house, or on the output of electricity, in whichever way the States impose the taxes. Therefore you would have this peculiar situation: You would have the company at Bulls Head paying a tax for the use of water under a license from the Federal Government, because both the dam and the power house would be private property, and a hundred miles above there you would have a power company not paying any taxes for the use of the surplus water of that dam. You would have unequal taxes in the very first place.

Mr. WALSH of Montana. Mr. President, let me inquire whether power plants generating electricity in all reasonable probability will not be constructed and have not been construted in various places throughout both States?

Mr. PITTMAN. They have been. Let me call attention to the fact now that in the State of Arizona the Salt River Water Users' Association, in the locality reclaimed by the Roosevelt Dam, has acquired title to all of the water that is impounded. They have acquired title by the district assuming to pay the Government's debt, and to-day the Salt River Water Users' Association is engaged in the business of generating and selling hydroelectric energy all over parts of Arizona.

The State will have to have uniform taxation with regard to power. Whether it be a taxation of the physical property of the power company or whether the tax be based, as it is now, I believe, in Alabama, upon the amount of electric energy that is generated, it will have to be uniform. They will not be able, for instance, if they should elect to tax hydroelectric energy, to tax the Salt River Water Users' Association one-fourth of a mill per kilowatt-hour and tax the power committee that uses the water from the proposed dam a half a mill per kilowatt-hour. That would be unconstitutional.

The result is that, protected by the constitutional provision as to uniformity of taxation, and there being every incentive of everybody in both States to keep down taxation—which is a fact—there can be no fear that there would be any discrimination in this case. But as affecting not only this particular transaction, but as affecting every State in the Union, that policy should be maintained.

When we had before us the general oil leasing bill that matter was subject to discussion for a long period of time in the committee, it was subject to discussion on the floor of this body, and it was determined that when the Federal Government marked a vast line around a lot of public land that was supposed to contain oil and proceeded to lease the right to mine that oil, while they served a great national purpose in the conservation of oil, at the same time they forever removed the power of the State to tax that land. If it had gone into private ownership it would have been subject to taxation.

It was also feared, as the Senator from Montana [Mr. WALSH] has said, that even the oil that was taken out under the lease, after it was put in tanks, would not be subject to taxation, under the theory that this private oil company was an agency of the United States Government, because it was operating under a lease; and it is feared here that if a private company does get the use of this water and builds this power house, although it will have nothing whatever to do with the primary purpose of flood control, but will be just a separate business, and will not use anything except the surplus waters behind that dam, which are not needed for the main purpose of this act; yet it might be held that that private company, selling power as it saw fit throughout the country, was still an agency and instrumentality of the Government and could not be taxed. If that were the case, you would have that company going free of taxation, and you would have another company, at a dam built under the Federal power act, below it or above it, utilizing the same waters, paying a tax.

In the steady growth of Federal operations throughout the United States through the various leasing acts we have through the possible extension of activities under the commerce clause of the Constitution of the United States, it is essential that taxing powers of the States be maintained so long as they do not interfere with the operations of the main purposes of the Government in its works.

I think as a general proposition a principle of this kind should be sustained. I have no objection whatever to the additions to this legislation which the Senator from Montana [Mr. WALSH] is going to offer. In fact, I think it is perfectly proper to maintain that policy which he now desires to initiate, that this right shall always be subject to the prior right of the Government of the United States to carry on its project.

Mr. SHORTRIDGE. Mr. President, the senior Senator from Arizona, in the course of his discussion of this bill, cited a great many cases, many of which were to this effect, that the Government of the United States acting in its sovereign capacity may be the owner of property which is not subject to State taxation. He also cited cases to the effect that where the Federal Government goes outside of or beyond its constitutional functions and becomes the owner of property, it becomes in a sense a private property owner, and its property is subject to taxation. Those are very well known principles or rules of law. Along with those two rules of law, recognized, I take it, by everybody, it has been held, further, that a State owning property is subject to the rules of equity and in a given case be estopped from asserting certain rights. I have in mind the case of the State of Iowa *v.* Carr.

I listened with respect, not feigned but genuine respect, to the argument made by the senior Senator from Arizona [Mr. ASHURST], and also by the junior Senator from Arizona [Mr. HAYDEN,] both of whom are thoughtful men and look far into the future, and have manifested that they are worthy champions and defenders of the rights of their great State. If I understood their argument, they fear that the State of Arizona will be deprived of certain of its claimed sovereign rights to tax the property concerning which we have devoted so much time in discussion. I am not now thinking of any other dam hereafter to be constructed by private parties or the rights of the State in respect to taxing that property. I am inviting close attention to this particular Boulder Dam which I am happy to say will be constructed.

I had understood up to this moment, or up to the time this amendment was urged, that in lieu of its right to tax, in lieu of the right to receive some revenue to come out of this great enterprise through taxation, the State of Arizona asked the Congress or the Nation to concede to it something in consideration of what it might lose, and I think we have done so.

Mr. HAYDEN. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from California yield to the Senator from Arizona?

Mr. SHORTRIDGE. I yield; certainly.

Mr. HAYDEN. Let me make it perfectly clear to the Senator that so far as any contact between the official representatives of the State of California and the State of Arizona appointed as commissioners to negotiate an agreement to settle the differences between the two States, there has never been any dispute. California's commissioners have always said they were willing that the States of Arizona and Nevada should receive a percentage of the gross profit; and, in addition thereto, that the city of Los Angeles, if it constructed a power plant, would pay taxes to Arizona and Nevada upon that power plant just as though it was private property.

Mr. SHORTRIDGE. I am not disputing as to what has heretofore been conceded or argued. I am now to be governed by what the Congress is called upon to do.

Mr. HAYDEN. The Congress has been informed of that fact many times.

Mr. SHORTRIDGE. Grant that; but I proceed to repeat that I thought, and I venture to say that practically every Member of this body thought, that when we were giving or conceding to Arizona 18.75 per cent of certain revenues to be derived from the operation of this great enterprise, that was in lieu of or in consideration of some rights to tax which Arizona was losing or might lose.

Mr. HAYDEN. If the Senator will yield further——

Mr. SHORTRIDGE. Certainly.

Mr. HAYDEN. I think the explanation made by the Senator from Montana [Mr. WALSH] on that point is perfectly clear, that the provision for the payment of 18.75 per cent of the excess revenues was in lieu of the right to tax property of the United States and had nothing to do with the right to tax property of the lessee.

Mr. NORRIS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from California yield to the Senator from Nebraska?

Mr. SHORTRIDGE. I yield.

Mr. NORRIS. I think a reading of the 18.75 per cent provision discloses that the 18.75 per cent is to be derived from the entire revenue, and if the Government leases to some private party a part of the electricity they will get a revenue from that. That is included, it seems to me, so if this is proposed in place of taxation, Arizona is going to get something in lieu of taxation and then tax the property afterwards just the same as though there was no such provision.

Mr. HAYDEN. If the Senator will pardon me, I am sure he would not want to make an incorrect statement. He said 18.75 per cent of all the revenue. It is 18.75 per cent of the excess revenue after the United States has been reimbursed.

Mr. NORRIS. It is a part of the revenue derived from electricity.

Mr. SHORTRIDGE. And ultimately, may I add, as we thought and as I now think, Arizona will receive an immense revenue under the provisions now in the bill. I do not wish to compare the demands made by Arizona with the demands made by my State. Much has been said touching California's demands, but I stand in admiration of the Senators from Arizona in their continuing fight for more revenue.

Finally, if this provision goes into the bill this is to be considered: Nothing is to be done under the bill until certain contracts shall have been entered into. Either the Government is to build, or private concerns, corporations, districts, or subdivisions of States are to build. Manifestly, when a private concern enters into negotiations looking far into the future, it will be greatly concerned over this very question whether the State can tax the property involved. I venture to say that that provision or such a provision, if put into the bill, will have a very deterring influence upon the entering into of perhaps very desirable contracts.

Mr. HAYDEN. Would it have a more deterring effect than the payment of taxes by any private power company if it engaged in business also? They would expect to pay their taxes, would they not?

Mr. SHORTRIDGE. I grant that. But finally, I submit that in this bill we have been more than just, we have been generous, to Arizona. We have provided that ultimately she shall receive an immense revenue from this great enterprise. What more does the State want? How far will she go?

Mr. JOHNSON. Mr. President, I think this is an amendment that is fraught with very great peril. I trust it will not be adopted. It is asserted, of course, that it is but the statement of an existing law and that it is confirmatory only of a right that the State now has. If that be true, then it is unnecessary. If, indeed, it seeks more than that, then it is worse than unnecessary; it is vicious and it ought not to be adopted. I am unable to say what "output of electrical energy" may mean or how it would be construed, but whatever the facts may be, to squint at least toward taxation of what may be done at that time by the Government is something that we ought not to do.

Our friend from Arizona quoted from Mr. Hoover again. He ought not to do that, because I think that he realizes just as I do that that is one of the things that never will be tolerated by the next President of the United States, and he has so said to representatives of the State of Arizona. I hate to say such things and indulge in that sort of talk upon the floor of the Senate, but it is only because of the reiterated statements that have been made by the junior Senator from Arizona [Mr. HAYDEN] that in self-defense I make that sort of statement now.

However that may be, it is a matter of indifference, so far as our legislation is concerned, and I want to make that perfectly plain. I do not care a rap whether some gentleman, even the next President of the United States, at some place in Arizona at some time in the past made some reference of the character that the Senator from Arizona has indicated, or that at some time subsequent to that he made the direct statement that I have attributed to him to representatives of Arizona just after the election. That is neither here nor there. The question is whether an amendment should be fastened upon this bill out of which difficulties and troubles might in the future arise. I trust that the Senate will not permit it to be done.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Arizona [Mr. HAYDEN], which will be read.

The CHIEF CLERK. On page 11, line 22, after the word "apply" insert:

Provided further, That nothing in this act shall be construed or held to affect the rights of the States or other local authority to exercise any rights which they may have, including the right to levy and collect taxes upon improvements, output of electrical energy, or other rights, property, or assets of any lessee or contractee of the United States.

Mr. ASHURST. Mr. President, I demand the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. FESS (when his name was called). On this question I have a pair with the junior Senator from Maryland [Mr. TYDINGS]. I transfer that pair to the senior Senator from New Jersey [Mr. EDGE] and vote "nay."

The roll call was concluded.

Mr. HARRISON. On this vote I am paired with the senior Senator from South Dakota [Mr. NORBECK]. If permitted to vote, I should vote "yea."

Mr. McMASTER. I desire to announce that my colleague the senior Senator from South Dakota [Mr. NORBECK] is unavoidably absent. If he were present, he would vote "nay."

Mr. JONES. I desire to announce that the senior Senator from Wyoming [Mr. WARREN] is paired with the junior Senator from North Carolina [Mr. OVERMAN].

Mr. SHEPPARD. I desire to announce that my colleague the junior Senator from Texas [Mr. MAYFIELD] is detained from the Senate by illness.

Mr. WAGNER. I wish to announce that my colleague the senior Senator from New York [Mr. COPELAND] is necessarily detained from the Senate because of illness in his family.

Mr. ROBINSON of Arkansas. I desire to announce that on this question the junior Senator from New Jersey [Mr. EDWARDS] has a pair with the senior Senator from New York [Mr. COPELAND].

The result was announced—yeas 35, nays 42, as follows:

YEAS—35

Ashurst	Gerry	Oddie	Swanson
Barkley	Glass	Pittman	Thomas, Okla.
Black	Harris	Ransdell	Trammell
Blease	Hawes	Robinson, Ark.	Tyson
Broussard	Hayden	Sheppard	Wagner
Bruce	Heflin	Simmons	Walsh, Mont.
Caraway	King	Smith	Waterman
Fletcher	McKellar	Steck	Wheeler
George	Moses	Stephens	

NAYS—42

Bayard	Dill	Keyes	Schall
Bingham	Fess	La Follette	Shipstead
Blaine	Frazier	McMaster	Shortridge
Borah	Gillett	McNary	Smoot
Bratton	Glenn	Norris	Steiwer
Brookhart	Goff	Nye	Thomas, Idaho
Capper	Hale	Phipps	Vandenberg
Couzens	Hastings	Pine	Walsh, Mass.
Curtis	Johnson	Reed, Pa.	Watson
Dale	Jones	Robinson, Ind.	
Deneen	Kendrick	Sackett	

NOT VOTING—18

Copeland	Harrison	Mayfield	Reed, Mo.
Edge	Howell	Metcalf	Tydings
Edwards	Larrazolo	Neely	Warren.
Gould	Locher	Norbeck	
Greene	McLean	Overman	

So Mr. HAYDEN'S amendment to the amendment was rejected.

Mr. BROOKHART. Mr. President, a question has been raised concerning this bill by some of the farm organizations. It has been their claim that it will put new land under cultivation, and therefore produce new crops in competition with the production we already have, while at the same time we have the big problem of controlling the surplus. In order to get the record clear and distinct as to the amount of land to be put under cultivation by this project and the nature of the crops, I desire to ask the Senator from California about the probable increase. How much new land will be brought under cultivation by this project?

Mr. JOHNSON. Mr. President, it is a difficult thing to answer with any exactness concerning the amount of acreage, but I think I may say upon feasible irrigation areas in the Imperial Valley there may be lands brought under cultivation to the extent of about 150,000 acres. On areas that may be difficult a very considerable acreage more will be brought in. Did the Senator ask me about the crops?

Mr. BROOKHART. Can the Senator from California give something like an estimate of what would be possible?

Mr. JOHNSON. I think we could state as a possibility 300,000 acres, but upon immediately feasible schemes I think I have stated with fair accuracy the number of acres.

Mr. BROOKHART. I will call the Senator's attention to the fact that that means less than one ordinary county in the State of Iowa. Now, will the Senator state the nature of the crops which will be produced on this land?

Mr. JOHNSON. Mr. President, I am very glad the Senator from Iowa has asked that latter question, because there has been some little fear expressed about the crops raised in the Imperial Valley and contiguous territory, to the effect that they might come in competition with the products of already overburdened farmers. That fear has led some persons to look a little askance at this measure.

Let me say that the Imperial Valley may be regarded as a sort of greenhouse for America. What it produces in abundance, and that which makes that territory valuable from the standpoint of productivity, does not come in competition in reality with the production of any other part of the United States. Because of the singular situation of that territory, where there is no rain at all, its most important products come into market at a time when there are no other products of like character in the market in the United States.

So there can be never any of that competition that is feared by ordinary agricultural pursuits because of the bringing of more lands under ordinary agriculture.

In 1927, for instance, there were 17,764 carloads of cantaloupes shipped from that valley. There is not another place in the United States, save the San Joaquin Valley, in the State of California, probably, with which those cantaloupes could possibly come in competition.

Mr. BROOKHART. Is that because of the season of the year?

Mr. JOHNSON. It is because of the season of the year, and because, too, that is the one place where that particular kind of product is grown.

Likewise, 8,900 carloads of lettuce were shipped in 1927 during December, January, February, and March. That production at that time does not come in competition with the production in any other part of the country.

Three thousand five hundred carloads of watermelons were shipped in May and June, principally to the Pacific coast. The other shipments were beyond the confines of the State of California and to the East.

Mr. BROOKHART. Watermelons in my section of the country are not ready for shipment until August and September.

Mr. JOHNSON. Yes; while those produced in Imperial Valley are ready for consumption at the earlier period which I have indicated.

What is raised in the Imperial Valley most profitably—and, of course, the land is devoted to that which can be profitably raised—comes in competition with nothing that is raised in any other part of our country. I think that statement can not be gainsaid or denied.

Mr. PHIPPS. Mr. President, will the Senator tell us whether in any other section of this country dates and figs may be successfully raised? Dates are becoming an important product of the Coachella Valley.

Mr. JOHNSON. As to figs I am not advised, but I know of no other place in the country where dates are produced. I can not say as to figs at all.

Mr. BROOKHART. What proportion of this land available for cultivation is likely to be devoted to citrus orchards?

Mr. JOHNSON. This land in the main would not be devoted to citrus orchards. It would be devoted to the most profitable products, such as cantaloupes, lettuce, and vegetables.

Mr. BROOKHART. During the winter season?

Mr. JOHNSON. During the winter season.

Mr. FLETCHER and Mr. McMASTER addressed the Chair.

The PRESIDING OFFICER (Mr. MCKELLAR in the chair). The Senator from Iowa has the floor. To whom does he yield?

Mr. BROOKHART. I will yield first to the Senator from Florida.

Mr. FLETCHER. I wish to say a word in order to clear up the Senator's statement a little: I think the Senator was somewhat mistaken about there being no competition between the Imperial Valley production and the production in other portions of the United States. Particularly in the case of lettuce my impression is that Florida lettuce moves about the same time as the dates given by the Senator.

Mr. JOHNSON. That may be.

Mr. FLETCHER. The winter production of lettuce, as well as celery, is important in Florida.

Mr. JOHNSON. The Senator may be correct as to that.

Mr. FLETCHER. I think that lettuce goes to market from Florida about the same time as the lettuce from the valley in California which has been referred to.

Mr. JOHNSON. Fortunately, the market for lettuce is constantly increasing.

Mr. FLETCHER. Yes.

Mr. McMASTER. Mr. President, according to the explanation of the situation given by the Senator from California, on the 150,000 acres of land or more which may be brought under cultivation, fruit and vegetables will be raised, and, since the products are raised at a particular time of the year, they will not come in competition with the products of other vegetable and fruit-producing areas.

Mr. JOHNSON. That is quite true.

Mr. McMASTER. And furthermore, as I understand from the Senator's explanation, when such fruits and vegetables are raised, at that particular time of the year, ordinarily there are importations of such fruits and vegetables from South American countries into California and the other Pacific Coast States.

Mr. JOHNSON. Yes; we do not supply our entire demand out there by any means.

Mr. McMASTER. As I understand, the Pacific coast has importations of vegetables and certain fruits from South American countries at certain times of the year.

Mr. JOHNSON. Yes, sir.

Mr. BROOKHART. May I ask the Senator a further question? These products are not exported beyond the United States?

Mr. JOHNSON. I think not.

Mr. BROOKHART. The products of which we do have an exportable surplus in this country are all different, like wheat and cotton?

Mr. JOHNSON. These products of the Imperial Valley are all consumed at home—that is, in the United States.

Mr. BROOKHART. In the United States?

Mr. JOHNSON. Yes, sir.

Mr. SHORTRIDGE. Mr. President, may I say a word?

Mr. BROOKHART. Yes, sir.

Mr. SHORTRIDGE. The wheat and corn of Iowa, North and South Dakota, Nebraska, and Kansas need have no fear of competition from the Imperial Valley. Corn, wheat, rye, oats,

and so forth, if raised at all in that valley, are raised in such small quantities as not at all to come in competition with the mentioned products of Iowa and other States.

Mr. BROOKHART. They raise sweet corn for local use, and things of that kind?

Mr. SHORTRIDGE. Yes.

Mr. BROOKHART. It seems to me, Mr. President, that a complete survey of this situation shows that these products are produced mainly at the time of year when the farmers of the country generally can not produce them. They like to buy some of these products themselves; and an increase of the production would be to the benefit of the farmers of the Northwest, rather than to their detriment.

Mr. JOHNSON. That is entirely so, sir.

Mr. BLACK. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 11, line 22, after the word "apply," it is proposed to insert:

Provided, That if the United States operates an electric-power plant in the States of Arizona and Nevada, or either of them, and sells said power to or for the use of the public, a percentage of the proceeds derived from the sale of such power shall be paid by the Secretary of the Interior to the State in which such power is generated, equal in amount to the general tax imposed by State law, if any, upon the generation or sale of power.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Alabama.

Mr. BLACK. Mr. President, this amendment practically brings up in a different form the same proposition that has just been voted upon by the Senate. I imagine that the Senator from California would prefer not to wait to have this amendment printed because of the similarity of ideas involved.

Mr. JOHNSON. I shall be glad to take it up right now.

Mr. BLACK. That is what I thought.

I wish to state that this amendment is offered in the friendliest spirit to the purpose and object of the bill. Unless some amendments are placed upon the bill which prevent my doing so, I expect to vote for this legislation. Therefore I do not offer this amendment in order to encumber the legislation which the Senator from California is pressing. I offer it because I favor the object of his bill.

If the bill is so amended as to provide for the construction of the power plant by the Government, it will not prevent my voting for the legislation. I make that statement in the outset, so that it will be understood that this amendment is not offered with the idea of obstructing the bill.

Mr. NEELY. Mr. President, will the Senator from Alabama explain the difference between the amendment he has offered and the amendment which was just defeated offered by the Senator from Arizona?

Mr. BLACK. I will.

This amendment strikes directly at the proposition which was presented during the debate on the Muscle Shoals legislation last year. Assuming that the Government will construct and operate a power plant, the amendment would permit the States of Arizona and Nevada, one or both, to receive from the Government an amount of the proceeds equal to the taxes imposed by those States upon private power companies engaged in business in those two States, one or both. It is offered on the principle that if the Government engages in the business of generating or selling power in a State, the State should not from that cause be deprived of the revenue which the State would receive from taxation should a private concern engage in the same business.

One of the greatest problems of government, of course, is that of taxation. It is a question where the taxes shall be most heavily imposed. It is my judgment that already in this Government we impose unjust burdens on agricultural interests while releasing from their rightful proportion of taxation many industries and manufacturing enterprises. If it were possible for the Government to go into a State and take charge of the operation of every power plant along the navigable streams, and at the same time pay no taxes to the State while it operates such business, the State would thereby be deprived of one of its greatest natural assets, and the loss of tax on such generation of power on governmental projects would require that such burden be placed on some other source of taxation.

Those governmental employees who engage in the business of generating the power would necessarily use the public schools of the State. To that extent these employees would be beneficiaries of the State schools. They would use the public roads. They would utilize those necessities and comforts and conveniences provided by the State and paid for out of the common tax fund. If the Government can remove from any State a large portion of the potentially taxable assets, it has to that extent made necessary the shifting of the burden of taxation on to other properties of the State.

I take the position that a water site is an asset of the State in which it is located. It is not different in this respect from a coal mine. It should be subject to the same taxation as a farm. It should be subject to the same taxation as manufacturing enterprises.

While I will not vote against the bill on account of the fact that the Government is to construct or operate the power plant—on the contrary, it is my judgment that the Government should control its navigable streams even to the extent of constructing power plants—yet it does seem to me unjust and unfair to permit the Government thus to deprive the State of its taxable assets without imposing upon the Government the duty of replacing this tax.

Some have argued that Government operation of power plants is wrong on account of the fact that the Government is not compelled to contribute to taxation, and therefore has an unfair advantage over its competitors engaged in private business.

I take the position that the amount of taxation is so small, comparatively speaking, that the advantage thereby given the Government is infinitesimal, and it is not, therefore, on that broad ground that I especially urge the justice of this amendment. I do think, however, that if we can take away from a State its taxable assets in the way of water power, we can likewise take away from a State its taxable assets in the way of mines and manufacturing.

Many counties in this country have been impoverished and are to-day on the verge of bankruptcy because of the fact that the Government has bought blocks of thousands of acres of land in these counties which lands are tax free. Only a short time ago this body passed a road law, as I recall, for the benefit of the State of Nevada, providing that the Government should contribute its part toward the building of public roads through huge Government reservations. The statement was made on the floor of the Senate that without this assistance the State could not construct the roads.

This doctrine is somewhat new and novel; but, in view of the direction in which we are trending, sooner or later it must be met. For that reason I have offered this amendment, and expect to present it on every occasion where the opportunity affords. The law-making body of this Government, in my judgment, sooner or later must reach a conclusion on this question which is just. While it is not claimed to be right for the Government to pay State taxes upon its post offices, yet if the Government advances a step further and seizes an asset of the State or the locality and sells power for private distribution, then this advanced step makes it necessary and right that the State shall receive from the Government an amount equal to the taxes which would be imposed upon private companies. Whether this amendment is adopted or not, sooner or later we must get to that point if the Government does construct power plants on water sites and engage in the business of selling power for private consumption.

This amendment is offered with the belief that if the Government uses a State's natural asset for the purpose of supplying power to sell to and enrich the general public, simple and natural justice requires and demands that the State in which the business is located shall not on this account be deprived of taxes needful for the construction of schools, for the building of roads, for the maintenance of public order, and for the general expenses of organized society.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. BLACK. I yield.

Mr. HAYDEN. Does it not occur to the Senator that those who advocate Government ownership of power plants should welcome this amendment, rather than repel it?

Mr. BLACK. It seems to me that those who believe in the Government operation of power plants would be interested in thus striking down one of the arguments which is most persistently presented against the construction by the Government of power plants and the sale of power. It is an argument which, in my judgment, refers to a matter which is small in comparison with the assets and the receipts of business, yet it looms large in all the arguments which are presented anywhere against the operation by the Government of power plants.

For that reason I am of the opinion that those who believe that the Government should build power plants and generate power should welcome this as taking away an argument which heretofore has proven very effective against their idea of governmental operation of business.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama [Mr. BLACK] to the amendment in the nature of a substitute.

The amendment to the amendment was rejected.

Mr. JOHNSON. Mr. President, there were a couple of amendments offered yesterday by the Senator from Arizona, and I invite the attention of the Senators from that State so that we may, I think, dispose of the amendments very readily. The first amendment to which I refer is that presented by the senior Senator from Arizona last night relating to section 10, found upon page 16.

I understand it will be satisfactory to the Senators from Arizona if there be stricken from that section line 22, and the first three words on line 23, "districts and also." I agree to strike out that particular portion beginning with line 22, to strike out all of line 22, and the first three words of line 23. The amendment, I understand, will then be withdrawn.

Mr. HAYDEN. The effect of that amendment, Mr. President, would be that the section as it remains would provide that nothing could be done to disturb the existing contract between the Secretary of the Interior and the Imperial irrigation district, but the district might enter into contracts with the Secretary for construction of the all-American canal. It eliminates the objection which was made on the Yuma reclamation project in Arizona, that the contracts might be modified without the consent of the Imperial irrigation district. I sincerely trust the amendment will be adopted if the Senator offers it.

Mr. JOHNSON. I ask that I may be permitted to strike out the words I have just indicated.

The PRESIDING OFFICER. Does the Senator from Arizona accept the amendment offered by the Senator from California?

Mr. HAYDEN. I accept it.

The PRESIDING OFFICER. The question is upon agreeing to the amendment to the substitute amendment, which will be stated.

The CHIEF CLERK. On page 16, line 22, to strike out the words "to modify the said contract, with the consent of the said district, and also."

The amendment to the substitute amendment was agreed to.

Mr. JOHNSON. I understand now that the amendment of the Senator from Arizona is withdrawn?

Mr. HAYDEN. Yes.

Mr. JOHNSON. All right. The Senator from Arizona had another amendment. Has he it before him?

Mr. HAYDEN. I have.

Mr. JOHNSON. Is that the amendment upon page 12?

Mr. HAYDEN. Page 12, line 19.

Mr. JOHNSON. Will the Senator state, please, how he is willing to modify that amendment?

Mr. HAYDEN. The proposal I made yesterday, Mr. President, was that the Laguna Dam and the all-American canal, down to and including Siphon Drop, should remain under the ownership of the United States. I have provided for that by a separate proviso. The suggestion has been made that, instead of following that procedure, on page 12, line 19, after the word "structures," we should insert the words "except the Laguna Dam and the main canal and appurtenant structures down to and including Siphon Drop." The adoption of the language I have just suggested will accomplish the purpose of my amendment as offered yesterday.

Mr. JOHNSON. I accept that amendment.

The PRESIDING OFFICER. The clerk will report the amendment.

The CHIEF CLERK. On page 12, line 19, after the word "structures," to insert the following words, "except the Laguna Dam and the main canal and appurtenant structures down to and including Siphon Drop."

The PRESIDING OFFICER. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. JOHNSON. The amendment, then, that was the subject of discussion yesterday is withdrawn by the Senator from Arizona?

Mr. HAYDEN. Yes. In fact, it never has been offered.

Mr. JOHNSON. Were there any other amendments the Senator from Arizona had? I see the senior Senator from Arizona is now here.

Mr. ASHURST. The amendment No. 35, which I proposed last evening, has been disposed of satisfactorily.

Mr. JOHNSON. On that amendment we have just agreed, subject, of course, to the approval of the proponent of the amendment, on page 16, to strike out of section 10 all of line 22 and the first three words, "district and also," in line 23.

Mr. ASHURST. That is satisfactory.

Mr. JOHNSON. That has been done. Then I ask whether the Senator withdraws his amendment.

Mr. ASHURST. I, of course, formally withdraw the amendment which I offered last evening, which is amendment No. 35.

Mr. JOHNSON. I think the Senator from Arizona had some other amendments.

Mr. ASHURST. The junior Senator has.

Mr. HAYDEN. I desire to offer an amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will state the amendment to the amendment.

The CHIEF CLERK. On page 17, after line 2, insert a new section, as follows:

SEC. 11. That the Secretary of the Interior is hereby authorized to make such studies, surveys, investigations, and do such engineering as may be necessary to determine the lands in the State of Arizona that should be embraced within the boundaries of a reclamation project, heretofore commonly known and hereafter to be known as the Parker-Gila Valley reclamation project and to recommend the most practicable and feasible method of irrigating lands within said project, or units thereof, and the cost of the same; and the appropriation of such sums of money as may be necessary for the aforesaid purposes from time to time is hereby authorized. The Secretary shall report to Congress as soon as practicable, and not later than December 10, 1931, his findings, conclusions, and recommendations regarding such project.

Mr. JOHNSON. I appeal to the Senator from Arizona not to press the amendment on this bill. It is a most unfortunate thing to put a new project into the bill at this time.

Mr. HAYDEN. If the Senator will listen to me a moment, I think he will understand what I am seeking to accomplish. In that connection, I would like to direct attention——

Mr. JOHNSON. I simply made the suggestion. I withdraw the appeal.

Mr. HAYDEN. I would like to have the attention of the Senator from Washington [Mr. JONES]. The Senator from Washington and his colleague will remember that on last Monday the Senate passed an act authorizing engineering investigations to determine the feasibility of the Columbia Basin project in the State of Washington. The amendment I have just offered is modeled as closely as is possible upon the legislation which the Senate passed on last Monday.

Mr. President, my object in offering this amendment I can make clear in a very few moments. There will be impounded in the great dam to be constructed at Boulder Canyon on the average about nine and a half million acre-feet of water, and this bill contemplates the use within the United States of about five and a half million acre-feet of that water, four and a half million acre-feet for the irrigation of lands in California, and a million acre-feet for domestic use, leaving a very large volume of water to go to waste in Mexico, unless some use is made of it in the United States.

We have in the bill provided that the water should be used exclusively in the United States, but a means must be found whereby to use it. The object and purpose of my amendment is merely to authorize the Secretary of the Interior in the future to make studies of irrigation development that has attracted great attention in the State of Arizona.

Mr. FESS. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. FESS. I think the purpose of the Senator is justifiable, of course, but does he not think that if we take this step here, it opens up the way for further suggestions, and will load the bill down with questionable burdens? It would seem to me that with the machinery we have for reclamation we ought not to seek to do this in connection with this bill.

Mr. HAYDEN. The Senator from Ohio I know wants to do what is for the best interests of the United States of America.

Mr. FESS. Certainly.

Mr. HAYDEN. He does not want a volume of water impounded in a great dam, and then an arrangement made whereby that water will flow uninterruptedly into old Mexico and be placed to beneficial use to such an extent that in time to come the United States can not use it.

Mr. FESS. Would it not be better to make that a subsequent operation?

Mr. HAYDEN. On the contrary, I think it very essential that it be done now. It is in line with the recommendations of the seven governors of the States in this basin, who said in a formal resolution read to the Senate by the Senator from Utah that direct notice should be given to the Republic of Mexico that the waters of the Colorado River thus impounded would be used in the United States. This is in effect notice. The bill takes care of a little over half of the water. This is notice that the United States is pursuing a diligent course in determining

where the remainder of the water impounded on American soil, at the expense of the American Government, may be used.

Mr. FESS. The statement of the Senator would be an assurance that there would be consideration given later, but why should we load this bill down with this matter?

Mr. HAYDEN. It is not loading the bill down; it is simply providing in the bill for the complete utilization of the works to be constructed under it. Otherwise the bill is perfectly silent upon that subject. The bill provides for the construction of a great dam and then provides for the construction of the all-American canal in California, which would irrigate, under its entire scope, about 735,000 acres of land. That quantity of land will not utilize all the water impounded to-day, so what is to become of the remainder of the water?

Mr. PHIPPS. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. PHIPPS. I will speak either in my own time or in the Senator's time, as circumstances may indicate to be best.

While I have no doubt that the Parker proposition is meritorious and should have consideration, I must say that in my opinion it is not proper to interject it into this piece of legislation. The Senator must remember that this bill will have to have consideration by the House, and I fear that we are going to have a sufficient number of matters to iron out with the representatives of that body without adding to them now.

The Columbia River basin recommendation was not made by the committee nor could a bill be passed here until very large expenditures had been made by the State and by individuals of the State of Washington to determine what the possibilities of the Columbia basin project might be. In fact, the bill came from the committee in such form that personally I had to object and to insist on limiting the authorization to the purposes of the investigation rather than the adoption of a project to which I am favorable.

I would say to the Senator that it would be a very simple matter to treat that question in an independent bill or resolution which the Committee on Irrigation and Reclamation, of which I have the honor to be chairman at the moment, will certainly give prompt and careful consideration and, I believe, favorable consideration from what I know of the situation with respect to the land. But I think it would be inadvisable to attach an amendment of that nature to the bill. It would only add to our difficulties and troubles. I assure the Senator that personally, I will do what I can to have the proposition given most careful and, if possible, favorable consideration by the committee, assuming that I am chairman at the time or a member.

Mr. HAYDEN. What the Senator from Arizona seeks to do is to paint a complete picture here. We can not do it when we only provide in the legislation for the use of a little over one-half of the water impounded.

Mr. PHIPPS. I submit there is ample time in which to prepare for that.

Mr. HAYDEN. Mr. President, may I reserve the balance of my time?

The PRESIDING OFFICER. The Senator has five minutes remaining.

Mr. HAYDEN. I reserve the balance of my time.

Mr. DILL. Mr. President, the bill provides for the irrigation of additional lands in California. The proponents of the bill, and particularly those from California who want the lands of Imperial Valley irrigated, did not go to the Committee on Irrigation and Reclamation of the Senate to get a provision in the bill as such, separate and apart, but they provided in the bill for the irrigation of lands in California. I can not understand why it is proper to provide for the irrigation of additional lands in California and not provide at least for studies and investigations later relating to the irrigation of lands in Arizona.

I have not voted with the Arizona Senators on many of their amendments, but I think the Senate ought to be fair to Arizona. The waters that flow over this dam will be largely waters that come down from the north and a large part of them from the State of Arizona. This is a proposal to cause the Secretary of the Interior, who will have charge of the building of the dam, who will have charge of the building of the all-American canal for the irrigation of lands in California, to study the possibilities of irrigating additional lands in Arizona, all a part of the same project. There would not be any possibility of irrigating those lands in Arizona that are proposed to be covered by this amendment if it were not for the proposal to build the dam. I, for one, want to be fair to the State of Arizona, so far as I can be without involving the principle of the building of the dam and the development of water power.

Mr. FESS. Mr. President, will the Senator yield?

Mr. DILL. Yes; I yield.

Mr. FESS. Does the Senator know whether this particular project has ever been recommended by the Department of the Interior or the Committee on Irrigation and Reclamation?

Mr. DILL. I understand it has not, and, so far as I know, neither has the all-American canal nor the irrigation of lands in Imperial Valley been recommended in a separate proposal.

Mr. FESS. The Senator knows that he and I think about the same way on a good many measures. I dislike very much to vote against a thing that might be worked, and yet I would not want to vote for it simply because some of the parties are using a situation to get favorable action when they have the opportunity. It appears to me it is hardly a rational method of legislation to put these projects on the pending bill.

Mr. DILL. Let me call the Senator's attention to another fact. The speed with which this project may be built and completed will depend in part upon the attitude of the State of Arizona. If Arizona is to give way, as her Senators have given way here in many of these proposals, we ought at least to show a spirit of fairness and say that we are willing to help the State of Arizona get something out of this dam, too. It seems to me that the placing of this provision in the bill is evidence that the Senate and the Congress as a whole desire to give Arizona the benefits that can be had from the impounding of this water as well as to give them to California. I can not see why it is improper to prepare for the irrigation of lands in Arizona from the waters that are impounded by this dam and still perfectly proper to take care of lands in California that could not be taken care of if it were not for the dam.

Mr. FESS. If the Senator will permit, it appears to me, and I think to the Senate, that Arizona has gotten a good deal out of this bill due to the tremendous influence and ability of the representatives from that State in this body. I think they have won pretty generally in their contentions. It seems to me hardly fair to say that they are making such a great sacrifice. I would be very glad to vote for the recommendation if it came in the regular way, so we would have the information, but I dislike very much to vote to load down a bill like this. If we do it in this case, why not do it in any other case?

Mr. DILL. I do not see how we are loading down the bill when we are simply providing for a method of use for this water. I want to say to the Senator from Ohio that as a member of the Committee on Irrigation and Reclamation I made a trip to Southern California and Arizona and into Old Mexico in studying the project. The one thing that impressed me with the claims of the citizens of Arizona was that the impounding of this water, which would necessarily flow into Old Mexico, because it could not be used by California, and the use of it in Mexico would result in claims on the part of Mexico to the permanent use of the water under the relations that exist between the countries with reference to the use of water. I was more bothered by that question than by any other.

Here is an opportunity to show the people of Arizona and to show the people of the country generally that we are protecting the States that seem to be entitled to the use of this water on the north side of the Mexican line rather than to allow it to flow across the line, and the right to attach there that certainly will attach by its use on the part of Mexico.

Mr. FESS. Does not the Senator agree with me that if the project is meritorious, a failure to put it on this bill will not result in its defeat but that it will come subsequently in the regular course of business?

Mr. DILL. It may come subsequently, but we are under some obligations, I think, to the people who live in that part of the United States. I come back again to the proposition that if we are going to take all irrigation proposals out of the bill, then we ought to take out that part which applies to California. Of course, I am not in favor of that. I want to leave the all-American canal in the bill, and I want to provide for the irrigation of California lands; but I also want to be fair to Arizona and provide that the Secretary of the Interior shall make an investigation looking to the use in Arizona of the surplus water not needed in California and to which Mexico should have no right. I hope the amendment of the Senator from Arizona will be adopted.

Mr. ASHURST. Mr. President, my colleague the junior Senator from Arizona [Mr. HAYDEN] has made a very able argument in support of this amendment. We are also grateful to the Senator from Washington [Mr. DILL] for his able although brief speech in support of the amendment. My colleague used a phrase that I must adopt. This amendment simply "completes the picture." This is not any excrescence of form. This is not an amendment which is not germane. This is an amendment proposed simply to carry out the natural and logical sequence and result of the bill.

Mr. BRATTON. Mr. President, will the Senator yield?

Mr. ASHURST. I yield, of course, to the Senator from New Mexico.

Mr. BRATTON. All that is contemplated is that the Secretary shall make a study of the proposed project.

Mr. ASHURST. Yes.

Mr. BRATTON. The only thing that can possibly be involved is the expense to be incurred in making that survey?

Mr. ASHURST. And this is only an authorization of the expense. We would have to appropriate the necessary sums of money later.

Mr. PHIPPS. Mr. President, if the Senator will pardon me, my understanding is that any such investigation must be paid for out of the reclamation fund at the disposal of the Department of the Interior; but that is a matter that I would not quibble about.

Mr. BRATTON. The only money that is involved is the expense of making the survey, regardless of whether it comes out of the reclamation fund or directly out of the Treasury.

Mr. PHIPPS. Yes. It might involve $25,000 or $150,000. We can not say in advance. For that reason I think the Committee on Irrigation and Reclamation should have an opportunity to have data before them as to the acreage and the possibilities, and so on. I think it should be taken up in the manner in which all requests for authorizations to investigate the possibilities of reclamation projects have been handled in the past rather than to be put on the bill in the form of an amendment offered on the floor of the Senate.

Mr. BRATTON. I agree with the Senator that probably it should be handled the other way; but we are approaching what seems to be a happy solution of a long drawn-out battle, and it occurs to me that we could well afford to put this amendment into the bill and let the Secretary make the investigation and secure data on the feasibility of the proposed project.

I appeal to the Senator from California to accept the amendment and let it go into the bill. It does not affect one State more than another. The expense comes out of the reclamation fund, in which the public-land States are jointly and similarly affected.

Mr. HAYDEN. If my colleague will permit me, I will point out one other fact. Any diversion dam constructed in the Colorado River for the irrigation of these lands in Arizona in which we are interested has one end in California, and I have yet to find anyone from California who knows the facts who is opposed to my amendment.

Mr. BRATTON. The item seems to me to be too small to delay action on the bill. I appeal to the Senator from California to forego his objection and let the amendment be adopted, and then let us press on with the bill.

Mr. JOHNSON. Mr. President, it is impossible, if the Senator is addressing me. I am sorry that is so. I would be glad to aid in this project, if it is a legitimate project, as I have no doubt it is, and to render such service as I could to pass a bill in respect to it; but it ought not to be a part of this measure. Certainly we ought not to have a part of the measure providing that appropriations in indefinite form may be made from time to time as may be essential.

Mr. BRATTON. I thank the Senator from Arizona for permitting me to use some of his time.

Mr. JONES. Mr. President——

Mr. ASHURST. I yield to the Senator from Washington.

Mr. JONES. May I suggest to the Senator from California that these appropriations made from time to time are to carry on a survey and not to carry on the actual project. It merely authorizes appropriations from time to time to carry on the survey.

Mr. BRATTON. That is what I was trying to point out to the Senator from California.

Mr. JOHNSON. To carry on surveys, investigations, and the like.

Mr. JONES. Yes; but not the construction of the project.

Mr. JOHNSON. No, I do not mean that; I did not intend to convey that it was to carry on the construction.

Mr. BRATTON. The cost of investigation will be so small that we can not afford to delay.

Mr. JOHNSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from California?

Mr. ASHURST. I have only a few minutes left, but I yield.

Mr. JOHNSON. No; I will not take the Senator's time. He may proceed.

Mr. ASHURST. Mr. President, it has been pointed out several times that this amendment is to authorize an appropriation, to give the Secretary of the Interior power and authority to investigate as to the feasibility of this Parker project. I do not wish to be dogmatic, but I do assert that this project, the feasibility of which is proposed to be investigated, is necessary—a logical thing and a physical necessity. To authorize the Boulder Canyon project without taking into consideration the Parker-Gila project would be just like Apollo with a front tooth out. You can not build the Boulder project and have it symmetrical and useful and employ all the agencies of water and power and land unless and until the Parker-Gila project shall be incorporated.

This amendment provides only, as I have stated, for an authorization. There has been a suggestion here—and I do not mean to be offensive—that it looks as though Arizona is attempting to get something "while the getting is good." We disclaim that the amendment improves this bill.

Mr. SHORTRIDGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from California?

Mr. ASHURST. I yield.

Mr. SHORTRIDGE. The Senator apparently has overlooked section 14 of the bill.

Mr. ASHURST. Will the Senator read it for my edification?

Mr. SHORTRIDGE. That section gives full authority to the Secretary of the Interior to do what the Senator is now asking for.

Mr. ASHURST. I shall be glad to listen to the Senator from California read the section.

Mr. KING. Let me say to the Senator from California, if the Senator from Arizona will yield to me for that purpose, that section 14 does not specify this project at all. It proposes to appropriate $250,000 out of this fund—not out of the reclamation fund—for the purpose of making an investigation as to the potentialities of the entire river. It is not for the purpose of investigating per se the Parker-Gila project.

Mr. SHORTRIDGE. The section reads——

Mr. ASHURST. I have only a couple of minutes remaining, but I will ask the Senator from California to read the section.

Mr. SHORTRIDGE. The section reads as follows:

> The Secretary of the Interior is authorized and directed to make investigation and public reports of the feasibility of projects for irrigation, generation of electric power, and other purposes in the States of Arizona, Nevada, Colorado, New Mexico, Utah, and Wyoming for the purpose of making such information available to said States and to the Congress, and of formulating a comprehensive scheme of headwater control and the improvement and utilization of the water of the Colorado River and its tributaries. The sum of $250,000 is hereby authorized to be appropriated from said Colorado River Dam fund, created by section 2 of this act, for such purposes.

If that is not ample authority, I would be glad to have the learning of the Senator from Arizona suggest other words.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona [Mr. HAYDEN] to the substitute amendment.

Mr. ASHURST. That amendment is so important that I must ask for the yeas and nays thereon.

Mr. DILL. I make the point of no quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Ashurst	Frazier	McMaster	Smith
Barkley	George	McNary	Steck
Bayard	Gerry	Moses	Steiwer
Bingham	Glass	Neely	Stephens
Black	Goff	Norris	Swanson
Blaine	Hale	Nye	Thomas, Idaho
Blease	Harris	Oddie	Thomas, Okla.
Borah	Harrison	Overman	Trammell
Bratton	Hastings	Phipps	Tyson
Brookhart	Hawes	Pittman	Vandenberg
Broussard	Hayden	Ransdell	Wagner
Capper	Heflin	Reed, Mo.	Walsh, Mass.
Couzens	Johnson	Reed, Pa.	Walsh, Mont.
Curtis	Jones	Robinson, Ind.	Warren
Deneen	Kendrick	Sackett	Waterman
Dill	Keyes	Schall	Watson
Edge	King	Sheppard	Wheeler
Fess	La Follette	Shortridge	
Fletcher	McKellar	Simmons	

Mr. COUZENS. I desire to announce that the Senator from Oklahoma [Mr. PINE] is absent on business of the Senate in attendance upon the Committee on Interstate Commerce.

The PRESIDING OFFICER. Seventy-four Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment offered by the junior Senator from Arizona [Mr. HAYDEN] to the substitute amendment.

Mr. ASHURST. On that I request the yeas and nays.

Mr. ODDIE. Mr. President, I ask permission to ask a question of the junior Senator from Arizona before the roll is called.

The PRESIDING OFFICER. The Senator from Nevada is recognized.

Mr. ODDIE. Mr. President, I should like to ask the junior Senator from Arizona what the effect of the adoption of this amendment would be on possible action by the Legislature of Arizona in ratifying the 7-State compact, assuming that the bill shall pass?

Mr. HAYDEN. Mr. President, under the terms of this bill, there must be within six months a 7-State ratification of the Colorado River compact, which means that the Arizona Legislature, which will convene in January, will be called upon to pass upon that question. The ratification of the compact and the construction of the proposed project, as everyone knows, are very much involved together. Certainly it would be helpful to be able to say to the Legislature of the State of Arizona that, instead of Congress having passed a wholly California measure—that is, a measure which provides for the generation or enormous quantities of hydroelectric power to be used in California and which authorizes the construction of a canal for the irrigation of lands in California—in addition thereto Congress has authorized investigations looking to the use of the $2,800,000 acre-feet of water from the main stream of the Colorado River allocated to Arizona. There can be no question but that it would have a powerful effect in the State of Arizona and upon the legislature of that State in connection with the consideration and approval of the Colorado River compact.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arizona [Mr. HAYDEN] to the amendment.

Mr. PHIPPS. I ask that the amendment be stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 17, after line 2, it is proposed to insert a new section, as follows:

SEC. 11. That the Secretary of the Interior is hereby authorized to make such studies, surveys, investigations, and do such engineering as may be necessary to determine the lands in the State of Arizona that should be embraced within the boundaries of a reclamation project, heretofore commonly known and hereafter to be known as the Parker-Gila Valley reclamation project, and to recommend the most practicable and feasible method of irrigating lands within said project, or units thereof, and the cost of the same; and the appropriation of such sum of money as may be necessary for the aforesaid purpose from time to time is hereby authorized. The Secretary shall report to Congress as soon as practicable and not later than December 10, 1931, his findings, conclusions, and recommendations regarding such project.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arizona [Mr. HAYDEN] to the amendment, on which the yeas and nays have been demanded.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. FESS (when his name was called). I have a pair with the Senator from Maryland [Mr. TYDINGS]. I transfer that pair to the Senator from Rhode Island [Mr. METCALF] and will vote. I vote "nay."

Mr. HARRISON (when his name was called). On this question I am paired with the senior Senator from South Dakota [Mr. NORBECK] and withhold my vote.

The roll call was concluded.

Mr. McMASTER. My colleague the senior Senator from South Dakota [Mr. NORBECK] is unavoidably absent. If present, he would vote "nay."

Mr. ROBINSON of Arkansas. I desire to announce that on this question the Senator from New York [Mr. COPELAND] is paired with the Senator from New Jersey [Mr. EDWARDS], and the Senator from Arkansas [Mr. CARAWAY] is paired with the Senator from Vermont [Mr. GREENE].

The result was announced—yeas 45, nays 29, as follows:

YEAS—45

Ashurst	Glass	Oddie	Stephens
Barkley	Goff	Overman	Swanson
Bingham	Hale	Pine	Thomas, Okla.
Black	Hawes	Pittman	Trammell
Blease	Hayden	Ransdell	Tyson
Bratton	Heflin	Reed, Mo.	Wagner
Broussard	Jones	Robinson, Ark.	Walsh, Mass.
Couzens	Kendrick	Sheppard	Walsh, Mont.
Dill	McKellar	Simmons	Wheeler
Fletcher	Moses	Smith	
George	Neely	Steck	
Gerry	Norris	Steiwer	

NAYS—29

Bayard	Fess	McNary	Thomas, Idaho
Blaine	Frazier	Nye	Vandenberg
Borah	Glenn	Phipps	Warren
Brookhart	Harris	Reed, Pa.	Waterman
Capper	Hastings	Robinson, Ind.	Watson
Curtis	Johnson	Sackett	
Deneen	La Follette	Schall	
Edge	McMaster	Shortridge	

NOT VOTING—21

Bruce	Gould	Larrazolo	Shipstead
Caraway	Greene	Locher	Smoot
Copeland	Harrison	McLean	Tydings
Dale	Howell	Mayfield	
Edwards	Keyes	Metcalf	
Gillett	King	Norbeck	

So Mr. HAYDEN's amendment to the substitute amendment was agreed to.

Mr. PITTMAN obtained the floor.

Mr. JOHNSON. Mr. President, will the Senator from Nevada yield for just a moment?

Mr. PITTMAN. Certainly.

Mr. JOHNSON. We have now concluded, have we not, the amendments of the Senators from Arizona?

Mr. HAYDEN. If I offer amendments they will be of a minor, perfecting nature. I have no major propositions to present.

Mr. PITTMAN. Mr. President, there are two important amendments remaining unconsidered, dealing with this whole project.

It has been understood that the cost of building the all-American canal will not be imposed as an obligation on the revenues derived from the power developed at the power house at the Boulder or Black Canyon Dam. I desire now to offer an amendment which will make that entirely clear. Although the bill already has a provision of that kind, it is not as yet sufficiently definite.

I therefore offer the amendment which I send to the desk and ask to have stated.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 2, line 13, after the word "law," it is proposed to insert:

and shall not be paid out of revenues derived from the sale or disposal of water power or electric energy at the dam authorized to be constructed at said Black Canyon or Boulder Canyon, or for water for potable purposes outside of the Imperial and Coachella Valleys.

Mr. PITTMAN. Mr. President, I will state that I have been in consultation with representatives of the Imperial Valley and also with representatives of Los Angeles; and with the insertion of the words which have been read, that this cost will not be taxed against the power created by the dam at Boulder Canyon or Black Canyon, I know of no opposition.

Mr. JOHNSON. May I inquire whether that is satisfactory to the gentlemen with whom the Senator has conferred?

Mr. PITTMAN. It is; and I included in it the amendment they have just suggested, limiting it to the hydroelectric energy created at the power house at the dam at Black or Boulder Canyon.

Mr. JOHNSON. And, as amended, it is satisfactory to them?

Mr. PITTMAN. Yes, sir.

Mr. JOHNSON. I have no objection; and so far as I am able I accept the amendment, then.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Nevada.

The amendment to the amendment was agreed to.

Mr. PITTMAN. Mr. President, I have another amendment in line with that.

On page 2, at the end of line 15, after the word "purposes," I desire to insert the words "in the Imperial or Coachella Valleys."

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 2, line 15, after the word "purposes," it is proposed to insert "in the Imperial or Coachella Valleys."

Mr. PITTMAN. So that that paragraph will then read as follows:

That no charge shall be made for water or for the use, storage, or delivery of water for irrigation or water for potable purposes in the Imperial or Coachella Valleys.

I will state that originally I entered a motion to strike out that whole proviso. However, as the representatives of Imperial Valley desired to stay in, and are willing to limit its effects entirely to that valley, I defer to their wishes.

Mr. JOHNSON. I have no objection to the amendment that is suggested.

Mr. KING. Mr. President, may I inquire of the Senator from Nevada whether that is similar to the amendment which was offered yesterday? I have just entered the Chamber, and did not hear the entire statement of the Senator. The purpose, as I understand, of the amendment, is to relieve Imperial Valley from any charges whatever, except such as would be imposed under the reclamation act.

Mr. PITTMAN. That is the opinion of the representatives of Imperial Valley, and that is the reason why it is put in that

form. They feel that in some way that paragraph is more in harmony with the reclamation act. There is some doubt in my mind as to that; but, as they are willing to limit its effect entirely to their own valley, it is not a matter of such great concern to me.

Mr. KING. Let me ask the Senator, in my own time, if he does not have the time, whether in his opinion the new lands which it is expected will be brought under cultivation in the Coachella or Imperial Valleys ought to be exempted from contribution to the construction of the dam?

Mr. PITTMAN. There is no charge in this bill whatever on the Imperial Valley land or the Coachella Valley land for the construction of the dam or power house.

Mr. KING. I know that, but inquire whether the Senator believes the users of water should exempt. Under the reclamation projects, as the Senator knows, those who make contracts for the purchase of land or the purchase of water are required to pay for both water and the construction of canals and dams, and the amount which they pay includes all of the expenses of the Government. Here we are asking the settlers to pay only for the canal, and exempting them from paying anything whatever toward the construction of the dam.

Mr. PITTMAN. I admit this is an exception to the practice under the reclamation act in that it relieves this land from the payment of any part of the cost of the dam. It simply limits it to the cost of the canal. In this particular case the Senate has allocated $25,000,000 toward the cost of the dam. It is true that the $25,000,000 must be paid back, but the payment may be postponed until the end of the period of amortization. I think that in view of the fact that this dam has to be built for flood-control purposes, and in view of such allocation, we should exempt those lands in Imperial Valley from the payment of any part of the cost of that dam.

Mr. KING. Then it is apparent that the residents of Imperial Valley will have the benefits of flood control, storage water, the certainty of getting an equated flow, and will be required to pay for nothing except the cost of the all-American canal.

Mr. PITTMAN. That is the fact; but I think the circumstances warrant it.

Mr. KING. Does the Senator think there should be no distinction between those who have vested rights, who have already appropriated water in the Imperial Valley, and those who have no vested rights, and have never appropriated any water?

Mr. PITTMAN. No; I do not think we can have a successful reclamation project if we attempt to draw that distinction, because undoubtedly even those with the vested rights will have to pay a part of this cost if the Government is to be repaid——

Mr. KING. Does this bill attempt to award to the Imperial Valley any portion of the water which, under the tri-State agreement, might be allocated to California?

Mr. PITTMAN. This provision has no reference whatever to any allocation of water.

Mr. KING. Does the Senator think this bill ought to go into operation until and unless the water users of the Imperial Valley, speaking through their municipal or corporate authorities, shall consent to the terms of the compact?

Mr. PITTMAN. I do not think the reclamation district has anything to do with a tri-State compact.

Mr. KING. I agree with the Senator entirely. I am not referring to the tri-State compact but to the Santa Fe compact. I am trying to ascertain whether the Imperial Valley may not make a claim for a large quantity of water, which, together with that which is claimed by California for other purposes, and in other parts of the State, might exceed the quantity which might be allocated to California.

Mr. PITTMAN. I concede that is possible, because if the State of California makes the ratification that is provided it limits the amount of water that can be taken into that State out of the river to 4,400,000 acre-feet, and there is only a small portion of that at the present time that has been appropriated in the Imperial Valley.

Mr. KING. Does the Senator think that the State can speak for vested rights in the Imperial Valley and limit the amount which is to be allocated?

Mr. PITTMAN. No; it could not speak for them; but it could speak for the surplus between that and the 4,400,000 acre-feet, and that is a great deal.

Mr. KING. I think the last statement is correct. I desire to be sure that we are not to be embarrassed in the future by demands from the Imperial Valley that her rights, by prior appropriation or otherwise, are so great as to require a larger amount than the other users or proposed users of water in California might be willing to concede, because it might diminish the amount allocated to the coastal cities to a point below their necessities, or their claimed necessities.

Mr. PITTMAN. I think it would only be a controversy between residents of the State of California.

Mr. KING. If it could be limited to a controversy between residents of California, that would be all right; but controversies or claims that in any manner might jeopardize the rights of the upper States or of Arizona should be avoided. If Imperial Valley claims more than is conceded by the other California interests, her inhabitants might make demands for additional water from Arizona or Nevada or the upper States. We must be assured that Imperial Valley will be cared for from the quantity of water granted to California and may never seek an additional amount from other States.

Mr. PITTMAN. Personally, I see no chance of that under the amendment we have already adopted limiting their authority to 4,400,000 acre-feet.

Mr. KING. But, as I understand, that limitation of 4,400,000 acre-feet exists only in the event of a 6-State compact, not a 7-State compact. We hope, of course, that there will be a 7-State compact, because, if not, the upper States will not be fully protected.

Mr. PITTMAN. But now, under the so-called Hayden amendment, there is exactly the same apportionment of the water.

Mr. KING. Assuming that that shall be accepted by California and Arizona?

Mr. PITTMAN. Exactly.

Mr. KING. But, of course, we may not coerce either of those States into an acceptance of the so-called Hayden-Pittman amendment.

Mr. PITTMAN. If there is a 7-State compact, it will be in accordance with the treaty which the Senate consented to, which gives the same amount of water to California that she would get under a 6-State compact, and it provides also that the 6-State compact ratification holds, unless all three of those States do ratify.

Mr. KING. I concede that.

Mr. PITTMAN. I ask for a vote on the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Nevada to the substitute amendment.

The amendment to the amendment was agreed to.

Mr. PITTMAN. Now, Mr. President, in order to make the bill harmonious, having segregated the all-American canal, the reclamation project, from the Boulder Dam, the Black Canyon Dam, and the power-house project, it is essential to make subdivision (b) in section 4, on page 5, conform to that.

Mr. KING. Will not the Senator state that again?

Mr. PITTMAN. I say that having separated the building of the all-American canal from the rest of the project, in other words, the building of the dam and the power house, it is also essential to make section (b) harmonious with that action. Subdivision (b) provides that no appropriation may be made and no construction started until the Secretary has by contract been assured of the payment for the construction not only of the dam and power house, but of the canal. Therefore, a delay in obtaining contracts would hold up the other. So, having separated the projects, we now have to take up subdivision (b), which reads as follows:

(b) Before any money is appropriated or any construction work done or contracted for, the Secretary of the Interior shall make provision for revenues, by contract, in accordance with the provisions of this act, adequate, in his judgment, to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of the project, of all amounts advanced to the fund under subdivision (b) of section 2, together with interest thereon, made reimbursable under this act.

That would mean that the $165,000,000 provided in subdivision (b), section 2, must be assured of repayment by contract before any work would start.

The dam and the power house are to be paid for out of revenue derived from the sale of power at the power house. The all-American canal is to be paid for, under the terms of the reclamation act, by the lands to be benefited by that irrigation. Consequently, I have separated that section, and I have offered the following amendment.

The VICE PRESIDENT. The clerk will report the amendment.

The LEGISLATIVE CLERK. On page 5, strike out all of subdivision (b) and insert the following:

Before any money is appropriated for the construction of said dam or power plant, or any construction work done or contracted for, the

Secretary of the Interior shall make provision for revenues by contract, in accordance with the provisions of this act, adequate in his judgment to insure payment of all expenses of operation and maintenance of said works incurred by the United States and the repayment, within 50 years from the date of the completion of said works, of all amounts advanced to the fund under subdivision (b) of section 2 for such works, together with interest thereon made reimbursable under this act.

Mr. PITTMAN. That, I take it, is exactly the same as the proposed section, except that I have placed in it provision for the dam and power.

Mr. JOHNSON. I have no objection to the amendment.

Mr. KING. Mr. President, I want to ask the Senator, because it would be a limitation or modification of this, if he has offered, or intends to offer, the provision that the power shall be upon a competitive basis?

Mr. PITTMAN. Not yet; that is another question.

Mr. KING. That will be offered.

Mr. PITTMAN. After this is adopted, I want to offer another one dealing purely with the canal.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Nevada to the substitute amendment.

The amendment to the substitute amendment was agreed to.

Mr. PITTMAN. Now I offer an amendment just exactly the same as the other, dealing with the repayment of money expended on the all-American canal.

The VICE PRESIDENT. The clerk will state the amendment to the amendment.

The LEGISLATIVE CLERK. Insert at the bottom of page 5 the following:

Before any money is appropriated for the construction of said main canal and appurtenant structures to connect the Laguna Dam with the Imperial and Coachella Valleys in California, or any construction work is done upon said canal or contracted for, the Secretary of the Interior shall make provision for revenues, by contract or otherwise, adequate in his judgment to insure payment of all expenses of construction, operation, and maintenance of said main canal and appurtenant structures in the manner provided in the reclamation law.

Mr. JOHNSON. As I followed the reading—and the Senator can confirm my view in that regard—lines 7, 8, and 9, concluding with the words "reclamation act," were omitted from the original amendment which he presented.

Mr. PITTMAN. Yes; commencing with the word "otherwise," on line 6. The Senator includes "for." The part stricken out starts on line 6 with the word and goes through the word "act," on line 9.

Mr. JOHNSON. Yes.

Mr. PITTMAN. Of course, I inserted the word "law" in the thirteenth line instead of "act."

Mr. JOHNSON. I have no objection to the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Nevada to the substitute amendment.

The amendment to the substitute amendment was agreed to.

Mr. WATERMAN. Mr. President, some days ago the junior Senator from Arizona [Mr. HAYDEN] paid a glowing and merited tribute to a distinguished citizen of my State who was a member of the Colorado River Commission, Delph E. Carpenter. I had intended to discuss some of the phases which have arisen in connection with the progress of the pending legislation, but it seems to me that I should suppress any purpose I might have. Instead I now ask that a report and supplemental report made by Mr. Carpenter to the Governor and the Legislature of Colorado, which had great influence in bringing about the ratification of the so-called 7-State compact by my State, may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The report and supplemental report are as follows:

Report and supplemental report of Delph E. Carpenter, commissioner for Colorado, on the Colorado River Commission, 1923, with copy of the compact; also the historical memorandum and brief of the law respecting interstate compacts submitted to the Judiciary Committee of the House of Representatives, Sixty-seventh Congress, first session, at the hearing on June 4, 1921, in re H. R. 6821

(On same subject see Hearings in re H. R. 6821, Judiciary Committee, House of Representatives, June 4, 1921, serial 6, Sixty-seventh Congress, first session; extended remarks with attached memoranda, letters, etc., of Hon CARL HAYDEN, of Arizona, before the House of Representatives, Sixty-seventh Congress, fourth session, CONGRESSIONAL RECORD of January 30, 1923.)

REPORT OF DELPH E. CARPENTER, COMMISSIONER FOR COLORADO, COLORADO RIVER COMMISSION, IN RE COLORADO RIVER COMPACT

DENVER, COLO., *December 15, 1922.*

Hon. OLIVER H. SHOUP,

Governor of Colorado, Capitol Building, Denver.

SIR: I have the honor to report that a compact between the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming providing for the equitable division and apportionment of the use of the waters of the Colorado River was signed at Santa Fe, N. Mex., November 24, 1922, by the commissioners for said States and was approved by the Hon. Herbert Hoover, Secretary of Commerce, representative for the United States of America upon said commission.

I signed the compact as commissioner for the State of Colorado, by your appointment, under authority of chapter 246, Session Laws, 1921, and the commissioners for the other States acted under authority of similar legislation. The Hon. Herbert Hoover approved the compact, as the representative of the United States, under authority of the act of Congress approved August 19, 1921 (42 Stat. L. 171).

The compact was executed in a single original, which has been deposited in the archives of the Department of State of the United States, and a duly certified copy has been forwarded to the governor of each of the signatory States. It shall become binding and obligatory upon the signatories when approved by the legislature of each of said States and by the Congress of the United States.

I transmit herewith a copy of the compact. It provides in substance as follows:

"All territory within the United States of America, to which the waters of the Colorado River and its tributaries are or may be beneficially applied, is designated as 'the Colorado River Basin.' The drainage area of the river consists of two great natural subdivisions, viz., the upper region, located above the head of the great canyon, and the lower region below the great canyon (including the territory drained by the Gila, Little Colorado, and other lower tributaries). Lee Ferry is situated at the head of the canyon, in the State of Arizona, a few miles southerly from the intersection of the Colorado River with the boundary common to the States of Arizona and Utah, and is the natural point of demarcation between the upper region and the lower region.

"All waters of the entire river system within the upper region (including those returning to the river from irrigated lands) unite to form a single stream at Lees Ferry, where the flow may be measured and recorded.

"The compact conforms to this natural division. The upper region, plus all lands outside the drainage area which may be beneficially served by waters diverted from the river, is designated as the 'upper basin.' The lower region is designated as the 'lower basin.'

"The seven States are grouped into two political divisions. Colorado, New Mexico, Utah, and Wyoming constitute the 'States of the upper division.' The States of Arizona, California, and Nevada constitute the 'lower division.'

"Seven million five hundred thousand acre-feet, exclusive annual beneficial consumptive use, is set apart and apportioned in perpetuity to the upper basin and a like amount to the lower basin.

"Any waters necessary to supply lands in the Republic of Mexico (hereafter to be determined by international treaty) shall be supplied from the surplus flow of the river. If the surplus is not sufficient, any deficiency shall be borne equally by the upper basin and the lower basin.

"By reason of development upon the Gila River and the probable rapid future development incident to the necessary construction of flood works on the lower river, the lower basin is permitted to increase its development to the extent of an additional 1,000,000 acre-feet annual beneficial consumptive use before being authorized to call for a further apportionment of any surplus waters of the river.

"No further apportionment of surplus waters of the river shall occur within the next 40 years. At any time after 40 years, if the development in the upper basin has reached 7,500,000 acre-feet annual beneficial consumptive use or that of the lower basin has reached 8,500,000 acre-feet, any two States may call for a further apportionment of any surplus waters of the river, but such supplemental apportionment shall not affect the perpetual apportionment of 7,500,000 acre-feet made to each basin by this compact.

"The States of the upper division shall not cause the flow of the river at Lees Ferry to be depleted below an aggregate of 75,000,000 acre-feet for any period of 10 consecutive years (7,500,000 acre-feet average annual flow over any 10-year period) if necessary for use in the lower basin. This is approximately 50 per cent of the river flow at Lees Ferry during the lowest 10-year period of which we have a record.

"Navigation is made subservient to all other uses. Power is made subservient to domestic and agricultural uses.

"State control of the appropriation, use, and disposition of water within each State is left undisturbed.

"Present perfected appropriations of water are not disturbed, but such rights take their water from the apportionment to the basin in which they are located.

"All future controversies between two or more States of each group are specifically reserved for separate consideration and adjustment by separate commissions or by direct legislation, whenever such questions may arise, if ever they do.

"Records of the river flow at Lees Ferry are under the control of the State engineers of the seven States and two representatives of the United States, but the authority of such officials terminates with the ascertainment and publication of the facts.

"The compact may be terminated at any time by the unanimous agreement of the signatory States."

FURTHER COMMENT

I take the liberty of offering the following observations:

The upper basin constitutes the principal source of the water supply. All waters returned to the river from irrigated lands within the upper basin will pass Lees Ferry and be measured as a part of the water to be delivered to the lower basin. The upper States guarantee somewhat less than one-half the average annual flow of the river (at Lees Ferry) during the 10-year period from 1902 to 1911, inclusive, which was the period of the lowest recorded river flow. All water, both natural and return flow, which passes Lees Ferry will be credited to the delivery by the upper States. There is no minimum or maximum requirement for any particular year. The compact is satisfied by an aggregate delivery of 75,000,000 acre-feet of water during any 10-year period.

The topography of the upper basin limits the extent to which each of the upper States may go in its development and its corresponding consumption of river flow. As the various tributaries leave Colorado and Wyoming they have already entered into deep canyons and their waters are not available for diversion in Utah. The Utah development will be confined to tributary streams and the waters of such are no longer available to Utah lands after they have entered the Green or Colorado Rivers. The waters of the San Juan are no longer available for diversion in Utah after they have served lands in Colorado and New Mexico. These natural limitations upon the use of the waters within each of the upper States will always afford ample assurance against undue encroachment upon the flow at Lees Ferry by any one of the four upper States. Colorado can not divert 5 per cent of its portion of the river flow to regions outside the river basin.

All development in Utah and New Mexico, requiring diversion from streams in Colorado, shall be subject to separate adjustment with Colorado before construction occurs.

The term "beneficial consumptive use" is to be distinguished from the amounts diverted from the river. It does not mean head-gates diversions. It means the amount of water consumed and lost to the river during uses of the water diverted. Generally speaking, it is the difference between the aggregate diverted and the aggregate return flow. It is the net loss occurring through beneficial uses.

The apportionment of 7,500,000 acre-feet exclusive annual beneficial consumptive use to the upper basin means that the territory of the upper basin may exhaust that much water from the flow in the stream each year. The aggregate annual diversions in the upper basin are unlimited. The limitation applies only to the amount consumed, and all waters which return to stream are not "consumed."

The apportionment to the upper territory is perpetual. It is in no manner affected by subsequent development. It is not required that the water shall be used within any prescribed period. Further development on the lower river will in no manner affect this apportionment or impair the right of the upper States to consume their apportionment whenever their necessities require. Any immense reservoir hereafter constructed on the lower river can not be the basis of a preferred claim which will interfere with the future developmnt of the upper basin. The development in the lower basin will be confined to the apportionment made to that basin, with the permissible increase. Any excess of development can not infringe upon the reservation perpetually set apart to the upper territory. There can be no rivalry or contest of speed in the development of the two basins. Priority of development in the lower basin will give no preference of right as against the apportionment to the upper basin.

The 7,500,000 acre-feet annual beneficial consumptive use apportioned to each basin includes the water necessary to supply present perfected uses in each of the basins. Such present uses consume but a small part of the apportionments. By reason of a fear that further upper development might temporarily deplete the low flow of the river in the autumn and early winter of dry years, it is provided by Article VIII that present perfected appropriations upon the lower river shall not be precluded from protecting any such appropriations from encroachments upon their supplies until reservoirs have been constructed to store a definite part of the water apportioned to the lower basin.

There is no treaty between the United States and Mexico fixing any right in Mexico to the use of waters of the Colorado River. All such matters must depend upon future treaties. The compact provides that water, if any, necessary to supply the obligations of any such treaty shall be taken first from any surplus after meeting the apportionments—and right to increase—already made to the upper and lower basins. If the surplus is inadequate any deficiency shall be borne equally by the two basins.

If the time arrives when the development in either of the basins requires a supplemental apportionment—which probably will never occur—the water available for such purposes will be the surplus remaining after deducting the perpetual apportionments—and right to increase—now made plus any possible international burden. The supplemental apportionment will not disturb or impair the perpetual apportionment made by the present compact.

The repayment of the cost of the construction of necessary flood-control reservoirs for the protection of the lower river country probably will result in a forced development in the lower basin. For this reason a permissible additional development in the lower basin to the extent of a beneficial consumptive use of 1,000,000 acre-feet was recognized in order that any further apportionment of surplus waters might be altogether avoided or at least delayed to a very remote period. This right of additional development is not a final apportionment. This clause does not interfere with the apportionment to the upper basin or with the right of the States of the upper basin to ask for further apportionment by a subsequent commission.

The compact provides that the upper basin shall not be required to deliver any water to the lower basin which can not be beneficially applied to domestic and agricultural uses. Power claims will always be limited by the quantity of water necessary for domestic and agricultural purposes. The generation of power is made subservient to the preferred and dominant uses and shall not interfere with junior preferred uses in either basin.

Article VII, protecting the obligations of the United States to the Indian tribes, avoids necessity of conditional ratification of the compact by the Congress. Such rights are negligible and the apportionment to each basin includes all such necessary diversions.

Broadly speaking, from a Colorado viewpoint, the compact perpetually sets apart and withholds for the benefit of Colorado a preferred right to utilize the waters of the river within this State to the extent of our present and future necessities. It protects our development from adverse claims on account of any great reservoir or other construction on the lower river. It removes all excuses for embargoes upon our future development and leaves us free to develop our territory in the manner and at the times our necessities may require.

It affords me pleasure to call attention to the distinguished services of Ralph I. Meeker, engineering expert for the State of Colorado, whose comprehensive knowledge of the entire Colorado River Basin commanded the attention of the commission and facilitated its labors. I append hereto a table prepared by Mr. Meeker showing the estimated annual water supply of the Colorado River (including the amount at present consumed) and the disposition of such water by the compact.

I trust the compact will meet your favorable consideration, and I respectfully request that it be submitted to the legislature for its early approval.

Respectfully submitted.

DELPH E. CARPENTER,
Commissioner for Colorado.

DENVER, COLO., *December 15, 1922.*

Physical data, Colorado River Basin

TABLE 1

	Acre-feet
Estimated average annual water supply	20,500,000
Estimated average annual water consumption, 1921	7,000,000
Present unused surplus wasting to Pacific Ocean	13,500,000

TABLE 2

Upper basin water supply	17,500,000
Lower basin water supply	3,000,000
Total water supply of basin	20,500,000

Unused water passing out of Colorado, average yearly flow	11,000,000
Estimates future requirements all new lands western slope (1,500,000 acres) and future transmountain diversions	2,600,000
Average annual surplus water to main Colorado River	8,400,000

COLORADO RIVER COMPACT

The States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming, having resolved to enter into a compact under the act of the Congress of the United States of America, approved August 19, 1921 (42 Stat. L., p. 171), and the acts of the legislatures of the said States, have through their governors appointed as their commissioners: W. S. Norviel, for the State of Arizona; W. F. McClure, for the State of California; Delph E. Carpenter, for the State of Colorado; J. G. Scrugham, for the State of Nevada; Stephen B. Davis, jr., for the State of New Mexico; R. E. Caldwell, for the State of Utah; Frank C. Emerson, for the State of Wyoming; who, after negotiations participated in by Herbert Hoover, appointed by the President as the representative of the United States of America, have agreed upon the following articles:

ARTICLE I

The major purposes of this contract are to provide for the equitable division and apportionment of the use of the waters of the Colorado River system; to establish the relative importance of different beneficial uses of water; to promote interstate comity; to remove causes of present and future controversies; and to secure the expeditious agricultural and industrial development of the Colorado River Basin, the storage of its waters, and the protection of life and property from floods. To these ends the Colorado Basin is divided into two basins, and an apportionment of the use of part of the water of the Colorado River system is made to each of them, with the provision that further equitable apportionment may be made.

ARTICLE II

As used in this compact—

(a) The term "Colorado River system" means that portion of the Colorado River and its tributaries within the United States of America.

(b) The term "Colorado River Basin" means all of the drainage area of the Colorado River system and all other territory within the United States of America to which the waters of the Colorado River system shall be beneficially applied.

(c) The term "States of the upper division" means the States of Colorado, New Mexico, Utah, and Wyoming.

(d) The term "States of the lower division" means the States of Arizona, California, and Nevada.

(e) The term "Lees Ferry" means a point in the main stream of the Colorado River 1 mile below the mouth of the Paria River.

(f) The term "upper basin" means those parts of the States of Arizona, Colorado, New Mexico, Utah, and Wyoming, within and from which waters naturally drain into the Colorado River system above Lees Ferry, and also all parts of said States located without the drainage area of the Colorado River system which are now or shall hereafter be beneficially served by waters diverted from the system above Lees Ferry.

(g) The term "lower basin" means those parts of the States of Arizona, California, Nevada, New Mexico, and Utah, within and from which waters naturally drain into the Colorado River system below Lees Ferry, and also all parts of said States located without the drainage area of the Colorado River system which are now or shall hereafter be beneficially served by waters diverted from the system below Lees Ferry.

(h) The term "domestic use" shall include the use of water for household, stock, municipal, mining, milling, industrial, and other like purposes, but shall exclude the generation of electrical power.

ARTICLE III

(a) There is hereby apportioned from the Colorado River system in perpetuity to the upper basin and to the lower basin, respectively, the exclusive beneficial consumptive use of 7,500,000 acre-feet of water per annum, which shall include all water necessary for the supply of any rights which may now exist.

(b) In addition to the apportionment in paragraph (a), the lower basin is hereby given the right to increase its beneficial consumptive use of such waters by 1,000,000 acre-feet per annum.

(c) If, as a matter of international comity, the United States of America shall hereafter recognize in the United States of Mexico any right to the use of any waters of the Colorado River system, such waters shall be supplied first from the waters which are surplus over and above the aggregate of the quantities specified in paragraphs (a) and (b); and if such surplus shall prove insufficient for this purpose, then the burden of such deficiency shall be equally borne by the upper basin and the lower basin, and whenever necessary the States of the upper division shall deliver at the Lees Ferry water to supply one-half of the deficiency so recognized in addition to that provided in paragraph (d).

(d) The States of the upper basin will not cause the flow of the river at Lees Ferry to be depleted below an aggregate of 75,000,000 acre-feet for any period of 10 consecutive years reckoned in continuing progressive series beginning with the 1st day of October next succeeding the ratification of this compact.

(e) The States of the upper division shall not withhold water, and the States of the lower division shall not require the delivery of water, which can not reasonably be applied to domestic and agricultural uses.

(f) Further equitable apportionment of the beneficial uses of the waters of the Colorado River system unapportioned by paragraphs (a), (b), and (c) may be made in the manner provided in paragraph (g) at any time after October 1, 1963, if and when either basin shall have reached its total beneficial consumptive use as set out in paragraphs (a) and (b).

(g) In the event of a desire for a further apportionment as provided in paragraph (f) any two signatory States, acting through their governors, may give joint notice of such desire to the governors of the other signatory States and to the President of the United States of America, and it shall be the duty of the governors of the signatory States and of the President of the United States of America forthwith to appoint representatives, whose duty it shall be to divide and apportion equitably between the upper basin and the lower basin the beneficial use of the unapportioned water of the Colorado River system as mentioned in paragraph (f), subject to the legislative ratification of the signatory States and the Congress of the United States of America.

ARTICLE IV

(a) Inasmuch as the Colorado River has ceased to be navigable for commerce and the reservation of its waters for navigation would seriously limit the development of its basin, the use of its waters for purposes of navigation shall be subservient to the uses of such waters for domestic, agricultural, and power purposes. If the Congress shall not consent to this paragraph, the other provisions of this compact shall nevertheless remain binding.

(b) Subject to the provisions of this compact, water of the Colorado River system may be impounded and used for the generation of electrical power, but such impounding and use shall be subservient to the use and consumption of such water for agricultural and domestic purposes and shall not interfere with or prevent use for such dominant purposes.

(c) The provisions of this article shall not apply to or interfere with the regulation and control by any State within its boundaries of the appropriation, use, and distribution of water.

ARTICLE V

The chief official of each signatory State charged with the administration of water rights, together with the Director of the United States Reclamation Service and the Director of the United States Geological Survey, shall cooperate, ex officio:

(a) To promote the systematic determination and coordination of the facts as to flow, appropriation, consumption, and use of water in the Colorado River Basin and the interchange of available information in such matters.

(b) To secure the ascertainment and publication of the annual flow of the Colorado River at Lees Ferry.

(c) To perform such other duties as may be assigned by mutual consent of the signatories from time to time.

ARTICLE VI

Should any claim or controversy arise between any two or more of the signatory States: (a) With respect to the waters of the Colorado River system not covered by the terms of this compact; (b) over the meaning or performance of any of the terms of this compact; (c) as to the allocation of the burdens incident to the performance of any article of this compact or the delivery of waters as herein provided; (d) as to the construction or operation of works within the Colorado River Basin to be situated in two or more States or to be constructed in one State for the benefit of another State; or (e) as to the diversion of water in one State for the benefit of another State; the governors of the States affected, upon the request of one of them, shall forthwith appoint commissioners with power to consider and adjust such claim or controversy, subject to ratification by the legislatures of the States so affected.

Nothing herein contained shall prevent the adjustment of any such claim or controversy by any present method or by direct future legislative actions of the interested States.

ARTICLE VII

Nothing in this compact shall be construed as affecting the obligations of the United States of America to Indian tribes.

ARTICLE VIII

Present perfected rights to the beneficial use of waters of the Colorado River system are unimpaired by this compact. Whenever

storage capacity of 5,000,000 acre-feet shall have been provided on the main Colorado River within or for the benefit of the lower basin, then claims of such rights, if any, by appropriators or users of water in the lower basin against appropriators or users of water in the upper basin shall attach to and be satisfied from water that may be stored not in conflict with Article III.

All other rights to beneficial use of waters of the Colorado River system shall be satisfied solely from the water apportioned to that basin in which they are situate.

ARTICLE IX

Nothing in this compact shall be construed to limit or prevent any State from instituting or maintaining any action or proceeding, legal or equitable, for the protection of any right under this compact or the enforcement of any of its provisions.

ARTICLE X

This compact may be terminated at any time by the unanimous agreement of the signatory States. In the event of such termination all rights established under it shall continue unimpaired.

ARTICLE XI

This compact shall become binding and obligatory when it shall have been approved by the legislature of each of the signatory States and by the Congress of the United States.

Notice of approval by the legislatures shall be given by the governor of each signatory State to the governors of the other signatory States and to the President of the United States, and the President of the United States is requested to give notice to the governors of the signatory States of approval by the Congress of the United States.

In witness whereof the commissioners have signed this compact in a single original, which shall be deposited in the archives of the Department of State of the United States of America, and of which a duly certified copy shall be forwarded to the governor of each of the signatory States.

Done at the city of Santa Fe, N. Mex., this 24th day of November, A. D. 1922.

HISTORICAL MEMORANDUM IN RE COLORADO RIVER AND BRIEF OF LAW OF INTERSTATE COMPACTS

(Submitted by Delph E. Carpenter to Judiciary Committee, House of Representatives, 67th Cong., 1st sess., on June 4, 1921, at hearing in re H. R. 6821)

HISTORICAL MEMORANDUM

The object of the pending legislation is to permit a settlement respecting the future utilization and disposition of the waters of the Colorado River, and of the streams tributary thereto, by compact between the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming.

The object is to determine the respective rights of the States to the use and disposition of the waters of this great river prior to any further large construction or extensive utilization of these waters, in order that the rights of the States and the Government may be settled and determined in advance of construction and before interstate or other controversies may arise.

The pending bill was introduced pursuant to resolution adopted and signed by the governors of the seven States above named at Denver, Colo., May 10, 1921, wherein it is recited that each of the seven States whose territory includes in part the drainage of the Colorado River has already provided for adjustment respecting the future utilization and disposition of the waters of the stream and has appointed its commissioner to serve with commissioners from other interested States and with a commissioner to be appointed for the United States for this general purpose.

The resolution reads as follows:

"Whereas the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming have by appropriate legislation authorized the governors of said States to appoint commissioners representing said States for the purpose of entering into a compact or agreement between said States and between said States and the United States respecting the future utilization and disposition of the waters of the Colorado River and the streams tributary thereto; and

"Whereas the governors of said several States have named and appointed the commissioners contemplated by the legislative acts aforesaid: Now, therefore, be it

"*Resolved*, That the Congress of the United States be, and is hereby, requested to provide for the appointment of a commissioner on behalf of the United States to act as a member of said commission; and be it further

"*Resolved*, That the proposed draft of a bill for presentation to Congress, a copy of which is hereto attached, be offered as a suggestion for legislation for the purposes aforesaid; and be it further

"*Resolved*, That Gov. Thomas E. Campbell, of Arizona, and the governors of the other States in the Colorado River Basin, or such representatives as they may severally designate, be and they hereby are, authorized to present his resolution to the President and to the Congress of the United States."

We, the undersigned, do hereby certify that the foregoing resolution was adopted by unanimous vote at a meeting of the Governors of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming, held at the capitol at Denver, in the State of Colorado, on the 10th day of May, 1921.

THOMAS E. CAMPBELL,
Governor of Arizona.
WILLIAM D. STEPHENS,
Governor of California,
By W. F. MCCLURE,
State Engineer.
OLIVER H. SHOUP,
Governor of Colorado.
EMMET D. BOYLE,
Governor of Nevada.
MERRITT C. MECHAM,
Governor of New Mexico.
CHARLES R. MAYBEY,
Governor of Utah.
ROBERT D. CAREY,
Governor of Wyoming.

HISTORY OF PROCEEDINGS BY COLORADO RIVER STATES LEADING TO INTERSTATE COMPACT LEGISLATION—COLORADO RIVER

SALT LAKE CONFERENCE

January 18–21, 1919, a conference between the representatives of the seven Colorado River States, to wit, Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming, was called by the Governor of Utah for the purpose of discussing questions relating to the utilization of the water supplies of the Colorado River and its tributaries, and especially in connection with a law then proposed by Secretary Lane relating to soldiers' and sailors' settlement.

Hon. W. J. Spry, ex-Governor of Utah, present Commissioner of the General Land Office, presided over the meeting and was made permanent chairman of a continuing organization.

The other Colorado River Basin States above noted were represented. The meeting of the seven States resolved itself into a permanent organization to be known as The League of the Southwest.

As a result of the sessions the following resolutions, inter alia, were adopted:

"The history of irrigation throughout the world has shown that the greatest duty of water is had by first using it upon the upper reaches of the stream and continuing the use progressively downward. In other words, 'the water should first be captured and used while it is young,' for it can then be recaptured as it returns from the performance of its duties and thus be used over and over again.

"Attention is further directed to the fact that many of these irrigation projects, of a magnitude to be developed only by the Federal Government, can be properly carried on without interfering with smaller developments which should be undertaken by individual and corporate initiative, and we therefore urge upon the Interior and Agricultural Departments the adoption of a liberal and sympathetic policy in the granting of rights of way for reservoirs and ditches upon the public domain, where the same are essential to the development of such private projects.

"We further urge the liberal administration of all land laws of the United States looking to the end of placing the lands of the United States in the actual possession and occupation of its citizens in order that the citizens may have a home and that the lands may go upon the tax rolls of the various States in which they may be located in order that they may bear their just portion of the expense of State administration.

"Along the lines set forth in these resolutions, we pledge ourselves to a hearty cooperation with the representatives of the Federal Government in order that the desired end may be attained at the earliest possible moment consistent with a wise administration of the affairs of the Nation and of States.

"In the carrying out of all reclamation projects in which the Federal Government may become interested, its activities should ever be in conformity with the laws of the State in which the project under development is located. In the arid States of the West the irrigation projects undertaken by or with the aid of the Federal Government should in every instance be based upon a full compliance with the laws of the State wherein the projects are located so far as the appropriation of water and other matters of purely State control are concerned."

Subsequent meetings of the league were held at Los Angeles, where resolutions of a similar character were adopted.

DENVER CONFERENCE

A subsequent meeting of the league was held at Denver August 25–27, 1920, at which the desirability of encouraging the construction of large reservoirs in the canyon of the Colorado River for purposes of flood control, power, and irrigation was discussed, and at which the Director of the Reclamation Service assured the representatives of the seven States that the construction of such reservoirs need in no manner interfere with the future development of the upper reaches of the streams within the States of origin of the waters to be impounded by the reservoirs situate in the lower States.

The following resolutions were unanimously adopted:

"*Be it resolved*, That the resolution, adopted at the conference of the league, held at Salt Lake City, January 18–21, 1919, and the proceedings of the third convention of the League of the Southwest, held at Los Angeles, April 2–3, 1920, be, and the same are, hereby ratified, approved, and reaffirmed.

"Whereas it is the understanding of this league, from information presented by Hon. Arthur P. Davis, director of the United States Reclamation Service, that the water supply of the Colorado River drainage is sufficient to supply the present and future necessities of all of the States whose territory is involved and that all present and future interference with development upon or from the upper reaches of the stream should be avoided: Now, therefore, be it

"*Resolved*, That the league favors the early development of all possible beneficial uses of waters of the stream upon the upper reaches of the stream and its tributaries along the lines set forth in the resolutions adopted at the Salt Lake conference of January 28–31, 1919, and that the present and future restrictions upon such development by withholding or conditional granting of applications for rights of way across public lands for irrigation works should be discontinued and that such applications should be granted with that degree of dispatch which will permit the construction of all such projects while financial and other means are at hand and opportunity for construction exists: Be it further

"*Resolved*, That it is the sense of this conference that the present and future rights of the several States whose territory is in whole or in part included within the drainage area of the Colorado River, and the rights of the United States, to the use and benefit of the waters of said stream and its tributaries, should be settled and determined by compact or agreement between said States and the United States, with consent of Congress, and that the legislatures of said States be requested to authorize the appointment of a commissioner for each of said States for the purpose of entering into such compact or agreement for subsequent ratification and approval by the legislature of each States and the Congress of the United States."

Pursuant to the last-quoted resolution, and at the request of the Governor of Arizona, president of the League of the Southwest, bills were drawn and submitted to the legislatures of the seven States involved and were thereafter enacted by all of said States.

Each of said bills provide for the appointment of a commissioner for each of said States by the respective governors for the purpose of formulating the compact or agreement provided for by the concurrent legislation.

The legislation by each of the States also provided for a representative of the United States to act on behalf of the Federal Government in the formulation of the interstate compact or agreement.

Pursuant to the above legislation, the governors of each of the States have appointed their respective commissioners.

May 10, 1921, the governors of the seven States, or their duly accredited representatives, met at the city of Denver and there formulated resolutions calling upon the President of the United States and upon Congress to provide for the appointment of a representative for the United States in harmony with the above-mentioned legislation by the States, and directed that the resolution so formulated be laid before the President and Congress by the governors of the States. The resolution adopted by the governors at Denver was presented by the governors, or their duly accredited representatives, to the Secretary of the Interior, at Washington, May 17, and to the President of the United States, May 19, 1921.

BRIEF ON LAW OF INTERSTATE COMPACTS—POWERS OF STATES TO ENTER INTO COMPACTS

Compacts or agreements between the States are recognized by Article I, section 10, paragraph 3, of the Constitution of the United States, which provides:

"No State shall, without consent of Congress, * * * enter into any agreement or compact with another State. * * *"

Interstate controversies and differences respecting boundaries, fisheries, etc., have been frequently settled by interstate compact.

Among the many boundary disputes so settled may be mentioned the following: Virginia and Pennsylvania, 1780 (11 Pet. 20); Virginia and Pennsylvania, 1784 (3 Dall. 425); Kentucky and Tennessee, 1820 (11 Pet. 207); Virginia and Tennessee, 1802 and 1856 (148 U. S. 503, 511, 516); Virginia and Maryland, 1785 (153 U. S. 155, 162).

Of the compacts between States respecting the taking of fish in rivers forming the boundary between the two disputant States may be mentioned Washington and Oregon, Columbia River; Maryland and Virginia, Potomac River (153 U. S. 155).

The States of New York and New Jersey settled their harbor differences by interstate compact.

While all compacts which would in any way involve the Federal Government or its jurisdiction, property, etc., must be made with consent or approval of Congress in order to be binding, it has been suggested by the Supreme Court that compacts made between two States respecting matters in which the States alone are interested might be taken as binding without consent or approval of Congress. (Stearns *v.* Minnesota, 179 U. S. 223, 245; Virginia *v.* Tennessee, 148 U. S. 503; Wharton *v.* Wise, 153 U. S. 155.)

For a full discussion respecting the rights of the States to enter into treaties or compacts, with consent of Congress, see Rhode Island *v.* Massachusetts (12 Pet. 657, 725–731).

In the case just cited the Supreme Court observed that when Congress has given its consent to two States to enter into a compact or agreement, "then the States were in this respect restored to their original inherent sovereignty; such consent, being the sole limitation imposed by the Constitution, when given, left the States as they were before, as held by this court in Poole *v.* Fleeger (11 Pet. 209); whereby their compacts became of binding force, and finally settled the boundary between them; operating with the same effect as a treaty between sovereign powers. That is, that the boundaries so established and fixed by compact between nations, become conclusive upon all the subjects and citizens thereof, and bind their rights, and are to be treated to all intents and purposes, as the true real boundaries. * * * The construction of such a compact is a judicial question," for the United States Supreme Court. (12 Pet. 725.)

See also discussion of the same subject in Stearns *v.* Minnesota (179 U. S. 223); Virginia *v.* Tennessee (148 U. S. 503, 517–528); Wharton *v.* Wise (153 U. S. 155).

In other words, the States of the Union, by consent of Congress, have the same power to enter into compacts with each other as do independent nations, upon all matters not delegated to the Federal Government.

INTERNATIONAL RIVERS

Controversies respecting international rivers have been settled by treaty. (Heffter Droit Ind., Appendix VIII; Hall, International Law, sec. 39.)

While the right of the United States to the use and benefit of the entire flow of the Rio Grande River irrespective of any former uses made in Mexico was upheld by the opinion of the Attorney General in 1895 (21 Ops. Atty. Gen. 274, 282), the rights of the two nations were settled by a "convention providing for the equitable distribution of the waters of the Rio Grande for irrigation purposes" made May 21, 1906. (Malloy, Treaties, Vol. I, p. 1202.)

That the United States has a perfect right to divert the waters of the Colorado River at any point above the international boundary with Mexico irrespective of the effect of such diversion upon the flow of the river in Mexico or along that part of its course which forms the boundary between the two nations was held by the Attorney General, September 28, 1903. (Rept. to Atty. Gen. of U. S., Colorado River in California, p. 58; Opinion of Atty. Gen., Aug. 20, 1919.)

The above opinion is in harmony with the decision in the Rio Grande case, wherein it was held (quoting from syllabus):

"The fact that there is not enough water in the Rio Grande for the use of the inhabitants of both countries for irrigation purposes does not give Mexico the right to subject the United States to the burden of arresting its development and of denying to its inhabitants the use of a provision which nature has supplied entirely within its territory. The recognition of such a right is entirely inconsistent with the sovereignty of the United States over its national domain.

"The rules, principles, and precedents of international law imposed no duty or obligation upon the United States of denying to its inhabitants the use of the water of that part of the Rio Grande lying entirely within the United States, although such use results in reducing the volume of water in the river below the point where it ceases to be entirely within the United States." (21 Ops. Atty. Gen. 274.)

For a full discussion of international rights upon the Colorado River, see appendix, pages 318–343, part 2, Hearings Before Committee on Irrigation of Arid Lands, House of Representatives, Sixty-sixth Congress, first session.

While by all rules of international law the upper nation is entitled to make full use of the waters of an international stream rising wholly within the borders of the upper nation, nevertheless such matters are usually settled by treaty in the same manner as the settlement between the United States and Mexico respecting the use and benefit of the waters of the Rio Grande (above cited), wherein it is provided for an "equitable apportionment" of the waters of the stream between the two Governments.

The rule of equitable apportionment applies to the settlement by the Supreme Court of controversies between States over rivers common

to two or more States of the Union. (Kansas *v.* Colorado, 206 U. S. 46, 117.)

This equitable apportionment of the waters of an interstate river may be made by one of two methods:

(1) By interstate "compact or agreement" between the States, by consent of Congress; and

(2) By suit between the States before the United States Supreme Court.

The latter method is the substitute, under our form of government, for war between the States. In other words, were it not for the provisions of our Constitution the States might settle their differences over interstate rivers by resort to arms. But by the terms of the Constitution the right to resort to settlement by force was surrendered, and in lieu thereof was substituted the right to submit interstate controversies to the Supreme Court in original proceedings between the States. (Kansas *v.* Colorado, 206 U. S. 46; Rhode Island *v.* Massachusettes, 12 Pet. 657.)

A suit between the States is but a substitute for war. It is the last resort, and should not be resorted to until all avenues of settlement by compact have been exhausted. It has been suggested that the Supreme Court should announce the principle that no suit between States would be entertained without a preliminary showing that reasonable efforts had been made by the complaining State to compose the differences between it and the defendant State by mutual agreement or interstate compact. It would appear that the rule of settlement by treaty of international disputes over rivers common to two nations should likewise apply to settlements of controversies present or possible, between States of the Union.

The object of the present legislation is to follow the international principle of settlement.

INTERSTATE COMPACTS RESPECTING USE OF WATERS OF INTERSTATE RIVERS

While, as we have already observed, various of the States have settled their controversies respecting boundaries, fisheries, etc., by interstate compact or by concurrent State legislation, having the same effect, this method of settlement of pending or threatened controversies respecting the use and distribution of the waters of interstate streams for irrigation and other beneficial purposes, has not been availed of. The right of adjoining States to the use and benefit of the waters of the streams common to both States has been considered by the court in the case of Kansas *v.* Colorado (185 U. S. 125; 206 U. S. 46), in which case it was held that the respective States were each entitled to an equitable portion of the waters of the common river, the extent of the use in each State to be determined upon the facts and circumstances of each particular case.

In the above-mentioned case the right of the United States to the use of the waters of the western streams was also considered and determined (pp. 87–93).

An equitable apportionment or allocation of the use and distribution of the waters of western interstate streams may be best accomplished through the efforts of the States represented by commissioners fully acquainted with the facts and the surrounding conditions, as well as with the future possibilities of use of water from the streams.

Principles of international law are applicable to the use and distribution of waters of interstate streams, and as regards compacts between the States, "the rule of decision is not to be collected from the decisions of either State, but is one, if we may so speak, of an international character." (Marlett *v.* Silk, 11 Pet. 1, 23.)

The rights of the nation in whose territory an international stream has its rise to the use and benefit of its waters for the development of its territory, irrespective of the effect upon the territory of a lower nation through which the stream passes on its way to the sea, were fully considered by Attorney General Judson Harmon with respect to the claims made by the Republic of Mexico to damage by depletion of the waters of the Rio Grande, occasioned by uses in the United States. After exhaustive consideration of the various authorities upon the subject, he arrived at the conclusion that, while the United States had the right to utilize the entire flow of the Rio Grande in the necessary reclamation of the lands near the source of the stream, and while "precedents of international law imposed no liability or obligation upon the United States" to permit any of the water of the stream to flow to El Paso, nevertheless he advised that the matter be treated as one of policy and settled by treaty with Mexico. (21 Ops. Atty. Gen. 274, 280–283.)

It is safe to predict that most of the past controversies respecting the waters of western interstate streams could have been avoided had the matters in dispute been first submitted to competent compact commissioners. Friction between the Federal departments and the State authorities should be avoided by proper compacts between the States before construction proceeds upon rivers where such controversies may arise.

The Colorado River is still "young," as regards utilization of its wafer supply. Conditions look to enormous development during the next quarter of a century. Nature facilitates an easy allocation and settlement of all matters pertaining to the future utilization of the waters of this stream, if means to that end are taken prior to further construction and before friction develops. All apprehension of interference with the gradual and necessary future development upon the upper reaches of the stream by reason of earlier construction of enormous works on the lower river may be avoided by compact and agreement entered into prior to any future construction.

In fact, settlement of possible interstate controversies by interstate compacts is recommended by the United States Supreme Court. (Washington *v.* Oregon, 214 U. S. 205, 218.)

COMPACT BY "JOINT COMMISSION" BETWEEN STATES AND UNITED STATES

In another section we observe that the States, with consent of Congress, have full powers to make compacts with each other. Treaties between States are designated as agreements or compacts. (Art. I, sec. 10, par. 3, Constitution.)

The United States, in the exercise of its sovereign powers, may enter into compacts or agreements with one or more of the States, acting in their sovereign capacities.

The usual method of formulating such compacts or agreements, either between the States or between the States and the United States, is through the instrumentality of joint commissions thereunto duly constituted by legislative enactments and appointment by the executives of the State or the States and of the Nation. Such joint commissions are in all respects similar to the joint commissions constituted by separate governments for formulation of treaties between independent nations. The term does not refer to a joint commission consisting only of members of one sovereignty and created by joint action of two or more legislative branches, but refers to that character of commission formed by two independent powers for the purpose of joint action to a common end.

Of the available examples of settlements of controversies between the United States and one or more of the States through the instrumentality of joint commissions, the most convenient example is that of the attempts at settlement of the boundary between the United States and Texas. Here two joint commissions, duly constituted by the National and State Governments, sought to settle the boundary line. The history of these attempts is found in the reports of the United States Supreme Court in the case of United States *v.* Texas (143 U. S. 621; 162 U. S. 1).

Throughout the many pages of the reports covered by the decisions in this case, the representative of the Government of the United States, on the one hand, and that of the State of Texas on the other, are designated as commissioners, and the common agency for settlement of the controversy is designated as the joint commission or joint boundary commission.

Lest there be some question respecting the use of the term "joint commission" the following references to the opinions in the above case may be profitable:

By a treaty concluded August 25, 1838, between the United States and the Republic of Texas (8 Stat. 511) each of the contracting parties agreed to appoint "a commissioner" for the purpose of jointly agreeing upon the line between the two Republics.

By the act of June 5, 1858, chapter 92 (11 Stat. 310), enacted in harmony with the act of the Legislature of the State of Texas, February 11, 1854, it was provided that the President should appoint a representative to act in harmony with one from the State of Texas for the purpose of definitely locating the boundary between the Indian Territory and the State of Texas. The following references to the representatives so appointed and the name of the body so constituted appear in the decisions in the above case at the following pages: "A commissioner was appointed on behalf of the United States" (162 U. S. 1, 65); "the commissioners of the two Governments"—i. e., the Government of Texas and the Government of the United States (162 U. S. 1, 66); "a joint commission on the part of the United States and Texas commenced the work," etc. (143 U. S. 621, 635); "the commissioner on the part of the United States" (id.); "the commissioners of the United States and Texas" (id.).

By the act of January 31, 1885, chapter 47 (23 Stat. 296, 297), it was provided that the United States should appoint a representative who should work in conjunction with a representative to be appointed by the State of Texas, for the purpose of ascertaining the boundary. The following references appear as descriptive of the person and the agency:

"The two Governments (United States and State of Texas) appointed commissioners" (162 U. S. 1, 70); the joint body so constituted is defined as "the Joint Boundary Commission" (162 U. S. 1, 21); in the act by the Legislature of Texas authorizing the appointment of its commissioner, the combined representation of the two Governments (State and National) is designated a "joint commission" (162 U. S. 1, 73); by the act authorizing the suit between the United States and Texas (26 Stat. 81, 92, ch. 182, sec. 25) the commission formed under the act of 1885 with the State of Texas is designated as "the joint boundary commission under the act of Congress," etc. (143 U. S. 621, 622); and by the act of 1885 "a joint commission was organized" (143 U. S. 621, 636).

Without further multiplication of examples, it would appear that where two representatives of the United States and of a State are duly ap-

pointed for the purpose of settling a boundary or some other dispute, such persons are "commissioners" and are collectively a "joint commission," and as the court said (162 U. S., 76), "Under the act of Texas of 1882 and the act of Congress of 1885, the two Governments appointed commissioners," and the body so constituted was a "joint commission."

This exercise of the treaty-making powers of the two separate Governments (National and State) necessarily proceeds upon the fundamental fact that there are two separate and distinct Governments, each having its attributes of sovereignty. Of this we shall make mention in a separate memorandum.

COMPACTS BETWEEN STATE AND NATIONAL GOVERNMENTS

Controversies arising between two States or between the United States and a State or States may be settled by compact or agreement or by judicial determination by the United States Supreme Court. Diplomacy failing, the suit before the court is the substitute for war. In either event, the high contracting or litigating parties proceed upon the basis of sovereignties, each exercising independent and separate powers and each exclusive within its proper sphere. As said by Mr. Justice Harlan in United States *v.* Texas (143 U. S. 621, 646):

"The submission to judicial solution of controversies arising between these two Governments, 'each sovereign with respect to the objects committed to it, and neither sovereign with respect to the objects committed to the other,' McCulloch *v.* State of Maryland (4 Wheat. 316, 400, 410), but both subject to the supreme law of the land, does no violence to the inherent nature of sovereignty. The States of the Union have agreed, in the Constitution, that the judicial power of the United States shall extend to all cases arising under the Constitution, laws, and treaties of the United States, without regard to the character of the parties (excluding, of course, suits against a State by its own citizens or by citizens of other States or by citizens or subjects of foreign States), and equally to controversies to which the United States shall be a party, without regard to the subject of such controversies, and that this court may exercise original jurisdiction in all such cases 'in which a State shall be a party' without excluding those in which the United States may be the opposite party."

The power to enter into compact between a State or States and the United States is founded upon the same principle as the power in the Supreme Court to settle controversies between States, as said by Mr. Justice Harlan in the foregoing case (p. 644), "We can not assume that the framers of the Constitution, while extending the judicial power of the United States to controversies between two or more States of the Union and between a State of the Union and foreign states, intended to exempt a State altogether from suit by the General Government."

The above statement followed an analysis of the position taken by Texas (p. 641):

"Texas insists that no such jurisdiction has been conferred upon this court, and that the only mode in which the present dispute can be peaceably settled is by agreement, in some form, between the United States and that State. Of course, if no such agreement can be reached—and it seems that one is not probable—and if neither party will surrender its claim of authority and jurisdiction over the disputed territory the result, according to the defendant's theory of the Constitution, must be that the United States, in order to effect a settlement of this vexed question of boundary, must bring its suit in one of the courts of Texas * * * or that, in the end, there must be a trial of physical strength between the Government of the Union and Texas."

The court decided that, inasmuch as the State and the United States did not settle their controversy by compact, the Supreme Court had the power to determine the controversy between the United States and the State.

The right to settle by compact proceeds upon the sovereignty of the State and the sovereignty of the Nation. As stated regarding another matter, "It is a matter between two sovereign powers." (U. S. *v.* La., 127 U. S. 182, 189.)

The following quotations bear upon this general subject of power and separate sovereignty:

"The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States, respectively, or to the people." (Constitution of the United States, tenth amendment.)

"It must be recollected that previous to the formation of the new Constitution we were divided into independent States, united for some purposes, but in most respects sovereign." (Chief Justice Marshall in Sturges *v.* Crowninshield, 4 Wheat. 122, 192.)

"Reference has been made to the political situation of these States anterior to its (Constitution) formation. It has been said that they were sovereign, were completely independent, and were connected with each other only by a league. This is true." (Chief Justice Marshall in Gibbons *v.* Ogden, 9 Wheat. 1, 187.)

"The United States are sovereign as to all the powers of Government actually surrendered. Each State in the Union is sovereign as to all the powers reserved. It must necessarily be so, because the United States have no claim to any authority but such as the States have surrendered to them. Of course, the part not surrendered must remain as it did before." (Chisholm *v.* Georgia, 2 Dall. 419, 435.)

"In America the powers of sovereignty are divided between the Government of the Union and those of the States. They are each sovereign with respect to the objects committed to it, and neither sovereign with respect to the objects committed to the other." (Chief Justice Marshall in McCulloch *v.* Maryland, 4 Wheat. 316, 410.)

"Under the Articles of Confederation each State retained its sovereignty, freedom, and independence, and every power, jurisdiction, and right not expressly delegated to the United States. Under the Constitution, though the powers of the States were much restricted, still all powers not delegated to the United States, nor prohibited to the States, are reserved to the States, respectively, or to the people. And we have already had occasion to remark at this term that 'the people of each State compose a State, having its own government and endowed with all the functions essential to separate and independent existence,' and that 'without the States in union there could be no such political body as the United States.' Not only, therefore, can there be no loss of separate and independent autonomy to the States through their Union under the Constitution but it may be not unreasonably said that the preservation of the States and the maintenance of their governments are as much within the design and care of the Constitution as the preservation of the Union and the maintenance of the National Government. The Constitution, in all its provisions, looks to an indestructible Union, composed of indestructible States." (Chief Justice Chase in Texas *v.* White, 7 Wall. 700, 725, decided in 1868.)

"The General Government and the States, although both exist within the same territorial limits, are separate and distinct sovereignties, acting separately and independently of each other, within their respective spheres. The former in its appropriate sphere is supreme, but the States within the limits of their powers not granted, or, in the language of the tenth amendment, 'reserved,' are as independent of the General Government as that Government within its sphere is independent of the States." (Mr. Justice Nelson in Collector *v.* Day, 11 Wall. 113, 124, decided in 1870.)

"We have in this Republic a dual system of government, National and State, each operating within the same territory and upon the same persons, and yet working without collision, because their functions are different. There are certain matters over which the National Government has absolute control and no action of the State can interfere therewith, and there are others in which the State is supreme, and in respect to them the National Government is powerless. To preserve the even balance between these two governments and hold each in its separate sphere is the peculiar duty of all courts, preeminently of this—a duty oftentimes of great delicacy and difficulty." (Mr. Justice Brewer in South Carolina *v.* United States, 199 U. S. 437, 448, decided in 1905.)

"Each State is subject only to the limitations prescribed by the Constitution and within its own territory is otherwise supreme. Its internal affairs are matters of its own discretion." (Id. 454.)

"The powers affecting the internal affairs of the States not granted to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, and all powers of a national character which are not delegated to the National Government by the Constitution are reserved to the people of the United States." (Justice Brewer in Kansas *v.* Colorado, 206 U. S. 46, 90.)

In the case of Kansas, *v.* Colorado, last above cited, the United States intervened, in effect claiming national control of the waters of western streams to be administered under the doctrine of prior appropriation. In answer to the primary question of national control, regardless of the rights of the States, inter sese, Justice Brewer, after observing that the United States had an interest in the public lands within the Western States and might legislate for their reclamation, subject to State laws, thus disposed of the claim of national control of western interstate streams:

"Turning to the enumeration of the powers granted to Congress by the eighth section of the first article of the Constitution, it is enough to say that no one of them by any implication refers to the reclamation of arid land. * * * No independent and unmentioned power passes to the National Government or can rightfully be exercised by the Congress. * * * But it is useless to pursue the inquiry further in this direction. It is enough for the purpose of this case that each State has full jurisdiction over the lands within its borders, including the beds of streams and other waters. (Citing cases). * * * It may determine for itself whether the common law rule in respect to riparian rights or that doctrine which obtains in the arid regions of the West of the appropriation of waters for the purposes of irrigation shall control. Congress can not enforce either rule upon any State. * * * One cardinal rule, underlying all the relations of the States to each other, is that of the equality of right. Each State stands on the same level with all the rest. It can impose its own legislation on no one of the others and is bound to yield its own views to none." (Kansas *v.* Colorado, 206 U. S. 46, 87–97.)

In concluding the above decision the Supreme Court dismissed the case without prejudice to the right of Kansas to institute new proceedings "whenever it shall appear that through a material increase in the

depletion of the waters of the Arkansas by Colorado * * * the substantial interests of Kansas are being injured to the extent of destroying the equitable apportionment of the benefits between the two States resulting from the flow of the river." (206 U. S. 46, 117.)

The United States has large interests in the form of public lands within the Colorado River area, and has already constructed large irrigation works near Yuma, Ariz., and is engaged in irrigation of large areas along the lower portion of the stream and in the vicinity of the Salton Sea. The seven Colorado River States have already enacted legislation authorizing a commissioner for each of the States, to meet with a representative of the United States, for the purpose of formulating and entering into a compact or agreement respecting the future utilization and disposition of the waters of the Colorado River and its tributaries. Any such compact will be of no binding force or effect until ratified by the legislatures of each of the States and by the Congress of the United States. The seven State sovereignties have legislated. The governor of each has appointed a commissioner pursuant to the legislation. The governors have collectively waited upon the President and presented their written request for national legislation authorizing the appointment by the President of a representative for the United States.

NOTE.—Since the foregoing memorandum was written the United States Supreme Court decided, in Wyoming *v.* Colorado, that in cases between two States both of which recognize the doctrine of prior appropriation as a matter of local law, the court will apply the fundamental principles of the doctrine in the allocation of the waters of a river common to the two States and will so apportion the dependable average annual flow between the States that the older established uses in both States will receive first protection. The doctrine so announced leaves the Western States to a rivalry and a contest of speed for future development. The upper State has but one alternative, that of using every means to retard development in the lower State until the uses within the upper State have reached their maximum. The States may avoid this unfortunate situation by determining their respective rights by interstate compact before further development in either State, thus permitting freedom of development in the lower State without injury to future growth in the upper.

By the attached compact the objectionable features of leaving the destiny of the States to a wild scramble in a contest of speed for first development are avoided. The future uses within the upper State, according to its growing necessities, are protected without interfering with a similar growth in the lower State. Each State may proceed in an orderly manner in pace with the normal course of events, free from any cloud of threatened penalties.

SUPPLEMENTAL REPORT OF DELPH E. CARPENTER, COMMISSIONER FOR COLORADO, COLORADO RIVER COMMISSION

Printed in full in Senate Journal (Colorado, 1923, pp. 888–895, inclusive, as a part of the proceedings in re second reading of Senate bill 410, "a bill for an act to approve the Colorado River compact." Original report printed in Senate Journal of January 5, 1923, pages 75–86, inclusive.

DENVER, COLO., *March 20, 1923.*

Senator M. E. BASHOR,
Chairman Senate Committee on Agriculture and Irrigation;
and
Hon. ROYAL W. CALKINS,
Chairman House Committee on Agriculture and Irrigation,
Denver, Colo.

GENTLEMEN: Pursuant to your request, I respectfully submit the following observations respecting certain provisions of the Colorado River compact:

First and foremost, it should be ever kept in mind that the intent of the compact is to be ascertained from a consideration of the entire instrument, and that each clause must be considered in connection with other clauses.

ART. III, PAR. (b). Paragraph (b) of Article III does not authorize a cumulative increase of beneficial consumptive use of waters to the extent of 1,000,000 acre-feet per annum. This paragraph means that the lower basin may increase its annual beneficial consumptive use of water 1,000,000 acre-feet and no more.

Paragraph (a) of said article permanently apportions to the lower basin the annual beneficial consumptive use of 7,500,000 acre-feet of water, which includes all water necessary for the supply of any rights which may now exist.

Paragraph (b) permits the lower basin to increase its annual beneficial consumptive use of water 1,000,000 acre-feet. The two paragraphs permit an aggregate annual beneficial consumptive use of 8,500,000 acre-feet, and no more. The words "per annum," as used in paragraph (b) are not synonymous with the word "annually." No cumulative increase is intended by that paragraph.

ARTICLE VIII

Article VIII is not intended to authorize, constitute, or result in any apportionment of water to the lower basin beyond or in addition to that made in paragraphs (a) and (b) of Article III.

The Imperial Valley project which diverts water below Yuma, Ariz., is said to have diverted the entire low flow of the river for a period of several days in October during 3 of the past 10 years. Those in control of that project feared that additional development in the upper basin (before storage facilities had been provided for the lower basin) would materially decrease the October flow of the river at Yuma. Storage facilities constructed in the great canyon of the river will care for the entire supply necessary for the Imperial Valley. While the Imperial Valley probably has no legitimate claim which it may enforce against the upper basin, it was urged, nevertheless, that whatever rights such users may claim should not be disturbed until time and opportunity may afford the building of storage works.

The apportionment to the lower basin by paragraph (a) of Article III provides that such apportionment "shall include all water necessary for the supply of any rights which may now exist." Any claims of the Imperial Valley therefore would be satisfied out of such apportionment of water. The storage of water in reservoirs, as provided in Article VIII, must be made "not in conflict with Article III." After storage is provided, water stored in harmony with Article III will be available to the Imperial Valley project and "present perfected rights" on the lower river shall thereafter be satisfied from the water stored in harmony with Article III and their claims, if any, against the upper basin are thereafter cut off by the substitution of stored water for direct flow.

Article I provides that "an apportionment of the use of part of the water of the Colorado River system is made to the upper basin and also to the lower basin with provision that further equitable apportionment may be made."

Paragraph (f) of Article III provides that "further equitable apportionment of the beneficial uses of the waters of the Colorado system unapportioned by paragraphs (a), (b), and (c) may be made * * * if and when either basin shall have reached its total beneficial consumptive use as set out in paragraphs (a) and (b)." The storage of water under Article VIII must be in harmony with paragraph (f) of Article III, as well as with paragraph (a), and the latter paragraph provides that the apportionment to the lower basin "shall include all water necessary for the supply of any rights which may now exist," and the second paragraph of Article VIII provides that all other rights (than present perfected rights) "shall be satisfied solely from the water apportioned to that basin in which they are situate."

Taking the compact as a whole and construing its provisions together, Article VIII does not authorize, constitute, or result in any apportionment of water to the lower basin beyond that made in paragraphs (a) and (b) of Article III.

It will be noted that Article VIII does not concede that "present perfected rights" in the lower basin have any claims against the upper basin, the language being "claims of such rights, if any, by appropriators or users of water in the lower basin against the appropriators or users of water in the upper basin." In other words any such claims are neither acknowledged nor denied and their legal status, whatever it may be, is temporarily left as it was at the time of the compact. But when the reservoir is constructed, any claims against the upper basin by such "present perfected rights" are thereafter cut off.

ARTICLE III, PARAGRAPH (E)

Paragraph (e) of Article III is reciprocal. It should be construed with paragraph (b) of Article IV. The States of the lower division can not require the delivery of water at Lees Ferry, by the upper division, which can not be reasonably applied to domestic and agricultural uses in the lower basin. The clause preserves the dominant rights of agricultural and domestic uses over power uses and only prevents the withholding of water for power development within the upper basin to the extent that such withholding may encroach upon the supply necessary for agricultural and domestic uses in the lower basin. In other words, the compact means that power claims by the lower basin can not compel the upper basin to turn down any water which can not reasonably be applied to domestic and agricultural uses in the lower basin. This permits the first use of the waters of the upper basin for the generation of power, limited only by the agricultural and domestic demands in the lower basin. All power uses in both basins are made "subservient to the use and consumption of such water for agricultural and domestic purposes and shall not interfere with or prevent use for such dominant purposes" (referring to agricultural and domestic uses).

ARTICLE III, PARAGRAPH (F)

The compact reserves for future apportionment (between the two basins of the river) all of the waters of the river and its tributaries unapportioned by paragraphs (a), (b), and (c) of Article III. This is specifically provided in paragraph (f) of Article III. No such apportionment can occur (except by unanimous consent) until after October 1, 1963 (40 years). If at any time after 40 years either basin shall have reached its total beneficial consumptive use, as provided in paragraphs (a) and (b) of Article III, either basin may demand an equitable apportionment of the beneficial uses of the remainder of the water of the river. This does not prevent a diversion and use of water in either

basin in excess of the apportionment, but all such excess diversions will be made at the peril of the users. This applies to the excess uses made either before or after the expiration of the 40-year period. The apportionment of water to supply any such excess uses will be a matter entirely within the keeping and jurisdiction of the new compact commission and will require its unanimous approval.

By the compact the unapportioned waters are reserved for "further equitable apportionment" between the two basins. This negatives any suggestion that excess uses in either basin will be regarded as legal "appropriations." Any such excess uses will be by sufferance and without legal foundation, but such users will not be prevented from pressing their equitable claims in the future apportionment provided for in paragraph (g) of Article III. This will apply to all excess uses made by means of enormous reservoirs in the lower basin capable of storing and beneficially using (for power or other uses) all of the flow of the river which may pass Lees Ferry. All such uses, made by means of such structures, are and will be subject to the Colorado River compact and can perfect no claim which will prevent further "equitable apportionment" between the basins at any time after 40 years.

ARTICLE IV, PARAGRAPH (C)

Intrastate control of appropriations made within the apportionments provided by the compact is specifically reserved by paragraph (c), Article IV. This includes such regulations as each State may provide by its constitution and laws respecting the preference of one class of use over other classes of use. In other words the constitution and laws of Colorado control the details of appropriation, use, and distribution of water within the State. The compact does not attempt to invade such matters of local concern. When approved, the compact will be the law of the river as between the States. It deals wholly with interstate relations. The paragraph refers to intrastate control. Whatever the intrastate regulation and control may be it can not effect the interstate relations. No law of any State can have extraterritorial effect or interfere with the operation of the compact as between the States.

"BENEFICIAL CONSUMPTIVE USE"

In my original report (printed in the Senate Journal of January 5, 1923) I discussed and defined the term "beneficial consumptive use." In addition to the discussion there contained, I might add there is a vast difference between the term "beneficial use" and the term "beneficial consumptive use." A use may be beneficial and at the same time nonconsumptive or the use may be partly or wholly consumptive. A wholly consumptive use is a use which wholly consumes the water. A nonconsumptive use is a use in which no water is consumed (lost to the stream). "Consume" means to exhaust or destroy. The use of water for irrigation is but partially consumptive for the reason that a great part of the water diverted ultimately finds its way back to the stream. All uses which are beneficial are included within the apportionments (i. e. domestic, agricultural, power, etc.). The measure of the apportionment is the amount of water lost to the river. The "beneficial consumptive use" refers to the amount of water exhausted or lost to the stream in the process of making all beneficial uses. As recently defined by Director Davis of the United States Reclamation Service, it is the "diversion minus the return flow." (CONGRESSIONAL RECORD, January 31, 1923, p. 2815.) Water diverted and carried out of the basin of the Colorado River by the Strawberry, Moffat, or other tunnels or by canal into the Imperial Valley is wholly consumed as regards the Colorado River, because no part of it ever returns to that stream system.

AMOUNT OF FLOW AT LEES FERRY

The net measured flow of the Colorado River at Lees Ferry (after all uses above) was 16,000,000 acre-feet from September 30, 1921, to September 30, 1922, according to the report of the Director of the United States Geological Survey. The net flow of the whole river (after all uses above Yuma) has been measured and recorded at Yuma, Ariz. (below all tributaries, including the Gila River), since 1899. The mean or average flow at Yuma for the 20-year period 1903–1922 is 17,400,000 acre-feet per annum. The flow September 30, 1921, to September 30, 1922, at Yuma was 17,600,000 acre-feet. This was 200,000 acre-feet (1 per cent) greater than the 20-year average. (See CONGRESSIONAL RECORD, January 31, 1923, p. 2819.) In other words, the flow of the river for that period was 101 per cent of normal. The flow of 16,100,000 acre-feet at Lees Ferry therefore represents 101 per cent of the average annual net flow of the river at that point (after deducting all water consumed during uses in the entire upper basin). Assuming that 2,500,000 is now annually consumed during uses in the upper basin, we would obtain a "reconstructed river" by adding that amount to 16,100,000 acre-feet, making an aggregate of 18,600,000 acre-feet annual discharge, which is 101 per cent of the 20-year annual average.

It is evident that the States of the upper basin may safely guarantee 75,000,000 acre-feet aggregate delivery at Lees Ferry during each 10-year period. This would mean an average annual delivery of 7,500,000 acre-feet as against 15,940,594 acre-feet present net annual average flow (100 per cent) at Lees Ferry or 18,415,842 acre-feet natural average annual flow (100 per cent) on the basis of a "reconstructed" river.

I herewith attach for your information copies of certain telegrams which will be self-explanatory.

Very truly yours,

DELPH E. CARPENTER,
Commissioner for Colorado.

CAPITOL BUILDING,
Denver, Colo., February 10, 1923.

Hon. HERBERT HOOVER,
Chairman Colorado River Commission,
Washington, D. C.:

Do you concur with me that the intent of the commission in framing the Colorado River compact was as follows:

That paragraph b of Article III means that the lower basin may increase its annual beneficial consumptive use of water 1,000,000 acre-feet and no more?

That Article VIII is not intended to authorize, constitute, or result in any apportionment of water to the lower basin beyond that made in paragraphs a and b of Article III?

DELPH E. CARPENTER.

WASHINGTON, D. C., *February 12, 1923.*

DELPH E. CARPENTER,
State Capitol, Denver, Colo.:

I concur with you, and shall so advise Congress in my report, that the intent of the commission in framing the Colorado River compact was as follows:

First, that paragraph b of Article III means that lower basin may acquire rights under the compact to annual beneficial consumptive use of water in excess of the apportionment in paragraph a of that article by 1,000,000 acre-feet and no more.

There is nothing in the compact to prevent the States of either basin using more water than the amount apportioned under paragraphs a and b of Article III, but such use would be subject to the further apportionment provided for in paragraph f of Article III and would vest no rights under the present compact.

Second. That article VIII is not intended to authorize, constitute, or result in any apportionment of water to the lower basin beyond that made in paragraphs a and b of Article III.

HERBERT HOOVER.

DENVER, COLO., *February 13, 1923.*

R. H. MCKISICK,
Deputy Attorney General, Sacramento, Calif.:

Do you concur with me that intent of commission in framing Colorado River compact was as follows:

That paragraph b of Article III means that the lower basin may increase its annual beneficial consumptive use of water 1,000,000 acre-feet and no more.

That Article VIII is not intended to authorize, constitute, or result in any apportionment of water to the lower basin beyond that made in paragraphs a and b of Article III.

DELPH E. CARPENTER.

SACRAMENTO, CALIF., *February 13, 1923.*

Hon. DELPH E. CARPENTER,
State Capitol, Denver, Colo.:

Am of opinion that paragraph b of Article III permits increase of annual beneficial consumption use of water by lower basin to 8,500,000 acre-feet total, or 1,000,000 in excess quantity apportioned each basin in perpetuity by paragraph a, Article III, and no more. When both paragraphs are read together no other construction tenable. "Per annum" not synonymous with "annually."

Article VIII is not intended to authorize, constitute, or result in any apportionment of water to the lower basin beyond that made in paragraphs a and b of Article III, but means that if and when the water passing Lees Ferry as provided in paragraphs d and e, Article III, is impounded within specified storage, claims of lower-basin appropriators or users adverse to those of upper-basin appropriators or users shall be transferred to and satisfied from the water so stored.

R. T. MCKISICK.

SACRAMENTO, CALIF., *February 15, 1923.*

DELPH E. CARPENTER,
Denver, Colo.:

My interpretation of Articles III and VIII well expressed in McKisick's wire of the 13th.

W. F. MCCLURE.

The following is from the letter of February 16, 1923, of Arthur P. Davis, Director United States Reclamation Service, addressed to Clarence C. Stetson, executive secretary Colorado River Commission, interpreting paragraph (b), Article III and Article VIII, Colorado River compact:

"Article VIII provides that all of the rights of the lower basin shall be satisfied from the water apportioned to that basin. There is no indication that any portion of its needs shall be taken from the allotment to the upper basin. The assumption that the lower basin could claim priority for the appropriation of water in a reservoir is an assumption that the compact is invalid, for this is just the contingency which it was designed to meet. The proviso that a storage reservoir of 5,000,000 acre-feet or more shall take care of the perfected rights in the lower basin is designed to lift the ban upon the diversion of the low-water flow from the upper tributaries after the construction of such a reservoir, which will be filled from the flood waters, but which is to be charged against the allotment of the lower division as specifically provided in paragraph (a), Article III. This provides conclusively against the supposition that the stored waters are not to come out of the allotment to the lower basin.

"The assumption that paragraph (b) of Article III has no limit is its own refutation on account of the absurdity of that assumption. It would in a few years, if so construed, absorb more than the entire flow of the river, which reduces the assumption to an absurdity. Furthermore, the language is specific as the apportionment is for the consumptive use of 1,000,000 acre-feet per annum and can not be construed to mean 2,000,000 acre-feet per annum or any other amount."

[NOTE.—The Colorado Legislature also had before it, during the debates in re approval of Colorado River compact, the report of Herbert Hoover, representative for the United States, the same being Document No. 605, Sixty-seventh Congres, fourth session, House of Representatives; also extension of remarks of Congressman CARL HAYDEN, of Arizona. See CONGRESSIONAL RECORD, January 30, 1923, Sixty-seventh Congress, fourth session.]

Mr. WALSH of Montana. Mr. President, I now offer the amendment which I said I would offer following the offering and disposal of the amendment submitted by the junior Senator from Arizona [Mr. HAYDEN]. It is equally desirable notwithstanding the fact that his amendment was defeated.

Mr. JOHNSON. I have no objection to it if it is the amendment that was mentioned previously by the Senator from Montana.

The VICE PRESIDENT. The clerk will read the proposed amendment to the amendment.

The LEGISLATIVE CLERK. On page 20, after line 20, insert:

Claims of the United States arising out of any contract authorized by this act shall have priority over all others, secured or unsecured.

The VICE PRESIDENT. Is there objection?

Mr. JOHNSON. There is not.

The VICE PRESIDENT. Without objection, the amendment to the amendment is agreed to. The question now recurs on the amendment of the Senator from California [Mr. JOHNSON] in the nature of a substitute as amended.

Mr. HAYDEN. Mr. President, I gave notice yesterday that I intended to move to strike out subsection (c) of section 8 in relation to the constitution of Arizona. I now move to strike out that subsection. Beginning on page 14, line 21, I move to strike out all of subsection (c) ending in line 5, page 15.

The VICE PRESIDENT. Is there objection?

Mr. JOHNSON. Yes, Mr. President, there is a very decided objection to striking it out.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Arizona to the amendment.

Mr. HAYDEN. Mr. President, I offered this amendment in the hope that the Senator from California would accept it, by reason of statements made in the course of the debate last session, in which he stated that he considered the matter to be one of not very great consequence. I should like to have the clerk read the language which I propose to have stricken out.

The VICE PRESIDENT. The clerk will read, as requested.

The LEGISLATIVE CLERK. On page 14, beginning at line 21, strike out paragraph (c), as follows:

(c) Nothing in this act shall be deemed to waive any of the rights or powers reserved or granted to the United States by paragraph 7 of section 20 of the act providing for the admission of Arizona, approved June 20, 1910, and by the tenth paragraph of Article XX of the constitution of Arizona, but the Secretary of the Interior is authorized on behalf of the United States to exercise such of said rights and powers as may be necessary or convenient for the construction and use of the works herein authorized and for carrying out the purposes of this act.

Mr. HAYDEN. Mr. President, the two objects sought to be accomplished by this provision are, first, to take advantage of a certain section of the constitution of the State of Arizona which has since been repealed, and the other to take advantage of a provision in the enabling act reserving certain lands for water-power purposes in the State of Arizona if selected within a period of five years. I have here a letter from the Commissioner of the General Land Office which shows that none of the lands selected within that 5-year period are situated in the vicinity of the Black Canyon Dam, so that part of the enabling act, which might have been of value in the event that the dam was constructed at Boulder Canyon, is of no value at the present time. I ask that the clerk may read the letter from the Commissioner of the General Land Office.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

UNITED STATES DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, D. C., April 26, 1928.

Hon. CARL HAYDEN,
United States Senate.

MY DEAR SENATOR: In reply to your letter dated April 24, 1928, with reference to Tps. 29, 30, 31, 32 N., R. 23 W., and Tps. 29–32 N., R. 22 W., you are advised that the records of this office show that certain lands in T. 32 N., R. 22 W., were withdrawn for power purposes under the authority granted in the act admitting the State of Arizona into the Union, the date of said withdrawal being February 9, 1917. The other townships referred to are not affected by any withdrawal under said act. A carbon copy of this letter is inclosed herewith.

Very respectfully,

WILLIAM SPRY, *Commissioner.*

Mr. HAYDEN. Certain lands in the vicinity of Boulder Canyon, some 20 miles from the present site of the dam at Black Canyon, were withdrawn within the period specified in the enabling act. No lands in the vicinity of the dam now proposed to be built at Black Canyon were withdrawn. If the State of Arizona could claim those lands, which it could not under existing conditions, since they are withdrawn for water-power purposes under the general statute. Therefore there could be no advantage gained by the Secretary of the Interior under that provision in the enabling act.

The other provision with reference to the following section of the constitution of the State of Arizona which has subsequently been repealed by the people of the State is as follows:

There are hereby reserved to the United States with full acquiescence of this State all rights and powers for the carrying out of the provisions by the United States of the act of Congress entitled "An act appropriating the receipts from the sale and disposal of public lands in certain States and Territories to the construction and irrigation works for the reclamation of arid lands," approved June 17, 1902, and acts amendatory thereof or supplementary thereto, to the same extent as if this State had remained a Territory.

I do not believe there is a lawyer in the Senate who, after looking at the provision in the bill which I have asked to have stricken out, will say that it adds to or takes away any right or power or authority that the Secretary of the Interior would otherwise have. Any advantage which the Federal Government may have under the constitution of the State of Arizona and the enabling act under which Arizona was admitted into the Union must stand or fall regardless of any subsequent act of Congress.

The Supreme Court has passed upon that question completely in the case of Coyle against Smith. The State of Oklahoma, in its enabling act, was prohibited from moving the State capital from the city of Guthrie. Oklahoma, after the admission of the State, did move its capital, and the Supreme Court of the United States held that Congress had no power to place any such limitation upon the State, but the court went further and said that so far as the public lands were concerned, whether there was any mention made of such lands in the enabling act or not, Congress held control over them and could dispose of them regardless of any statement in the enabling act.

This item first appeared in the Swing-Johnson bill in 1926, about two years ago, and immediately created a most unfavorable reaction in the State of Arizona. The reaction went to such an extent that the legislature submitted an amendment to the constitution of the State of Arizona to a vote of the people and those provisions were repealed. No one in Arizona would ever have thought of doing anything of the kind if this provision had not been placed in the Swing-Johnson bill. It may be doubted whether the people of Arizona gained anything or lost anything by the action that they took. I do not think the proponents of the legislation can hope to gain anything by this provision in the bill. It is but a source of irritation; it is rubbing some more salt in the wound. In order to bring our States together in harmony, to have them exercise that amity and comity which should prevail between neighboring States in the Union, where they are interested in great projects such as the one contemplated in the bill now before us, there should be no attempt at any kind of coercion in the legislation. I am sure that if the lawyers

in the Senate will look at this provision they will say that what I have said is true.

Mr. PITTMAN. To what section does the Senator refer?

Mr. HAYDEN. Subsection (c) on page 14.

Mr. PITTMAN. I never had thought that the section had any legal effect whatever. It simply provides that—

Nothing in this act shall be deemed to waive or change any of the rights or powers reserved or granted to the United States by paragraph 7 of section 20 of the act providing for the admission of Arizona, approved June 20, 1910, and by the tenth paragraph of Article XX of the constitution of Arizona, but the Secretary of the Interior is authorized on behalf of the United States to exercise such of said rights and powers as may be necessary or convenient for the construction and use of the works herein authorized and for carrying out the purposes of this act.

Personally I never thought it had any effect one way or the other.

Mr. WALSH of Montana. Mr. President, will not the Senator from Arizona give us the provisions of the enabling act that are supposed to confer some rights upon the Government of the United States?

Mr. HAYDEN. I shall be glad to do so. They read as follows:

SEC. 28. There is hereby reserved to the United States and excepted from the operation of any and all grants made or confirmed by this act to said proposed State all land actually or prospectively valuable for the development of water power or power for hydroelectric use or transmission, and which shall be ascertained and designated by the Secretary of the Interior within five years after the proclamation of the President declaring the admission of the State; and no land so reserved and excepted shall be subject to any disposition whatsoever of said State, and any conveyance or transfer of such land by said State or any officer thereof shall be absolutely null and void within the period above named; and in lieu of the land so reserved to the United States and excepted from the operation of any of said grants there be, and is hereby, granted to the proposed State an equal quantity of land to be selected from land of the character named and in the manner prescribed in section 24 of this act.

Reservations of that character were made and the State of Arizona has selected new lands for all reservations made within the 5-year period. I have here a list of the new lands selected. That transaction is consummated.

Mr. WALSH of Montana. That provision of the enabling act by the logic of events has become nugatory?

Mr. HAYDEN. Absolutely. The only question was whether some lands selected under that provision were needed for the construction of the proposed Boulder Canyon Dam. If the dam had been built at its original site, it would have come within certain lands withdrawn within the 5-year limitation by the United States. But, as it turns out now, the site where the dam is to be located is on other public lands reserved under other acts of Congress and to which the State of Arizona could lay no claim. Under no circumstances would the provision in the enabling act be of any benefit to the Secretary of the Interior or to the United States. The Federal Government would have no right that it would not otherwise have.

I ask to have printed in the RECORD at this point a list of the lands reserved by the United States and a list of the lieu lands selected by the State of Arizona.

The VICE PRESIDENT. Without objection, it is so ordered.

The lists referred to are as follows:

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, September 23, 1914.

REGISTER AND RECEIVER,
Phoenix, Ariz.

SIRS: By Executive order of September 5, 1914, the hereinafter-described lands in Arizona, involving, with other lands not in your district, approximately 40,000 acres, were withdrawn from settlement, location, sale, or entry and reserved for water-power sites as power-site reserve No. 446, subject to the limitations, provisions, exceptions, and conditions contained in the act of Congress entitled "An act to authorize the President of the United States to make withdrawals of public lands in certain cases," approved June 25, 1910 (36 Stat. 847 as amended by the act of August 24, 1912 (37 Stat. 497)).

GILA AND SALT RIVER MERIDIAN, ARIZONA

All lands within a quarter of a mile of Colorado River within the following unsurveyed townships:

T. 33 N., R. 5 W.	T. 32 N., R. 17 W.
T. 34 N., R. 5 W.	T. 30 N., R. 18 W.
T. 32 N., R. 16 W.	T. 31 N., R. 18 W.
T. 33 N., R. 16 W.	T. 31 N., R. 19 W.
T. 30 N., R. 17 W.	T. 32 N., R. 19 W.
T. 31 N., R. 17 W.	

All lands located on the north or west bank of Colorado River within a quarter of a mile thereof in the following unsurveyed townships and portions of townships:

T. 36 N., R. 5 E., N. ½ of T.	T. 42 N., R. 9 E.
T. 37 N., R. 5 E.	T. 33 N., R. 6 W.
T. 37 N., R. 6 E.	T. 32 N., R. 7 W.
T. 38 N., R. 6 E.	T. 33 N., R. 7 W.
T. 39 N., R. 6 E.	T. 32 N., R. 8 W., S. ½ of T.
T. 39 N., R. 7 E.	T. 31 N., R. 9 W.
T. 40 N., R. 7 E.	T. 32 N., R. 9 W.
T. 40 N., R. 8 E.	T. 31 N., R. 10 W.
T. 41 N., R. 8 E.	T. 31 N., R. 15 W.
T. 41 N., R. 9 E.	T. 32 N., R. 15 W.

All lands on the south or east bank of Colorado River within a quarter of a mile thereof and not within the Hualpai Indian Reservation, within the following unsurveyed townships:

T. 32 N., R. 6 W.	T. 31 N., R. 15 W.
T. 33 N., R. 6 W.	T. 32 N., R. 15 W.

Note the withdrawals upon your records and advise this office of such action.

Very respectfully,

C. M. BRUCE,
Assistant Commissioner.

DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
Washington, August 17, 1914.

REGISTER AND RECEIVER,
Phoenix, Ariz.

SIRS: By departmental order of July 16, 1914, the lands in the hereinafter-described areas located along the Colorado River, involving approximately 38,000 acres, were withdrawn from location, sale, entry, allotment, or other appropriation, and reserved for water-power sites as power-site reserve No. 447, subject to the limitations, provisions, exceptions, and conditions contained in the act of Congress approved June 25, 1910 (36 Stat. 855), and it was directed that no trust patents issue.

ORDER OF WITHDRAWAL—POWER-SITE RESERVE NO. 447, COLORADO RIVER, ARIZ.

It is hereby ordered that the following-described lands, valuable for power sites, be, and the same are hereby, reserved from location, sale, entry, allotment, or other appropriation, in accordance with the provisions of sections 13 and 14 of the act approved June 25, 1910 (36 Stat. 855, 858), and that no trust or fee simple patent be issued as regards the lands until further orders.

GILA AND SALT RIVER MERIDIAN

All lands in the Hualpai and Navajo Indian Reservations within a quarter of a mile of Colorado River and within the following unsurveyed townships:

T. 36 N., R. 5 E.	T. 32 N., R. 9 W.
T. 37 N., R. 5 E.	T. 27 N., R. 10 W.
T. 37 N., R. 6 E.	T. 28 N., R. 10 W.
T. 38 N., R. 6 E.	T. 29 N., R. 10 W.
T. 38 N., R. 7 E.	T. 30 N., R. 10 W.
T. 39 N., R. 6 E.	T. 31 N., R. 10 W.
T. 39 N., R. 7 E.	T. 27 N., R. 11 W.
T. 40 N., R. 7 E.	T. 28 N., R. 11 W.
T. 40 N., R. 8 E.	T. 27 N., R. 12 W.
T. 41 N., R. 8 E.	T. 28 N., R. 12 W.
T. 41 N., R. 9 E.	T. 28 N., R. 13 W.
T. 42 N., R. 9 E.	T. 29 N., R. 13 W.
T. 33 N., R. 6 W.	T. 29 N., R. 14 W.
T. 32 N., R. 7 W.	T. 30 N., R. 14 W.
T. 33 N., R. 7 W.	T. 31 N., R. 14 W.
T. 32 N., R. 8 W.	T. 31 N., R. 15 W.
T. 30 N., R. 9 W.	T. 32 N., R. 15 W.
T. 31 N., R. 9 W.	

Make proper notations upon the records of your office and advise this office of such action.

Very respectfully,

C. M. BRUCE,
Acting Commissioner.

STATE LIEU SELECTIONS

The State land department advises that the State of Arizona has selected lands in lieu of the lands withdrawn by the Secretary of the Interior for power-site purposes along the Colorado River as follows:

Power-site reserve No. 446:

T. 30 N., R. 17 W., sec. 32.
T. 37 N., R. 6 E., secs. 2, 16, 32, 36.
T. 38 N., R. 6 E., sec. 36.
T. 39 N., R. 7 E., secs. 2, 16, 32, 36.
T. 40 N., R. 7 E., sec. 36.
T. 40 N., R. 8 E., secs. 2, 16, 32, 36.

Power-site reserve No. 446—Continued.
T. 41 N., R. 8 E., sec. 36.
T. 41 N., R. 9 E., secs. 2, 32, 36.
T. 33 N., R. 6 W., secs. 32, 36.
T. 32 N., R. 7 W., secs. 2, 16, 32, 36.
T. 33 N., R. 7 W., sec. 36.
T. 31 N., R. 9 W., secs. 32, 36.
T. 31 N., R. 15 W., sec. 16.
T. 32 N., R. 6 W., secs. 2, 16, 32, 36.
T. 33 N., R. 6 W., secs. 32, part 36.
T. 31 N., R. 15 W., sec. 16.
Power-site reserve No. 447:
T. 37 N., R. 6 E., sec. 36.
T. 38 N., R. 6 E., sec. 36.
T. 39 N., R. 7 E., secs. 2, 16, 32, 36.
T. 40 N., R. 7 E., sec. 36.
T. 40 N., R. 8 E., secs. 2, 16, 32, 36.
T. 41 N., R. 8 E., sec. 36.
T. 41 N., R. 9 E., secs. 2, 32, 36.
T. 33 N., R. 6 W., sec. 32.
T. 32 N., R. 7 W., secs. 32, 36.
T. 33 N., R. 7 W., sec. 36.
T. 32 N., R. 8 W., sec. 36.
T. 27 N., R. 10 W., secs. 2, 16, 32, 36.
T. 28 N., R. 10 W., secs. 2, 32 (208 acres).
T. 27 N., R. 11 W., secs. 32, 36.
T. 27 N., R. 12 W., secs. 16, 32, 36.
T. 28 N., R. 13 W., sec. 16.

Mr. HAYDEN. I also ask to have printed in the RECORD the act of the Legislature of Arizona submitting to the people of the State the question of the repeal of that section of the constitution of the State to which I have referred and the section itself, so that the record may be made complete.

The VICE PRESIDENT. Without objection, it is so ordered.

The matters referred to are as follows:

(1927 session laws of Arizona, chapter 110, pp. 416–418)

Be it enacted by the Legislature of the State of Arizona—

SECTION 1. It is hereby proposed by the Eighth Legislature of the State of Arizona to amend the constitution of the State of Arizona, a majority of the members elected to each of the two houses of said legislature approving thereof and such approval having been entered on the journal of each house, together with the ayes and nays thereon, by amending the fifth paragraph of article 10 of said constitution to read as follows:

"Fifth. The lands and other property belonging to citizens of the United States residing without this State shall never be taxed at a higher rate than the lands and other property situated within this State belonging to residents thereof, and no taxes shall be imposed by this State on any lands or other property within an Indian reservation owned or held by any Indian; but nothing herein shall preclude the State from taxing, as other lands and other property are taxed, and lands and other property outside of an Indian reservation owned or held by any Indian, save and except such lands as have been granted or acquired as aforesaid or as may be granted or confirmed to any Indian or Indians under any act of Congress."

SEC. 2. It is hereby further proposed by the Eighth Legislature of the State of Arizona to amend the constitution of the State of Arizona, a majority of the members elected to each of the two houses of said legislature approving thereof and such approval having been entered on the journal of each house, together with the yeas and nays thereon, by abrogating, repealing, and striking therefrom the tenth paragraph of said article of said constitution, reading as follows:

"Tenth. There are hereby reserved to the United States, with full acquiescence of this State, all the rights and powers for the carrying out of the provisions by the United States of the act of Congress entitled 'An act appropriating the receipts from the sale and disposal of public lands in certain States and Territories to the construction of irrigation works for the reclamation of arid lands,' approved June 17, 1902, and acts amendatory thereof or supplementary thereto, to the same extent as if this State had remained a Territory."

SEC. 3. The said proposals to amend the constitution shall be submitted to the qualified electors in accordance with the provisions of law, of the constitution, and of this proposal at a special election hereby called and ordered by the eighth legislature, to be held on Tuesday, the 31st day of May, 1927.

Mr. HAYDEN. In connection therewith I should like to have included in the RECORD a statement of the reasons why the constitution of Arizona should be changed, made by Mr. A. H. Favour, an eminent attorney of the State of Arizona, who reviewed the various cases decided by the Supreme Court of the United States with respect to the right of Congress to limit a State in an enabling act passed by Congress upon admission of the State.

The VICE PRESIDENT. Without objection, it is so ordered.

The statement is as follows:

REASONS GIVEN WHY CONSTITUTION OF ARIZONA MUST BE CHANGED FOR COLORADO RIVER RIGHTS

In the matter of the repeal of sections 5 and 10, Article XX of the Arizona constitution.

STATEMENT OF CASE

The only provision in the Constitution of the United States with reference to the admission of new States is found in Article IV, subdivisions 3 and 4. These sections read as follows:

"SEC. 3. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State; nor any State be formed by the junction of two or more States, or parts of States, without the consent of the legislatures of the States concerned as well as of the Congress.

"The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

"SEC. 4. The United States shall guarantee to every State in this Union a republican form of government and shall protect each of them against invasion; and on application of the legislature, or of the executive (when the legislature can not be convened) against domestic violence."

The Congress of the United States passed an enabling act, approved June 20, 1910 (30 Stat. L. 557, ch. 310), wherein it was provided the terms and conditions upon which Arizona might become a member of the Union. Among other conditions was part of section which read as follows:

"The constitution shall be republican in form and make no distinction in civil or political rights on account of race or color, and shall not be repugnant to the Constitution of the United States and the principles of the Declaration of Independence.

"And said convention shall provide, by an ordinance irrevocable without the consent of the United States and the people of said State—"

Thereafter were set out nine specific items which the State of Arizona were to include in their acceptance, among which was a part of subdivision second, which reads as follows:

"That the lands and other property belonging to citizens of the United States residing without the said State shall never be taxed at a higher rate than the lands and other property belonging to residents thereof; that no taxes shall be imposed by the State upon lands or property therein belonging to or which may hereafter be acquired by the United States or reserved for its use; but nothing herein, or in the ordinance herein provided for, shall preclude the said State from taxing, as other lands and other property are taxed, any lands and other property outside of an Indian reservation owned or held by any Indian, save and except such lands as have been granted or acquired as aforesaid or as may be granted or confirmed to any Indian or Indians under any act of Congress, but said ordinance shall provide that all such lands shall be exempt from taxation by said State so long and to such extent as Congress has prescribed or may hereafter prescribe."

And subdivision seventh, which reads as follows:

"Seventh. That there be and are reserved to the United States, with full acquiesence of the State, all rights and powers for the carrying out of the provisions by the United States of the act of Congress entitled 'An act appropriating the receipts from the sale and disposal of public lands in certain States and Territories to the construction of irrigation works for the reclamation of arid lands,' approved June 17, 1902, and acts amendatory thereof or supplementary thereto, to the same extent as if said State had remained a Territory."

Subdivision ninth, the second paragraph, contains the following provision:

"All of which ordinance described in this section shall, by proper reference, be made a part of any constitution that shall be formed hereunder, in such terms as shall postively preclude the making of any future constitutional amendment of any change or abrogation of the said ordinance in whole or in part without the consent of Congress."

The enabling act provided for a proclamation by the President, when all conditions were complied with: "The proposed State of Arizona shall be deemed admitted by Congress into the Union, by virtue of this act, on an equal footing with the other States." This is the usual condition that has been set out in practically every enabling act by which a State has been admitted into the Union.

Following the passage of the enabling act, and according to the procedure set out therein, a constitutional convention was held in Arizona and it adopted the constitution. The twentieth article of this constitution entitled "Ordinance," is practically a restatement of section 20 of the enabling act. Article XX starts out with the following language: "The following ordinance shall be deemed irrevocable without the consent of the United States and the people of this State." Then follow the 12 sections and ends with section 13, of which the language is as follows:

"Thirteenth. This ordinance is hereby made a part of the constitution of the State of Arizona, and no future constitutional amendment shall be made which in any manner changes or abrogates this ordinance in whole or in part without the consent of Congress."

Now the question comes up, Can any one of these sections be repealed by the people of the State of Arizona as the constitution is amended or added to or repealed, and particularly sections fifth and tenth by the people without the consent of the United States? These sections read as follows:

"Fifth. The lands and other property belonging to citizens of the United States residing without this State shall never be taxed at a higher rate than the lands and other property situated in this State belonging to residents thereof, and no taxes shall be imposed by this State upon lands or property situated in the State belonging to or which may hereafter be acquired by the United States or reserved for its use, but nothing herein shall preclude the State from taxing as other lands and other property are taxed, any lands and other property outside of an Indian reservation owned or held by any Indian, save and except such lands as have been granted or acquired as aforesaid, or as may be granted or confirmed to any Indian or Indians under any act of Congress, but all such lands shall be exempt from taxation so long and to such extent as Congress has prescribed or may hereafter prescribe."

"Tenth. There are hereby reserved to the United States, with full acquiescence of this State, all rights and powers for the carrying out of the provisions by the United States of the act of Congress entitled 'An act appropriating the receipts from the sale and disposal of public lands in certain States and Territories to the construction of irrigation works for the reclamation of arid lands,' approved June 17, 1902, and acts amendatory thereof or supplementary thereto to the same extent as if this State had remained a Territory."

LAW

A number of cases involving this same question have come before the United States Supreme Court. The leading case on this subject is that of Coyle *v.* Smith (221 U. S. 559, 55 L. ed. 853). In this case Oklahoma was admitted into the Union in very much the same method that Arizona became a member. In 1906 an enabling act was passed by Congress which laid down certain conditions which Oklahoma was to accept by irrevocable ordinance before it came into the Union. Among these conditions was one that the capital should be located at Guthrie, and no vote should be taken to change its location from that place until the year 1913. The constitutional convention by which Oklahoma became a part of the Union irrevocably accepted the terms and conditions of the enabling act, including this one about the capitol being located at Guthrie. The enabling act contained the usual provision that Oklahoma was to be admitted on an equal footing with the original States. After the constitutional convention the legislature met and, by proper legislation, moved the capital from Guthrie to Oklahoma City, prior to 1913, and in violation to this part of the enabling act and Oklahoma's acceptance. The question was brought before the Supreme Court of the United States by an appeal from the decision of the Supreme Court of Oklahoma upholding the said statute of removal as constitutional and abrogating the provision in the enabling act and the State's acceptance. There is an interesting parallel between this case and that of Arizona, in that we find subdivision sixth of section 20 of the Arizona enabling act provides that the State capital shall be located at Phoenix and that no election shall be taken prior to the year 1925 for the removal of said State capital therefrom, and in Article XX of the Arizona constitution the ninth section accepts that provision.

The State of Oklahoma claimed that the Constitution of the United States set out in Article IV, subdivisions 3 and 4, a manner in which a new State might be admitted and that Congress was without power to impose any other conditions by which the State might become a part of the Union. On the other hand, it was contended by the parties to that suit that this was a solemn contract entered into by the State of Oklahoma and it was bound thereby.

Mr. Justice Lurton, of the United States Supreme Court, in deciding that question, held that the provision of the enabling act was a nullity and, in effect, not binding upon Oklahoma, and that Oklahoma was within its rights when it moved its State capital. The decision was that these various conditions that have been imposed upon the States in the enabling act, were binding only in so far as Congress would have the right to control the subject matter in the State of Oklahoma after admission, as in any other State. That is to say, that the provision in section 20 of the enabling act of Arizona, which required in the fifth subdivision that a State shall never enact a law restricting or abridging the right of suffrage on account of race, color, or previous condition of servitude, etc., is binding in Arizona, not from the fact that it was imposed on Arizona in the enabling act and accepted by the constitution, but rather from the fact it is a restatement of Section I, Article XV, amendments to the United States Constitution, and therefore it would be binding upon all States.

In discussing this matter, Judge Lurton set out the power of Congress with reference to the admission of new States, as follows:

"The power is to admit 'new States into this Union.'

"'This Union' was and is a Union of States, equal in power, dignity, and authority, each competent to exert that residuum of sovereignty not delegated to the United States by the Constitution itself. To maintain otherwise would be to say that the Union, through the power of Congress to admit new States, might come to be a Union of States unequal in power, as including States whose powers were restricted only by the Constitution, with others whose powers had been further restricted by an act of Congress accepted as a condition of admission. Thus it would result, first, that the powers of Congress would not be defined by the Constitution alone, but in respect to new State, enlarged or restricted by the conditions imposed upon new States by its own legislation admitting them into the Union; and, second, that such new States might not exercise all of the powers which had not been delegated by the Constitution, but only such as had not been further bargained away as conditions of admission."

He then set out an analysis of the subject that was before the court for decision in the following manner:

"In considering the decisions of this court bearing upon the question, we must distinguish, first, between provisions which are fulfilled by the admission of the State; second, between compacts or affirmative legislation intended to operate in future, which are within the scope of the conceded powers of Congress over the subject; and, third, compacts or affirmative legislation which operates to restrict the powers of such new State in respect of matters which would otherwise be exclusively within the sphere of State power."

He then went on and reviewed the decisions that have been rendered since the first States were admitted to the Union, and their bearing on the present case, and finally summed it up in the following manner:

"But in every case such legislation would derive its force not from any agreement or compact with the proposed new State, nor by reason of its acceptance of such enactment as a term of admission, but solely because the power of Congress extended to the subject, and therefore would not operate to restrict the State's legislative power in respect of any matter which was not plainly within the regulating power of Congress. Willamette Iron Bridge Co. *v.* Hatch (125 U. S. 1, 9, 31 L. Ed. 629, 632, 8 Sup. Ct. Rep. 811; Pollard *v.* Hagan, supra.)"

In quoting the decisions from Nebraska, Judge Lurton summed up the net result of this acceptance in this way: "All that was meant by these words was the State acknowledged, as every other State has done, the supremacy of the Federal Constitution, and if the provisions set out were not within such powers, then they are not binding upon the State. He finally summed up the reasoning in the decisions in the quotation from Lane County *v.* Oregon (7 Wall. 76, 19 L. Ed. 104), as follows:

"The people of the United States constitute one nation, under one government; and this Government, within the scope of the powers with which it is invested, is supreme. On the other hand, the people of each State compose a State, having its own government and endowed with all the functions essential to separate and independent existence. The States disunited might continue to exist. Without the States in union there could be no such political body as the United States."

"To this we may add that the constitutional equality of the States is essential to the harmonious operation of the scheme upon which the Republic was organized. When the equality disappears we may remain a free people, but the Union will not be the Union of the Constitution."

It was squarely decided in this case that Oklahoma had the right to ignore that provision of the enabling act and the acceptance, so far as that particular section was concerned. The principle set down would govern as to the others.

The same principle came up in the case of the United States against Sandoval (231 U. S. 28, 58 L. ed. 107) was reaffirmed. This case involved the same enabling act by which Arizona became a part of the Union, except that it applied to the section which affected New Mexico. Sections 1 to 18 of this act refer exclusively to New Mexico, but contain very many of the same provisions and conditions as those applying to Arizona. The act provided that New Mexico must accept by ordinance certain conditions, one of which was that no one should sell, barter, or give intoxicating liquor to Indians or to introduce it into Indian country. New Mexico adopted the Constitution and accepted by irrevocable ordinance, those provisions of the enabling act. Thereafter, Sandoval was convicted of introducing liquor into Indian country. The country into which Sandoval had introduced the liquor had been previously held by the New Mexico Supreme Court not to be Indian country and the indictment had been dismissed. An appeal was taken to the United States Supreme Court. The question was, Did the enabling act and the Constitution change the previously decided law of New Mexico?

The principle laid down in the Coyle case, supra, was restated by Mr. Justice Van Devanter in deciding the Sandoval case, on page 111, as follows:

"As was said by this court in Coyle *v.* Smith (221 U. S. 559, 574, 55 L. ed. 853, 860, 31 Sup. Ct. Rep. 688), 'it may well happen that Congress should embrace in an enactment introducing a new State into the Union, legislation intended as a regulation of commerce among the States, or with Indian tribes situated within the limits of such new State, or regulations touching the sole care and disposition of the public lands or reservations therein, which might be upheld as legis-

lation within the sphere of the plain power of Congress. But in every such case such legislation would derive its force not from any agreement or compact with the proposed new State, nor by reason of its acceptance of such enactment as a term of admission, but solely because the power of Congress extended to the subject, and therefore would not operate to restrict the State's legislative power in respect of any matter which was not plainly within the regulating power of Congress.' To the same effect are Pollard *v.* Hagan (3 How. 212, 224, 225, 229, 11 L. ed. 565, 571–574; ex parte Webb, 225 U. S. 663, 683, 690, 691, 56 L. ed. 1248, 1256, 1259, 1260, 32 Sup. Ct. Rep. 769).

"The question to be considered, then, is whether the status of the Pueblo Indians and their lands is such that Congress competently can prohibit the introduction of intoxicating liquor into those lands notwithstanding the admission of New Mexico to statehood."

In the Sandoval case the question was reviewed at some length as to just what was the power of Congress with reference to the legislation as to these Indians. It was held, that notwithstanding the enabling act and the acceptance, Congress had the right to determine this question, and it was a legitimate exercise of the power of Congress and within its jurisdiction, and the State of New Mexico never had any right to decide otherwise. The court directed that the judgment be reversed and to proceed on the indictment to prosecute Sandoval.

The Supreme Court of the United States decided in the Sandoval case that the part of the enabling act of New Mexico relating to the sale, barter, and the giving of intoxicating liquor to Indians, and the introduction of liquor into Indian Territory, was a subject which Congress had the right to control, or, as Judge Lurton said in the Coyle case, "solely because the powers of Congress extended to the subject."

The Coyle case and the Sandoval case set out the rule that all conditions in the enabling act and the acceptance are not of themselves binding on Arizona, except so far as the matters are within the power of Congress to control, irrespective of the enabling act and the acceptance. The subject matter of the fifth and tenth sections of Article XX of the Constitution must be examined with this rule in mind. If Congress has the right to control such subject matter in any State, a repeal would be of no avail; if not, then a repeal would be within the right and power of the people of Arizona.

APPLICATION

The Swing-Johnson bill makes the repeal of parts of Article XX important at this time. If for the benefit of a sister State—Arizona—the United States Government indirectly goes into the power business it should have the right to tax the physical property engaged in this power business within Arizona, although the title to the property may stand in the United States. That part of the fifth section of Article XX might be held to stop Arizona from making any such claim if Arizona should make the claim without repealing that part of the section.

The only part of the fifth paragraph which calls for repeal is that which reads as follows:

"No taxes shall be imposed by State upon lands or property situate in the State, belonging to or which may hereafter be acquired by the United States, or reserved for its use."

The remaining provisions in the paragraph are practically a reenactment of the fourteenth amendment to the United States Constitution, or relate to the reserved powers of the Congress of the United States as to the regulation of the Indian. It would therefore seem advisable to pass an act by the eighth legislature, submitting to the people at a special election, the fifth paragraph with the part deleted which is referred to above.

The tenth section of the twentieth article should be repealed in its entirety by an act and submission to the people at a special election. The Swing-Johnson bill refers to the section as part of the enabling act and our Constitution, and an attempt has been and will continue to be made to take advantage of the fact as binding Arizona into the conditions of that bill.

In conclusion, it would seem that it would be within the constitutional rights of Arizona, and would be within the moral rights to repeal these two sections for the following reason:

(1) The constitution of Arizona provides, section 3, Article II: "The Constitution of the United States is the supreme law of the land" and by the Constitution of the United States, Arizona is a sovereign State on a parity with every other State of the Union, at this time, except for the ordinance made a part of our Constitution as Article XX.

(2) When the enabling act was passed by Congress, Arizona was a Territory and she was not free to do otherwise than accept the conditions of the enabling act. It was forced on her as a Territory but is not binding on her as a State.

(3) Each provision of Article XX of the constitution of Arizona reenacting these particular mandates in the enabling act in so far as they are not supported by the Constitution of the United States are unconstitutional, not binding upon the State of Arizona, and Arizona has no more moral obligation to carry out than to enforce any other unconstitutional law, and lastly, whatever moral obligation there might be to carry out the provisions of this offer and acceptance as provided in the enabling act and in the constitution of Arizona, are of little weight, since a sister State, California, is attempting to take advantage of these facts to advance her own interests. When we weigh such equities, it calls for a repudiation of the binding effect of the section.

Respectfully submitted.

A. H. FAVOUR,
Senator from Yavapai.

Mr. SHORTRIDGE. Mr. President, the proposition may be very briefly stated. I caused to be published in the RECORD—Senators will find the matter on page 318—the provision in the act admitting Arizona into the Union, which was passed June 20, 1910. I also caused to be printed Article XX of the constitution of Arizona. I need not take up the time of the Senate to read them again. Thereafter, and within the time provided, the Government exercised its reserved right specifically mentioned in the enabling act and in the constitution of the State. Arizona rapped at the door and craved admittance into the Union. It was admitted upon certain terms and conditions, which took on the form of a contract, an agreement, honorable and proper. The Government of the United States has observed that agreement, that contract, which, I repeat, was honorable to both parties and just and prudent and wise.

Now, what is Arizona asking? What has it done? I regret to say that it has, I think, in the past attempted to violate that primary agreement, and I think it is now asking to be relieved from that agreement. Frankly, and with the respect due to that State——

Mr. ASHURST. Mr. President, I know the Senator has only a moment, but will he yield to me?

Mr. SHORTRIDGE. I will take some of my 15 minutes if it be necessary, but what is the question? The Senator will pardon me.

Mr. ASHURST. The able Senator has stated that Arizona has attempted to violate her agreement. On the contrary, we are certain that the Federal Government did not make the reservation within the five years and that the Federal Government is attempting to violate its own agreement and take advantage of its own laches. Of course, that can never be settled except by the court of last resort. We are not attempting to violate our agreement, but since the Federal Government did not make the reservation within the time, we are not bound by it. That is all. I thank the Senator. I will interrupt him no more.

Mr. SHORTRIDGE. Mr. President, the Senator from Arizona the other day made the same remark in substance. I caused to be printed in the RECORD the documents showing the official acts of the Federal Government, and it has always been claimed by the Government, I venture to claim to-day, that the Government took appropriate official action within the time provided by the constitution of Arizona and in the act admitting Arizona into the Union.

Mr. ASHURST. Mr. President, will the Senator from California again yield to me?

Mr. SHORTRIDGE. Certainly.

Mr. ASHURST. Of course, the Senator from California and every other Senator is justified in reposing reliance on the printed word of the Government, but in so far as the record says the Government "got under the wire" in time, the record is a forgery which was committed in the General Land Office. The date is not right; but after the Government had failed to come in within the time, it prepared a document and dated it back, so that it could say to the wayfaring man, "We got under the wire"—if Senators will pardon that expression—"within the time." Arizona has never "welched"—everybody here knows what that is—and Arizona is not attempting to get out of her agreements or contracts. The Federal Government, through its delay, its remissness, failed to reserve the lands within the five years. It then forged a document to make it appear and to pretend that it had gotten in within the five years. We do not yield any respect to forged documents.

Mr. SHORTRIDGE. Mr. President, I am not here now to defend the Government as against the charge made by the Senator from Arizona, but, as a Senator, I am warranted in presuming the truth of the official documents which are brought here to our official attention.

Mr. ASHURST. The Senator is justified in presuming that they are correct.

Mr. SHORTRIDGE. We are entitled to assume and presume their correctness. In point of truth, I am not able to enter into a controversy with the Senator as to the facts, but on behalf of the Government and on behalf of those who represented it, I respectfully deny—and without adjective or adverb—the statement or charge of the Senator from Arizona, more or less emotional for the moment. The contention is, however——

Mr. HAYDEN. Mr. President, will the Senator from California yield to me?

Mr. SHORTRIDGE. Pardon me for just a moment. The contention now is that the Government never kept the agreement. The proposed amendment of the Senator, I presume, proceeded upon the theory that the Government had observed the agreement and that Arizona wanted to be relieved.

Mr. CARAWAY. Mr. President, may I ask the Senator from California a question?

Mr. SHORTRIDGE. Certainly.

Mr. CARAWAY. I am perfectly frank to say that I myself do not see the materiality of this matter, any way. What harm, if the amendment be adopted, would come to the project? I fail to understand that.

Mr. SHORTRIDGE. Out of abundance of caution, I say to the Senate, it was deemed wise to put this provision in the bill, a provision to the effect nothing in the act should be construed as a waiver by the Federal Government of any rights, whatever it might have, growing out of paragraph 7 of section 20 of the act for the admission of Arizona and by the tenth paragraph of Article XX of the constitution of Arizona.

Mr. CARAWAY. If the Senator will be patient with me, what I am trying to find out is this: Is there any contention that the Government is about to lose some tangible rights under this bill?

Mr. SHORTRIDGE. I will answer the Senator with perfect candor. I know of no rights which it could lose, if it has them, but it has been asserted here again and yet again that it would be prudent, it would be judicious specifically to set out that no right was waived by the passage of this bill.

Mr. CARAWAY. In the interest of harmony and since the Federal Government is the stronger of the two agencies, would it not be the wiser course to protect the State against some possible harm that might come to it by leaving the language as it is? It can not affect the construction of the dam or any activities that the Senator wants under it.

Mr. SHORTRIDGE. If I grasp the force of the Senator's question and observation, I think the language of the bill as it is now should remain; that it does not injure anybody, but preserves, out of abundance of caution, the status quo of rights which may exist.

Mr. CARAWAY. What I am trying to get at, though possibly not very happily, is this: The Senator from Arizona thinks that it affects the rights of Arizona.

Mr. SHORTRIDGE. Evidently he does.

Mr. CARAWAY. Yes. Of course the Senator from California does not think so, nor does he believe the rights of the Federal Government would be jeopardized if that language in the bill were stricken out. I heard him use the expression "out of abundance of caution." What I am trying to say—and I repeat perhaps I am not saying it very happily—is that where there is a possible right of a State and a possible right of the Federal Government, would it not be more generous and wiser to be certain to protect the right of the State in enacting legislation because the Federal Government is the agency which is enacting it? That is the way it appeals to me.

Mr. SHORTRIDGE. Theoretically, some preference might be given to the supposedly weaker of the two, but before a court, in my mind, they would stand equal.

Mr. CARAWAY. At least the Federal Government is exercising the authority to enact this legislation.

Mr. SHORTRIDGE. Yes.

Mr. CARAWAY. The State of Arizona is not asked to assent to it. It is the stronger, the centralized government, that is proposing to do it. Under those circumstances, if the question should arise whether the Federal Government or the State of Arizona would most suffer, would it not be the proper thing to do to guard the right of the State, which is not moving in the case at all?

Mr. SHORTRIDGE. There is another thought which with me is controlling. During the earlier hearings on this bill, some time ago, I caused this matter to be brought to the attention of the committee, and in the records of the committee these provisions will be found.

Mr. CARAWAY. I understand that, and the Senator, I am sure, actually sets forth the reasons that impelled the committee so to act. I have such a very great regard for the highly sensitive attitude of the Senator toward the rights of the people who may be affected by legislation that it appeared to me, inasmuch as Arizona is not moving and the Federal Government is moving in the matter, if the rights of either might be jeopardized, the rights of the State ought not to be, because it is not asking for the legislation.

Mr. SHORTRIDGE. My view, to sum up, is this, that here was a contract entered into between a State about to enter into the Union——

Mr. CARAWAY. And with all due deference, the Senator absolutely knows that it had to accept the conditions imposed by Congress.

Mr. SHORTRIDGE. I grant that.

Mr. CARAWAY. It is not a contract in the sense that it was voluntarily entered into.

Mr. SHORTRIDGE. It was very willingly entered into.

Mr. CARAWAY. That would be a conclusion.

Mr. SHORTRIDGE. It was very willingly entered into because the pioneer men and women of the then Territory of Arizona were anxious to have their form of government changed into that of a State and to become a member of the Union.

Mr. CARAWAY. They——

Mr. SHORTRIDGE. Pardon me for just a second.

Mr. CARAWAY. Certainly; and then I hope the Senator will pardon me.

Mr. SHORTRIDGE. Thereupon the act admitting Arizona contained this provision.

Mr. CARAWAY. And Arizona could get into the Union only by accepting it.

Mr. SHORTRIDGE. Arizona proceeded in good faith to adopt her constitution. The Government, I think, in good faith exercised its rights under the contract; and I think that, as of to-day, that State through her Senators is asking to be relieved from that contract——

Mr. CARAWAY. I think I understand the Senator.

Mr. SHORTRIDGE. And they couple it now with the charge of fraud on the part of the Nation.

Mr. CARAWAY. Here is what I am coming back to again: I entertain very decided opinions along this line. Where the Federal Government deals with a Territory that seeks admission, and it imposes conditions which are sometimes both harsh and unjust, the Territory must accept them to get into the Union. At one time we argued with the Government in my State. The North said we could not go out of the Union, and then they said we were out and we could not get back unless we would ratify certain amendments to the Constitution, which could only be done by States. They said at first that we could not go out, and then that we were out and could not get back.

Mr. SHORTRIDGE. I have always contended that you never were out, and I rejoice that you are in.

Mr. CARAWAY. We were compelled to ratify certain amendments to the Constitution before we could get back. The Senator will agree with me that sometimes the stronger of the two imposes upon the weaker unreasonable conditions. When we are dealing with such a situation I am always very tender, indeed, of the rights of a State, whether it be California or Arizona. I never saw either of those States; there have been so many places where I would rather go that I have never gone to either one of them——

The PRESIDING OFFICER. The time of the Senator from California has expired.

Mr. SHORTRIDGE. On the amendment?

The PRESIDING OFFICER. On the amendment.

Mr. SHORTRIDGE. Then I will take a few moments on the bill itself.

The PRESIDING OFFICER. The Senator from California is recognized on the bill.

Mr. SHORTRIDGE. Solely to reply to my friend from Arkansas.

Mr. CARAWAY. I did not mean to consume so much of the Senator's time.

Mr. SHORTRIDGE. The Senator from Arkansas really consumed most of my time, and it was much better consumed than if I had been speaking.

No one, Mr. President, I venture to say, has more pronounced, definite, fixed notions in respect of the rights of the States of the Union than I have.

Mr. CARAWAY. I am conscious of that. I have a very great respect for the Senator.

Mr. SHORTRIDGE. I once advanced some views here with respect to the right of a State to choose its own Senators; and in other tribunals I have stood up for the rights of States to legislate in respect the ownership, the leasing their own land. But with me to-day the point is not a question of preferring the weak or favoring the strong. I think there was an honorable agreement entered into. I think it was wise. I see nothing in it that is unjust, nothing whatever; wherefore I think the bill should remain in the form in which it was framed and reported by the committee.

Mr. CARAWAY. I only interrupted the Senator because I thought he was departing from the doctrine he has so ably maintained heretofore, and I regretted to see him do so.

Mr. WALSH of Montana. Mr. President, I have before me now the provision of the enabling act, which reads as follows:

> There is hereby reserved to the United States and excepted from the operation of any and all grants made or confirmed by this act to said proposed State all land actually or prospectively valuable for the development of water power or power for hydroelectric use or transmission, which shall be ascertained and designated by the Secretary of the Interior within five years after the proclamation of the President declaring the admission of the State.

That was the right reserved to the United States. Grants of land were made; and although those lands were selected by the State of Arizona, yet the United States might, notwithstanding that selection, at any time within five years thereafter, reserve those lands for water-power development. Whether the State of Arizona did or did not exercise that right with respect to certain lands within the period of five years is entirely irrelevant now. Whatever right the United States had in the matter expired more than 10 years ago. What right has the United States now under that act that could possibly be waived by this bill?

Mr. SHORTRIDGE. Mr. President, the Federal Government may have so acted as to acquire rights which became vested and continue vested.

Mr. WALSH of Montana. Of course they continue vested. The Government of the United States has no more rights. It has withdrawn those lands, so that the State of Arizona did not get them, but got lieu lands in place of them. All of its rights are gone. There are not any more rights in the United States. It is expressly limited to the exercise of its rights within five years, so that this being an annoyance to the people of Arizona, apparently, and since there are no possible rights in the United States, why should we say here that the United States reserves some rights under that act?

Mr. SHORTRIDGE. The bill does not say so. The bill says, if the Senator will be good enough to turn to the language——

Mr. WALSH of Montana. It says:

> Nothing in this act shall be deemed to waive or change any of the rights or powers reserved or granted to the United States by paragraph 7—

And so forth.

Mr. SHORTRIDGE. All right. Then, if the United States has no rights, no harm is done; but, if she has rights, this provision is placed in the bill out of abundance of caution and to make it plain that she waives no rights.

Mr. WALSH of Montana. But let the Senator tell us what rights the United States has that could possibly be waived?

Mr. SHORTRIDGE. The rights which grew out of the exercise of the reserved power.

Mr. WALSH of Montana. But the right granted is the right to reserve these lands; and if the Government did not exercise that right within five years with respect to any lands, it has not any more rights under this act.

Mr. SHORTRIDGE. The Government did exercise the power, and made certain reservations.

Mr. WALSH of Montana. Exactly; so that it has those rights.

Mr. SHORTRIDGE. Why does the Senator insist, then, that the Government has no rights?

Mr. WALSH of Montana. It has no further rights under this act. It has exercised all the right it has. It has withdrawn lands, and the State of Arizona has lieu lands in place of them. The act is functus officio.

Mr. SHORTRIDGE. It may be quite unnecessary; but I do not follow the Senator's reasoning when he insists that the Government now has no rights. The Government had a right to do something.

Mr. WALSH of Montana. It had a right to withdraw the lands, and it did that. That ends it.

Mr. SHORTRIDGE. We wish nothing in this bill which will be construed as impairing the rights of the Government, rights which the Government acquired by the timely exercise of the right to withdraw certain lands.

Mr. WALSH of Montana. The rights of the Government have already been fixed. The right granted by this act is the right to withdraw lands.

Mr. SHORTRIDGE. Certainly.

Mr. WALSH of Montana. And we propose not to waive any rights that the Government has to withdraw lands; but it has not any rights to withdraw lands, and has not had for 10 years.

Mr. SHORTRIDGE. But it did withdraw lands, and it may be argued——

Mr. WALSH of Montana. I decline to discuss the thing further.

Mr. SHORTRIDGE. I did not provoke this discussion with the Senator. I did not start it, nor do I care to prolong it.

Mr. ASHURST. Mr. President, the question which has almost as much importance as the lands involved is as follows: Is Arizona attempting to escape from or avoid any of the provisions of the enabling act?

Mr. SHORTRIDGE. Yes.

Mr. ASHURST. Mr. President, I read from the enabling act the operative part of the provision in question:

> There is hereby reserved to the United States and excepted from the operation of any and all grants made or confirmed by this act to said proposed State all land actually or prospectively valuable for the development of water power or power for hydroelectric use or transmission, which shall be ascertained and designated by the Secretary of the Interior within five years after the proclamation of the President declaring the admission of the State.

Did the Federal Government, through its appropriate officers, within the five years from and after the date of the issuance of the President's proclamation, withdraw the lands in question?

Mr. SHORTRIDGE. That is a question of fact; is it not?

Mr. ASHURST. Yes.

I read from a dispatch to the Los Angeles Times. Let me say that whether we quarrel with the Los Angeles Times or not over its political philosophy, it is a very enterprising journal and makes a reasonable attempt to be accurate. Although it for more than 20 years has opposed my political pretensions, I am willing to say that it attempts to be accurate.

I quote from a dispatch to the Los Angeles Times dated December 18, 1924:

> In the United States Land Office there has been found an interesting error on the notation of the tract books covering the Colorado River area, this being a statement that withdrawal of water-power sites by the National Government has been made on February 19, 1917. The real date of withdrawal has been found to have been February 9, a matter of large importance as affecting Government ownership of all the Colorado River power dam sites. The President of the United States issued his proclamation February 14, 1912, and the 5-year limitation would have expired February 14, 1917.

The officials of the Government on February 19, or five days after the time expired, learning of their remissness, delay, and neglect to withdraw the lands in question within the time, erased the numeral "1," leaving the numeral "9"; and by the act of erasing the numeral "1" in front of the "9" they caused the record apparently to say that the withdrawal was made within the time. But by the erasure of the numeral "1" which was an improper, if not an unlawful act, the Federal Government claims that it withdrew the lands five days before the time expired.

It is of no utility to say that Arizona has failed to keep her agreements. I am not charging that the State of California, through its Senators and Representatives, knew of or had the slightest suspicion of this unlawful act; but it does not become those who base their title upon a fabricated entry to look at us and cry out "Welsher!" Clean your own hands of improper acts before you accuse others of not keeping their compacts with the Federal Government.

When the Federal Government failed to make the withdrawals within the five years, Arizona was no longer bound.

This dispatch says, further:

> The President issued his proclamation on February 14, 1912, admitting Arizona. The 5-year limitation expired February 14, 1907. The tract books would indicate that the reservation was made five days too late.

I am reading from page 238 of a work entitled "The Colorado River Compact," by Renel Leslie Olson.

Mr. WALSH of Montana. Mr. President, does the Senator agree that it does not make a bit of difference whether it was within or without the time, so far as this question is concerned?

Mr. ASHURST. I do; and if the Government did not make the withdrawal within the time, it is now too late.

Mr. WALSH of Montana. And if it did not, the time is gone?

Mr. ASHURST. If it did not, the time is gone.

Mr. WALSH of Montana. But is it material for this matter that is before us now?

Mr. ASHURST. No.

The PRESIDING OFFICER (Mr. FESS in the chair). The question is on the amendment offered by the Senator from Arizona [Mr. ASHURST] to the amendment in the nature of a substitute.

The amendment to the amendment was agreed to.

Mr. JOHNSON. Mr. President, I believe the Senator from Utah [Mr. KING] has certain amendments to offer.

Mr. KING. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. At the proper place in the bill it is proposed to insert the following paragraph:

Nothing herein shall be construed as interfering with such rights as the States now have either to the waters within their borders or to adopt such policies and enact such laws as they may deem necessary with respect to the appropriation, control, and use of waters within their borders, except as modified by the Colorado River compact or other interstate agreement.

Mr. JOHNSON. Mr. President, with the understanding that the verb relates to the present—the rights they now have to do all of the things that subsequently follow—I have no objection to the amendment.

The PRESIDING OFFICER. The question is upon the amendment offered by the Senator from Utah [Mr. KING] to the amendment in the nature of a substitute.

The amendment to the amendment was agreed to.

Mr. KING. Mr. President, yesterday an amendment was agreed to, and inadvertently the words "have the right to" were omitted from the amendment. I recur to the amendment, and ask to insert those words, so that the amendment will read:

Any commission or commissioner duly authorized under the laws of any ratifying State in that behalf shall have the right to act.

The words "shall have the right to" were omitted.

Mr. JOHNSON. There is no objection to that amendment.

The PRESIDING OFFICER. The Senator from Utah asks unanimous consent to reconsider the action by which the amendment on page 20, after line 20, was agreed to.

The motion to reconsider was agreed to.

The PRESIDING OFFICER. The question now is upon the modification stated by the Senator from Utah.

The amendment to the amendment was agreed to.

The amendment, as amended, to the amendment in the nature of a substitute was agreed to.

Mr. JOHNSON. The Senator from Utah has two other amendments, I think, upon which substantially we have agreed, and he can present them. While he is looking for them, however, I will present an amendment that was offered the other night that has perhaps little to it, but it is desired by certain parties.

The PRESIDING OFFICER. The clerk will state the amendment to the amendment.

The LEGISLATIVE CLERK. As a new section at the end of the bill insert the following:

SEC. 16. Nothing in this act shall be construed as a denial or recognition of any rights, if any, in Mexico to the use of the waters of the Colorado River system.

Mr. KING. My understanding has been that some amendment would be offered which would be an admonition to Mexico that the waters of the Colorado River are claimed and have been claimed by the United States, unless, perhaps, the limited quantity heretofore used for beneficial purposes in the Republic of Mexico.

Mr. JOHNSON. This amendment does not affect that matter. It would have to be covered by a different amendment entirely. No amendment of that sort has been offered, for reasons which I think confidentially can be conveyed to the Senator from Utah by the Senator from Colorado.

Mr. PHIPPS. May I call the attention of the Senator from Utah to the language in section 1 of the bill, which provides that the water shall be used exclusively within the United States.

Mr. KING. I am familiar with that. But let me ask the Senator from California, does not this amendment which he has just offered confirm, or is it not a recognition of, the claims of Mexico to water already used, or which she claims to have used in Mexico?

Mr. JOHNSON. Specifically, no.

Mr. KING. I would not be in favor of any amendment which would indicate that we concede any right to Mexico to use the waters of the Colorado River.

Mr. JOHNSON. I quite agree with the Senator from Utah. This is innocuous, in my opinion, but is desired by certain people who are interested in having it inserted in the bill.

Mr. WALSH of Montana. In view of this discussion, I ask that the amendment be read.

The PRESIDING OFFICER. The clerk will report the amendment to the amendment.

The LEGISLATIVE CLERK. The proposed amendment is to add as a new section at the end of the proposed substitute:

SEC. 16. Nothing in this act shall be construed as a denial or recognition of any rights, if any, in Mexico to the use of the waters of the Colorado River system.

Mr. McKELLAR. Mr. President, I did not hear the word after "denial." Will not the clerk read the amendment to the amendment again?

The amendment to the amendment was again read.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the substitute amendment.

The amendment to the substitute amendment was agreed to.

Mr. KING. Mr. President, I offer the following amendment, which has been submitted heretofore and read.

The PRESIDING OFFICER. The clerk will report the amendment to the amendment.

The LEGISLATIVE CLERK. Add at the proper place in the proposed substitute the following paragraph:

That the consent of Congress is hereby given to the States of Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming to negotiate and enter into compacts or agreements, supplemental to and in conformity with the Colorado River compact and consistent with this act for a comprehensive plan for the development of the Colorado River and providing for the storage, diversion, and use of the waters of said river. Any such compact or agreement may provide for the construction of dams, headworks, and other diversion works or structures for flood control, reclamation, improvement of navigation, division of water, or other purposes and/or the construction of power houses or other structures for the purpose of the development of water power and the financing of the same; and for such purposes may authorize the creation of interstate commissions and/or the creation of corporations, authorities, or other instrumentalities.

SEC. 2. Such consent is given upon condition that a representative of the United States, to be appointed by the President, shall participate in the negotiations and shall make report to Congress of the proceedings and of any compact or agreement entered into.

SEC. 3. No such compact or agreement shall be binding or obligatory upon any of such States unless and until it has been approved by the legislature of each of such States and by the Congress of the United States.

Mr. KING. I move the adoption of the amendment to the amendment.

Mr. JOHNSON. I have no objection.

The amendment to the substitute amendment was agreed to.

Mr. KING. I offer the following amendment.

The PRESIDING OFFICER. The Senator from Utah offers another amendment, which the clerk will report.

The CHIEF CLERK. On page 8, line 2, after word "shall," insert the words "be made with a view to obtaining reasonable returns and shall."

Mr. JOHNSON. I have no objection.

The amendment to the substitute amendment was agreed to.

Mr. KING. Mr. President, the Senator suggested that in the amendment adopted a moment ago the sections should be indicated as "(a)" and "(b)" instead of using numerals. I have no objection to that being done.

Mr. JOHNSON. Mr. President, so far as I am aware, the amendments are concluded now.

Mr. REED of Pennsylvania. Mr. President, I send to the desk an amendment.

Mr. WALSH of Montana. Before that is considered, may I inquire what was done with the amendment offered by the Senator from Utah providing for further compensation?

The PRESIDING OFFICER. It was agreed to.

Mr. JOHNSON. It is purely permissive.

The PRESIDING OFFICER. The clerk will report the amendment offered by the Senator from Pennsylvania to the substitute amendment.

The CHIEF CLERK. The Senator from Pennsylvania moves, after section 5, to insert a new section, as follows:

It is hereby declared to be the policy of this act that the construction of any plant for the generation of electrical energy shall be undertaken by the United States only in the event that satisfactory contracts for the construction and operation of such a plant or plants can not be made with States or governmental subdivisions of States or with private persons or corporations upon conditions prescribed by the Secretary of the Interior.

Mr. JOHNSON. Mr. President, first, I want to make the point of order that substantially that amendment was offered yesterday. As I recall it, however, it was subsequently withdrawn, was it not?

Mr. PHIPPS. That is correct.

Mr. JOHNSON. If it was withdrawn, I am not permitted to make the point of order.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Pennsylvania to the amendment.

Mr. REED of Pennsylvania. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Ashurst	George	King	Sackett
Barkley	Gerry	La Follette	Sheppard
Bingham	Gillett	McKellar	Shortridge
Black	Glass	McLean	Simmons
Blaine	Glenn	McMaster	Smith
Blease	Goff	McNary	Steck
Borah	Gould	Moses	Steiwer
Bratton	Greene	Neely	Stephens
Brookhart	Hale	Norris	Swanson
Bruce	Harris	Nye	Thomas, Idaho
Capper	Harrison	Oddie	Thomas, Okla.
Caraway	Hastings	Overman	Trammell
Couzens	Hawes	Phipps	Tyson
Curtis	Hayden	Pine	Vandenberg
Deneen	Heflin	Pittman	Wagner
Dill	Johnson	Ransdell	Walsh, Mont.
Edge	Jones	Reed, Pa.	Waterman
Fess	Kendrick	Robinson, Ark.	Watson
Frazier	Keyes	Robinson, Ind.	Wheeler

The PRESIDING OFFICER. Seventy-six Senators having answered to their names, a quorum is present.

Mr. JONES. Mr. President, I ask that the amendment be read again, so that everybody may understand what it provides.

The PRESIDING OFFICER. The clerk will read the amendment to the amendment.

The amendment to the amendment was again read by the Chief Clerk.

Mr. REED of Pennsylvania. Mr. President, I do not mean to take more than a few minutes in the discussion of this amendment. Recently, in questioning the proponents of the pending measure about the intention of the bill regarding the construction of this electric-power plant, we were told that the construction of the power plant is essential to the success of this entire project, and that therefore an option is given by the measure to enable the Government to build the plant in case satisfactory arrangements with the States or municipalities or private persons can not be reached, the idea being that that option is necessary in order to fortify the Secretary in his negotiations with the States or with the cities or with private individuals; in other words, that the Secretary could not drive a good bargain with them for the construction and operation of the plant unless he had reserved an option for the Government to do it itself. Having that option, we were told, better terms could be secured from the private interests or the States or the municipalities in the making of that contract.

Some of the supporters of the bill are frank enough to admit that it is their expectation and hope that the Government will at once plan to build this electric-power plant and generate electric power for sale without even trying to have it done for us by the States involved or by the cities involved or by any private organization.

All that this amendment proposes is to declare it to be the policy of the Government of the United States that if a satisfactory contract can be made with somebody else to take the water and operate the plant, that is a preferable solution to the expenditure of Federal money and the conduct of the business by the Federal Government. It in no way abbreviates the powers of the Secretary of the Interior as they stand in the bill now under consideration, but merely declares the preference of Congress for private operation of that industry or operation by the States or municipalities concerned, and declares it to be our policy that only as a last resort shall the Federal Government go into that industry.

Mr. NORRIS. Mr. President, I think the amendment is perfectly clear and that the statement of the Senator from Pennsylvania is equally clear as to the policy described and outlined in the amendment. So far as I am concerned, I am opposed to the policy the Senator has outlined. If the Government of the United States is going to spend the money to build this great dam, it seems to me it ought to build the entire thing. It ought not to be farmed out in piecemeal.

The real reason for this legislation, as I look at it—and it is one of the most impelling and forceful reasons that has ever moved me in my legislative experience—is to save Imperial Valley from damage by flood. I think that is the fundamental reason why the Government of the United States should back up the proposition. If we do not legislate for the building of a dam that will hold back the flood waters, then we ought to go into the Imperial Valley and buy all the property that is there for what it is worth and let that country become a part of the ocean. It is a mammoth undertaking beyond the capability of any municipality and perhaps most all private corporations. But if we are going to build the dam for flood control and know full well that incidental to that construction there is going to be a large amount of electric development, we would, of course, be foolish to build the dam and not utilize the electricity it develops. The question comes, How can it be done most economically, and how can this electricity get to the real consumers at the lowest possible price?

If the Government of the United States is going into this business at all and use the taxpayers' money to go into it, then it is the most economical thing, it seems clear to me, that we should build the entire work, for electrical development and everything else, as one great big unit. For that reason we ought not to use the money of the people, it seems to me, to construct the property and then let out to private people for private gain something that will come as an incident to the expenditure of public funds.

The provision in the amendment is that the work shall be undertaken by the United States only in the event that satisfactory contracts for the construction and operation of such plant or plants can not be made with States or governmental subdivisions of States or with private persons.

It seems to me it is perfectly clear that no State is so fixed that it can make this development. California can not do it. I presume they would have to have an amendment to their constitution first. They would have to go into two other States to construct the property. No State has shown a disposition to build the dam or to construct these works for the development of electricity. No division of a State can do it even if it were to be admitted for the sake of argument that a municipality is a division of a State. I suppose the Senator from Pennsylvania means to include municipalities although he does not name them as such, but I am assuming that is his object. The city of Los Angeles could not go in there and build the plant. It would be objected to, and I think properly so, by other States who are entitled to a part of the electricity. It would be the same thing if any State undertook it, and we would get down to the point where we would have to get a combination of all the States interested in order to do it.

So the amendment reduces itself, as I look at it, to the point that we have nothing left in it except private persons or corporations. In other words, it means that the Government of the United States shall not construct any works there to generate electricity if any private corporation will do it.

In the first place, I think that would be uneconomical. It is dividing the work into at least two units and perhaps more. It would not be efficient. In the next place, it would not give ultimately to the consumers of electricity the current as cheaply as they would get it if the Government built the generating plant. In the third place, it is using the funds of the Government of the United States to make the initial investment to build the dam that is necessary and essential if any electricity is to be generated there—building the dam by the use of public funds, the taxpayers' money, and the benefits accruing then to private corporations for private gain.

I am not finding fault with the private corporations or individuals who are engaged in this business, a perfectly respectable and perfectly honorable business, but it seems to me fair, if they are going to do it that their money ought to be invested. If the Government goes into the business of constructing the dam, it ought to construct the generating works which, as a matter of fact, will be a part of the dam itself if properly built. I take it that the generating works will probably be a part of the dam. It will be a part of it from the very beginning of the plans, and all work and everything else will revolve around that proposition.

The bill is constructed on the theory that out of the sale of electricity we are going to pay the taxpayers' money back to them, so that as a proposition it can not, for practical purposes and efficiency purposes, be divided. When the Government once has the generating plant built, at the same time and as a part of the dam itself, and comes to sell it, it ought to give the States and parts of States and municipalities the first opportunity to get the electricity that will be generated there by public funds. What does not go to them may be given to anybody who will take it, private corporations as well as others.

That being the case it strikes me that it would be the height of folly, it would be entering upon an inefficient and uneconomical venture to say, to begin with, that when we are building this mammoth dam that part of the dam which is going to generate electricity, that will have to be started soon as the dam is started, is going to be leased or turned over to private parties and to private corporations for their private gain.

It seems to me, for the various reasons I have given, that the amendment ought to be defeated and ought not to be engrafted as a part of this legislation.

Mr. REED of Pennsylvania. Mr. President, the difference between the Senator from Nebraska and myself——

Mr. NORRIS. Mr. President, I have no objection to the Senator from Pennsylvania speaking, but I want to give notice that I shall demand the same right if he speaks a second time.

Mr. REED of Pennsylvania. I might have notified the Senator from Nebraska in the same way when he began to speak.

Mr. NORRIS. But the Senator from Nebraska has spoken only once and the Senator from Pennsylvania has spoken once. I do not object to the Senator from Pennsylvania speaking again if that rule is going to be applied to all alike.

The VICE PRESIDENT. Under the unanimous-consent agreement under which we are working the Senator from Pennsylvania is not entitled to recognition at the present time.

Mr. REED of Pennsylvania. I did not understand that there was any such agreement.

The VICE PRESIDENT. The Senator from Pennsylvania can not proceed if there is objection.

Mr. PITTMAN. I object to violating the rule, of course; but I suggest that the Senator from Pennsylvania may take 15 minutes on the bill.

The VICE PRESIDENT. The Senator from Pennsylvania has exhausted his right to speak on the amendment, but he is entitled to 15 minutes on the bill.

Mr. REED of Pennsylvania. I did not know the terms of the unanimous-consent agreement, and I had no intention of taking more than three or four minutes.

The VICE PRESIDENT. The Senator from Pennsylvania is recognized for 15 minutes on the bill.

Mr. REED of Pennsylvania. The difference between the views of the Senator from Nebraska [Mr. NORRIS] and those of myself is fundamental. He believes that it is better for the people of the United States that they should build and operate the generating plant. On the contrary, I believe that it is better for all the people of the United States if it can be done by private enterprise, and that it is wiser to do so. I respect the honesty of the Senator's views and know he respects mine.

We have no difference in our views as to the necessity for flood prevention and the erection of a dam out of public moneys for that purpose. I do not think we have any difference in our views as to the propriety of the storage of water for irrigation, although we must all realize that we are adding to agricultural lands, increasing agricultural surpluses, and increasing to that extent the problem of surplus crops which confronts us now in the farm problem. But we all concede that that surplus is a temporary thing and that in the last analysis America will be greater as the number of fertile acres is greater. So I am glad to see the irrigation project adopted as a part of this plan.

I am willing to agree that the supply of pure water for domestic use is a governmental function and though it is ordinarily done by municipalities, the situation here being of an interstate character, the problem justifies the expenditure of Federal money for the solution of the problem.

Mr. WALSH of Montana. Mr. President, will the Senator from Pennsylvania yield to me?

Mr. REED of Pennsylvania. I yield.

Mr. WALSH of Montana. I should like to inquire of the Senator if he has any information concerning the practicability, from the standpoint of economy, of the construction of the dam by the Government and the power plant by some one else?

Mr. REED of Pennsylvania. In that regard I am depending on the proponents of the bill, who give the option to the Government, give an alternative right to the Government to do the work either by private operation or by public expenditure.

Mr. WALSH of Montana. But likewise, Mr. President, if the power plant is to be constructed as a separate proposition, of course, it would be owned under permit and occupied by the corporation if a corporation should construct it.

Mr. REED of Pennsylvania. No; I do not concede that.

Mr. WALSH of Montana. If it is built by a private company it must belong to the people who furnish the money.

Mr. REED of Pennsylvania. It might be built like a toll bridge, and become public property after it amortizes itself. That is left to the discretion of the Secretary of the Interior. He could make that a part of the contract if he wished to do so.

Mr. WALSH of Montana. Yes; but conceivably the power plant might be built in connection with the dam, and it would be impossible to segregate the two properties.

Mr. REED of Pennsylvania. That is conceivable but not necessarily impossible, and I accept the view that it is not impossible because the proponents of the bill themselves have stated it in the alternative as to whether Government shall or shall not spend its money for the construction of the plant. All I am trying to do in this amendment is to say that we prefer that this horn of the dilemma shall be taken instead of the other; that this solution between the two alternatives is preferable to Congress and leave it wholly to the discretion of the Secretary as to whether he shall impose such terms as may make it impossible to get any private bidder.

Mr. NORRIS. Mr. President——

Mr. REED of Pennsylvania. Just a word and I shall have finished.

Mr. NORRIS. Mr. President, I wanted to ask the Senator a question. I do not want to get the floor, but I should like to interrupt the Senator if he will permit me to do so.

Mr. REED of Pennsylvania. Certainly.

Mr. NORRIS. I want to ask the Senator if he thinks it is possible or practicable to construct a dam for the generation of electricity by water power and have, for instance, the water wheel that operates the machinery outside of the dam itself?

Mr. REED of Pennsylvania. Absolutely. It is done at Niagara Falls and it is done in perhaps a thousand other places.

Mr. NORRIS. There is not a plant at Niagara Falls or at other places, either public or private, which I have seen—and I have seen many of them—where the water wheel and apparatus for generating the electricity are not within the dam. In the Muscle Shoals Dam it is all inside one great structure. There is a building outside of that, it is true, where there is a lot of machinery and indicators, but I should like to have the Senator tell how as a practical, efficient, economical proposition it is possible to separate the two.

Mr. REED of Pennsylvania. It may be done very easily, Mr. President. If the Senator will think about the situation at Niagara it illustrates the situation. The electricity is going to be generated where the turbines are, at the foot of the chute of the water that produces the power that revolves those turbines. That may be in the dam itself, as at Muscle Shoals; it may be in a cliff a mile or more from the waterhead, as at Niagara Falls; it may be 25 miles from the dam, as in certain cases that I think of in California.

Mr. NORRIS. That is where a race, as it is called, is built; but does the Senator believe that where this dam is to be constructed at Boulder Canyon between massive walls on each side there will be any such thing?

Mr. REED of Pennsylvania. No; Mr. President——

Mr. NORRIS. I am satisfied that it will be like, for instance, the Muscle Shoals plant. There will not be any such thing as a mill race, but the water will go right down through the dam itself and the water wheel will be a part of the dam.

Mr. REED of Pennsylvania. Of course, I do not know the engineering decisions that will be reached.

Mr. NORRIS. Neither do I know.

Mr. REED of Pennsylvania. But we can make water flow down any hill. It just depends upon where the hill is made from which it shall flow; and it can go down through a chute or the side of a cliff 25 miles way. It is easily practicable.

But now, to finish what I was about to say, this amendment in no way would interfere with the discretion of the Secretary of the Interior in the imposition of any condition that his discretion might prescribe; and that would include a regulation of the rates to be charged, of the service to be rendered, of the method by which and rate at which the investment should be amortized and ultimately returned, as we provide in the case of toll bridges, to public ownership. Any safeguard that occurs to the Secretary of the Interior might be provided. All that the amendment does in effect is to say that we shall save $38,000,000—I think that is the correct amount—out of the Government's first expenditure; we will let that expenditure be provided out of State or county or city or private capital and not take it from the Federal Treasury; and we will regulate the business conducted there as we see best to regulate it, but not own it.

Those of us who believe that the utilities had better be operated by the Government than by private industry under regulation will doubtlessly vote against the amendment, but those of us who believe it is better to preserve private initiative, to use private capital, and to regulate it sternly in its relations to the public, will, I think, prefer to have this declaration of policy in the act.

Mr. JOHNSON. Mr. President, from one standpoint it is rather unfortunate that the question is raised and that the amendment has been presented by the Senator from Pennsylvania. I mean from the standpoint of the passage of the bill, for at the time this amendment was offered the bill was ready for passage; but much, sir, as I desire the passage of the bill, however my heart and my emotions may be enlisted in its behalf, I want to express my admiration for the Senator from Pennsylvania for asking that the Senate declare now, in connection with the greatest water-power development that the Government has ever undertaken, the policy which shall be pursued. The Senator from Pennsylvania has brought the issue before us; without his amendment the issue would not have

been before the Senate at all; but here it is. Men who have opinions and men who believe in policies for the Government that shall protect the people necessarily now upon the amendment of the Senator from Pennsylvania must take their stand.

I have not concealed from the Senator from Pennsylvania nor from this body my predilections, my inclinations, or my desires. I said the other day, when speaking here upon this subject late in the afternoon, just what was in my mind and just what I should like to see done. So far as I am concerned, sir, I would prefer that the Government of the United States, expending the enormous amount of money that will be expended for this dam, should from the standpoint of economy, from the standpoint of protection to our people, from the standpoint, indeed, of the welfare of every State that is contiguous to the Colorado River and is interested in its development, and from the standpoint of a rational and enlightened public policy—I would prefer that the Government of the United States building the dam build as well the generating plant. I desire, if that can be accomplished, that it may be done. I have never concealed this view. It is mine now, as it has always been in the past.

Now, it is sought by the amendment that is presented to declare upon the part of the Government of the United States, no matter what may be the surrounding circumstances, a policy which in the days to come shall constitute, so far as the Senate can constitute it, the definite and definitive national policy in relation to water power, its development, its distribution, and the like.

This is not a question, I make perfectly plain to you, of the Government going into business; this is not a question, I reiterate, of Federal public ownership as such. I would not care if it were, but that is apart from the particular proposition. The amendment which is now presented involves neither the one nor the other—the Government going into business or the endeavor to throttle in any degree private enterprise.

Whence came the desire for the Government of the United States to erect a generating plant at this dam? Who was it who proposed it? A radical from the Northwest or one from the Pacific coast? Not a bit of it. The idea of erecting a generating plant by the Government of the United States at Boulder Dam came first from the Federal Power Commission itself. It came next from the Secretary of the Interior, who, my friends upon this side will agree, has just conducted a magnificently successful political campaign in this Nation. It came, too, from all the officials of this Government who had examined the bill in question or who had rendered any opinion upon it. I call to witness in this behalf the letter originally written to Chairman MCNARY, of the Irrigation and Reclamation Committee, by Mr. Merrill, the secretary of the Federal Power Commission. No public-ownership man is he; he is not a gentleman who would interfere with private initiative or the right of private enterprise to generate power, but when he wrote upon this subject the views of his superiors, three Cabinet officers, remember, and himself, he said:

> If it is deemed desirable that the construction of the dam be financed by the United States, particularly if some such plan of financing as hereafter suggested is adopted, I believe it would also be desirable for the United States to finance and construct the power plant and the high-tension transformer and switching stations just as it has done at Muscle Shoals; to lease the works for operation when completed, and to require its lessee to build and operate the necessary transmission lines, substations, and distribution facilities. Such a procedure would, I believe, obviate many complications that might otherwise exist, make easier the problem of financing the work to be constructed by the lessee, and give more assurance of adequate and early utilization of the resources available.

We begin, therefore, with the Federal Power Commission in the history and evolution of a generating plant at Boulder Dam. We find that commission recommending that the Government build it. Then as we proceed the Secretary of the Interior, after consultation undoubtedly with his colleagues, renders his opinion in a writing expressing the desire of the present administration and the Government. This is what he wrote upon this bill and the construction of a generating plant:

> The building of a unified power plant by the Federal Government in the place of allocating power as proposed in the bill as regarded as more efficient and cheaper. It will obviate controversies between applicants, and long delays in their adjustment. In the end, results will, I believe, be superior to those possible under an allocation of privileges. The area—

And in this he is entirely accurate; all of us who have been there know that fact—

> The area for the location of separate power sites is restricted. Allotments would not be equal in value. Some allottees would, therefore, have an advantage over others. It would result in the creation of operation and administration controversies to be avoided, and which a unified development will avert.

Every engineering commission that has undertaken to render its estimates concerning Boulder Dam, and the works that are to be a part of it, has made its definite estimate upon the construction of a generating power plant by the United States Government—every single one of them. All have taken it for granted that the Government would build it.

Of course, it is obvious to you, in a work of this kind, what will be the economic side.

Here is a dam 550 feet in height, with a storage capacity behind it of 26,000,000 acre-feet, a lake stretching backward nearly 100 miles. You realize how stations and substations, how culverts and caissons, ledges, and even railways, must be constructed in making that dam; how, during the progress of the work there, it is essential that there should be electric power and there should be electric lighting in order properly to do the work. Who can do it most cheaply? Why, the Government that is building the dam can, of course, build more cheaply the generating plant. As one witness once remarked before us—he was not in any degree a Government-ownership man or connected with any of those who were—"Who builds the dam should build the generating plant"; and from the economic standpoint there can be no question upon that score.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit a question?

Mr. JOHNSON. Surely.

Mr. REED of Pennsylvania. If that be so, why does the Senator in his own bill provide the option to do this by private enterprise?

Mr. JOHNSON. If the Senator will pardon a personal reference there, because there were so many people upon the committee and in this body who had views exactly like those of the Senator from Pennsylvania; and the only possibility that we had to get the bill agreed to in committee and through finally here upon the floor and ultimately passed was to put this in the alternatives.

Notwithstanding what has been said by the President of the United States in his last message, notwithstanding the attitude that has been maintained in speeches that have been made during the campaign, I feel an abiding certainty that when the time comes to construct this dam the generating plant will be constructed as well by the United States Government under the option that is accorded by the bill that is now before the Senate.

Mr. GLASS. Mr. President——

Mr. JOHNSON. I yield.

Mr. GLASS. I shall be interested to know how the Senator derives the impression that this amendment declares a general policy of the Government.

Mr. JOHNSON. That was my understanding as it was read.

Mr. GLASS. As I read it, it declares a specific policy with respect to this particular enterprise.

Mr. JOHNSON. That may be.

Mr. HEFLIN. Mr. President——

Mr. GLASS. I want that known, because I differentiate this enterprise from the Muscle Shoals enterprise, now owned by the Government.

Mr. REED of Pennsylvania. So do I, Mr. President.

Mr. HEFLIN. Mr. President——

Mr. JOHNSON. Pardon me just one second. In what way do the Senators differentiate?

Mr. REED of Pennsylvania. The Muscle Shoals project includes a power station already built and already owned by the United States. We can not change that. That is an existing fact. This is a new project that proposes to build and construct and operate still another one. I say it is better to do that with private money, under regulation, and keep down the cost of your Boulder Dam project. I would rather see the Government take that alternative.

Mr. JOHNSON. I realize the Senator's position.

Mr. GLASS. Likewise, Mr. President, the Muscle Shoals plant was acquired as a war emergency or necessity.

Mr. JOHNSON. Yes.

I yield now to the Senator from Alabama.

Mr. HEFLIN. Mr. President, I agree with the Senator from California. If the Senate takes this action, if it indorses or approves the amendment offered by the Senator from Pennsylvania, it is going upon record as favoring the proposition that he submits, committing itself to that policy, and it will be a precedent on the subject.

Mr. JOHNSON. Mr. President, I think the Senator from Alabama is entirely correct. While it may be true that this

amendment relates simply to the particular bill that is now before us—my time upon the amendment having expired, I now speak upon the bill, Mr. President—nevertheless, with the question arising in the fashion that it has, it constitutes a declaration of policy by the Senate of the United States, and a declaration of policy that will be determined to be a very definite declaration of policy. So I do not think we can escape that, although the language of the amendment may make it applicable only to a particular bill.

When the Secretary of the Interior presented his financial set-up to the Senate, he provided for a million horsepower development, at a cost of $31,500,000. There never was a time but that he was contemplating the construction by the Government, from the figures that were presented, of the generating plant at the Boulder Dam—contemplating it so definitely that he provided in his financial set-up for the full cost of that generating plant, and then for the mode of meeting the payment thereof; and recently, in the Sibert report that was presented to this Congress on the 3d day of December, the same provision was made of $38,200,000 for a million horsepower development at the Boulder Dam. This, like in the former report, was to be an expenditure by the Government for the power plant.

So, all along the line, from just after the time when the bill was introduced and submitted to the Government and to the various heads of the departments, it has been apparently the set purpose of those in command of the Government, that the Government would erect a generating plant at Boulder Dam, and that in erecting that generating plant the Government would not be postponed until every other expedient had been exhausted.

On what theory, after all, should you say that the Government should not have the right to erect that generating plant if necessary? That is all that this bill does. Why should you declare a policy that the Federal Government must first give that right to a private corporation or to an individual, or even to a city or a State? If the Government sees the possibility of doing the job better, more efficiently, and more economically, on what theory, except to permit some private enterprise greater profit, should you deny your Government the right to do the thing that your Government might ultimately determine was absolutely necessary for the protection of its people?

I could understand the declaration of policy in reference to some undertakings; but I can not understand a declaration of policy that would deprive the Government of the right, the option, of hereafter doing what the Government under the circumstances might believe to be essential for the protection of its people; and every man within the sound of my voice knows that the people to-day must be protected in the matter of the generation of electric power.

To-day electric power has become king in our land. To-day electricity is just as much a necessity of life as, in days gone by, light was to us. To-day electricity enters into every vocation and into every activity of human kind. To-day electricity is an essential of every home, and every thinking man understands—it does not require a recital of the revelations of the Federal Trade Commission—that the people of the United States, in regard to this great necessity that has come into their lives, need the protection of the Government of the United States.

Mr. WATSON. Mr. President, may I ask the Senator a question?

Mr. JOHNSON. Yes.

Mr. WATSON. Do I understand that a vote for the proposition advocated by the Senator in opposition to the policy of the amendment proposed by the Senator from Pennsylvania means an announcement of a Government-ownersip policy of all power plants and of all electric plants doing an interstate business, henceforth and forever, as a governmental policy in the United States?

Mr. JOHNSON. If I were to answer that question, I fear I should indicate that I had not the admiration for the Senator from Indiana that I really have. He knows that there is no such design, that there can be no such legitimate conclusion drawn from any such vote. I do say that this Government must stand as the protector of its people in reference to electric power. This Government must stand—and if the Government as a whole will not stand or any part of it is timid or worse, the Senate should stand—as the protector of the people of this land in reference to electricity and the generation of electricity.

I prefer, I have told you—and I am perfectly frank in that—I prefer, if it were possible, to have the Government erect this generating plant at Boulder Dam, and for this consummation I am ready to act and to vote. I say to you, though, that all that is asked by this bill is that the Government be given the right and the option to protect its people, to erect a generating plant if it be necessary. Who should deny that small boon unto his Government?

Mr. PHIPPS. Mr. President, if I may have the attention of the Senator from Nebraska [Mr. NORRIS], I may be able to throw a little light upon a question or two propounded by the Senator as to the mechanical operation followed in these large hydroelectric plants in the matter of generating electric power.

Take, for illustration, the Roosevelt Dam on the Salt River in Arizona. You must have a dam structure or you must have an enormous flow following the contour of a mountain or following along the slope of a mountain in order first to obtain a drop.

The water may drop vertically, or at a very steep grade, or sharp angle, to actuate the wheel that revolves the main stem and transmits its revolutions to the generating dynamos.

I am not familiar with the method resorted to in the case of Muscle Shoals, but I believe the Pathfinder Dam is similar to the Roosevelt Dam. In both cases the power houses are built as adjuncts or extensions or are up against the dam structure.

The purpose of the dam itself, of course, is to retain the water. The water to operate the wheels that generate the power must drop from a high elevation, near the top of the dam, or, say, two-thirds up the height of the dam, in this case at Boulder Canyon, because water is to be preserved there for flood control.

In the case of hydroelectric plants, many examples of which will be found in the high Sierras, for instance, there is a flow line coming out, a slight drop along the side of the mountain for quite a distance. Then it comes to a place where the water is dropped down to the generating plant, and there you will have enormous pipes forming the pressure lines. In many cases there is merely one pressure line; in others there are two or three; and in some instances four or more. The power there is generated in the different units of the plant.

In the case of this proposed dam, undoubtedly as the requirements for power come into existence, the generating plants may be installed on the unit principle. It is not necessary at once to put in all the generating machinery to provide the output of 1,000,000 horsepower designed.

In my opinion there is no reason why various power companies now supplying that territory, the city of Los Angeles, if it so desires, and the city of Pasadena, having power plants of their own, can not combine and determine what their separate requirements are, agreeing upon a proportionate basis, and join in providing the funds necessary to build the power plants, given the dam, which would be built by the Federal Government.

Mr. NORRIS. Mr. President, may I interrupt the Senator now?

Mr. PHIPPS. Yes.

Mr. NORRIS. The Senator is familiar with the site, I suppose, that is proposed?

Mr. PHIPPS. I am; I have been there.

Mr. NORRIS. The Senator knows, then, that it will be a physical impossibility to take water out of the reservoir above the dam and carry it to some other locality and drop it down. Does not the Senator know that the power is going to be generated right at the dam, that there is not going to be a mill race?

Mr. PHIPPS. No; that is unnecessary. It is not impossible to do it, but it is not necessary to do it.

Mr. NORRIS. It may not be impossible, but it would be a terrible waste of money to undertake to do it. You would have to run it through solid rock, and when you get the dam built, and the water going over the dam, the pipes and the wheels are going to be in the bottom of it somewhere, and the pressure is going to be right there.

Mr. PHIPPS. Outside of the dam, not inside.

Mr. NORRIS. All right, outside; but it is going to be a part of it.

Mr. PHIPPS. Not necessarily.

Mr. NORRIS. How are you going to differentiate between the building of the dam and the water wheels? They will be in the dam, as a matter of fact, as they are at Muscle Shoals.

Mr. PHIPPS. Not necessarily.

Mr. NORRIS. You do down in there, where all the units are placed, and see them operating under the water. That would be the economy of the thing. If you should undertake to have a separate power plant a mile or two away, or 10 miles away, as the Senator from Pennsylvania suggests, you would have to build a race to carry the water through solid granite, all unnecessary.

Mr. PHIPPS. That was never contemplated by anyone who understands the proposition.

Mr. NORRIS. Then it is going to follow that the dam and the water-power proposition is all one. It will have to be.

Mr. PHIPPS. The dam structure itself would be provided with outlets, which would have gates similar to the gates that would be used to control the spillways that would be there.

Mr. NORRIS. Who is going to build the gates?

Mr. PHIPPS. They are built right into the dam structure.

Mr. NORRIS. Exactly, and that is where the water wheel is going to be. How are you going to differentiate between the private corporation that builds the power plant and the Government that builds the dam?

Mr. PHIPPS. I do not think that is a difficult problem at all, because the dam structure is given with the necessary outlets provided.

Mr. President, I think I should try to make my position clear in the matter. I do not care to repeat what I have said in the discussion on this bill to the effect that the consumers of hydroelectric power in California and Nevada are protected by their public utility commissions, which regulate the rates that shall be charged, which regulate the earnings of those corporations to a fixed figure on their invested capital, and all of that.

My belief is that private corporations and municipalities could combine, as I have stated, in order to utilize this power. The minute this bill becomes effective, these people who are interested and the municipalities are going to figure on what their requirements might be, what a plant would cost based on their experience in building plants, and, at the same time, undoubtedly the Government, in the proper department, would be figuring on what it would cost to build the power plants. They have already made this estimate, which has been boosted to $38,500,000. The department will then be in position to know what private enterprise would undertake, and what it would cost them as compared with what it would cost the Government. Also, undoubtedly, the point would be developed as to what power consumers could use; or I should say distributors, because I do not think anyone contemplates having the Government go to the expense of building the transmission lines and delivering the power to the ultimate consumer.

The Government could be furnished with bids in a competitive manner for power at the switchboard, or for the use of water at the dam, to be used for generating hydroelectric power.

Mr. President, I do not care to say anything further on this amendment, or to further discuss the bill, except to say this, that the flood menace to large tracts of land in Arizona and California is an ever-increasing one. Yet these dangerous waters are not now being put to beneficial use. When completed, this great project will remove that menace, and permit further development of a wonderful section of our country. Thus, flood waters now endangering life and property will become the greatest possible blessing to the States of the lower Colorado River Basin.

Mr. BORAH. Mr. President, I do not know whether the Senator in charge of the bill proposes to go to a vote this evening or not.

Mr. PHIPPS. May I answer for him? That is the intention, I believe.

Mr. BORAH. I have no desire to discuss the general question of public or private ownership under the 15-minute rule, or this late in the day. I doubt if we are prepared in this country yet to say what the ultimate policy of the Government is to be. I think that power development is in its infancy, and even if we desired to declare a permanent and final policy, I doubt if we are in a position to do so at this time. But even if I were for private ownership as a general policy, I would not apply the principle in these great projects, combining flood control, irrigation, and power. I would treat the project as a unit and as the Government must do part I would let it do all.

As I see this amendment, it would leave the bill precisely as it is now, except that Congress would have expressed its view as to what the policy should be. We are called upon, in other words, to declare not a policy but our view as to what the policy should be. We do not in any way change the bill.

It does not take away the option or the discretion of the Secretary of the Interior. He may yet go forward and do the two or three things, as he chooses to do them, specified in the bill. If we adopt the amendment, it is but an expression of Congress as to what the policy should do—no change in the bill, but simply a statement of our view as to our policy.

Mr. President, I do not look upon this bill as in any sense defining the general policy of the Government with reference to private or public ownership. I think in these projects, where the Government is going forward—and it is conceded that the Government must go forward and do the main part of the work—it should complete the job. So far as the development of electrical power is concerned, it is an incident to the enterprise; it ought to go with it to insure its success. It is in no sense like directing the Government to go out and build a power plant solely for the purpose of developing electric energy and selling it.

It is conceded here that the Government must do this work. One of the most dangerous and difficult rivers we have is to be controlled. Flood control is essentially the basis of this bill. The Government must do that work. When I go further and say that the Government must do all that is necessary in order to make it a success, I do not consider that I am defining the ultimate policy of the Government with reference to public or private ownership. We are simply proposing to make the matter a success if we can, and those who have studied it, and the Government itself, believe that the development of power is an essential part of the financial side of the enterprise. For that reason I shall vote for the bill, I hope with the Davenport amendment attached.

I think in all these enterprises where the Government is doing the work it should be authorized to do all. It is essential economically for it to do so.

Mr. FESS. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. FESS. As I understand the bill, as it was originally written, or finally amended, we would give to the Government the option or the discretion whether it would lease the plant, or construct it by private enterprise or do it itself. That is all, as far as I was concerned, that I was seeking.

Mr. BORAH. The Senator was perfectly safe in that, because I have no doubt at all that ultimately his policy will prevail, if that option exists.

Mr. FESS. The amendment offered by the Senator from Pennsylvania in a way hinders the discretion that we intended to write into the bill.

Mr. BORAH. It might hinder it depending on who was Secretary of the Interior.

Mr. FESS. In other words, a vote for the bill without this amendment would not be to commit the Government either to Government ownership or to private ownership.

Mr. BORAH. No; but by my vote, for instance, would be an indication of what my policy was with reference to this particular enterprise. It would not change the terms of the bill; it would not bind the Secretary of the Interior. He might still go forward. But I would be going on record as expressing my view one way or the other as to what the policy should be.

Mr. FESS. That is, on the amendment.

Mr. BORAH. In other words, we are called upon here to express our view as to a policy; that is all.

Mr. FESS. That is, not speaking of the bill but of the amendment. Personally, I would prefer that the Government not go into this business; but I do not regard myself as voting that the Government shall go into this business unless it may seem to be the best policy for it to follow. My vote is not to compel it to do it. It would have the discretion to do it or not to do it. I refer to the bill, not the amendment.

Mr. BORAH. The fact is, Mr. President, that the bill gives an option to the Secretary of the Interior. If this amendment shall be adopted he will still have the option, the same as if the amendment were not adopted. That is the exact situation.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question?

Mr. BORAH. Yes.

Mr. REED of Pennsylvania. Is not this a fact, that the bill as it stands leaves the option to the Secretary of the Interior without any expression by Congress as to which is the preferable solution of the situation, without any expression by us of preference between the two alternatives? It leaves complete discretion to the Secretary to determine the policy, Congress having refused or neglected to take that responsibility on itself.

If the amendment is agreed to, Congress assumes the responsibility of saying which alternative is preferable and does not leave that power to the Secretary.

Mr. BORAH. It either binds the Secretary or it does not. Whatever respect the Secretary pays to the judgment of Congress, of course, will have its effect when he comes to determine this question. If he does not care to respect the view of Congress, he has the authority to go ahead just the same as if we had not adopted the amendment. It may have a persuasive influence; it may have a moral influence upon him; but it does not change the terms of the bill. However, it does put me, or any man voting pro or con, upon record with reference to his view as to what the policy shall be, and that is all. It does not change the bill, and it does not, in my judgment, declare the general policy of public or private ownership. It simply declares what the view of Congress is in reference to this particular enterprise.

There is where it comes in conflict with my views. If it was declaring a general policy as to where the Government was going in solely for the purpose of building a power plant to develop electric energy, that would be a different proposition, but it is only declaring it with reference to this particular enterprise, into which particular enterprise the Government is going for the purpose of doing the work. That being true, I

think the Government ought to be authorized directly, as it is by the Davenport amendment, to build the power plant as a part of the general program which it is directed to carry out.

Mr. REED of Pennsylvania. I ask for the yeas and nays on agreeing to my amendment to the amendment.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. CURTIS (when his name was called). I have a general pair with the Senator from Arkansas [Mr. ROBINSON]. Not knowing how he would vote, I withhold my vote.

Mr. FESS (when his name was called). I have a pair with the Senator from Maryland [Mr. TYDINGS]. Not knowing how he would vote, I withhold my vote.

Mr. NORRIS (when Mr. HOWELL's name was called). The junior Senator from Nebraska [Mr. HOWELL] is absent on account of illness. If he were present, he would vote "nay."

Mr. KING (when his name was called). I am paired with the junior Senator from Texas [Mr. MAYFIELD]. Not knowing how he would vote, I withhold my vote.

Mr. OVERMAN (when his name was called). I have a general pair with the Senator from Wyoming [Mr. WARREN]. In his absence I withhold my vote.

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD]. I was informed by him that he favors the amendment, and therefore I am free to vote. I vote "yea."

The roll call was concluded.

Mr. WAGNER. I desire to announce that on this amendment my colleague the senior Senator from New York [Mr. COPELAND] is paired with the junior Senator from New Jersey [Mr. EDWARDS].

The result was announced—yeas 24, nays 53, as follows:

YEAS—24

Ashurst	Gillett	Hale	Moses
Bingham	Glass	Hastings	Phipps
Blease	Glenn	Hawes	Reed, Pa.
Bruce	Goff	Hayden	Vandenberg
Caraway	Gould	Keyes	Waterman
Edge	Greene	McLean	Watson

NAYS—53

Barkley	Gerry	Oddie	Stelwer
Black	Harris	Pine	Stephens
Blaine	Harrison	Pittman	Swanson
Borah	Heflin	Ransdell	Thomas, Idaho
Bratton	Johnson	Reed, Mo.	Thomas, Okla.
Brookhart	Jones	Robinson, Ind.	Trammell
Broussard	Kendrick	Sackett	Tyson
Capper	La Follette	Schall	Wagner
Couzens	McKellar	Sheppard	Walsh, Mass.
Dale	McMaster	Shipstead	Walsh, Mont.
Deneen	McNary	Shortridge	Wheeler
Dill	Neely	Simmons	
Frazier	Norris	Smith	
George	Nye	Steck	

NOT VOTING—18

Bayard	Fletcher	Mayfield	Smoot
Copeland	Howell	Metcalf	Tydings
Curtis	King	Norbeck	Warren
Edwards	Larrazolo	Overman	
Fess	Locher	Robinson, Ark.	

So the amendment of Mr. REED of Pennsylvania to the substitute amendment was rejected.

MULTILATERAL PEACE TREATY

Mr. MOSES. Mr. President, in my own name and also for the senior Senator from Missouri [Mr. REED], I ask unanimous consent as in open executive session to submit a resolution, and I ask that it be read and referred to the Committee on Foreign Relations.

The VICE PRESIDENT. It will be read.

The resolution was read, as follows:

Resolved, That the Senate of the United States declares that in advising and consenting to the multilateral treaty it does so with the understanding—

(1) That the treaty imposes no obligation on the United States to resort to coercive or punitive measures against any offending nation.

(2) That the treaty does not impose any limitations upon the Monroe doctrine or the traditional policies of the United States.

(3) That the treaty does not impair the right of the United States to defend its territory, possessions, trade, or interests.

(4) That the treaty does not obligate the United States to the conditions of any treaty to which the United States is not a party.

The VICE PRESIDENT. The resolution will be referred to the Committee on Foreign Relations.

BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 5773) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. JOHNSON. Mr. President, I offer what I hope is the last amendment. It has been submitted to the Senators from Arizona and to it they have no objection.

The VICE PRESIDENT. The clerk will read.

The CHIEF CLERK. On page 2, line 9, following the words "Laguna Dam," insert:

or other suitable diversion dams, which the Secretary of the Interior is hereby authorized to construct, if deemed necessary or advisable by him upon engineering or economic considerations.

Mr. HAYDEN. Mr. President, in view of the adoption by the Senate of the amendment I offered, authorizing certain engineering investigations on the part of the Gila irrigation project in Arizona, I have no objection to the amendment just offered, because I believe the same consideration should be given to the State of California.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from California to the amendment.

The amendment to the amendment was agreed to.

Mr. BORAH. Mr. President, I desire to offer an amendment in the nature of a motion to strike out. On page 11, beginning with the words "*Provided, however,*" in lines 12 and 13, I move to strike out the balance of the paragraph down to and including line 22, reading as follows:

Provided, however, That the Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of any Government-built plant, with right to generate electrical energy, or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy as herein provided, in either of which events the provisions of section 5 of this act relating to revenue, term, renewals, determination of conflicting applications, and joint use of transmission lines under contracts for the sale of electrical energy, shall apply.

That is what is known as the Davenport amendment.

Mr. JOHNSON. Mr. President, will the Senator yield to me?

Mr. BORAH. I yield.

Mr. JOHNSON. Permit me to call to the attention of the Senator from Idaho that if he is seeking to present merely the Davenport amendment, he has gone very much further, has he not?

Mr. BORAH. I included more than the Davenport amendment, but in my judgment it accomplishes what the Davenport amendment was intended to accomplish or, at least, what I would like to have it accomplish. The Davenport amendment began with the words "or alternatively." If the Senator would prefer to have it that way, I am willing to yield my views to that extent. But I prefer the amendment as I have proposed it.

Mr. JOHNSON. My feeling is if we strike out all immediately after the words "*Provided, however,*" we may deny the discretion to "enter into contracts of lease of a unit or units of any Government-built plant, with right to generate electrical energy." Congressman DAVENPORT proposed to strike out the alternative that follows.

Mr. BORAH. Of course, it is the difference between the Government operating it after having built it, and somebody else operating it. If that is preferable, I will have my amendment begin with the words "or, alternatively," in line 16.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. Beginning in line 16, on page 11, after the word "energy," it is proposed to strike out the words:

or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy as herein provided, in either of which events the provisions of section 5 of this act relating to revenue, term, renewals, determination of conflicting applications, and joint use of transmission lines under contracts for the sale of electrical energy, shall apply.

Mr. BRUCE. Mr. President, do I understand that is the amendment of the Senator from Idaho?

The VICE PRESIDENT. It is.

Mr. BRUCE. I will ask the attention of the Senator from Idaho a moment. I understand the effect of that amendment would make it mandatory on the Government to construct the dam and the electrical plant; that there would be no option to let the work out to private parties or anybody else?

Mr. BORAH. That is my understanding.

Mr. BRUCE. I suppose it is a matter of very little importance; but, I am sorry to say, that if the amendment shall be adopted it will cost this bill—I do not know that it is in need of any votes—but it will cost this bill two votes.

Mr. BORAH. Mr. President, I have no desire to debate the amendment; I merely wanted to state my position by offering the amendment.

Mr. EDGE. Mr. President, in addition to making it mandatory upon the Government to build the plant, in accordance with the answer which the Senator has already made to the question asked, do I understand further that it prohibits the Government from leasing the power to any private company or corporation?

Mr. BORAH. No.

Mr. EDGE. It does not?

Mr. NORRIS. Mr. President, I should like to call the attention of the Senator from Idaho to the fact that the language he undertakes to strike out, I think goes further than he desires. He strikes out more than he wants to strike out. The amendment ought to stop at the words "for the generation of electrical energy as herein provided." Then it would be necessary, if the amendment should be agreed to, to change one or two other words there, but the remainder of the provision which the Senator undertakes to strike out ought to remain and apply to the other part of that proviso.

Mr. BORAH. I presume that is true, since I waived lines 13, 14, and 15. The words to be stricken out I will read and the clerk may take them.

> Or, alternatively, to enter into contracts of lease for the use of water for the generation of electrical energy as herein provided.

Mr. WALSH of Montana. Let me suggest to the Senator that he should also strike out the words "in either of which events," so as to make it read "in which event."

Mr. BORAH. That could be changed if the amendment should be adopted.

Mr. NORRIS. If the amendment should be agreed to, such an amendment could be offered subsequently.

Mr. REED of Missouri. Mr. President, I do not like to prolong this debate, but some of us have not been able to be here much of the time. Will the Senator tell us the effect of the amendment in a few words?

Mr. BORAH. The effect will be to take away the discretion of the Secretary of the Interior with reference to leasing this power plant to private enterprise, and will leave it obligatory upon him or upon the Government to develop and operate the project.

Mr. EDGE. Mr. President, that is exactly the question I attempted to ask the Senator a moment ago. Then it does, in addition to making it mandatory upon the part of the Government to construct a power plant, also make it mandatory that the Government shall operate the power plant and sell the power, as I understand?

Mr. BORAH. Yes.

Mr. EDGE. As the Senator from Maryland [Mr. BRUCE] has said, with some modesty, if this amendment shall be adopted, while perhaps it will make very little difference in the passage of the bill, it will prevent my voting for it, which I greatly regret. I wanted to vote for this bill, with the option in the hands of the Secretary of the Interior, but if it is made mandatory that the construction of the dam, the operation of the plant, and the sale of the power from the dam shall absolutely be in the hands of the Government for all time to come, I can not support the bill.

Mr. BORAH. The objection to the bill as I see it—and I merely desire to express my individual view—is that it leaves to the Secretary of the Interior the great power to declare the policy with reference to this project; it is entirely discretionary with him. The Congress, in other words, waives what I think is its duty to declare affirmatively, one way or the other, upon this proposition. My judgment further is that if the bill is left in its present form there will be no doubt about the policy which will be carried into effect.

Mr. WALSH of Montana. Mr. President, I think the Senator from Idaho certainly can not have expressed himself correctly in answer to the question addressed to him by the Senator from New Jersey. The Senator from New Jersey asked if this amendment shall be adopted whether it will not be mandatory upon the Secretary to construct the plant and then thereafter for the Government to operate the plant.

Mr. EDGE. Exactly.

Mr. WALSH of Montana. The Senator from Idaho said that he did.

Mr. BORAH. I did not understand the question. What I meant to say was that the Government, if that language were stricken out, would have no power to enter into contracts of lease for the use of water for the generation of electric power.

Mr. WALSH of Montana. That would certainly be the case if the Senator commenced his amendment with the word "or" in line 16.

Mr. BORAH. That is what I have done now.

Mr. WALSH of Montana. Exactly. If the amendment shall be adopted as now offered by the Senator from Idaho to strike out, commencing with the word "or" in line 16 and ending with the word "*Provided*" in line 18, then the Government will build the plant, but it will have the right to lease the plant to anyone to whom it can lease it, and the lessee will generate the power and sell it and operate the plant. If the Senator desires to follow the course he has indicated he should adhere to his original proposal to commence the amendment at the proviso, which would strike out the words:

> That the Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of any Government-built plant, with right to generate electrical energy.

Mr. BORAH. Of course, my view is expressed in my first offier; that is, to begin with the word "*Provided.*"

Mr. WALSH of Montana. I understand so; but I understand further that the Senator has receded from that position. It seems to me he should have answered the Senator from New Jersey in the negative, that it will not be obligatory upon the Government to operate the plant, but the Secretary will be authorized to lease the plant to a lessee, who will operate it and distribute the electrical energy.

Mr. BORAH. So far as this particular class of project is concerned, what I desire to do is to express the view that the Government ought to build the plant and operate it.

Mr. WALSH of Montana. Then, the Senator from Idaho will certainly adhere to his first proposal.

Mr. BORAH. That only includes this class of project where the Government is in the business.

Mr. WALSH of Montana. I understood the Senator yielded to the suggestion.

Mr. BORAH. I did, because I did not want to endanger the bill any more than I could help.

Mr. REED of Pennsylvania. Mr. President, I should like to ask a question of the Senator from Idaho. I wish to ask the Senator in what State he now leaves it; whether he wants this amendment to represent his views by striking out everything beginning with the word "*Provided*," from line 13 to line 22, or whether he wants to restrict it merely to removing the option of private construction of the electric plant?

Mr. BORAH. I am going to confine the vote in the first instance to the latter proposition beginning with the words "or, alternatively."

Mr. REED of Pennsylvania. The proposition now is to cut out the option which the Senator from California has very candidly told us was put in in order to secure the votes of those of us who do not believe in Government construction and operation.

Mr. JOHNSON. Oh, no, Mr. President; I will not submit to any such characterization as that. It was not put in for any such reason at all.

Mr. EDGE. Mr. President, the Senator from Montana may be correct—and I never question the accuracy of any statement he may make—but if I interpret the amendment correctly this is the language that is being stricken from the bill:

> *Provided, however,* That the Secretary of the Interior may, in his discretion, enter into contracts of lease of a unit or units of any Government-built plant.

Then, if that authority is denied him, he can enter into contracts——

Mr. WALSH of Montana. The motion is not to strike that out but to leave that in.

Mr. EDGE. I have just asked the Senator from Idaho, but he says that is the part he is moving to strike out.

Mr. BORAH. Beginning with the words "or, alternatively."

Mr. EDGE. And the Senator leaves in the part I have just read.

Mr. BORAH. Yes.

Mr. PHIPPS. Mr. President, I want to say just a word, and will take only a moment. If the bill goes to the Chief Executive without any provision whatever for the construction of plants by States, municipalities, or private enterprise, in my opinion, it will not meet with his approval. I base that statement merely upon the declaration in his latest message to the Congress. I think the bill would be defeated, and we would lose the opportunity to bring about this great development.

Mr. NORRIS. Mr. President, the Senator from Colorado has given expression to what has been whispered around over the Chamber for the last 24 hours, that if this provision shall be stricken out, the bill will meet with a veto. The Senator from Colorado includes in his suggestion that it is likely to bring a veto language that will permit municipalities, as well as private enterprise, to build this plant. As I said in relation to the amendment of the Senator from Pennsylvania [Mr. REED] some time ago, we might just as well abandon the idea of municipalities coming over from California to Nevada or Arizona and

building this plant. I understand they could not do it under their charters. The other States in the compact would object at once, because they are directly interested. So we get down to the fact that there is nobody left, if the Government of the United States does not do it, except private corporations, and that is the real reason why it is liable to bring a veto if we vote this language out.

Mr. PHIPPS. May I ask the Senator a question?

Mr. NORRIS. Yes.

Mr. PHIPPS. Is the Senator not aware that the State of California has recently enacted a provision of law that permits the municipalities to do that very thing? That is my information.

Mr. NORRIS. Does the Senator think for a moment that if Los Angeles or the State of California went over into Nevada to build this power plant there would not be a rebellion in Arizona and in the other interested States—and, I think, with some degree at least of righteousness. It is an interested party in the transaction; it would have to be dealing with these other States. That provision might just as well be eliminated. As a matter of fact, everybody knows that neither California nor Los Angeles nor Arizona nor Nevada nor any of the other States is going to build this dam and the entire works connected with this project. It is perfectly out of the question.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. NORRIS. In just a moment. The Senator from Colorado has voiced what to my mind ought to be given some consideration. Other Senators have said that if this amendment shall be adopted they are going to vote against the bill. Of course, that is perfectly proper; they have a right to do that; but I have been somewhat chagrined at the whispering campaign that has been going on that if we do this thing that is now proposed the President is going to veto the bill. I am in favor not only of the amendment now pending, but was in favor of the amendment as the Senator from Idaho recently offered it. Even, however, if it had been offered and been defeated, or if the bill should come back with the provision now sought to be stricken out still in it, much as I should like to see it stricken out, I should not have it in my heart to vote against the bill. There is something greater than water power involved here, and, much as I should like to keep the Water Power Trust, as I believe it to be, from getting its fingers on this great project, and reaping private reward out of it, I would turn it over to them rather than see the Imperial Valley become a part of the ocean. I do not believe that the President of the United States, whoever he may be, would veto this bill if we put in this provision, because, by doing it, he would in effect say, "Unless you let the Power Trust gets its grip on the power part of this proposition we will turn Imperial Valley over to the fishes of the sea. We will not pay any heed or attention to the cry that is going up from 65,000 people to save their homes. Everything they have on earth we will not save. We will let them go to destruction unless a private corporation can make some money out of this great dam that you are going to construct."

That is the proposition when it comes to a veto message; and I do not believe anybody will do it. If we are going to submit now, and say that we will not put in this provision because of fear of a veto from the White House, or if we say that we are going to defeat this bill unless private parties can have the benefit of the electricity that shall be generated with public funds, we practically say that we put that fact in one side of the balance when the homes of 65,000 American citizens are put in the other side of the balance.

Why, Senators, there can not be any question but that it would be better to save those people, who have everything they have on earth, the savings of a lifetime, invested there, than to heed any other consideration that can be involved in the use of the waters that will be held back at this dam. It is only a question of time; it is as certain as the rising and the setting of the sun that Imperial Valley ultimately will become part of the Pacific Ocean unless somewhere there is built a dam that will hold back the flood waters of the Colorado River.

Nobody denies that. I believe that is admitted and conceded by every man. So far as I am concerned, I expect to vote for this bill if it still retains that provision in it, no matter how it may hurt in every other respect; and I would not be so cruel, so unreasonable, I think, as to impute to the President of the United States a motive that would induce him to veto this bill if he can not turn part of the water power over to private corporations. I do not believe any man with a heart or a soul would do such a thing.

Mr. BORAH. Mr. President, I can perhaps shorten this matter a little.

There is a feeling among the friends of the measure, it seems, that this amendment will imperil this bill. I certainly have no desire to do that. The fight has been a long one, and I certainly do not desire to defeat the bill. I want to say, however, that the amendment which I first offered states my view as to what the bill should be. I do not know whether there are enough votes to make it that way or not; but I think that in these projects where the Government is going in to do the work, the entire enterprise should go under the operation of the Government.

Having said that, however, and having stated my position, I withdraw the amendment, for the sole reason that I would not want to contribute to the defeat of the measure here or elsewhere. I feel that it would be almost criminal to postpone flood control and the protection of the people of Imperial Valley.

Mr. REED of Missouri. Mr. President, I have not been able to take any part in the discussion of this bill; but I regret that the Senator from Idaho [Mr. BORAH] withdraws his amendment. If his view is correct, it is an important one, and we ought to have an opportunity to vote upon it.

It does not do much good for one to express his private view with regard to a question of governmental policy. So far as I am concerned, I believe that when the Government takes the people's money and invests it in an enterprise the Government ought to continue to control that enterprise. I am not in a position to make the contention about it, because other duties have kept me from the Senate a great deal of the time during the last several days; but I hope the Senator will let us vote on his amendment.

So far as I am concerned, I am getting very tired of being told on the floor of the Senate, by gentlemen who first disclaim any authority to speak, that they know what the President is going to do; that they are intimately acquainted with his inner consciousness. I do not know what the President will do.

Mr. PHIPPS. Mr. President, will the Senator yield?

Mr. REED of Missouri. Yes.

Mr. PHIPPS. Is the Senator referring to my statement?

Mr. REED of Missouri. Yes.

Mr. PHIPPS. I based that, as I said, merely and solely upon the President's message, which no doubt the Senator has read.

Mr. REED of Missouri. Very well. We have all read it, and we can all put our constructions on it.

This much I want to say: There is a class of men in this country who think that the Government of the United States and its Treasury ought to be employed for the purpose of creating great works and carrying forward great enterprises; that as soon as they have become profitable or successful they should be turned over to some private interests that will realize the profits, if profits are to be realized; but that in case the venture is not a financial success the Government of the United States should sustain the loss. In other words, they approach every question from the standpoint of private and selfish interest. They may believe that they are doing a service to private capital; but I hesitatingly say that if private capital continues its marauding expeditions, if it continues to demand the right to monoplize every one of the great sources of wealth in the United States, private capital will some day awaken to a realization of the fact that it has gone so far as to have produced a sentiment which will be very inimical, perhaps, even to honest capital honestly administered.

The worst enemy of capital in the United States to-day is the man who insists that private capital shall be allowed to exploit itself and exploit the people without limit. It may proceed in that manner for a time; but the day will come, and it will come in the not distant future, when capital will find that public sentiment has been arrayed against it. It will face, then, not moderate and conservative measures but immoderate and extreme measures that will in the end be greatly to its detriment.

I hope the Senator from Idaho will permit us to vote upon his amendment as he originally offered it. I am eternally opposed to going into the Treasury of the United States—which is into the pockets of the people of the United States—and expending money, and then, when it is expended and an enterprise has been made successful, turning it over to exploiters who in turn capitalize it at eight or ten times its value and in turn put the stock upon the market and sell it to the people at exorbitant prices. The time for that sort of business has about ended in the United States. If it has not ended, it will be ended some day when the people feel the pinch of the vise upon them and resent it, and do it in a very forceful way.

The VICE PRESIDENT. The question is on the amendment of the Senator from California [Mr. JOHNSON] as amended.

Mr. KING. That means the substitute for the House text, I understand?

The VICE PRESIDENT. The Senator is correct.

Mr. PHIPPS. I demand the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. PHIPPS. Mr. President, so that there may be no misunderstanding, will the Chair state what the vote is on now?

The VICE PRESIDENT. The vote is on the substitute amendment of the Senator from California [Mr. JOHNSON] as amended.

Mr. PHIPPS. Which is the substitute bill?

The VICE PRESIDENT. The substitute bill.

The Secretary will continue the calling of the roll.

The Chief Clerk resumed the calling of the roll.

Mr. KING (when his name was called). Upon this vote I am paired with the junior Senator from Texas [Mr. MAYFIELD]. I understand that if present the Senator from Texas would vote as I shall vote. Therefore I am permitted to vote, and I vote "yea."

Mr. BRATTON (when Mr. LARRAZOLO's name was called). My colleague [Mr. LARRAZOLO] is necessarily absent. He has been unable to secure a pair. If he were present and permitted to vote, he would vote "yea" on this question.

Mr. SHEPPARD (when Mr. MAYFIELD's name was called). My colleague the junior Senator from Texas [Mr. MAYFIELD] is unavoidably detained on account of illness. If he were present, he would vote "yea."

Mr. REED of Pennsylvania (when his name was called). Making the same announcement as before as to my pair with the senior Senator from Delaware [Mr. BAYARD], I vote "nay."

The roll call was concluded.

Mr. BRUCE. I desire to announce that my colleague [Mr. TYDINGS] is unavoidably detained from the Senate. If present, he would vote "yea."

Mr. FESS. On this vote I have a pair with the junior Senator from Maryland [Mr. TYDINGS]. I understand that if that Senator were present he would vote as I shall vote. I will therefore vote. I vote "yea."

Mr. McMASTER. I desire to announce that my colleague the senior Senator from South Dakota [Mr. NORBECK] is unavoidably absent. If present, he would vote "yea."

Mr. OVERMAN (after having voted in the affirmative). Has the senior Senator from Wyoming [Mr. WARREN] voted?

The VICE PRESIDENT. The senior Senator from Wyoming has not voted.

Mr. OVERMAN. Then I withdraw my vote.

Mr. SWANSON. I desire to announce that the senior Senator from Florida [Mr. FLETCHER] is paired on this vote with the senior Senator from Delaware [Mr. BAYARD]. If present, the senior Senator from Florida would vote "yea," and the senior Senator from Delaware, if permitted to vote, would vote "nay."

Mr. WAGNER. I desire to announce that my colleague [Mr. COPELAND] is paired with the junior Senator from New Jersey [Mr. EDWARDS]. If my colleague were present and permitted to vote, he would vote "yea," and if the junior Senator from New Jersey were present and permitted to vote he would vote "nay."

The result was announced—yeas 64, nays 16, as follows:

YEAS—64

Barkley	Fess	McKellar	Shortridge
Black	Frazier	McMaster	Simmons
Blaine	George	McNary	Smith
Borah	Gerry	Neely	Steiwer
Bratton	Gillett	Nye	Stephens

NOT VOTING—15

Bayard	Howell	Metcalf	Smoot
Copeland	Larrazolo	Norbeck	Tydings
Edwards	Locher	Overman	Warren
Fletcher	Mayfield	Robinson, Ark.	

So Mr. JOHNSON's substitute amendment as amended was agreed to.

The VICE PRESIDENT. If there are no further amendments to be proposed, the bill will be reported to the Senate as amended.

The bill was reported to the Senate as amended.

Mr. NORRIS. Mr. President, I desire now very briefly to speak on the bill. In the roll call that has just been had I voted "nay." This indicated that I preferred the House bill to the Senate bill. The vote was taken on a motion to substitute the Senate bill for the House bill, though some Senators told me that they thought they were voting on the passage of the bill. That roll call was simply on the motion to substitute the Senate bill for the House bill. Believing as I did, and as I still believe, that the House bill was a better bill, from my viewpoint, than the Senate bill, I voted "nay."

The House bill contains, in effect, the amendment known as the Davenport amendment, which the Senator from Idaho offered and withdrew. In my view of it, that constitutes the principal difference now between the House bill and the Senate bill.

The Senate bill having been substituted for the House bill, it now becomes the pending bill. I take it for granted there will be a roll call on the passage of the bill, and when we come to that vote we shall be confronted with the question as to whether we will have any bill at all or not.

As I said before, Mr. President, I would accept almost any proposition if contained in it was the real reason why I feel an interest in this legislation, and that is, for the protection of the people of Imperial Valley, a fertile valley containing about 65,000 people, with cities and roads and homes, people who are as patriotic and as intelligent as any other part of our citizenship. Everything that they own, everything they have, their homes and everything, will be destroyed if the country is overflowed with water.

The Imperial Valley is below sea level; the Colorado River is above sea level. That river has been building itself higher and higher by the silt which it deposits, and the work of man in building dikes to keep the water back has about reached its limit. So that everybody knows that in the course of time nature itself will bring the water of the Colorado River to Imperial Valley, unless a dam is built that will hold back the flood waters, and because this bill contains provision for that I am going to vote for it, although I am very fearful that in its operation those who will have charge of it will, if they possibly can—and they can under the bill by sacrificing economy and efficiency—turn over to some representative of the Water Power Trust the generation of the electricity that can be generated at that dam.

Mr. SACKETT. Mr. President, I want to offer one more amendment to the bill in the Senate.

The VICE PRESIDENT. The clerk will report the amendment.

The CHIEF CLERK. On page 3, line 11, after the figures "$165,000,000," strike out the following:

> Of this amount the sum of $25,000,000 shall be allocated to flood control and shall be repaid to the United States out of 62½ per cent revenues, if any, in excess of the amount necessary to meet periodical payments during the period of amortization, as provided in section 4 of this act. If said sum of $25,000,000 is not repaid in full during the period of amortization, then 62½ per cent of all net revenues shall be applied to payment of the remainder.

Mr. SACKETT. Mr. President, I offer that amendment because it brings up a question that was voted on here yesterday, which I felt the Senate probably did not understand when it voted, that of the total moneys that were to be paid for this improvement the sum of $25,000,000 should be allocated to flood control.

I felt that if the Senate did understand the bill thoroughly they would feel that a great natural resource of this kind, which was to be built by the Government, and which would provide a tremendous revenue, could well afford to be charged with the entire improvement of this great river; that to withdraw $25,000,000 and allocate it to flood control was to put that amount of the cost of this improvement upon the general taxpayers of the country, when the project itself could very well afford to pay for it.

That brings in a new principle of flood control which is not quite compatible with the principle adopted when we were dealing with flood control on the Mississippi. In the bill covering the Mississippi flood control we provided, in effect, for a large contribution from the citizens whose lands were particularly benefited. If this were left as it was originally in the bill, that difference between the Mississippi Valley proposition and the Colorado River proposition would not exist.

For these reasons I ask, with this explanation, for another vote upon this amendment.

Mr. PITTMAN. Mr. President, this matter was argued so fully yesterday and at such great length that I do not care to argue it now, but the statement the Senator makes that $25,000,000 is not to be paid back, but is to come out of the pockets

of the taxpayers, is erroneous, because there will be $10,000,000 annually after amortization to pay it.

The VICE PRESIDENT. The question is on agreeing to the amendment to the substitute amendment.

The amendment to the substitute amendment was rejected.

The VICE PRESIDENT. The question is on concurring in the amendment made as in Committee of the Whole.

The amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The VICE PRESIDENT. The bill having been read three times, the question is, Shall it pass?

Mr. NORRIS. On that I ask for the yeas and nays .

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. WAGNER (when Mr. COPELAND's name was called). I desire to announce that my colleague, the senior Senator from New York [Mr. COPELAND] is detained because of illness in his family. He is paired with the junior Senator from New Jersey [Mr. EDWARDS]. If the senior Senator from New York were present, he would vote "yea." If the junior Senator from New Jersey were present, he would vote "nay."

Mr. FESS (when his name was called). Making the same announcement as before, I vote "yea."

Mr. NORRIS (when Mr. HOWELL's name was called). I desire to announce that the junior Senator from Nebraska [Mr. HOWELL] is absent on account of illness. If he were present, he would vote "yea."

Mr. BRATTON (when Mr. LARRAZOLO's name was called). The junior Senator from New Mexico [Mr. LARRAZOLO] is necessarily absent from the Chamber. If present, he would vote "yea."

Mr. SHEPPARD (when Mr. MAYFIELD's name was called). The junior Senator from Texas [Mr. MAYFIELD] is unavoidably detained on account of illness. If present, he would vote "yea."

Mr. SACKETT (when Mr. METCALF's name was called). The Senator from Rhode Island [Mr. METCALF] is detained from the Senate by illness. If present, I am informed that he would vote "yea."

Mr. REED of Pennsylvania (when his name was called). I have a general pair with the Senator from Delaware [Mr. BAYARD]. If that Senator were present, he would vote as I intend to vote. Therefore I am free to vote. I vote "nay."

The roll call was concluded.

Mr. GERRY. I desire to announce that the Senator from Florida [Mr. FLETCHER] is necessarily absent. If present, he would vote "yea." He is paired with the Senator from Delaware [Mr. BAYARD], who, if present, would vote "nay."

Mr. BRUCE. If my colleague the junior Senator from Maryland [Mr. TYDINGS] were present, he would vote "yea."

Mr. McMASTER. The senior Senator from South Dakota [Mr. NORBECK], if present, would vote "yea."

The result was announced—yeas 65, nays 11, as follows:

YEAS—65

Barkley	Frazier	Neely	Steiwer
Black	George	Norris	Stephens
Blaine	Gerry	Nye	Swanson
Borah	Harris	Oddie	Thomas, Idaho
Bratton	Harrison	Phipps	Thomas, Okla.
Brookhart	Hastings	Pine	Trammell
Broussard	Hawes	Pittman	Tyson
Bruce	Heflin	Ransdell	Vandenberg
Capper	Johnson	Reed, Mo.	Wagner

Fess	Moses	Smith	

NAYS—11

Ashurst	Glass	Gould	Hayden
Bingham	Glenn	Greene	Reed, Pa.
Blease	Goff	Hale	

NOT VOTING—19

Bayard	Howell	Mayfield	Smoot
Copeland	Keyes	Metcalf	Steck
Edwards	Larrazolo	Norbeck	Tydings
Fletcher	Locher	Overman	Warren
Gillett	McLean	Robinson, Ark.	

So the bill was passed.

Mr. JOHNSON. Mr. President, I move to amend the title of the bill by striking out the word "lower" in the title as printed.

There being no objection, the title was amended so as to read: "A bill to provide for the construction of works for the protection and development of the Colorado River Basin, for the approval of the Colorado River compact, and for other purposes."

PRISON-MADE GOODS

Mr. HAWES. Mr. President, I move that the Senate proceed to the consideration of the bill (H. R. 7729) to divest goods, wares, and merchandise manufactured, produced, or mined by convicts or prisoners of their interstate character in certain cases.

The motion was agreed to, and the Senate, as in Committee of the Whole, proceeded to the consideration of the bill.

PANAMA AND NICARAGUA CANALS

Mr. EDGE. Mr. President, I desire to give notice that on Monday next, after the disposition of morning business, I propose to address the Senate, if I may receive recognition, on the subject of the proposed Nicaraguan canal and the proposed increased facilities of the Panama Canal.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened; and the Senate (at 6 o'clock and 10 minutes p. m.) adjourned until to-morrow, Saturday, December 15, 1928, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate December 14 (legislative day of December 13), 1928

APPOINTMENTS IN THE REGULAR ARMY

ASSISTANT CHIEF OF BRANCH

To be Assistant to the Quartermaster General, with the rank of brigadier general, for a period of four years from date of acceptance, with rank from February 2, 1929

MEDICAL CORPS

To be first lieutenants

First Lieut. John Larkin Gallagher, jr., Medical Corps Reserve, with rank from December 5, 1928.

First Lieut. Robert Eugene Bitner, Medical Corps Reserve, with rank from December 5, 1928.

MEDICAL ADMINISTRATIVE CORPS

To be second lieutenants

Staff Sergt. Orion Victor Kempf, Medical Department, with rank from December 8, 1928.

Private Paul Estabrooke Zuver, Medical Department, with rank from December 8, 1928.

Staff Sergt. Kindrick Ownby, Medical Department, with rank from December 8, 1928.

Staff Sergt. Robert Lee Black, Medical Department, with rank from December 8, 1928.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

QUARTERMASTER CORPS

Capt. John Bryce Casseday, Cavalry (detailed in Quartermaster Corps), with rank from July 1, 1920.

First Lieut. Charles Franklin Fletter, Field Artillery (detailed in Quartermaster Corps), with rank from July 1, 1920.

FINANCE DEPARTMENT

First Lieut. James Robert Manees, Infantry, with rank from July 1, 1920.

CHEMICAL WARFARE SERVICE

Maj. Theodore Barnes, Cavalry (assigned to duty with Chemical Warfare Service) with rank from July 1, 1920.

FIELD ARTILLERY

Capt. William Wayne Murphey, Ordnance Department (assigned to duty with Field Artillery), with rank from April 8, 1928.

PROMOTIONS IN THE REGULAR ARMY

To be lieutenant colonels

Maj. Charles Bernadou Elliott, Infantry, from November 17, 1928.

Maj. John Bunyan Corbly, Infantry, from November 19, 1928.

Maj. Joseph Lybrand Topham, jr., Quartermaster Corps, from November 21, 1928.

Maj. Charles Lewis Sampson, Infantry, from November 26, 1928.

Maj. John Marshall True, Quartermaster Corps, from November 30, 1928.

To be majors

Capt. Richard Bruce Webb, Coast Artillery Corps, from November 17, 1928.

Capt. Moses Goodman, Coast Artillery Corps, from November 18, 1928.

Capt. Arthur Henry Truxes, Cavalry, from November 19, 1928.

Capt. Gordon Joseph Fred Heron, Cavalry, from November 21, 1928.

Capt. Thomas Seelye Arms, Infantry, from November 26, 1928.

Capt. Raymond Duffield Bell, Infantry, from November 27, 1928.

Capt. Archelaus Lewis Hamblen, Infantry, from November 30, 1928.

Capt. Paul Whitten Mapes, Infantry, from December 7, 1928.

To be captains

First Lieut. Frederic Bernard Wieners, Air Corps, from November 17, 1928.

First Lieut. Frank Richards, Coast Artillery Corps, from November 18, 1928.

First Lieut. Ralph Harry Woolsey, Quartermaster Corps, from November 18, 1928.

First Lieut. Richard Francis Lussier, Infantry, from November 19, 1928.

First Lieut. Jack Roy Gage, Infantry, from November 21, 1928.

First Lieut. Raymond Peter Lavin, Infantry, from November 23, 1928.

First Lieut. Henry Wyatt Isbell, Infantry, subject to examination required by law, from November 24, 1928.

First Lieut. Willis Stanley Bryant, Field Artillery, from November 25, 1928.

First Lieut. Harland Clayton Griswold, Infantry, from November 26, 1928.

First Lieut. Ralph Edmund Powell, Infantry, from November 27, 1928.

First Lieut. Perry Wainer, Air Corps, from November 30, 1928.

First Lieut. Krauth Whitson Thom, Infantry, from December 6, 1928.

First Lieut. Guy Malcolm Kinman, Infantry, from December 7, 1928.

PROMOTIONS IN THE NAVY

Commander Gordon W. Haines to be a captain in the Navy from the 6th day of November, 1928.

Lieut. Commander James R. Barry to be a commander in the Navy from the 6th day of November, 1928.

Lieut. Harrison Avery to be a lieutenant commander in the Navy from the 1st day of April, 1928.

Lieut. Thomas R. Cooley to be a lieutenant commander in the Navy from the 6th day of November, 1928.

Lieut. (Junior Grade) William B. Cranston to be a lieutenant in the Navy from the 10th day of January, 1928.

Lieut. (Junior Grade) Paul H. Wiedorn to be a lieutenant in the Navy from the 3d day of June, 1928.

Lieut. (Junior Grade) Carl F. Espe to be a lieutenant in the Navy from the 3d day of July, 1928.

Lieut. (Junior Grade) Edward C. Metcalfe to be a lieutenant in the Navy from the 22d day of July, 1928.

Lieut. (Junior Grade) William F. Jennings to be a lieutenant in the Navy from the 1st day of September, 1928.

Lieut. (Junior Grade) John P. Whitney to be a lieutenant in the navy from the 12th day of October, 1928.

Lieut. (Junior Grade) Joyce C. Cawthon to be a lieutenant in the Navy from the 16th day of November, 1928.

The following named ensigns to be lieutenants (junior grade) in the Navy from the 4th day of June, 1928:

Redfield Mason.	Herman E. Schieke.
Hubert T. Waters.	William H. Shahan.
Donald A. Bush.	

The following-named surgeons to be medical inspectors in the Navy, with the rank of commander, from the 1st day of April, 1927:

George C. Rhoades.

John C. Parham.

Asst. Surg. John M. Woodard to be a passed assistant surgeon in the Navy, with the rank of lieutenant, from the 1st day of January, 1928.

Paymaster Hervey B. Ransdell to be a pay inspector in the Navy, with the rank of commander, from the 1st day of April, 1927.

Pharmacist Maurice W. Throckmorton to be a chief pharmacist in the Navy, to rank with but after ensign, from the 19th day of November, 1928.

Chief Pay Clerk William D. Wilkinson to be a chief pay clerk in the Navy, to rank with but after ensign, from the 10th day of October, 1925, to correct the date from which he takes rank as previously nominated and confirmed.

The following-named assistant naval constructors to be naval constructors in the Navy, with the rank of lieutenant, from the 3d day of August, 1928:

George Helms.	Tony L. Hannah.
Timothy E. Kiley.	Herbert Duthie.
John P. Yates.	James G. McPherson.
Thomas W. Richards.	Albert G. Merrill.
Joseph M. Simms.	Frederick B. Britt.
Frederick C. LePine.	Robert B. Pick.
Matthew B. Pollock.	John H. Jack, jr.
Walter W. Toles.	Clarence W. Chaddock.
William C. Hardie.	Thomas F. O'Brien.
William F. Hamberger.	Irving B. McDaniel.
John A. Lord.	George T. Paine.
William O'Neill.	William A. Sullivan.
Frederick M. Kirchmier.	Harold Larner.
George A. Lazar.	Carl B. Harper.
Lawrence A. Maaske.	Ralph S. Barnaby.
Harry E. Cooper.	Clem H. Congdon.
Albert Tucker.	Raymond D. MacCart.
Clifton Greenwell.	Walter S. Diehl.
Joseph Feaster, jr.	William F. Twitchell.
Harry T. Newman.	Michael C. Faber.
Peter Treutlein.	Lucien M. Grant.
James W. Costello.	Antonio S. Pitre.
Robert H. Lake.	Joseph M. Kiernan.
Brandt W. Wilson.	George V. Whittle.
Stuart P. Mead.	Hugh W. Gokey.
Joseph J. Redington.	Roland G. Mayer.
Francis X. Maher.	William W. Hastings.
Robert Velz.	George W. Henderson.
Louis Haase.	Gerald W. Thomson.
Caleb Whitford.	William Neidert.
Robert Morgan.	Cornelius V. S. Knox.
Joel A. Davis.	Virgil V. McKenna.
James P. Shovlin.	Wendell P. Roop.
Robert H. Neville.	Charles Hibbard.
John A. Price.	Karl Schmidt.

Assistant Civil Engineer Robert L. McLellan to be a civil engineer in the Navy, with the rank of lieutenant, from the 30th day of June, 1928.

The following-named assistant civil engineers to be civil engineers in the Navy, with the rank of lieutenant, from the 3d day of August, 1928:

Harold W. Johnson.	Robert R. Yates.
Charles L. B. Anderson.	Albert A. L. Ort.
Dow H. Nicholson.	Clyde W. Coryell.
Allen Hoar.	Edward D. Graffin.
Harry LeG. Hilton.	Robert E. Hancock.
Collins L. Macrae.	William W. Schneider.
Edmund B. Keating.	Thomas J. Brady, jr.

Commander John W. Wilcox, jr., to be a captain in the Navy from the 11th day of December, 1928.

Lieut. (Junior Grade) Thomas B. Dugan to be a lieutenant in the Navy from the 3d day of June, 1928.

Lieut. (Junior Grade) John A. Hollowell, jr., to be a lieutenant in the Navy from the 4th day of December, 1928.

Ensign Julian B. Jordan to be a lieutenant (junior grade) in the Navy from the 4th day of June, 1928.

The following-named ensigns to be lieutenants (junior grade) in the Navy from the 4th day of June, 1928:

James A. McNally.

Theodore Wolcott.

POSTMASTERS

ALABAMA

James C. Crim to be postmaster at Siluria, Ala., in place of B. L. Glasscock, resigned.

ARIZONA

Robert W. Wingfield to be postmaster at Camp Verde, Ariz. Office became presidential July 1, 1928.

ARKANSAS

Lovette J. Lee to be postmaster at Paris, Ark., in place of C. V. B. Harley, resigned.

COLORADO

Sadie Mear to be postmaster at Buena Vista, Colo., in place of L. W. Tomkins. Incumbent's commission expired December 18, 1927.

Ferd G. Smith to be postmaster at Kim, Colo., in place of V. L. Waters, removed.

IDAHO

Catherine J. Craig to be postmaster at Avery, Idaho, in place of C. J. Craig. Incumbent's commission expires December 17, 1928.

Golda O. Coy to be postmaster at Bovill, Idaho, in place of G. O. Coy. Incumbent's commission expires December 17, 1928.

Flossie G. Hill to be postmaster at Gooding, Idaho, in place of F. G. Hill. Incumbent's commission expired December 10, 1928.

ILLINOIS

Rufus D. Denton to be postmaster at Carthage, Ill., in place of R. D. Denton. Incumbent's commission expired December 10, 1928.

Anna B. Dorsey to be postmaster at Lovejoy, Ill., in place of A. J. Arthur. Incumbent's commission expired May 20, 1928.

IOWA

Ludwig C. Pedersen to be postmaster at Kimballton, Iowa, in place of R. P. Larsen, removed.

Elmer F. Walter to be postmaster at Manly, Iowa, in place of E. C. Reindl. Incumbent's commission expired June 5, 1928.

KANSAS

Robert W. Cyr to be postmaster at Aurora, Kans., in place of R. W. Cyr. Incumbent's commission expired December 12, 1928.

Enos F. Halbert to be postmaster at Chapman, Kans., in place of E. F. Halbert. Incumbent's commission expired December 9, 1928.

KENTUCKY

Stanley Byers to be postmaster at Horse Branch, Ky. Office became presidential July 1, 1928.

Jennie S. May to be postmaster at Stone, Ky., in place of Clyde Burton, resigned.

MARYLAND

Mary N. Yates to be postmaster at La Plata, Md., in place of W. O. Yates, removed.

MICHIGAN

Leon D. Corwin to be postmaster at Ashley, Mich., in place of L. D. Corwin. Incumbent's commission expired December 12, 1928.

MINNESOTA

Isaac R. Lamppa, jr., to be postmaster at Embarrass, Minn., in place of M. R. Hannula, removed.

MISSOURI

WITHDRAWAL

Executive nomination withdrawn from the Senate December 14 (legislative day of December 13), 1928

POSTMASTER

ILLINOIS

Oscar B. Harrauff to be postmaster at Princeton in the State of Illinois.

HOUSE OF REPRESENTATIVES

FRIDAY, *December 14, 1928*

The House met at 12 o'clock noon and was called to order by the Speaker.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We entreat the spirit of the Lord God to be upon us. Let this day be an open door to another opportunity for service. Bless us with ease of mind in disappointment and with victory over every fear. Give us beauty for ashes, the oil of joy for mourning, and the garment of praise for heaviness. Let the revelation of eternal love be our ideal. Thus equipped, may we toil for the extension of the good. Empty our hearts of all jealousy, pride, and covetousness, and all selfishness which creates the bitterness of the world. In the calendar of memory may we live as wise servants of the Republic and obedient children of Him who has opened the gates of mercy for all mankind. In His name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 14801. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes.

The message also announced that the Senate had passed without amendment a joint resolution and bill of the House of the following titles:

H. J. Res. 346. Joint resolution authorizing the payment of salaries of the officers and employees of Congress for December, 1928, on the 20th day of that month; and

H. R. 13990. An act to authorize the President to present the distinguished flying cross to Orville Wright, and to Wilbur Wright, deceased.

The message also announced that the Vice President had appointed Mr. BINGHAM, Mr. MCMASTER, and Mr. BLACK members of the committee on the part of the Senate as provided for in the joint resolution (H. J. Res. 332) entitled "Joint resolution to appoint a congressional committee to attend the exercises celebrating the twenty-fifth anniversary of the first airplane flight made by Wilbur and Orville Wright on December 17, 1903, at Kill Devil Hills, Kitty Hawk, N. C."

MESSAGE FROM THE PRESIDENT

A message from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who informed the House that on the following dates the President did approve and sign bills of the House of the following titles:

On December 12, 1928:

H. R. 10869. An act amending section 764 of Subchapter XII, fraternal beneficial associations, of the Code of Law for the District of Columbia.

On December 13, 1928:

H. R. 279. An act to amend section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867; and

H. R. 5894. An act for the relief of the State Bank & Trust Co., of Fayetteville, Tenn.

REREFERENCE OF A BILL

Mr. HAWLEY. Mr. Speaker, I ask unanimous consent that the bill H. R. 14670 be transferred from the Committee on Territories to the Committee on Ways and Means. I have consulted with the chairman of the Committee on Territories in regard to this.

Mr. GARNER of Texas. Mr. Speaker, what was the gentleman's request?

Mr. HAWLEY. I was asking for the transfer from the Committee on Territories to the Committee on Ways and Means of the bill H. R. 14670, introduced by the Delegate from Hawaii [Hon. V. S. K. HOUSTON], to amend section 495, title 48, chapter 3, of the United States Code, exempting salaries of officers and employees of the Territory of Hawaii from the Federal income tax, which was referred to the Committee on Territories.

The SPEAKER. Without objection, the transfer of the bill will be made.

There was no objection.

PRESENTATION OF A GAVEL TO THE SPEAKER

Mr. ALLEN. Mr. Speaker, it was with the greatest pleasure that I was able this morning to present to you a gavel fashioned from the wood of a tree which grew in the front yard of the Hoover home in Iowa. In this connection I should like permission to extend my remarks in the RECORD by inserting a short statement sent to me by Mr. Robert Reed Wallace, who sent the gavel to me for presentation to the Speaker.

The SPEAKER. Without objection, it is so ordered.

The statement referred to is as follows:

If this bit of wood could speak our language, it would tell of the beginning of the journey of a care-free little boy from a 2-room house on a frontier prairie in Iowa to the White House in Washington, D. C.—to the greatest office in the gift of men and women—to the greatest responsibility that can rest on any one man in the world.

* * * * * * *

A sturdy blacksmith set up his forge and shop on the west branch of a little stream on the western prairie, and across the ox-cart road he established his home, and in the front yard of that home he and his good wife planted a tree, and that tree grew in the rich soil and pure air of Iowa—a little boy came and played under the friendly branches of that tree—the scythe of time took the father and mother and the relatives took the little boy and taught him the ways of the farm, and the country school, on which there is no better foundation to build a man, and that man is now the President elect of the United States, the highest office in the gift of men and women, and the greatest possible responsibility that can rest on any man in the world.

This gavel was fashioned of wood out of the tree planted by Mr. Hoover's father and mother—intrinsically it has little value, while inspirationally it has immeasurable value if we will allow it to epitomize what can be accomplished by a boy who will apply the very best that is in him to every physical, mental, moral, social, political, and humanitarian problem that presents itself to him, and it is with that inspirational value in mind that the gavel is now presented to the Speaker of the House of Representatives.

The people of the United States and of the world are expecting much of Mr. Hoover and his accomplished wife, and I have faith that they will measure up as far as it is possible for human beings to measure up, and I know we will have for our President a man well born, well educated, well seasoned, and widely experienced, a diligent, conscientious, humble, Christian gentleman.

ROBERT REED WALLACE,
Hamilton, Ill.

INAUGURATION OF THE PRESIDENT ELECT

Mr. SNELL. Mr. Speaker, I present a privileged report (Rept. No. 1951) from the Committee on Rules on Senate Concurrent Resolution 24.

The SPEAKER. The gentleman from New York presents a privileged report from the Committee on Rules, which the Clerk will report.

The Clerk read as follows:

Senate Concurrent Resolution 24

Resolved by the Senate (the House of Representatives concurring), That a joint committee consisting of three Senators and three Representatives, to be appointed by the President of the Senate and the Speaker of the House of Representatives, respectively, is authorized to make the necessary arrangements for the inauguration of the President elect of the United States on the 4th of March next.

Mr. SNELL. Mr. Speaker, I simply desire to state that this is the usual resolution that is passed once in four years preceding the inauguration of a new President. This resolution is considered to be an authorization for an appropriation which will be carried in the deficiency bill.

I think that is all that is to be said about that at this time. I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

The SPEAKER. The Speaker appoints as members of that committee Mr. SNELL, Mr. DYER, and Mr. POU.

PENSIONS

Mr. ELLIOTT. Mr. Speaker, I call up the bill (H. R. 14800) granting pensions and increase of pensions to certain soldiers, sailors, and marines of the Civil War and certain widows and dependent children of soldiers, sailors, and marines of said war, and ask unanimous consent that it be considered in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Indiana calls up the bill H. R. 14800, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 14800) granting pensions and increase of pensions to certain soldiers, sailors, and marines of the Civil War and certain widows and dependent children of soldiers, sailors, and marines of said war.

The SPEAKER. The gentleman from Indiana asks unanimous consent that the bill may be considered in the House as in Committee of the Whole. Is there objection?

There was no objection.

The SPEAKER. The Clerk will read the bill.

The bill was read.

The bill is a substitute for the following House bills referred to the Committee on Invalid Pensions:

H. R. 501. Rose A. Patten.
H. R. 510. Nancy J. Cain.
H. R. 512. Carrie H. Freelove.
H. R. 513. Mary E. Hanna.
H. R. 514. Naomi Johnson.
H. R. 515. Addie Pipes.
H. R. 520. Hulda A. Blake.
H. R. 521. Margaret M. Cunningham.
H. R. 524. Ellen Gebhart.
H. R. 525. Hannah Giffin.
H. R. 530. Sarah E. Shaferman.
H. R. 533. Barbara Bray.
H. R. 537. Sophronia Williams.
H. R. 538. Margaretta C. Feay.
H. R. 541. Rebecca E. Nuzum.
H. R. 543. Elcie Been.
H. R. 545. Rebecca Neal.
H. R. 546. Emma F. De Moss.
H. R. 550. Sallie Neidhardt.
H. R. 552. Sarah B. Ray.
H. R. 553. Sarah H. Miller.
H. R. 555. Gertrude Wiedebusch.
H. R. 557. Ary Shaw.
H. R. 559. Sivilla C. Moore.
H. R. 560. Sarah V. Merrifield.
H. R. 562. Rhoda McEldowney.
H. R. 563. Mary R. McIlvain.
H. R. 565. Mary E. Hohmann.
H. R. 566. Catharine Geldbaugh.

H. R. 14646. Mary E. Savage.
H. R. 14648. Mary D. Heistand.

Mr. ELLIOTT. Mr. Speaker, I offer the following amendments.

The SPEAKER. The Clerk will report the amendments.

The Clerk read as follows:

Committee amendments offered by Mr. ELLIOTT: Page 59, strike out lines 13 to 16, inclusive, the proposed beneficiary, Carrie S. Richey, having died.

Page 88, strike out lines 3 to 6, inclusive, the proposed beneficiary, Nancy E. Mount, having died.

Page 106, strike out lines 24 and 25, and on page 107, strike out lines 1 and 2, the proposed beneficiary, Sarah E. Wirick, having died.

Page 128, strike out lines 8 to 12, inclusive, the proposed beneficiary, Lucy A. Johnson, having died.

Page 148, strike out lines 14 to 17, inclusive, the proposed beneficiary, Frances E. Bolan, having died.

Page 148, strike out lines 22, 23, and 24, and on page 149, strike out lines 1 and 2, the proposed beneficiary, Nellie L. Burns, having died.

Page 207, strike out lines 7 to 10, inclusive, the proposed beneficiary, Olive H. Woods, having died.

Page 207, strike out lines 15 to 18, inclusive, the proposed beneficiary, Mary M. Tappana, having died.

Page 211, strike out lines 1 to 5, inclusive, the proposed beneficiary, Mary E. Robinson, having died.

Page 218, strike out lines 16 to 21, inclusive, the proposed beneficiary, Mary J. Anderson, having died.

Page 234, strike out lines 6 to 10, inclusive, the proposed beneficiary, Janie R. Stewart, having died.

Page 267, strike out lines 19 to 22, inclusive, the proposed beneficiary, Julia Cramer, having died.

Page 286, strike out lines 15 to 18, inclusive, the proposed beneficiary, Helena Hasenstab, having died.

Page 286, strike out lines 23 and 24, and page 287, strike out lines 1 and 2, the proposed beneficiary, Prissilla Storms, having died.

Page 301, strike out lines 14 to 17, inclusive, the proposed beneficiary, Lucy A. Blakeley, having died.

Page 302, strike out lines 18 to 21, inclusive, the proposed beneficiary, Ella Moore, having died.

Page 351, strike out lines 21 to 24, inclusive, the proposed beneficiary, Elizabeth Doxtater, having died.

Page 454, strike out lines 24 and 25, and page 455, strike out lines 1 and 2, the proposed beneficiary, Meltha M. Coss, having died.

Page 483, strike out lines 4 to 7, inclusive, the proposed beneficiary, Dulcena Jones, having died.

Page 489, strike out lines 19 to 22, inclusive, the proposed beneficiary, Elizabeth K. Kershaw, having died.

Page 497, strike out lines 9 to 12, inclusive, the proposed beneficiary, Sylfinia Bryan, having died.

Mr. ELLIOTT. Mr. Speaker, these amendments reduce the estimated cost of the bill $2,640 per annum; the estimated annual cost of the bill as now reported is $415,524.

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill as amended.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

TREASURY AND POST OFFICE APPROPRIATION BILL, 1930

Mr. WOOD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Treasury and Post Office appropriation bill, disagree to all the amendments of the Senate, and agree to the conference asked for.

The SPEAKER. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (H. R. 14801) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1930, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mr. GARNER of Texas. Reserving the right to object, Mr. Speaker, will the gentleman state to the House whether or not that is agreeable to the member of the Post Office Committee from this side of the House, who is ill?

Mr. WOOD. Yes.

The SPEAKER. The gentleman from Indiana asks unanimous consent to disagree to the Senate amendment and agree to the conference asked for. Is there objection?

There was no objection; and the Speaker appointed as conferees on the part of the House Mr. WOOD, Mr. THATCHER, and Mr. BYRNS.

NO QUORUM—CALL OF THE HOUSE

Mr. TILSON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Connecticut makes the point of order that there is no quorum present. Evidently there is no quorum present.

Mr. CHINDBLOM. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The SPEAKER. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 3]

Auf der Heide	Denison	Jeffers	Parker
Beck, Pa.	Dickstein	Jenkins	Peavey
Beck, Wis.	Doutrich	Johnson, Wash.	Peery
Cooper, Ohio	Dowell	Kearns	Porter
Crosser	Doyle	Kelly	Prall
Bell	Evans, Calif.	Kemp	Quayle
Boies	Faust	Kent	Rainey
Bowles	Fitzgerald, Roy G.	King	Ransley
Boylan	Fitzgerald, W. T.	Kunz	Reed, Ark.
Britten	Fletcher	Kvale	Reed, N. Y.
Browne	Foss	Lea, Calif.	Reid, Ill.
Buckbee	Frear	Lindsay	Robsion, Ky.
Busby	Fulbright	Linthicum	Romjue
Bushong	Furlow	Lyon	Sanders, N. Y.
Butler	Gambrill	McClintic	Somers, N. Y.
Carew	Garber	McCormack	Sproul, Kans.
Carley	Garrett, Tenn.	Maas	Strother
Casey	Gibson	Menges	Sullivan
Celler	Golder	Montague	Tatgenhorst
Cole, Md.	Goldsborough	Mooney	Tillman
Combs	Graham	Moore, Ky.	Underwood
Connery	Griest	Moore, N. J.	Updike
Crowther	Hammer	Moore, Ohio	Weller
Cullen	Hare	Morgan	Welsh, Pa.
Curry	Hudspeth	Norton, N. J.	White, Kans.
Davenport	Hull, William E.	O'Connor, N. Y.	Wolfenden
Davey	Hull, Tenn.	Oliver, N. Y.	Wurzbach
Dempsey	Igoe	Palmer	

The SPEAKER. Three hundred and twenty-two Members have answered to their names. A quorum is present.

Mr. TILSON. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

HON. THEODORE E. BURTON

Mr. TILSON. Mr. Speaker, I ask unanimous consent that our distinguished and revered colleague the gentleman from Ohio [Mr. BURTON] be allowed to address the House out of order. [Applause.]

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. BURTON. Mr. Speaker, ladies and gentlemen of the House, this is at the same time a most happy occasion for me and a melancholy one. I can not exaggerate my reluctance in leaving this body, and on the kind suggestion of the gentleman from Connecticut I prize most highly the opportunity to address a few words of greeting to my colleagues on this the last day of my service in the House of Representatives.

My membership in this House has lasted for 24 years, in three different periods. It commenced 40 years ago the coming 4th of March. There is no one else in House or Senate whose tenure of office commenced at so early a date except our distinguished colleague the gentleman from Virginia [Mr. TUCKER]. As I look over this body I recognize how many were born after I first came to this House, how many of the multitude with whom I have served have come and gone and how many have passed on. My association here has been with Presidents of the United States, with men who have occupied a most notable position not only in the legislative halls of the House and Senate but in the executive departments of the Government. I have been acquainted, with some degree of intimacy, with every President, beginning with Benjamin Harrison.

In this period of 40 years how wonderful are the changes that have occurred in our own country and this great world of ours. I feel sometimes as if I were moving in a different universe from that which existed when I first came to Congress, and I again refer to the many who have passed on with whom I have associated. I can say in the language of the great German poet:

> They hear not the following words
> The souls that listened to my first.

As one of long experience here I feel it perhaps a duty to offer certain words of advice and injunction to those with whom I have served. I do not wish that there should be forgotten the causes that I have advocated. In most instances the membership of the House has agreed with me; in some they have not, and I have accepted their dissent with the spirit of a genuine sport. I sincerely hope that no measure may be passed increasing the size of this House. [Applause.] When my membership commenced there were 325 only as against 435. On each occasion when there has been an increase it has been the distinct promise of those who favored it that there should be no further addition to the membership when the succeeding censuses were taken, but there was an increase in 1890, 1900, and 1910. I can not too strongly emphasize the disadvantages in the transaction of public business in a large House as compared with a smaller House, and I must again, with some delicacy, refer to the diminished prestige that belongs to the membership with every successive addition.

May I speak rather bluntly, my colleagues? You have served with me, so let me leave this injunction: Be courageous in voting upon all the questions coming before the House. There are some who in forgetfulness neglect to realize how much the average citizen prizes courage. Do not yield to the sudden impulses of an uninformed public opinion. Do not listen to the selfish propaganda of groups and different elements. If I leave the House with one disposition of regret it is that I have seen some Members, perfectly well intentioned and seeking to do their duty, overborne by propaganda in the advocacy of measures here or policies which mature consideration would have taught were not for the best interests of the people and of the whole people. The voice of conservatism is that not always the first but sometimes the second voice of the people is the voice of God, and while I would not advise you to adhere to any hide-bound conservatism, I would ask you to stand by the things which should not be shaken.

I have taken great interest here in our foreign relations, always with this one central idea: America first and patriotism our chiefest duty. [Applause.] But I have sometimes seen a spirit of distrust and unkindliness for other members of the great family of nations, which I regret. The world is becoming more and more one great social and economic republic, and to occupy our proper place in the sun we must harmonize with every other people. If we have that commercial supremacy which we desire we must be fair to every other people. If we have that respect which we earnestly wish we must show ourselves deserving of respect by fairness and even by generosity in our dealings with the other countries of the earth. If we assume that leadership which, I think, proudly our own America should assume, we must show that, by our disposition toward other peoples, by a constant spirit of justice, good will, and a desire for cooperation, we are worthy of that leadership.

> Let all the ends thou aim'st at be thy country's,
> Thy God's and truth's.

It is better to face defeat in an election than it is to swerve one iota from the path of principle and that which commends itself to the conscience of the individual Members.

I am sincerely hoping that in the very near future progress may be made in the cause of international peace. To speak to you freely, one reason why I sought to become a Member of the Senate was because it has so much larger a part in international relations, though we have tried here to do our best in that regard. I trust you may not be misled by the din of armies and by any pride about supremacy on the sea to adopt legislation which shall prevent us from taking that part we should as a peace-loving Nation and as one that deserves the support of other countries in assuming that leadership which we should enjoy. [Applause.]

The year is closing with two directly antagonistic facts in view, one the Briand and Kellogg treaties, which are more than a gesture. They are a declaration by more than 50 nations that war, as an instrument of policy, shall be condemned. I can not believe this declaration to be insincere or without the most salutary results. On the other hand, between two nations of South America there is a very bitter controversy. The whole framework of methods for conciliation and the avoidance of war is at stake in that controversy. Both countries are members of the League of Nations, and it is our earnest hope that the league will vindicate itself as an agency for peace in preventing armed collision between those two countries. Both are parties to treaties that promised, by conciliation, to avoid the outbreak of war. If in spite of these two facts war should break out, the question will be agitated the world over: Are your treaties for commissions of inquiry and are your memberships in the League of Nations any guaranty against nations flying at each other's throats and engaging in war, or is it true in the case of these two countries that they are less advanced in civilization and in the factors which make for world comity and for peace? We ask that question with the utmost deference.

I have sought to maintain here a rational economy. I have opposed extravagant measures. We must, on the other hand, realize that this is a great and expanding country, that the activities of the Federal Government are gaining larger volume year by year, and while public expenditures should be watched with the utmost care, it is only the most sanguine who can expect that their volume will be decreased.

I do not wish to detain you too long. I wish this parting to be without formality. I do not wish that anyone should feel called upon to respond to my remarks. I will only say good bye. I can not say farewell to many lifelong friendships, so large a number of pleasant associations. I shall hope to linger near you in the years of my life that are to follow. I shall make a constant study of your transactions. I hope at times to come in among you and see what you are doing. Health, happiness, prosperity to you all, every one.

I can not omit to state that the good will which has been manifested for me has been irrespective of party, irrespective of locality.

It is a wonderful responsibility you have to America and to the world. May your deliberations be with dignity, with the avoidance of petty squabbles or personal recrimination, with temperance in language used regarding those outside of this body, for these characteristics are worthy of a great body like this.

The future of our country, which we hope will be far better than the past, rests very much in your hands. Face this responsibility, I pray you, with courage, with wisdom, and while I would not decry partisanship, let not bitter partisanship be the motive which actuates any of you. It is with the highest hopes that I utter these words, with the hope that in the future this great House of Representatives may be worthy of its traditions in the past, that as I think of those who have gone before I am not like one speaking to a banquet hall deserted, but worthy successors are coming with each successive election, that those upon whose brow rests the dew of youth will gather with those of maturer age in the making of this House what it should be, a great factor for human betterment, for human progress, for equality of opportunity, for constant addition to the advancement and the glory of our own United States, which we have promised to serve. [Prolonged applause, all Members rising.]

The SPEAKER. Under the special order of the House the Chair recognizes the gentleman from California [Mr. SWING] for 30 minutes.

BOULDER DAM GIVEN FAVORABLE REPORT BY SIBERT BOARD OF ENGINEERS

Mr. SWING. Mr. Speaker and gentlemen of the House, opponents of the Boulder Dam project in this body, and in another body, profess great satisfaction with the recent report of

the board of engineers appointed under an act of Congress to investigate and report on this project. The contention of these people seems to be that the report of this board substantiates in every particular the contentions made against this project, and necessitates a scrapping of the pending legislation authorizing the project. Nothing could be further from the truth.

The report of the board resolves all major engineering disputes in favor of the Boulder Dam project. Practically every one of the controverted issues which were raised last session have been answered in favor of the proponents. I agree with the editorial comment of the Engineering News-Record of December 13, 1928, in which they say:

Public service of unusually high type is reflected in the report of the engineering board of review on the Boulder Dam project. Responding fully, sanely, and unequivocally to the queries placed before it, the report answers the major doubts with which Congress and the general citizen were disturbed last spring in the discussion of this contentious issue.

The Engineering News-Record holds, which I think is true, that "the board takes an extreme attitude of conservatism," although "this," it says, "can not reasonably be criticized, in a work of such character and magnitude."

The editorial then proceeds to list the answers which the report gives to the "major doubts" raised in the last session of Congress, as follows:

First. It declares that the proposed 550-foot dam is feasible, is capable of being safely and readily built.

Second. It finds that the project will be effective to carry out the specific combination of purposes for which it was devised—namely, flood control, silt removal, flow equalization for most efficient water supply, and power generation.

Third. It concludes that the canal into Imperial Valley can be built and maintained successfully, contrary to what has been claimed by many critics.

Fourth. It holds that the power by-product of the dam is needed and is valuable, and the project will pay, after due deduction (which, as we understand the last proceedings, has previously been contemplated) of flood-protection charges and the cost of the Imperial Valley canal.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. SWING. Let me first finish my statement, and then if I have any time I will be pleased to yield.

ENGINEERING BOARD APPROVES BLACK CANYON SITE IN EVERY PARTICULAR

Many people assumed that because the engineering board recommended the Black Canyon site that this was something new and different from what had heretofore been advocated as the Boulder Dam project. Such is not the case. Boulder and Black Canyon sites are only about 20 miles apart, and a dam in either place, of the same height, will accomplish practically the same results and will store the same amount of water in the identical reservoir basin. Both sites were thoroughly investigated by the Reclamation Service, but Black Canyon was considered the better site by them. The Swing-Johnson bill authorizes the construction of the dam at either of the two sites.

The Sibert Board recommends the Black Canyon site. This site is named in the Swing-Johnson bill, and is the one that was recommended in the Weymouth report for the reason that a dam can be built at that site at a lower cost than at Boulder Canyon, because—

(a) The canyon is narrower.

(b) The rock in the foundations and abutments is better suited for a high dam.

(c) More storage will be created for a dam of the same height.

(d) It is nearer the railroad.

(e) There is a better location for the construction plant, and so forth.

In approving the site the board made the following very favorable findings:

(a) The site is about 40 miles from Las Vegas, Nev., and the Union Pacific Railroad.

(b) The approach is comparatively easy to the vicinity and not particularly difficult to the site itself.

(c) A construction railroad from Las Vegas would pass near available gravel deposits and the best quarry sites lie immediately adjacent to the dam site on the line of approach.

(d) The terrain where the quarries, railway shops, and camps would be located is open, and its development into such use at reasonable cost is entirely practicable.

1. The rock gorge at this location is 110 to 127 feet below low water. The gorge at the dam site is 350 feet wide at the low-water line and 880 feet wide at the crest of the dam.

2. The foundation is a * * * tough, durable mass of rock standing with remarkably steep walls * * *. The whole rock mass is essentially impervious.

3. It is an almost ideal rock for tunneling, is satisfactory in every essential, and is suitable for use in construction.

4. The associated rock formations at higher levels, more advantageously situated for development for construction uses * * * are of excellent quality for that purpose. Near by there are deposits of angular gravels that have been proven by test to be suitable for use in construction.

5. There is no doubt whatever but that the rock formations of this site are competent to carry safely the heavy load and abutment thrusts contemplated. It is well adapted to making a tight seal and for opposing water seepage and circulation under and around the ends of the dam. It insures successful tunneling and, so far as the rock is concerned, the general safety and permanence of the proposed structures.

6. The board is of the opinion that the Black Canyon site is suitable for the proposed dam.

ENGINEERING BOARD NEGATIVES EARTHQUAKE DANGER

To many the most alarming and disturbing assertion made by our opponents the last session was that the proposed site was located in an earthquake area and that the dam might in this way be destroyed. This argument was urged following the failure of the St. Francis Dam, with the resultant disaster, although the St. Francis failed solely because of foundation weaknesses and not because of earthquakes.

The gentleman from Arizona in his address to the House last session said:

It has been stated by reputable engineers that Boulder Canyon is in an earthquake area. Two months ago there was an article in the Literary Digest showing the location of seismic disturbances throughout the world, and there was a large black dot over Boulder Canyon. (CONGRESSIONAL RECORD, May 23, p. 9860.)

This same gentleman in his minority views went even further in urging this supposed danger. On page 6 of his report he declares:

General Goethals testified that in a mass of masonry as large as the proposed Boulder Dam stresses and strains heretofore unknown would probably develop. Boulder Canyon Dam may fail because of such stresses and strains. The location of the dam site has been said to be in an area in which earth tremors occur. In the southwestern desert I personally have seen cracks in the earth many feet wide, caused by seismic disturbances. Should there during the course of years be such a disturbance in Boulder Canyon the dam will fail.

First, let me point out that my friend from Arizona was in error in his reference to General Goethals's testimony. General Goethals was before the committee in support of the proposal of Mr. W. G. Clark, to build a rock-filled dam 1,155 feet above bedrock at Boulder Canyon. His reference to unknown stresses was in connection with this proposed colossal height of dam and not in connection with the 550-foot dam proposed in my bill. Furthermore, General Goethals distinctly stated that the site was suitable for a masonry or concrete dam of the height proposed by us for Boulder Canyon. His testimony is found at page 747 of the 1924 hearings, as follows:

Mr. HAYDEN. Are you convinced that the danger from earthquakes is so serious that a rigid masonry type of dam should not be adopted at that site?

General GOETHALS. No. As between the masonry dam and the concrete, or the filled dam, going to that height, I would rather put in a rock-filled dam; that is all.

Mr. HAYDEN. And any type of dam if properly constructed would be a safe dam at Boulder Canyon?

General GOETHALS. I think so.

It thus appears that General Goethals did not support the contention of the opponents that the dam might fail because of stresses and strains or that it might be destroyed by earthquakes.

Mr. DOUGLAS of Arizona. Will the gentleman yield?

Mr. SWING. I will.

Mr. DOUGLAS of Arizona. Will not the gentleman state to the House that in speaking of earthquakes on the floor of the House I said that the dam could be designed to withstand earthquake shock, but that the dam as designed by the Reclamation Service for a maximum of 40 tons was not safe?

Mr. SWING. Whatever the gentleman says that he said I will agree to.

Mr. DOUGLAS of Arizona. Does not the gentleman think it should be said that the Sibert Board recommended the dam designed for a maximum stress of 30 tons per square foot?

Mr. SWING. I am talking about earthquakes. The gentleman led the House to believe that there was great danger from earthquake.

Speaking before this House in support of my bill, I asserted there was—

no evidence of earthquakes in the vicinity.

I said:

True, there have been found some old faults in the surface of the earth near Boulder Dam site, but all the evidence, according to Doctor Ransome, "indicate some measure of antiquity." There has not been, he says, any movement along these faults since civilized man inhabitated North America.

Now, on this issue raised between my friend from Arizona and myself, what did the Sibert Board find the facts to be? They found that there was no danger whatever from earthquakes. In this they confirmed the positive views of Doctor Ransome contained in the Weymouth report.

The board of engineers reported:

In former geologic times this district was subjected repeatedly to volcanism and deformation. These events must have been accompanied by earthquakes. Such evidence as there is, both to be observed in the field and to be gathered from records, indicates that these geological activities ceased long ago and that the region has been virtually undisturbed for a very long time. The district is recognized as having comparative freedom from present-day earth movements.

The foundation is a volcanic breccia or tuff, originally an accumulation of fragments of many kinds derived from volcanic eruptions and now transformed into a well cemented, tough, durable mass of rock, standing with remarkably steep walls and resisting the attack of weather and erosion exceptionally well. The whole rock mass is essentially impervious.

The rock formation * * * is satisfactory in every essential.

And again:

There is no doubt whatever but that the rock formations of this site are competent to carry safely the heavy load and abutment thrusts contemplated. It is well adapted to making a tight seal and for opposing water seepage and circulation under and around the ends of the dam. It insures * * * so far as the rock is concerned, the general safety and permanence of the proposed structures.

I do not know what more could be said to more fully demolish the arguments of the opponents relative to the unsuitability of the site for a high dam. The board concludes with this final positive and all-embracing declaration:

The board is of the opinion that it is feasible from an engineering standpoint to build a dam across the Colorado River at Black Canyon that will safely impound water to an elevation of 550 feet above low water.

And—

A dam of 550 feet above low water, across the Colorado River at Black Canyon, impounding 26,000,000 acre-feet of water, will be adequate, in the opinion of the board, to so regulate the flow of the lower Colorado as to control ordinary floods, to improve the present navigation possibilities, and to store and deliver the available water for reclamation of public lands and for other beneficial uses within the United States.

ADDITIONAL FAVORABLE FINDING

The Sibert Board has cleared up a number of additional controversial questions which have clouded the main issue. They knocked into a cocked hat the bugabooed argument which has been bandied about for the past eight years about the quantity of salt in the reservoir which it was alleged would destroy the value of the water for irrigation and domestic purposes. The board finds that—

the actual salt content will not be increased to an injurious amount even in the beginning, and that in a comparatively short time * * * the salt content of the river waters will be reduced to about the present amount.

Of course, the present waters are the domestic supply of more than 100,000 people and is the source of the fertility of the Imperial and Yuma Valleys.

The board also settles the controversy that the dam will not desilt the river below it. It was asserted by the gentleman from Arizona [Mr. DOUGLAS], and by the gentleman from Utah [Mr. LEATHERWOOD], that the reservoir would not desilt, and that may be forever the water below would be so filled with silt that the benefits we have claimed for it, to wit, the removing of silt as a flood menace, because the silt now builds up the lower bed of the river and tends to make overflow possible, and if any quantity of silt is in the water it will make it bad for domestic uses.

Mr. DOUGLAS of Arizona. Will not the gentleman in fairness eliminate the word "forever" and say for a period of years?

Mr. SWING. The gentleman from Utah made the statement in his report—

the silt problem would not be solved for a period of many years, probably from 20 to 100, if indeed it is ever solved by this dam.

The silt problem is important, because, first, silt builds up the bed of the river in the lower basin and thereby adds directly to the flood menace. Silt also chokes up the channels, ditches, and latterals in all of the irrigation systems and makes the agricultural industry that much more difficult. Also any considerable quantity of silt in the water would of course depreciate its value for domestic uses.

However, the board makes a definite favorable finding upon this controversy. They say:

When the dam is built and clear water issues from the reservoir a new load of silt will be picked up along its course through these deposits. In the beginning this load is certain to be about as heavy as it is normally present. But, * * * a tendency of silt stabilization will follow as the river becomes very deeply entrenched and develops a paved bed. As soon as this stage is reached * * * silt conditions will have improved. This improvement is certain to continue with time * * * we believe that marked improvement will be shown within the first 10 years.

With reference to the amount of silt that will flow into the reservoir the board again took an "ultraconservative" position. They assumed the maximum quantity of silt that has ever been estimated for that point on the river, to wit, 137,000 acre-feet per year. The Reclamation Service has estimated the silt content of the river for a great many years. The Imperial Irrigation Service also has carried on studies of the same subject for over 10 years. The estimates of the Reclamation Service and the Imperial Irrigation Service are that the silt content at the Boulder Dam will not exceed on the average 88,000 acre-feet of silt per year. But, even on the basis of the board's estimate, they find that it will take 190 years to fill the reservoir. If there are any additional reservoirs built upstream in the intervening time, of course each additional reservoir would divide the silt burden with the Boulder Dam.

BOARD'S FINDINGS FAVORABLE ON THE SUBJECT OF THE ALL-AMERICAN CANAL

The board makes a definite, positive, and affirmative finding, as follows:

Although it is clear that difficulties are presented by the drifting sands, it is the opinion of the board that it is feasible to construct, maintain, and successfully operate the canal. The overcoming of these difficulties will affect the cost, which has been allowed for in the estimates. The board believes that the canal should be lined with concrete throughout the sand-dune region and should be given a slope sufficient to carry the inflowing sand to a suitable place for deposit and removal.

For this change the board adds $7,500,000 to the original estimated cost of the canal of $31,000,000. However, the board evidently overlooked the study of this same problem in the report of the all-American canal board, which went into the matter very thoroughly and in great detail several years ago. The board designed and estimated a concrete-lined canal throughout the sand-dune region and found that when this was done it would permit of a smaller cross section of the canal and that the cost in either instance would be about the same. The all-American canal board reported that the excavation of about 6,000,000 cubic yards would be saved by this construction, but the saving in cost from this reduction in yardage would be about offset by the cost of the concrete lining.

SUGGESTED CHANGES IN ENGINEERING PLANS

The opponents of this project hail the suggestion of the Seibert Board for certain changes in the Weymouth engineering plans as proof of their contention that there had been inadequate engineering to warrant Congress authorizing the project.

It was never contended that the Weymouth report constituted working plans and specifications on which a contract could be instantly let. His report was just what it purported to be, a report on a proposed project regarding its feasibility, practicability, and an estimate of its cost. Mr. Weymouth himself stated in the report that further studies would be necessary, which would no doubt suggest changes and improvements in the proposed plans. My bill, by an amendment inserted by myself, provided that before the work authorized should be undertaken the proposal should be reviewed by a board of eminent engineers. This is what the Secretary of the Interior would have done, anyway. This is exactly what he did in the case of the San Carlos or Coolidge Dam. It is his practice in the case of all important dams. It has never been the practice, however, that working plans and specifications should be prepared in advance of an authorization by Congress. What I said on this point to the House when my bill was under discussion was that—

the Weymouth report * * * is the most complete and exhaustive study ever made of any project in advance of its authorization by Congress. Certainly the engineering data is more complete than that for the Mississippi flood works recently authorized.

I stand on that statement to-day, and do not feel that there is any occasion to apologize for what I said regarding the Weymouth report.

It should be noted that the Sibert Board does not criticize the Weymouth plans for the Boulder Dam. Nowhere did they say that a dam such as he proposed could not be built or would be unsafe after it was built. What they did say is that in order to be conservative, yea, "ultraconservative"—that is their word—the foundations should be lengthened and additions made to the amount of cement put into the structure. This, of course, adds substantially to the cost of the work.

The board also suggests providing by-pass tunnels for the diversion of the water, with a capacity of 200,000 cubic feet per second instead of the 100,000 feet proposed in the Weymouth report. This adds $7,500,000 to the estimate.

And, again, to be "ultraconservative" the board suggests a higher unit price for all the work at the dam above the estimate determined by the Reclamation Service, based on actual bids for similar kinds of work.

I do not mean to criticize the action of the board of engineers. I, myself, desire the dam to be made as strong and safe as possible. Whether or not these additions are necessary to insure safety is a matter for the engineers to determine. There will, of course, have to be further studies, because there are not, even now, working plans and specifications on which a contract can be let. The final study will determine how much of this board's recommendations ought to be adopted.

In this connection, I quote A. P. Davis, former president of the American Society of Engineers, and former Chief Engineer and Director of the Reclamation Service, on the question of methods of construction to be used at Boulder Dam, and probable unit prices. He says:

The details of the suggested methods for diverting the river and unwatering the dam site are given in far greater detail in the Weymouth report than is usual in such reports. They were never intended as final, nor as more than suggestive of a basis for judging the feasibility and estimating the cost of such diversion. That is a problem ordinarily solved by the construction engineer or contractor who undertakes the work. Such temporary works usually involve some financial hazard, and the unit estimates are made high enough to cover the contingency of ill fortune. This was the program suggested in the Weymouth report.

If it be decided to increase the size of the tunnels and their number sufficiently to eliminate this risk the large allowance for contingencies to cover that risk becomes unnecessary. The heavy expenditure becomes certain instead of an improbable contingency. In this case, if the cost and number of diversion tunnels be increased, as recommended by the board, then the unit prices for the dam proper should be decreased accordingly.

The estimates of the Weymouth report are $7 per cubic yard for concrete. Six bids on the San Gabriel Dam, also a large concrete structure, awarded in November, 1928, showed prices of mass concrete, including everything except cement, ranging from $2.19 to $2.60 per cubic yard, averaging $2.365 per cubic yard. Adding the cost of cement will leave the total cost less than $5 per cubic yard for the concrete.

The Pardee Dam, a large gravity dam now under construction in the canyon of Mokelumne River, is being built at a cost of $5.85 per cubic yard, including everything.

It is reasonable to estimate that the concrete in Boulder Dam can be placed for about $6 per cubic yard, or less, if river control is separately provided for. This will largely offset the cost of the extra diversion works, recommended by the board.

Mr. COOPER of Wisconsin. Is that the Sibert Board?

Mr. SWING. The Sibert Board.

Permit me, also, to quote the comment of Mr. F. E. Weymouth, who is generally admitted to be the best construction engineer the Government ever had, and who built under the cost estimates, what was at the time, the highest dam in the world, the Arrowrock Dam. Regarding the changes in plans for the diversion of water while putting in the foundation, he says:

Many factors should be considered before making any definite decision regarding the type and size of the diversion works, such as the size and frequency of floods, the time required to unwater, excavate, and prepare the foundations, and the time required to build with concrete the permanent upper and lower cofferdams. The expenditures justified for the diversion works must be determined after careful consideration of the above factors. If there is a real probability of being able to unwater, excavate, and prepare the foundations and put in the upper and lower permanent cofferdams between floods, there is no justification for spending money for diversion works that will carry all yearly floods the highest of which occur each June and July. I contend that there is ample time to put in the above between floods and therefore believe there is no justification for building temporary diversion works to carry 200,000 second-feet as recommended by the board.

I believe that it is advisable to be conservative in this matter. I therefore suggested to the board on November 6, 1928, that it would be well to provide for temporary diversion works for 150,000 second-feet, but not more. The reason for not going above 150,000 second-feet is due to the fact that only two floods have exceeded that amount since records have been kept on the river.

In connection with this last statement, permit me to add that those two floods both happened in the year 1920. As to the increase in cost estimates, Mr. Weymouth says:

There would be some extra costs due to the increased diversion suggested, but this extra cost would be more than offset by the saving in the improvement in dam design that can be made and in the cost of placing the concrete in the dam. In my 1924 report $7 was allowed per cubic yard for concrete. This cost can easily be cut to $6 per cubic yard. Recent contracts made by the United States Bureau of Reclamation for the Owyhee Dam and by the county of Los Angeles for the San Gabriel Dam and by others justify the above statements.

ENGINEERING BOARD RECOMMENDS REDUCTION OF PRESSURE PER SQUARE FOOT BELOW PRESENT PRACTICE

The Sibert Board recommends that pressures be reduced in the proposed dam from 40 tons per square foot, as designed, to 30 tons, because the board seems to be of the opinion that 30 tons is as high a pressure as is allowable in the best practice. This opinion is not supported by recent engineering work in dam design, as shown by the following list:

List of pressures on foundations of dams designed or in service

Dam	Type	Material	Height	Pressure in tons
San Gabriel, Calif.[1]	Curved gravity	Concrete	492.5	40.8
Owyhee, Oreg.[1]	do	do	405	44.0
Arrowrock, Idaho	do	Rubble concrete	351	38.4
Exchequer, Calif.	do	Concrete	325	38.2
Horse Mesa, Ariz.	Constant angle arch.	do	305	46.8
Roosevelt, Ariz.	Curved gravity	Masonry	260	34.9
Coolidge, Ariz.	Multiple dome	Concrete	250	42.3
Pardee, Calif.[1]	Curved gravity	do	357	40.0
Melones, Calif.	do	do	210	37.8
Calles, Mexico	Constant single arch.	do	218	52.0
Big Bear Valley, Calif.	Arch	Masonry	64	60.1
Stevenson Creek, Calif.	do	Concrete	60	72.5

[1] Under construction.

Mr. DOUGLAS of Arizona. Mr. Speaker, will the gentleman yield?

Mr. SWING. Please let me finish.

Mr. DOUGLAS of Arizona. The gentleman is repudiating the Sibert report.

Mr. SWING. I can not yield.

The designs for the Exchequer, 38.2 tons; Melones, 37.8; Pardee, 40; and the San Gabriel, 40.8, have been approved by the Federal Power Commission.

The Arrowrock Dam in Idaho was completed in 1915, and the reservoir has been filled every year since that date. The list shows that the practice during the past 15 years is to design high dams for pressures of 40 tons or more. None of them have shown any damage from such pressures.

The design of the Arrowrock, Owyhee, Exchequer, and Coolidge Dams was approved by Mr. A. J. Wiley, recognized by the engineering profession as being the foremost authority on high-dam designs in the world to-day. He has recently returned from India, where he went to advise British engineers on the design of dams over 500 feet high.

The San Gabriel Dam, now under construction near the city of Los Angeles, above a densely populated area, will be the highest dam in the world when finished—492.5 feet—and requires more concrete than the proposed Black Canyon Dam.

That dam has been designed with a pressure on the foundation of 40.8 tons. This design was approved by J. B. Lippincott and D. C. Henry, both of them engineers of international as well as national reputation in connection with dam design.

It is true that there has been a progressive increase in recent years in the pressures allowed in the concrete foundations of important structures, but this has not been due to a corresponding reduction in safety requirements. It is due mainly to improvements in quality and strength of concrete made possible by progress in scientific knowledge, and consequent improvements in methods and materials of manufacture. Due to finer grinding, greater uniformity, and other improvements, the quality of cement has gradually improved in the past 20 years. Due to extensive researches by Abrams and others in proportions and methods of mixing, and especially in the quantity of water used, much stronger concrete can be made with given materials than was the practice 10 years ago. Mathematical researches of Cain and others have made computed stresses more certain.

All this progress has been fruitful of results in rendering possible the construction of large works both safer and cheaper than formerly. This accounts for the recent increases in pressures allowed by the most experienced designers of high masonry dams, as shown in the preceding table.

This action is abundantly justified by current tests made during the progress of the work. For example, the concrete placed in the Pardee Dam, now under construction, shows crushing tests on 8-inch cylinders averaging over 180 tons per square foot. In larger masses its resistance would be much higher.

Should it finally be decided to build the dam with only 30 tons pressure on the foundation, as recommended by the board, instead of 40 tons as recommended in the Weymouth report, although 40 tons is well within modern practice, as shown by the many dams now in use with a greater pressure than 40 tons, the cost of the extra concrete and extra excavation could not exceed $7,000,000.

The extra tunnels recommended by the board to increase the diversion capacity from 100,000 second-feet to 200,000 second-feet could not cost more than $7,000,000, making an extra cost of $14,000,000 for these two features. If this extra cost is added to the $41,500,000 in the Weymouth estimate for the dam, an amount that Lynn Atkinson guarantees to build the dam for, the total cost of the dam would then be $55,500,000, instead of the $70,600,000 given in the board report.

At this point permit me to read the telegram of Mr. Lynn Atkinson:

GLOBE, ARIZ., *December 4, 1928.*

Hon. HIRAM JOHNSON,

United States Senator, Washington, D. C.:

Anticipating early passage of Boulder Dam legislation and construction, myself and associates have carefully studied details of Weymouth report and plans, data, and estimates of cost relating to Boulder Canyon Dam construction. Our independent analysis of the cost of constructing of Boulder Dam indicates that the engineers' estimate of cost as set forth in Weymouth report is adequate, and I assure you that myself and associates are prepared to submit a bid and enter into a firm contract covering the construction of the Boulder Canyon Dam as designed and specified in Weymouth report for less than the engineers' estimate as set forth therein. Due to probability of our bidding against other construction companies for this work, it is evident that we would not be justified in revealing our net estimate of cost at this time, and I simply say to you that the engineers' estimate is adequate and that we are prepared to submit a guaranteed bid for this construction work when bids are requested for less than the estimates set forth in the Weymouth report. Boulder Canyon Dam is a rather large project, but not particularly difficult, as gravity dams represent simply mass construction. Weymouth estimate was made several years ago, when prices were higher and labor efficiency lower. Construction methods have been improved upon since Weymouth's estimate was made, and we are constantly lowering our costs by improved methods. We would not adopt exactly the construction methods outlined in Weymouth's report, but our methods of equipment and operation and river control would result in lower costs. Myself and associates are just completing two of the largest dams, and we are thoroughly familiar with costs in both Arizona and California, where we have operated for years.

We are just completing construction of Coolidge Dam for United States Government. This contract was awarded to us less than the engineers' estimate against eight other bidders. Coolidge Dam is located on Gila River in desert locality in southeastern Arizona at a point where floods of over 90,000 second-feet have occurred. Gila River is very comparable to Colorado. We have handled river-control situation here without difficulty and completed contract considerably in advance of contract requirement established by Government engineers. We are also completing largest gravity dam built to date for city of Oakland in northern California on Mokelumne River, almost 400 feet high, known as Pardee or Lancha Plana Dam. Our bid for this work was considerably under engineers' estimate, and I secured contract against four other bidders; and we will complete Pardee Dam in less than two years, as compared with engineers' estimate and contract requirement of five years or over three years ahead of time. No difficulty with river control in spite of fact that we completed foundation work during winter flood season to expedite construction against maximum flow of over 30,000 second-feet. Satisfactory profit being made on this work. Our bids on this work were guaranteed by cash and our contracts guaranteed by corporate surety bond guaranteeing our undertakings to full value of contract price. We perform only public-works contracts and anticipate furnishing 100 per cent bonds to guarantee all of our undertakings as required by law. Working conditions in Arizona are not difficult and we are paying same wages in Arizona as in California, and in some instances less. Coolidge Dam is second dam I have built in Arizona and we are familiar with working conditions.

I recently bid on $25,000,000 San Gabriel Dam in California and was low bidder on two alternates although fourth bidder on basis on which job was awarded. Competition on San Gabriel contract on which six bids were received would indicate other firms are figuring lower costs than we do. As a piece of construction Boulder Canyon Dam presents no particularly difficult phases. Engineers' estimate of time of construction is ample. Believe we could build it in less than five years. Should not require over two years to complete foundation work and river control and pouring of concrete in superstructure would require less than two years to complete. We have poured over 60,000 yards of concrete per month in Pardee Dam with relatively small equipment and the plant we have designed for Boulder would be capable of placing over 200,000 yards of concrete per month. Telegram was received by me at Coolidge Dam site in Arizona and full details not at hand, but can advise further upon request.

LYNN ATKINSON,
Coolidge Dam Site.

It is believed that the board's estimate for the power plant and all-American canal is too high in about the same proportion.

COST OF POWER

It was asserted last session that recent improvements in steam turbine and other generating machinery have so reduced the cost of steam power when generated by large units as to make it lower than the estimated cost of hydroelectric power produced by the proposed Boulder Canyon Dam. These claims have been urged partly on the ground of low fuel costs in southern California where oil is abundant. Recent investigations, however, have disproved this claim.

In the Electrical World for October 27, 1928, is given the results of detailed investigations into 16 of the largest modern steam plants in the country. The following table—Table 1—condensed from the Electrical World, shows the total cost per kilowatt-hour of power generated in each of these 16 stations, from which it will be seen that the average cost in practice is 0.853 cent per kilowatt-hour, which is nearly double the cost of delivering the electric current from Boulder Canyon Dam to the cities of southwestern California. Even the cheapest of these shown in the table is substantially higher than the cost of Boulder Canyon power. The first plant in the list is the one that would be most directly in competition with Boulder Canyon power, and shows a cost nearly three times as great as the estimated cost of that power delivered to the same metropolis:

Summary of cost data on representative power stations

Capacity, kilovolt amperes	Number of generators	Dollars per kilovolt ampere			Cents per kilowatt-hour		Tota
		Station	Building	Equipment	Fixed charge	Total production	
+100,000	3	100	27	71	0.89	0.38	1.27
−50,000	1	128	25	71	.366	.382	.748
−100,000	2	85			.146	.366	.512
−100,000	2	142	39	101	.476	.275	.751
+100,000	3	132	21	71	.424	.227	.651
−100,000	2	130	38	90	.592	.421	1.013
+250,000	4	127	52	71	.436	.478	.914
+200,000	5	121			.613	.343	.956
+300,000	5	81	21	55	.431	.319	.750
+100,000	2	115	43	70	.458	.216	.674
−50,000	1	106.50	26	63	.576	.35	.926
−50,000	2					.417	
−100,000	2	81	19	46	.341	.337	.678
+50,000	2	110	22	53	.52	.37	.89
−100,000	3	112	30	80	.768	.546	1,314
+100,000	2	144	56	59	.442	.310	.752

Average cost per kilowatt-hour, 0.853 cent.

In this connection permit me to read a telegram from Lester S. Ready, one of the leading authorities on the Pacific coast, on this subject:

The value of electric power in southern California, determined by the cost of power from other sources, particularly steam power, would equal $8,265,000, for 3,600,000,000 kilowatt-hours of annual production, at 55 per cent load factor at Boulder Canyon switchboard, of proposed 1,000,000 horsepower plant. Based on the Colorado River board estimate, with interest during construction, approximating $122,000,000 for dam and power plant, the total annual cost for interest, amortization, operation, and depreciation, would equal approximately $7,255,000, assuming amortization during 41 years. This shows leeway of approximately $1,000,000 annually during amortization period, and nine years prior to the amortization period, for power absorption, which estimates show could be accomplished in approximately four years, by retarding other power developments in anticipation of Boulder power. The revenue from water for domestic purposes would add to the $1,000,000 leeway. Future possible and probably increase in price of fuel oil over $1 per barrel, considered herein, would further increase the leeway in the future. It should be noted, also, that hydroelectric power plant

installation costs on Pacific slope is thoroughly well established, and show previous estimate of $31,500,000, without interest during construction, ample for power plant and that increasing this to $38,000,000 appears entirely unnecessary.

LESTER S. READY,
Consulting Engineer for State Railroad Commission, formerly Chief Engineer of State Railroad Commission.

Referring to Mr. Ready's telegram in reference to Black Canyon power:

The $8,265,000 mentioned is the value of power on the switchboard of the Black Canyon Power Plant—that is, the value of the 3,600,000,000 kilowatt-hours at 2.3 mills. This power is worth around 4.3 mills in Los Angeles. The cost of transmitting the power from Black Canyon to Los Angeles has been deducted from the value at Los Angeles. The price of 2.3 mills is very low. It is very conservative. The Reclamation Service had assumed a price of 3 mills.

The $122,000,000 capital charge is made up as follows:

Cost of dam and reservoir	$70,600,000
Cost of power plant	38,200,000
Interest on the two above items during construction	13,200,000
Total	122,000,000

The cost of producing power, based on the engineer board's estimate, would be approximately $7,250,000. This amount is arrived at as follows:

4 per cent interest on $122,000,000 capital cost equals	$4,880,000
1 per cent amortization on the whole investment of $122,000,000	1,220,000
Operation and maintenance	700,000
Depreciation on the power plant, costing $31,500,000, at 1 per cent	315,000
Total	7,115,000
Mr. Ready seems to have added for good measure	135,000
Mr. Ready's total	7,250,000

Mr. Ready assumes that a period of nine years will accrue before all the power can be sold. This is very conservative. Other well-informed authorities estimate that all the power can be absorbed in five years at the most.

There is a difference of over $1,000,000 in the cost of production, namely, $7,250,000, and the sale value of the power, namely, $8,265,000, which makes the whole proposition very conservative. Also there will be some additional annual increase from the sale of domestic water.

Mr. Ready is of the opinion that the board estimate of $38,200,000 for the power plant is too high and that the Weymouth estimate of $31,500,000 is sufficient.

But even if the dam and power plant cost all that the board has estimated, both will be paid for in 41 years with power sold at 2.3 mills.

WATER SUPPLY IS UNDERESTIMATED BY BOARD

The board has expressed the opinion that "the results of Yuma gaugings are at least 10 per cent too high." No reason is given for this opinion except that the methods used in gauging in the early part of the record are less accurate than those later developed and now in use on the Colorado. Some of the improvements in methods of measurement tend to secure larger discharge, but some tend to secure smaller.

The tendency in general is for the errors of the early measurements in the long run to balance each other. The recent methods employed at Lees Ferry and Yuma, since 1921, together with a comparison of the Yuma record of former years with Lees Ferry discharges estimated—in the absence of actual measurements at that point—from upstream gauging stations, indicate that in general the results formerly obtained at Yuma are not too high. In a few years of extremely high discharge they appear somewhat high, and in years of extremely low discharge, too low. If this indication is a correct guide—and it is the best we have—the water conditions are more favorable to power development than those used by the Reclamation Service in the Weymouth report; just the reverse of the conclusions of the Sibert Board.

The board apprehends a cycle of lower flow of the Colorado River than that represented by the 26-year record now available, although this record includes two low stages of the river which are the lowest ever known.

In the spirit of extreme conservatism that is manifest throughout the report, the board concludes that the flow at Black Canyon under the present development is as follows:

	Acre-feet
Average low flow for a period of 15–20 years	10,000,000
Average high flow for a similar period	14,500,000
Average of high and low periods	12,250,000

This average added to the amount now consumed for irrigation in the upper basin, increases it to 15,000,000 acre-feet, the amount apportioned by the Colorado River compact—so that this is not affected.

Even this extreme conclusion, which is about 25 per cent lower than the indications of 26 years' measurement, does not impair the power output, estimated at 550,000 continuous horsepower, which requires only an average of less than 10,000,000 acre-feet of water, which is the average the board adopts for its mythical "low period."

On page 10 of the printed report the Sibert Board marshals the testimony on which it bases its pessimistic conclusions regarding water supply. This consists of nine estimates and averages in and near the basin. Every one of these nine comparisons indicates that the period from 1900 to 1905 was the driest ever known. This period was included in the table, No. 6, on page 5, of Senate Document No. 142, on which the plans for Boulder Dam were based, and so far as this evidence indicates anything it indicates that the period used by the Weymouth report was low and that more abundant supplies may be expected for the future. This is the opinion of such men as Davis, Weymouth, Debler, and others who have given years to the study of the water supply of the Colorado River.

The board, however, in addition to its extreme assumptions of low water, adds another assumption by concluding that rapid irrigation development is to be expected in the upper basin.

This expectation is unwarranted, because the physical and economic conditions are unfavorable for a rapid development in the upper basin. This fact is frankly recognized by people of the upper States, and was the chief reason for their desire to have a compact for the division of water, to protect their water rights for the future, instead of depending on the establishment of their rights by beneficial use, which is sure to be slow.

The board appears to have entirely overlooked the fact that the conditions of extreme drought they have assumed as possible would cause an acute shortage of water in the irrigated upper valleys now developed, and to be developed (the supplies of which are predicated on the records of the past 40 years), and in case of the hypothetical drought more severe and prolonged than any heretofore known, the tributary streams could not possibly furnish for irrigation the amount of water they furnish in normal years, and the subtraction from the flow of the river would be much less than assumed by the board. The shortage would thus be distributed throughout the basin, instead of being concentrated in the lower basin as assumed by the board.

Former Director of the Reclamation Service, Mr. A. P. Davis, believes that even on the extreme conditions of drought assumed by the board, there would be considerable surplus water at all times above that necessary for 550,000 horsepower, and even assuming the coincidence of the hypothetical drought with upstream development, there would be no power shortage, and at all other times there would be large surplus of water.

It should be remembered that the greater the probability of extreme and prolonged drought the greater is the need of a large reservoir capacity to hold the floods of abundant years for use during the drought.

It is interesting to compare the findings of the Sibert Board of Engineers with the findings of another body, the Colorado River Commission, presided over by Herbert Hoover.

The Sibert Board was appointed primarily for the purpose of passing upon engineering plans and were concerned with the quantity of water involved only as an incident to the question of the economic soundness of the project. On the other hand, the Hoover commission was appointed for the express purpose of ascertaining the amount of water which the river produced, because their purpose was to divide the water, and before they could divide it they had to ascertain how much there was to divide. The Hoover commission was made up of the leading water authorities of the seven Colorado River Basin States. They spent a much longer time in their investigations than did the Sibert Board, and the conclusions the Hoover commission arrived at, as expressed by him, were set forth in the House hearings in 1923. Mr. Hoover there said:

The unapportioned surplus is estimated at from 4,000,000 to 6,000,000 acre-feet, but may be taken as approximately 5,000,000 acre-feet.

This shows that the "ultraconservative" findings of the Sibert Board will in all probability never be realized.

The board throughout its report adheres radically to its announced policy of being conservative, even to the extent of being "ultraconservative." I do not criticize this, but I believe Congress should appreciate the rather extreme limits to which the board has gone in order to be ultraconservative.

The board assumes for construction purposes there will be in the next few years the highest water in the river of which we have any record, and yet for revenue purposes the board assumes that we are now entering a cycle of extremely dry years. The board estimates the run-off of the river in the past

26 years at less than what the actual records show it to be, and then in discussing the possible power output assume the future will be less productive of water than what they say has been in the river during the past 26 years. They assume further that there will be "relatively rapid development" in the upper-basin States, and not only that the upper-basin States will use their allotted share" but, more, that the upper States may even violate the terms of the Colorado River compact in the quantity of water abstracted from the river. I have already pointed out that the board adds to the cost and quantity of tunnels for by-passing water during construction and adds to the quantity and unit price of cement, and yet in the face of it all they find with certain modifications of the financial plan that the dam and power plant will pay for itself within the time limit named in the bill.

The board has estimated the cost at $165,000,000, but that does not necessarily mean that it will actually cost that amount.

However, it has been deemed advisable to amend the bill to cover the board's figure, and that has been done in the Senate.

But, if we assume that the price of $165,000,000 for the dam and power plant is what these structures are to cost, how does this compare with the earnest assertions of the opponents of the project last session?

I find that the gentleman from Arizona, on page 32 of his report, told the House—

that at the expiration of 50 years the Federal Government will have in the Boulder Canyon project a net investment of $322,585,644.

But as his report proceeds his figures mount because, on page 37 of his report, he says:

Even if the cost of this project be correct the Federal Government can not be reimbursed for its expenditures. * * * The Federal Government at the expiration of the 50 years of amortization will have upon its hands instead of an amortized project one in which the total net investment will have amounted to over one-half billion dollars.

This is as far removed from the figure of $165,000,000 declared by the board to be ultraconservative as the sun is from the moon.

If, however, on final review it is determined by the engineers in charge of the actual construction that 150,000 cubic second-feet capacity for tunnels would be a reasonable provision for the diversion of water during the construction of the foundation, and if it should be found that 35 tons pressure per square foot is safe conservative practice, then the suggested increase of $40,000,000 to the cost of the project will have by those two items alone been cut into half. Further, if the unit price of the cost of production is taken to be that which is being actually bid and contracted for to-day instead of the ultraconservative high unit price assumed by the board, then the remaining 20,000,000 addition will again be cut approximately in two.

But if, as has been suggested by the Sibert Board, the cost of the all-American canal is charged wholly and directly against the lands benefited and this provision has already been made by amendment in the Senate, then, even assuming the Sibert Board estimate of the cost of dam and power plants, still the project will pay out well within the time limit named in the bill, as was shown by the Ready analysis of the board's figures.

Under our bill the communities interested in the Southwest will put up contracts for $165,000,000, if it costs that much, and every dollar of it will be paid back to the United States. [Applause.]

To show that the Reclamation Service estimates on dam construction have been reliable, I insert the following table.

ESTIMATES OF COST

The following table gives the actual costs and estimates of cost made by the Reclamation Service for all the dams built by that service over 50 feet high:

Estimated and actual costs for all Bureau of Reclamation dams 50 feet or more in height

Dam	Project	Maximum height (feet)	Estimated cost	Actual cost
Owyhee	Owyhee	405	$5,243,000	[1] $4,947,716
Arrowrock [2]	Boise	349	6,250,000	4,327,710
Shoshone	Shoshone	328	1,021,000	1,439,135
Elephant Rutte [2]	Rio Grande	306	5,600,000	5,004,216
Roosevelt	Salt River	280	[3] 3,750,000	3,890,187
Tieton [2]	Yakima	222	4,020,000	3,756,256
Pathfinder [2]	North Platte	218	[4] [5] 1,000,000	1,794,366

[1] Based on contract prices—construction recently started.
[2] Dam and reservoir.
[3] Estimate was for dam raising water surface 190 feet; after construction began, plans were changed and dam built for 220-foot raise of water surface.
[4] No detailed estimate found, but early board reports show $1,000,000 allowed for Pathfinder Reservoir.
[5] Increase partly due to the building of an additional outlet tunnel, and changes made in north tunnel, both together amounting to $641,000.

Estimated and actual costs for all Bureau of Reclamation dams 50 feet or more in height—Continued

Dam	Project	Maximum height (feet)	Estimated cost	Actual cost
Black Canyon	Boise	183	1,800,000	1,243,889
Gibson	Sun River	179	[6] 1,826,000	[7] 1,566,240
McKay	Umatilla	160	2,500,000	2,116,828
East Park	Orland	139	198,000	196,120
Sun River Diver	Sun River	132	145,000	149,366
Hubbart	Flathead	131	308,000	362,653
Echo	Salt Lake Basin	130	[8] 1,395,000	[7] 1,125,098
Lahontan	Newlands	124	1,425,000	1,324,782
Belle Fourche	Belle Fourche	122	1,040,000	[9] 1,259,515
Stony Gorge	Orland	120	[6] 610,000	[7] 518,904

Ralston	Shoshone	50		[20]
Avalon	Carlsbad	50	162,000	[21] 315,989
Total, 38			55,378,000	51,782,696

[2] Dam and reservoir.
[3] Estimate was for dam raising water surface 190 feet; after construction began, plans were changed and dam built for 220-foot raise of water surface.
[6] Dam now under construction. Figures represent engineer's estimate of cost of principal construction. Do not include gates, cement, or other accessories and materials furnished by the United States.
[7] Contract price.
[8] Failure of contractors delayed work two years, and this, together with additional construction of a gravel berm and installation of auxiliary valves, increased the estimated cost.
[9] Original estimate did not include item for general expense, amounting to $55,600.
[10] Subsequent improvements, not included in original plans, have brought the cost up to $625,841.
[11] Change in location of dam due to conditions revealed after construction began occasioned increase in excavation and concrete quantities.
[12] Dam only, exclusive of outlet works and spillway.
[13] Actual cost of present structure, $235,537. Original estimate, $536,000, but this was for a dam 40 feet higher than was finally constructed. No estimate found for lower dam.
[14] Modified by board report of Dec. 16, 1913, to $1,337,000.
[15] Difficulty of obtaining suitable material increased cost by $240,000. Other changes which greatly increased the original estimate were rip-rapping, inclusion of concrete cut-off wall, changes in tunnel scheme, increased excavation for spillway and heavier concrete lining, additional road construction and clearing and logging reservoir—the latter item alone costing $290,000.
[16] Enlargement of existing reservoir.
[17] Beginning of construction disclosed unsatisfactory foundation conditions and dam was relocated 3,300 feet upstream, involving increase in volume and extensive changes in plans for outlet work and spillway. Subsequent enlargement brings total cost to $324,734.
[18] Including section of main canal just below dam.
[19] Dam purchased from Pecos Irrigation Co., repaired and enlarged; no estimates found.
[20] Dam was part of Garland Division canal system and no separate estimate for the dam appears to have been made.
[21] Increase due to use of concrete core wall instead of sheet piling, two new tunnels to increase spillway capacity, and an additional spillway of reinforced concrete. These changes cost over $100,000.

This table shows that on an average these structures have been built substantially cheaper than the estimated cost. Particulars are given in the footnotes.

It should be remembered that always the estimates preceded the construction, and in most cases this interval was several years. Also that estimates were necessarily based on experience of previous years, so that the construction always followed from 5 to 10 years after the experience on which estimates were based. Any change in prices in this interval would influence the ratio of estimate and cost.

The trend of prices from 1896 to 1926, the period involved in the operations covered by the table, was decidedly upward, the prices for 1926 being more than double those for 1896. This general rise of prices sometimes involves costs far above those of previous years on which estimates were necessarily based, and this largely accounts for the cases in which the costs exceeded the estimates. The fact that in general and on the average they did not shows that as a rule such estimates were liberal.

THE "VESTRIS" DISASTER AND THE SHIPPING LAWS

The SPEAKER pro tempore. Under the order of the House the gentleman from New York [Mr. LAGUARDIA] will be recognized for 40 minutes.

Mr. LAGUARDIA. Mr. Speaker and gentlemen and ladies of the House, it is my purpose this morning to talk about our shipping laws. I want to call attention to the confused, antiquated, obsolete, and ineffective laws that govern our Steamboat Inspection Service and the laws under which the Government of the United States derives its jurisdiction and power to inspect steamers and protect the safety of passengers at sea. I will also touch on the question of the limitation of liability of shipowners granted to them under an archaic law which should have no place in our statutes. Unfortunately, it requires a great disaster, the loss of many lives, or a tragedy of some sort, to arouse public opinion and perhaps even to move legislators into a study of the situation and the need of reform. At any rate, we should at least profit by the experience of the past and as some unforeseen tragedy or disaster happens, see to it if it can in any way be prevented in the future. Members will remember the sinking of the *Titanic* with the loss of over a thousand lives.

Many will remember that following several investigations, some legislation, and changes in ship inspection, regulations followed. I am sure that disaster also spurred naval architects to study and bring about structural changes in the building of big ships. The steamer *Eastland*, which sank right at the dock in Chicago, was another instance which brought home the necessity of bringing our Steamboat Inspection Service up to date. In that case the service did change or improve its work and revise its regulations, and although many recommendations were made to Congress very little of anything was done in the way of enacting necessary legislation.

Now we come to the last tragedy of the sea, the sinking of the British steamer *Vestris*. No accident at sea has ever been more shocking. Not a child was saved. Large percentage of the women passengers were lost. The percentage of the crew who were saved is out of all proportions of the percentage of the passengers saved. From the information that we have to-day obtained from witnesses, some of them officers of the ship, I believe it is universally agreed, that the handling of the ship and the seamanship displayed was far short of even an average standing. It is not my purpose to-day to go into detail concerning the sinking of the *Vestris*. It is not my purpose to fix the blame. That is not our function. It is my purpose to take the *Vestris* as a ship, her rights under the law, the inspection to which she was submitted, and the laws under which such inspections were made as an example to show the necessity of a complete revision of our laws on this subject. Not only the necessity of the revision of the law but the necessity of prompt action, prompt action as soon as a thorough study of this involved and technical subject will permit.

The *Vestris* was an old-type ship with a very low factor of safety. Although it might have been known that she was not a safe ship, I do not believe that under the existing law it would have been possible for United States officials to prevent her in engaging in the passenger trade. It is apparent that the ship lacked stability. A great deal has been said on the question of stability of late, and I find that the term is very often misunderstood. The matter of stability in a ship is fundamental in considering her safety. In fact, the entire consideration in the building of the hull is given to the principal point of stability. For this purpose I have brought here a model of a "one-compartment" ship similar in general construction to the *Vestris*. I have here the plans of the last type, I might say of the best type, of safe passenger steamers, the steamship *Malolo*. Just what is meant by "one compartment" I will take up in a minute.

To return to stability. The stability of a ship is not what is generally believed by a passenger. It does not mean that a ship with the greatest stability is the ship that rolls the least. Stability simply means the ability of a ship to right itself whenever she does roll or is listed to one or the other side. To take a simple illustration, a canoe has very little stability. While it glides along smoothly and rolls very little, once that a wave puts it over to one side or she rolls over she capsizes very easily. A raft has great stability. It is difficult to push it over, and if in choppy weather it will roll most uncomfortably but always comes back to an even keel. Now gentlemen, here is what is known as the keel of the ship [indicating]. This deck on the model [indicating] in this particular ship is the main or strength deck. The keel and the strength deck are the two principal units of a ship. They may be compared to the foundation and keystone of an arch building.

Stability is obtained by proper and correct proportions of the draft [indicating] which, as you know, is the portion of the ship under the water line, and the beam [indicating] of the ship at midship, naturally, everything being in proportion and accurately calculated. One rough way of determining the stability of a ship, assuming always that the center of gravity is correct and properly placed, is to take the square of the beam and divide it by the draft. The higher the quotient the higher the degree of stability. I need not point out, of course, that the superstructure on the deck and its general construction all enter in determining the center of gravity. I referred to this model being a "1-compartment" ship. That means that the ship is divided, as you can see, into several compartments. This model is made so that the inside of the ship may be seen. [Opens side of ship and indicates.] Here, gentlemen, are the bulkheads dividing the ship into several compartments. A bulkhead in the language of the landlubber is a crosswise partition dividing the ship into water-tight compartments. In other words, here [indicating] is a bulkhead. Here is another. This space in between is a compartment and supposed to be water-tight. The doors in between bulkheads, especially the doors in the midship section in modern ships, are closed by a main control from the bridge [indicating]. Now, if a ship collides or springs a leak in the case of a ship like this—1-compartment ship—that means that if one compartment is flooded she can still float. That is to-day a ship of very low safety. In fact, no 1-compartment ship should be permitted to carry passengers. The *Vestris* was a 1-compartment ship, and there is a question if she was even that. But I will return to that in a minute. Now, here, gentlemen, is the diagram of the last word in safety in passenger-vessel construction. It is the diagram of the American steamer *Malolo*. Here you have a sectional diagram and you will see that there are no less than 12 compartments. Right here [indicating] we have the diagram of the main deck.

I want to call your attention [indicating] to the structure of this main deck, as I will have occasion to refer to main-deck structure later on. This curve on this diagram here [indicating] will show you the floatability of the *Malolo*. She can be called a 4-compartment ship. Now should the ship collide or spring a leak anywhere around her midship section [indicating] this ship can float with no less than four compartments flooded. If she should break or spring a leak aft or in her bow [indicating], she can float with three compartments flooded. You can readily see by comparing the structures of the two ships the progress that has been made in the art of shipbuilding. Yet our law to-day on the subject was made when this old-type ship [indicating model] was the last word in shipbuilding construction and while all this improvement has been made and progress achieved from 1870 to date, nearly 60 years, we have not changed our laws at all. I want to point out, gentlemen, that the safety and floatability of the *Malolo* is not only theoretical. It so happened that on her trial trip she was rammed right square midship by a Norwegian barge. She was hit right here [indicating], right between her two boiler sections, a terrible gash put into her side under the water line. Both boiler rooms were immediately flooded and put out of commission. She could not generate a pound of steam, but there was no danger at any time, and she kept afloat as if nothing had happened. She was finally towed into port and the repairs necessary were only slight. Even that experience brought a lesson to naval architects and ships built in this country since then have the two boiler rooms separated with one water-tight compartment in between. Such up-to-date ships, for instance, as the steamships *California* and *Virginia*.

Having seen how important to the safety of the ship and to the security of her passengers are the proper construction of the hull and the stability of the ship, the necessity of proper supervision over such construction and proper stability backed by statutory requirements can not be denied. Yet, gentlemen, the law on this subject was enacted prior to 1870. The Steamboat Inspection Service, the Government agency charged with the inspection of all vessels, can only inspect a ship after she is completed. There is nothing in the law which permits a supervision of the plans or gives the Government any say as to the construction of the hull. The minimum requirements of the law read in this day and age is simply laughable. Let me read section 4490 of the Revised Statutes, and to say that that is the only section in the law governing the subject of hull construction and subsequent hull inspection. While the regulations, it is true, are written by the Secretary of Commerce, as everyone knows, they can not go beyond the scope or limit of the statute itself:

SEC. 4490. Every sea-going steamer, and every steamer navigating the great northern or northwestern lakes, carrying passengers, the building of which shall be completed after the 28th day of August, 1871, shall have not less than three water-tight cross bulkheads, such bulkheads to reach to the main deck in single-decked vessels, otherwise to the deck next below the main deck; to be made of iron plates, sustained upon suitable framework; and to be properly secured to the hull of the vessel. The position of such bulkheads and the strength of material of which the same shall be constructed shall be determined by the general rules of the board of supervising inspectors.

The Steamboat Inspection Service has repeatedly asked Congress to amend this section and to bring the law up to date. I am sorry to note that for 18 years Congress has ignored this plea. What happens now? A ship is inspected and entitled to a certificate if she can navigate the waters she sails. A mere reference to the statute referring to a ship built prior to 1870 as a requirement under the law shows the obsolescence of the statute. To require a minimum of three water-tight cross bulkheads indicates how far behind the law is to the present school of shipbuilding. Examinations are now conducted by local inspectors. There is no centralization. Local inspectors are practical men. They qualify as practical men, and they are paid as such. They are not technicians; they are not naval architects. Their qualifications are limited; their duties are limited, and on the whole they have performed their duties very well, and considering the limitation of the law, satisfactorily. The law as to boiler inspection is broader and gives the service greater jurisdiction and power of inspection, but even the boiler law is not centralized. The Steamboat Inspection Service has also called attention of Congress to the necessity of the revision of these sections of the law. Repeatedly, as I will read to you in a few minutes, has the Steamboat Inspection Service urged these changes, and again I will say Congress has not heeded and nothing has been done by Congress to provide the necessary legislation. Here I will read section 4418 of the Revised Statutes, and I want to call attention of the House that it was amended by an act approved March 3, 1905:

SEC. 4418. The local inspectors shall also inspect the boilers and their appurtenances in all steam vessels before the same shall be used, and once at least in every year thereafter, and shall subject all boilers to the hydrostatic pressure. All such vessels shall comply with the following requirements, namely: That the boilers are well made, of good and suitable material; that the openings for the passage of water and steam, respectively, and all pipes and tubes exposed to heat are of proper dimensions and free from obstructions; that the spaces between and around the flues are sufficient; that flues, boilers, furnaces, safety valves, fusible plugs, low-water indicators, feed-water apparatus, gauge cocks, steam gauges, water and steam pipes connecting boilers, means of prevention of sparks and flames from fire doors, low-water gauges, means of removing mud and sediment from boilers, and all other such machinery and appurtenances thereof, are of such construction, shape, condition, arrangement, and material that the same may be safely employed in the service proposed without peril to life; and the local inspectors shall satisfy themselves by thorough examination that said requirements of law and regulations in regard thereto have been fully complied with. All boilers used on steam vessels and constructed of iron or steel plates, inspected under the provisions of sections 4430, shall be subjected to a hydrostatic test in the ratio of 150 pounds to the square inch to 100 pounds to the square inch of the working steam power allowed. No boiler or flue pipe, nor any of the connections therewith, shall be approved which is made, in whole or in part, of bad material or is unsafe in its form or dangerous from defective workmanship, age, use, or other cause.

It will be noted that in the case of the boilers—this, I believe, was brought about by the amendment of 1905—provides for an inspection and test of the boilers before they are used. It also defines specifically minimum requirements of boiler plates, the necessary pressure, all of which gives the Steamboat Inspection Service the right to make inspections and examinations not only of the boilers before they are used but of the material that goes into the making of the boiler. The regulations provide fully for the inspection of the plates and material at the factory and of stamping such material after it has been approved. But, gentlemen, even that is not sufficient. Under the law these examinations are entirely in the hands of the local inspectors. They carry on the examinations, inspections within their own districts. There is no centralization. There should be a central office properly equipped with a personnel of technically trained experts to pass upon the plans, construction, and material of these boilers in order to bring about uniformity of inspection throughout the country and also to have men who are qualified to pass upon these highly technical and specialized subjects. This suggestion for centralization of boiler inspection and hull inspection such as I have indicated is by no means original with me, or novel. It had been urged by the Steamboat Inspection Service for over 15 years. I am going to read, at the risk of boring you, extracts from the report of the Supervising Inspector General for the year 1915. In this report he not only urges revision and amendments to the law but he quotes from previous reports as far back as 1910, stressing the necessity for legislation on this subject. Kindly pay attention to the recommendations made in 1915 and to the review of previous recommendations from the Steamboat Inspection Service made to Congress, and which to date, I repeat again, Congress has failed to act. In 1915, Mr. Uhle, the then Supervising Inspector General of the Steamboat Inspection Service, in his annual report said:

HULL INSPECTION

Though occurring in the fiscal year ending June 30, 1916, it is not inappropriate to refer in this report to certain criticisms that have been made of the service in connection with the *Eastland* disaster. Despite the many untruths that have been told and the gross amount of misrepresentations made, either intelligently or through ignorance, hull inspection is something that has received the serious attention of this bureau. Under the provisions of section 4417, Revised Statutes, the local inspectors are required, once in every year at least, to carefully inspect the hull of each steam vessel within their respective districts, and satisfy themselves that every such vessel so submitted to their inspection is of a structure suitable for the service in which she is to be employed, etc. Under authority conferred by this statute, the local inspectors have the right to refuse to certificate a vessel they do not believe is of suitable structure. Nevertheless, it has never been held that the board of supervising inspectors has authority to lay down in detail structural tests in the same manner as has been done in the case of boiler construction, express authority in the case of boilers having been conferred by certain statutes applicable thereto. It may be interesting to review in this connection certain remarks and recommendations that have been made by this office in previous annual reports in regard to hull inspection.

Attention is called to the remarks under the heading "Hull inspection," appearing on page 15 of the Annual Report of the Supervising Inspector General for the fiscal year ended June 30, 1910, which reads as follows:

"For some time it has been required that the manufacturers of boilers submit to the local inspectors blue prints showing in detail the proposed construction of the boiler or boilers which they are about to build. Inspectors have thereby been enabled to ascertain whether the boilers are to be constructed in conformity with the requirements of the general rules and regulations and of the United States statutes upon which those rules and regulations are based, and before approving such blue prints they frequently confer with the boiler manufacturers and point out to them the defects, if any.

"This service is of opinion that the time has now come when blue prints of hull construction should also be submitted, not with a view to imposing unnecessary burdens upon shipbuilders and the owners of steam vessels, but in order that the inspectors may know whether the hulls of the vessels proposed to be built are to be constructed in accordance with safe practice. At present the inspectors of hulls ascertain exactly whether the necessary life-saving and fire-fighting equipment is aboard the boat, whether the fire hose is in a good condition, whether the necessary life preservers are on board and in good condition, and other matters relating to the hull inspection of a vessel, but having ascertained all of this they are often still in ignorance as to the details of the original construction of the hull.

"An important item of information with which inspectors should be furnished when the hull of a steamer is built is the thickness of the material and the size and weight of the scantling used in the construction thereof, for it is well known that there is a general deterioration of hulls, with the result that as the years go by and the vessels go from one district to another, the inspectors really have to depend absolutely upon surface indications as to the condition of the hull. The condition of a steel or iron hull is ascertained by the hammer test and general indications, and of wooden hulls by boring, scraping, etc. Anyone familiar with hull construction knows that quantities of rust accumulate on the inside of the iron or steel hull, if not properly cared for, with the result that each year the material of such a hull becomes thinner, while the wooden hull softens and rots. If inspectors were furnished with detailed information regarding the original construction of a hull, they would then be accurately informed as to just how much the vessel had deteriorated since her construction. It is therefore proposed to submit to you for approval a bill which will make necessary a more detailed hull inspection than that heretofore prevailing."

While it was stated in the last sentence of the above quotation that it was proposed to submit to you a bill that would make necessary a more detailed hull inspection than that heretofore prevailing, it was finally decided when the matter came before the board of supervising inspectors for consideration that the first steps to be taken in this respect might better be in the form of a regulation requiring that the blue prints of the hulls of certain vessels be submitted to the inspectors, not for approval, but for their information.

Reference again was made to this matter in the paragraph headed "Effect of hull inspection," on page 14 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1911, which reads as follows:

"In my annual report to you for the fiscal year ended June 30, 1910, I recommended a more rigid and thorough hull inspection, and at the last meeting of the Board of Supervising Inspectors of Steam Vessels, in January, 1911, a rule was passed requiring vessels of a certain ton-

nage to submit blue prints showing their construction and other information of value to the inspectors, and it is believed that it will become more and more apparent that the rule above referred to is a good one, for prior to the passage of that rule inspectors of this service were in complete ignorance of many essential things they should know regarding the construction of hulls of vessels inspected by them."

Attention is also invited to the first paragraph appearing under the heading "Activities of the service," on page 14 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1912, which reads as follows:

"In connection with the work of the service it may be interesting to note the manner of hull inspection. An examination of the Rules and Regulations Prescribed by the Board of Supervising Inspectors shows that there has been developed in great detail the matter of boiler inspection and construction, but it having become more and more apparent every year that the service must give more attention to hull inspection, at the annual meeting of the Board of Supervising Inspectors of Steam Vessels in January, 1911, a resolution was introduced requiring that the owners of every new vessel of over 100 gross tons when making application for the first inspection of the vessel must furnish the local inspectors of the district where the vessel is to be inspected a drawing or blue print, in plan and section, showing fully the general construction of the vessel, of wood, iron, or steel, including dimensions, spacing of frames, disposition of hull plates, outside and in, or of outside and inside planks, construction of decks, construction of transverse and longitudinal bulkheads and location of same, space between decks, and details of principal scarfs, and must also furnish a statement of the shapes, dimensions, and unit weights of all structural parts of the hull, and of the kinds of material of which made, including kinds of wood. The resolution also provided that a full description of the riveting of all parts of an iron or steel hull must be furnished. The result of that resolution, which was adopted by the Board of Supervising Inspectors, has been most beneficial, and now inspectors have in their possession certain valuable information of which they were in complete ignorance prior to the passage of the rule. It will thus be seen that even before a vessel is built the service makes an effort to see that it is in fact properly constructed."

Attention is also invited to the paragraph appearing under the heading "Classification for hull inspection," on page 17 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1912, which reads as follows:

"It becomes more apparent each year that there should be some classification for hull inspection, and there is no reason why there should not be an American standard of construction. At the present time the American Bureau of Shipping, closely allied with and supported by shipowners, shipbuilders, and marine insurers, is the only standard that we have in this country. The Board of Supervising Inspectors should now examine the rules of the American Bureau of Shipping and suggest such changes as seem desirable and also suggest some basis of cooperation with this American standard of construction. It should be a matter of pride that America should have a standard classification for hull construction that may be spoken of as the standard authority in this country, and the Board of Supervising Inspectors is the body that should formulate the rules for that American standard. It is believed that under sections 4405 and 4417, Revised Statutes, the Board of Supervising Inspectors has ample authority to undertake this work."

While in the last sentence of the quotation above the statement is made that it is believed that under sections 4405 and 4417, Revised Statutes, the Board of Supervising Inspectors has ample authority to undertake this work, it was concluded by the Board of Supervising Inspectors after due deliberation and discussion that sufficient authority did not exist for the approval of hull construction and for requiring certain detailed tests in regard to construction.

The bureau desires to refer also to the first two paragraphs appearing under the heading "Hull inspection," commencing on page 16 of its annual report for the fiscal year ended June 30, 1914, which read as follows:

"Reference has been made to the fact that under the rules of the Board of Supervising Inspectors blue prints descriptive of the hull construction of certain vessels are required to be filed with the local inspectors having jurisdiction, but, as has already been pointed out, it is not at present required that these blue prints be approved by the local inspectors with whom they are filed. Some thought has been given the question of whether it would not be advisable to require these blue prints to be approved by the Steamboat Inspection Service, but such approval not to be given by the local inspectors. It is believed instead that there should be stationed in the office of the Supervising Inspector General a corps of experts whose business it would be to approve the proposed hull construction. This, it is thought, is necessary (1) because it would enable the department to employ experts who are more familiar with hull construction than the local inspectors and (2) it would result in that uniform administration of the law with which the Supervising Inspector General is charged.

"To adopt such a system as this might require the enactment of a statute that would give this express authority to the Steamboat Inspection Service, or if it should be determined that there is sufficient law to justify this action, certainly it would require a larger appropriation for the employment of experts for the purpose named. Furthermore, it would be a distinct departure from the principles that have heretofore governed the Steamboat Inspection Service in the matter of the approval of certain things by local inspectors, as it would place that approving power in the central office, thereby relieving the local inspectors of much responsibility, as well as obtaining more expert advice and a more uniform administration of the law. This is a matter requiring careful consideration. It is not one to be adopted without mature deliberation, but it is a question that faces this service to-day and which will as time goes on require more and more attention."

It will be noted that the idea which the bureau has had in mind has been to create in the office of the Supervising Inspector General a corps of experts, whose business it would be to approve proposed hull construction. In order to do this it will be necessary, in the opinion of the Supervising Inspector General, to amend certain statutes that at present exist that place in the hands of local inspectors original jurisdiction with regard to hull inspection. If the construction of a vessel could be approved by experts stationed in the office of the Supervising Inspector General, there would result not only safe conditions with reference to construction but there would also result more uniformity in the matter of correct inspection and construction, and it is to be recalled that the Supervising Inspector General is charged with a uniform enforcement of the law. It would also be necessary to have a much larger appropriation than at present, not only to pay the salaries of the experts to be employed but also to pay the salaries of many additional clerks required in the central office and for the salaries also of inspectors of construction, who should be stationed in all of the shipyards throughout the country.

Thus it will be seen that unfortunate as was the disaster to the steamer *Eastland* the matter of hull inspection and construction is one that has not been neglected, and it may be that as a result of this terrible disaster it will be possible to obtain a sufficiently large appropriation to pay for the additional expenditure above proposed, which would result in a larger and more effective service.

OVERLOADING OF PASSENGER STEAMERS

Closely connected with the proposition of hull construction is that of the overloading of passenger steamers. To one who gives this subject only superficial attention the first thought is, Has a steamer carried more passengers than she is permitted to carry by her certificate of inspection? It is believed, however, that violations of law in this respect are comparatively few, and the more important question to ask is, Have the local inspectors permitted a steamer to carry a larger number of passengers than she should be permitted to carry by her certificate of inspection? In this connection is to be borne in mind not only does the ship possess sufficient stability to carry the number of passengers allowed, but in giving the passenger allowance has due consideration been given to the possibility of panic and to the handling of the life-saving apparatus in the event of panic?

It will be interesting in this connection to refer to previous annual reports in regard to the question of overloading, and attention is called to the remarks appearing under the heading "Overloading of passenger steamers," commencing on page 19 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1912, which read as follows:

"The matter of the number of persons permitted to be carried on passenger steamers is one that has received the careful and constant attention of this bureau.

"Section 4464, Revised Statutes, requires inspectors to state in every certificate of inspection granted to steamers carrying passengers, other than ferryboats, the number of passengers that any such steamer has accommodations for, or can carry with prudence and safety. It will thus be seen that the local inspectors have exclusive jurisdiction in the matter of fixing the number of passengers that shall be carried on board steamers. This perhaps is as it should be, for as a result of varying local conditions the local inspectors are the ones who are presumably best informed as to the number of passengers a steamer can carry with safety. At the same time, however, if the local inspectors do not exercise good judgment, steamers will be permitted to carry more persons than they should be allowed. The bureau has persistently endeavored to have the local inspectors watch most carefully this situation, impressing upon them that the responsibility is theirs, and that in the event of disaster from this cause they will most surely suffer the punishment that is proper for any carelessness or neglect of duty. If it were possible or practicable to have a general and uniform rule by which the passenger allowance could be estimated, it would be most desirable, but at the present time I can not see how such a rule could be put into effect.

"It is believed, however, that the new rules in regard to the boating of vessels will very materially control the situation, for now that vessels are required to boat according to the number of passengers carried, and not according to tonnage, an unreasonably large number of passengers can not be carried because of the inability of the steamers to boat up to the requirements."

There was also issued in the year 1912 a very important circular letter, dated April 27, 1912, addressed to United States supervising local inspectors of the service in regard to this matter. Particular attention is invited to the last paragraph of this letter:

"As the season approaches when water travel will be at its height, you are directed to give particular and careful attention to the matter of the inspection and equipment of all steamers under your jurisdiction, especially those steamers accommodating a large complement of people. You must see that all of the life-saving apparatus, such as life preservers, lifeboats, and life rafts, is in first-class condition, a conclusion that must be reached only by actual personal examination on the part of the local or assistant inspectors.

"Hose, pumps, fire extinguishers, etc., must be carefully examined by a local or assistant inspector to determine that the fire-fighting apparatus is in good condition, and ready for immediate use.

"Another matter, to which most careful consideration must be given, and one that has had the attention of this bureau, is that of passenger allowances on excursion steamers. It is impossible to lay down any iron-clad rule as to how many passengers shall be allowed on a steamer, for some steamers, by reason of their construction and stability, are able to carry more persons than other steamers that may actually have more deck space. In arriving at the passenger allowance you should have in mind not only the stability of the ship but also the possibility of panic in case of disaster. If the passenger allowance of excursion steamers invites any doubt whatever, do not hesitate to cut down such allowance, for you are aware that you are responsible, and will be held responsible, in the event of disaster to such boats."

Reference is also made here to a part of the statement appearing under the heading "Precautions against overloading of passenger steamers," commencing on page 14 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1913, and reading as follows:

"The bureau has always made an earnest effort to prevent the overloading of steamers carrying passengers, and it is believed that it has succeeded in greatly reducing this practice. There are two factors to be considered in the matter of the number of passengers that steamers are permitted to carry. The first is, Have the inspectors permitted the vessel by her certificate of inspection to carry more passengers than she can safely accommodate? and second, Have the officers of the vessel permitted more passengers to be carried than is allowed by her certificate of inspection? Under section 4464, Revised Statutes, the inspectors are required to state in every certificate of inspection granted to steamers carrying passengers, other than ferryboats, the number of passengers of each class that any such steamer has accommodations for and can carry with prudence and safety, and thus it will be seen that local inspectors have exclusive jurisdiction in the matter of fixing the number of passengers that may be carried on board steamers. In a country such as ours, with so many varied local conditions and so many different types of vessels, this is probably the best arrangement that can be made; but the judgment of all men is not the same, and one inspector may err in permitting a steamer to carry more passengers than its capacity justifies, whereas another may err in not permitting a steamer to carry as many passengers as might be safely and prudently allowed. If it were possible to have a general and uniform rule by which passenger allowance could be estimated, it would be most desirable, but under the varying conditions it is practically impossible to put such a rule in effect. The bureau, however, has repeatedly warned local inspectors that the responsibility is theirs and that they would be held responsible in the event of disaster, and it is believed that these warnings and instructions have had a good effect. There is one factor, however, by which the allowance of passengers has been substantially controlled, and that is the rules at present in force in regard to lifeboat equipment, for where steamers are boated according to the number of passengers carried they are restricted in their passenger allowance by the extent of their equipment, and consequently can not carry a larger number of passengers than justified by their lifeboat capacity.

"The matter of preventing steamers from carrying more passengers than allowed by their certificates of inspection has received particular attention during the present season, and a system of having inspectors actually count passengers and submit reports direct to this office on small cards has been instituted and soon will be in general use by inspectors of this service and by customs inspectors. This will enable the department to be in immediate and close touch with the counting of passengers on steamers and do much to prevent overloading. It is believed that the counting of passengers should be entirely under the control of the inspectors of this service, which, of course, would require additional inspectors, because the small number at present available would not be able to take care of this very large and important business.

"In this connection I desire to call your attention to the recommendation of the bureau on page 18 of its annual report for the fiscal year ended June 30, 1905, as follows:

"'For the purpose of restricting the number of passengers that may be carried on motor vessels other than steam, I recommend that section 4464, Revised Statutes, be amended so as to read:

"'"The inspectors shall state in every certificate of inspection granted to vessels carrying passengers, other than ferryboats, the number of passengers of each class that any such vessel has accommodations for and can carry with prudence and safety."

"'I would suggest that the word "steamer" in the first line of section 4465, Revised Statutes, be stricken out and the word "vessel" inserted in lieu thereof in order to meet the amendment to section 4464.'

"The same matter is again referred to in the annual report for the fiscal year ended June 30, 1906, on page 15 of which appears the following comment:

"'Sections 4463, 4464, and 4465, Revised Statutes, referred to in my previous report, should be amended without delay, and in the interest of the safety of the traveling public I beg to renew my former recommendations upon this subject, and earnestly request that you urge upon Congress the necessity of this legislation.'

"Again, in the annual report for the fiscal year ended June 30, 1907, page 27, this recommendation was renewed in the following language:

"'Under the present law there is no authority to restrict the number of passengers that may be carried on motor vessels other than steam, and for the purpose of correcting this condition I would recommend that section 4464, Revised Statutes, be amended to read as follows:

"'"SEC. 4464. The inspectors shall state in every certificate of inspection granted to vessels carrying passengers, other than ferryboats, the number of passengers of each class that any such vessel has accommodations for and can carry with prudence and safety."

"'For the purpose of harmonizing with this proposed amendment, I would recommend that section 4465, Revised Statutes, be amended by eliminating the word "steamer" in the first line and substituting therefor the word "vessel."'"

Lastly, your attention is invited to the statement appearing under the heading "Transportation of persons," on page 25 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1914, which reads as follows:

"In the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1913, reference was made to the attention which had been given to precautions against the overloading of passenger steamers, showing, first of all, how this matter was taken care of by the certificates of inspection that are issued by inspectors, in which certificates the statement is made as to the number of persons that shall be carried on passenger steamers. The effort made in detecting the overloading of passengers after the issuance of the proper certificate was also pointed out. The inspectors of this service are giving their attention to the passenger-carrying allotment of these passenger and excursion steamers, and the number of passengers permitted to be carried to-day is relatively smaller than that permitted to be carried a few years ago. In any event, the original jurisdiction is placed by law in the hands of the local inspectors, and those are the officers who are responsible, and this bureau has impressed upon those officers that they will be held strictly accountable in this respect.

"During the past fiscal year there was put into use a new form for reporting the number of passengers carried. As these cards were received in the bureau they were carefully examined, and in every instance where it appeared that there was any overloading, or a suspicion of it, the matter received prompt and immediate attention. It is not the steamers subject to inspection that violate the law, or on which danger exists in the matter of carrying passengers; where danger exists is on motor vessels not subject to inspection, and on motor vessels in some instances subject to inspection.

"In this connection your attention is invited to the statement in the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1907, where, on page 27, it was stated that under the present law there is no authority to restrict the number of passengers that may be carried on motor vessels other than steam. For the purpose of correcting this condition it is recommended that section 4464, Revised Statutes, be amended to read as follows:

"'SEC. 4464. The inspectors shall state in every certificate of inspection granted to vessels carrying passengers, other than ferryboats, the number of passengers of each class that any such vessel has accommodations for and can carry with prudence and safety.'

"It will be noted that the recommendation substitutes the word 'vessel' for 'steamer.'

"Under present conditions, so far as relates to motor vessels, the situation is partly met by the equipment of these vessels; that is to say, the vessels are boated according to the number of persons they carry, but it must be obvious to anyone that this is an attempt to control a dangerous situation by indirect methods that are never satisfactory. Will it be necessary that there shall be some great catastrophe in order to eliminate the danger of carrying too many persons on motor boats? A change should be made in the law before this occurs. It seems to be the history of human nature that no great progress has been made except by the shedding of human blood. In the light of the past why is it necessary that this historical condition should be required to repeat itself?

"Therefore, your attention is urgently called to the matter so that the proper legislation may be at once brought before Congress, with a view to correcting this very dangerous condition."

The conclusion of the whole matter is that the original responsibility rests upon the local inspectors in the matter of passenger allowance. This is a condition that has given the bureau much concern and worry lest the local inspectors may not always exercise good judgment in the matter of passenger allowances. The bureau has tried to devise some way by which the statutes could be amended, taking the authority out of the hands of the local inspectors entirely, but at the present time it is not seen how this authority can be taken from them and obtain satisfactory results. It might prove necessary to have every ship carrying passengers measured and tested by experts, with a view to ascertaining what the passenger allowance of these vessels should be, but under the provisions of law as they exist at present it is impossible to do this. The bureau has endeavored to impress upon the local inspectors the seriousness of this responsibility which rests upon them, and condemns in unqualified language any local inspector who exercises the great authority conferred upon him by section 4464, Revised Statutes, without fully appreciating its seriousness.

FIREPROOF CONSTRUCTION OF EXCURSION STEAMERS

While all eyes are turned in the direction of requiring stability tests of vessels, do not let us forget other perils that are as terrible as the unseaworthy ship. Reference is made to the danger of fire, and attention is called to certain recommendations that have heretofore been made in connection with that peril. In the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1905, under the heading "Experiments in fireproof river and excursion steamers," on page 21, the following statement appears:

"The question of the inflammability of the ordinary type of river and excursion steamer is one that should have the fullest consideration by the department, and while fire is one of the worst conditions that we have to meet, and the most appalling in its results, little or no effort has heretofore been made to design or construct these steamers upon any different plans than those in use for years. Paints, compositions, and various other compounds of a so-called fireproof character have been suggested and tried, but none seems to have met the purpose of its design. There is now in course of construction in one of the prominent shipyards of the country a river steamer nearly 300 feet in length that has been designed with a view of having her as nearly fireproof as utility will permit. Upon the success of this experiment will depend whether or not fireproof construction in this class of vessels may be demanded, and if so the Government should lose no time in enacting legislation that will make such construction imperative in this type of vessel.

"Every disaster carries with it a lesson, and not one of them should go unheeded. Each accident should be made the subject of a most thorough and searching investigation to determine the cause and remedy the defect. The annual inspection of a vessel is no guaranty that her equipment is maintained in serviceable condition throughout the term of her certificate of inspection, and for this reason I believe that intermediate inspections are not only important but that they are absolutely necessary and essential for safety. Accidents can never be totally eliminated from the risks of navigation, but a strict observance of wholesome laws and consistent rules will so reduce their number that confidence will be more firmly established, strengthening the public opinion that every precaution is being exercised to promote safety, so far as it is possible for rigorously enforced, well devised laws and rules to provide it."

Attention is invited also to the paragraph appearing under the heading "Fireproof construction of excursion steamers," commencing on page 15 of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1906, which reads as follows:

"In my last report I referred briefly to the experiment of a fireproof excursion steamer, and it gives me pleasure to report that this matter has now passed its experimental stage. The construction and operation of a fireproof excursion steamer has proven successful beyond the strongest hopes of those who conceived this type of construction, and I renew my recommendation that Congress enact such legislation as will imperatively demand that fireproof construction be required in all excursion steamers hereafter built or contracted for."

Attention is also invited to the last four paragraphs appearing on page 17, under the heading "Hull inspection," of the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1914, which reads as follows:

"The Steamboat Inspection Service inspects vessels in order to make travel by water safer, and while this service has done much to have lifeboat and fire-fighting apparatus provided, it nevertheless remains a fact that the most important thing to do is to make the ship itself as nearly unsinkable as possible. Having done this, it then becomes necessary to place on board the vessel the proper equipment to take care of those who travel on the ship, and to see that the vessel is properly manned. It is believed that the greatest peril which has to be met on board ship is fire, and in order to follow out the principle of making the ship itself as safe as possible before taking up the question of equipment, the Government should require that all excursion steamers be entirely fireproof.

"It may be claimed by some that it would not be practicable to make excursion steamers absolutely fireproof and yet be commercially successful, but attention is invited to a statement made in the annual report of the Supervising Inspector General for the fiscal year ended June 30, 1905. In that report it was stated that the question of the inflammability of the ordinary type of river and excursion steamer is one that should have the fullest consideration of the department, and that while fire is one of the worst conditions that we have to meet, and the most appalling in its results, little or no effort has heretofore been made to design these steamers upon any different plan than those in use for years. It was pointed out that paints, compositions, and various other compounds of a so-called fireproof character have been suggested and tried, but none seems to have met the purpose of its design. It pointed out also that at that time there was in course of construction in one of the prominent shipyards of the country a river steamer nearly 300 feet in length that had been designed with a view to having her as nearly fireproof as utility would permit. In the same report for the succeeding fiscal year it was stated that the construction and operation of a fireproof excursion steamer had proven successful beyond the strongest hopes of those who conceived this type of construction. The Supervising Inspector General therefore renews his recommendation, made in the annual reports of 1905 and 1906, that Congress enact such legislation that will demand this fireproof construction to be required on all excursion steamers hereafter built or contracted for.

"In the meantime, admitting that we do not have absolute fireproof construction on all excursion steamers now in use, the best precautions that we can take against loss of life and property is to maintain the very best fire-fighting equipment on these steamers, manned with crews well drilled and competent to fight fire should it break out.

"Until Congress requires fireproof construction of excursion steamers, it is believed that the use of the sprinkler system, already adopted by many passenger steamers, should be extended."

While we have been fortunate in not having any great fires recently on excursion steamers, it is a peril which none the less exists, and though we may have any number of regulations in regard to fire-fighting equipment, in order to prevent such another disaster as occurred on the steamer *General Slocum* the best way is to remove the cause for such a disaster and require absolute fireproof construction of excursion steamers. This can not be done until Congress acts, and the bureau most earnestly invites attention to the necessity for legislation in this respect.

I believe it is well worth while to have referred to this report as it covers the ground so fully and it surely, in view of what has occurred, will make a profound impression upon us all and spur Congress to action in providing the necessary legislation. In just a moment, I am going to refer to the last report of the Supervising Inspector General and call your attention to something which to my mind is startling to say the least.

In stating, emphasizing, and repeating what Congress has failed to do, it is only fair to say that Congress has done something in the way of compelling the building of first-class ships by the passage of the Jones-White Act at the last session.

Under the Jones-White Act, ships receiving mail contracts or receiving the benefits of the loans therein provided, are auxiliary vessels of the Navy, and as such, must be approved by the Navy Department. The plans of these ships are submitted to the Department of Navy and that gives the Government supervision and control in their construction. It is only fair to say that the Bureau of Construction of the Navy Department is attending to this work very seriously and in approving these plans, though the ships are auxiliary naval vessels, have not lost sight of the fact that they will in all probability spend their useful life in the merchant marine and must be made and constructed for commercial purposes. This becomes very important, gentlemen, because the safer a ship is made, the more precautions that are taken in building these water-tight compartments, in placing bulkheads running way up to the top deck without doors and entrances while they naturally increase the safety of the ship, it all has the tendency of reducing the serviceability of the ship as a merchantman. It is through the desire to make ships safe under unusual circumstances that has developed in this country an unusually high type of safe ships.

I want to pause right here to say that the highest-class ships we have in the way of safety happen to be engaged in the South American trade at this very moment in competition with the old British tubs of the Lampert & Holt Line, to which, as you know, belonged the *Vestris*. These ships with an unusual high degree of safety are the *American Legion*, the *Southern Cross*, *Western World*, and the *Pan American*. Another fine line of American ships are the *President Harding* and *President Roosevelt*, en-

gaged in the North Atlantic trade and operated by the United States Line. Then we have the so-called Merchant Line, with ships of unusual high degree of safety, as the *American Trader*, the *American Banker*, the *American Farmer*, the *American Merchant*, and the *American Shipper*. In the Pacific we also have the so-called President boats. The *President Grant, President Madison, President Jackson, President McKinley, President Cleveland, President Lincoln, President Pierce, President Taft*, and the *President Wilson*. Quite a formidable fleet of splendid, safe passenger steamers, all under the American flag. It is interesting to note that most of these steamers were built with the principal object in mind to make them safe. Many of them were built originally and most of them were designed as transport ships in time of war, when the submarine danger was very great. All the ingenuity that man could devise was put into these ships to make them safe. I refer to these ships and their present service in the mercantile trade as a complete answer to the argument that if too much safety is put into a ship her construction is such as to impair her commercial serviceability and reduce her earning powers. These ships prove that that is not so. I have already mentioned two latest ships of the American merchant marine, the steamer *California* and the steamer *Virginia*, which represent the finest type of ships for passenger service where nothing for the safety of the passengers was omitted.

But, gentlemen, it will not be very long before the provisions of the Jones-White Act will not be able to absorb any more ships. So that the present temporary and incidental control of hull construction now being carried on by the Navy Department is by no means permanent and does not in the slightest avoid the necessity of amending our shipping laws. Besides, there are many ships being built which require the supervision I have suggested before and which is so urgently being demanded by the Steamboat Inspection Service.

Mr. GREEN. Will the gentleman yield?

Mr. LAGUARDIA. I will be pleased to yield when I finish my statement.

I have spoken about the inspection and supervision over ships, and that was in reference to our own ships. As to foreign ships, we are governed mostly by treaty provisions. Countries having similar standards of inspection as ours have their ships exempt from our supervision and inspection. That exemption applies where such country's ships are plying between our ports and the ports of her own country. For instance, English ships plying between American ports and Great Britain do not come under our inspection. Passenger ships are required, however, to have certain life-saving equipment which our regulations require as a minimum. Foreign ships plying between American ports and ports not of their own country do come under our jurisdiction for supervision and inspection. The law on this point is likewise confused and inadequate. It is my firm belief that the law should be amended and provide definitely and specifically the extent of the supervisory jurisdiction and inspection of United States over such ships so engaged. Coming back to the *Vestris*, that was a British ship plying between New York and South American ports, and came within that provision of the law which required inspection by United States officials. It is my belief that if the *Vestris* were an American ship she would have long ago lost her certificate of seaworthiness. Why, gentlemen, up to this late date there is not a complete set of plans of the *Vestris* in this country. She was never submitted to what is known as inclining test or stability test. Every American ship is required to submit to such an inclining test. Section 16 of rule 7 of the General Rules and Regulations of the Steamboat Inspection Service provides for such stability tests. The rules also provide for a complete set of plans of the ship to be filed in order to determine mathematically the structural stability of the vessel. Again I want to point out that even this rule is local and under the jurisdiction of the supervising inspector and not of the central office.

I am advised by competent naval architects and reliable shipping men that if the plans of the *Vestris* had been examined and the vessel submitted to a stability test, it would have demonstrated that the vessel was utterly unseaworthy. The question arises now how far can we go on a foreign vessel in taking her out and submitting her to such tests. I hold that a foreign vessel engaged in the passenger trade between the United States and foreign ports not of her own country must submit to all the requirements, inspections, and tests that this Government may demand, and that it can not properly raise a legal, technical, or other objection and resist such inspection and tests. The sister ship of the *Vestris*, the steamer *Vauban*, is operated by the Lampert & Holt Line and engaged in the same service as the ill-fated *Vestris*. Sister ships, as you know, are built of the same design, from the same plans and specifications. I believe it is not only prudent but necessary to submit the steamer *Vauban* immediately to an inclining test. That will not only establish her condition but also test our powers under the law. If the owners resist an order for such inspection, the case should be taken to court immediately and the matter decided. As I said before, legislation should be enacted to leave no doubt as to our rights over such foreign vessels.

I have this day therefore addressed a request to the Supervising Inspector General asking for such an inspection. I will read the letter:

DECEMBER 14, 1928.

Hon. DICKERSON N. HOOVER,
Supervising Inspector General,
Steamboat Inspection Service Department,
Washington, D. C.

MY DEAR COMMISSIONER HOOVER: Under the law you have jurisdiction over foreign vessels plying between American ports and countries not their own. Just how far this jurisdiction goes and whether you have as complete jurisdiction over such foreign vessels and American vessels I believe there is a difference of opinion. It seems to me that foreign vessels engaged in the carrying of passengers from American ports to other countries are in no position to raise any technical objection to any inspection or test which may be required by your service. It has been impossible to date, I am informed, to obtain a complete set of the plans of the ill-fated steamer *Vestris*. That being so, it is indeed difficult to determine the stability of this ship. It is apparent from what took place that her stability was very low. I understand that the same company is operating a sister ship to the *Vestris* called the steamer *Vauban*, this ship being of the same construction and design of the *Vestris*. After what took place and the lack of complete set of plans, I would ask you to submit the steamer *Vauban* at her next call at an American port to a stability test such as is required of American vessels under section 16 of rule 7 of your regulation.

Such a test will be useful not only in providing necessary data in arriving at correct conclusions concerning the *Vestris*, but will also make it known to the owners of foreign vessels engaged exclusively in trade between the United States and other countries that that same degree of safety and high standard of construction and strict supervision required of our own vessels will be required of foreign vessels so engaged.

Very truly yours,

F. LAGUARDIA.

Mr. SIROVICH. What is a stability test?

Mr. LAGUARDIA. It is putting a vessel in an inclining position to establish by actual test her ability to right herself into normal position. It tests the structural strength of the vessel when placed in an abnormal position such as when a ship is listed to one side. Take this ship, if she is inclined, say, 5° [indicating] she would immediately come back to an even keel. Now, the great danger when a ship is rolling is that in a very high sea, a great many things might happen. If she is structurally weak and continues to roll, strain is placed on part of the ship that might be weak and something is bound to break. A ship having proper stability can easily take 15° to 20° lists [indicating] and must be constructed to absorb a list of 30° [indicating]. In the case of the *Vestris*, where perhaps cargoes shifted or water seeped in when she got into a list, she was unable to recover but continued over, taking in more water all the time until she sank. The listing of the ship in connection with her stability, of course, becomes of the utmost importance in time of distress. Gentlemen will recall the case of the *Lusitania*. The ship was torpedoed, but the direct damage of the torpedo was not necessarily fatal. The ship immediately took water and commenced listing. [Indicating on ship model.] Unfortunately all her air ports were open and water rushed in through the entire length of the ship so that her water-tight compartments were of no avail, water being taken through one whole side of the ship. The *Lusitania*, by the way, had longitudinal bulkheads and that raises another question that I will not go into to-day. The great ship *Titanic*, which was on her maiden trip west, it will be recalled, sank after hitting an iceberg. Steaming at full speed in an iceberg field she hit an enormous mountain of ice and tore her hull a great length, so that several of her compartments were immediately flooded. That great ship sank in less than two hours. I do not want to get away from the main subject, and that is the necessity of the revision of the law affecting merchant ships. I pointed out a few moments ago the recommendations made heretofore by the Steamboat Inspection Service.

The report of the present supervising inspector general of the service for 1928 was published on July 2 of this year. I want to say right here that Mr. Hoover, the present supervising inspector general, has come up from the ranks. I believe he spent most of his life in the Steamboast Inspection Service. He knows his job and he, too, ever since he took office has been urging Congress through his annual reports for legislation to bring

the service up to the requirements of the day. His 1928 report is most interesting and contains specific recommendations for legislation and suggests several amendments to the law. It continues the unheeded recommendations contained in the report of 1915. Gentlemen, I am going to read Captain Hoover's report. For some reason that I can not understand his report was deleted, blue penciled, and emasculated by some one in the Department of Commerce so that Congress has not the benefit of his views and recommendations if it reads only the report as it appears in the printed form issued by the Department of Commerce. In all likelihood the Secretary of Commerce did not see the inspector general's complete report. I am sure you will all agree that Congress is entitled to have the complete report unrevised, unabridged, and in full of every bureau head or chief of a department required by law to submit an annual report. Before I proceed reading Mr. Hoover's report I want to show the House the printed report which I hold in my hand and you will see that it contains one short paragraph on page 1 and all of page 2. From page 3 on are the tables and figures submitted in the original report. Here is the report as submitted by the head of the Steamboat Inspection Service and the recommendations made by him therein. I will read it as it is very interesting and instructive:

REPORT OF THE SUPERVISING INSPECTOR GENERAL STEAMBOAT INSPECTION SERVICE

DEPARTMENT OF COMMERCE,
STEAMBOAT INSPECTION SERVICE,
Washington, July 1, 1928.

THE CENTRAL OFFICE

Nothing could show more forcibly the awakening of interest in the American merchant marine than the volume of work passing through the office of the Supervising Inspector General. It might be interesting to know of the numerous requests that are received from people all over the country and in all walks of life for information concerning things maritime. These requests come from persons who are desirous of locating missing relatives, who may be licensed officers, members of the crew, or persons supposed to have been passengers on vessels. They come from students and instructors in high schools and colleges for information concerning the activities of this service. This is a healthy condition of public interest, for it shows that our people upon the seaboard as well as from the interior points in the Mississippi Valley are turning their eyes again to the sea.

The head of this service is a member of the executive committee of the American Marine Standards Committee, and has participated actively in the work of standardization which has been sponsored by you. The American Society for Testing Materials has been doing excellent work in connection with standardization of the testing of steel plates, and in this work this service has cooperated actively. Two years ago the head of this service had occasion to address the National Council of Safety at its annual meeting in Detroit, Mich., and again in October an appropriate address will be made before the same organization in New York City.

Reference is made to these activities that touch this service because they have their effect upon the volume of work constantly passing and are but incidents in the regular routine of work in connection with the direction of a large service like this, which covers the entire United States, Alaska, the Hawaiian Islands, and Porto Rico; and, because of this increased pressure of work, because of the awakening of the people concerning things maritime, and because of the necessity of improving methods, it has become quite apparent during the last three years, and markedly so in the last year, that there must be a larger force in the central office. You will recall that in the last annual report I pointed out the manner in which the work of the central office might be reorganized and was fortunate in obtaining the services of three additional traveling inspectors, who will take oath and assume duty on July 1, 1928. Those inspectors will be used largely in connection with the stability work, much of which is behind, and all of which is increasing in volume from day to day, in connection with the regular work of the service.

In the estimates for 1930 I must stress the necessity of the appointment of two additional traveling inspectors, with headquarters in this office, to be used in connection with the standardization of examination questions for licensed officers and in checking the work of inspectors in the crewing of vessels, equipment required, and the approval of boilers, all with a view to obtaining uniformity throughout the service. We have in this office valuable data relating to the operations of this service, but, valuable as this data may be, it also may represent many errors of procedure, because of inadequacy of force to check up the work of the districts; and, having in mind that the Supervising Inspector General is required, under the law, to obtain uniformity of procedure, and realizing that uniformity can only be obtained by constant supervision and review in order to carry out the requirements of the statute, it is necessary to have an expansion of force in the central office.

When it is considered that, at the present time, aside from the official direction of the Supervising Inspector General, there are six traveling inspectors attached to the central office, and this without any adequate increase in the number of clerks in that same office, it is obvious that this bureau must have additional clerical assistance, because the correspondence, reports, and investigations that are constantly being conducted by this trained technical personnel require the assistance of properly trained clerks to carry on this work.

Right here is a table of personnel which is included in the deleted printed report, and I will therefore omit it. The original report continues:

In what is truly a mechanical age, when we may be prone to stress things other than men, it is none the less apparent that what is needed, more and more, is men, and efficient men. This bureau has endeavored to carry out constantly the desire of the administration for economy, and its record will show that it has successfully done so. There comes a time, however, when it is absolutely necessary to have a larger number of inspectors so as to maintain the high standard of inspection that is insisted upon by this office. Accordingly, in the estimates for 1930 I will recommend the appointment of 12 additional assistant inspectors, 2 to be stationed at each of the following ports: New Orleans, Baltimore, Boston, San Francisco, Portland, Me., and Galveston. There are, in fact, other ports where additional assistant inspectors might be used, but those named above are the ones where the need is most pressing at the present time. By the act of May 22, 1928, there was created a board of local inspectors at Hoquiam, Wash., and in the estimates for 1930 I will cover items that will make it possible, if Congress makes the appropriation, for that board to commence active operations on July 1, 1929.

Another matter vitally affecting personnel is that of salaries, and the salaries paid by this service are too low. The Welch bill gave some relief, but it did not correct conditions. To the extent that that bill gave small promotions to employees who had for years not received proper compensation we are truly grateful, but this matter of salaries in the Steamboat Inspection Service can not be finally adjusted until it is adjusted according to principle and not according to amount alone.

It is not a question of how much money shall be paid to an employee, so much as that the proper amount shall be paid, taking into consideration the duties performed and the skill possessed, and when the salaries of the employees of this service are measured by that rule, it will be found that they are greatly underpaid, which must always result in dissatisfaction. For example, supervising inspectors have a range of salary from $3,800 to $4,400 when their range should be from $5,200 to $6,000, and assistant inspectors, who receive the lowest compensation of the inspectorships, have a range from $2,900 to $3,400, and should have a range from $3,200 to $3,700. The clerks in the field, too, are greatly underpaid and, having in mind that they are required to do expert court reporting in addition to difficult clerical work involving the application of the provisions of the general rules and regulations as well as the statutes, larger salaries should be allowed. No court or committee of Congress would be willing to pay such low salaries for the skill required in like work for them. Such a condition should not exist, and if the classification of the field employees is to be studied by the Personnel Classification Board, or any other governmental agency, I trust that it will be studied in a constructive sense—not with the thought of paring down salaries or of giving a certain amount of money as a stop-gap, but with the purpose of correcting salary injustices along constructive principles.

I have to stress again the desirability of placing the supervising inspectors of this service under the classified civil service. These officers are at present in the presidential class, but every one of them, including myself, are employees who have been promoted through successive grades to their present positions. This is a service that exists, primarily, for the purpose of making transportation by water safe, and that task can be best carried out by men who are not amenable to the vicissitudes of politics. For the first time in the history of the Board of Supervising Inspectors, every member of that board is an employee who has reached it by promotion, and in order to continue the good work that has been for so many years carried on, and the policy that has been respected by all administrations, regardless of party, I submit below a bill to amend section 4404, Revised Statutes (U. S. C., title 46, sec. 373), as amended by the act approved July 2, 1918:

"*Be it enacted, etc.*, That section 4404 of the Revised Statutes of the United States, as amended by the act of Congress approved July 2, 1918, be, and the same is hereby, amended so as to read as follows:

"SEC. 4404. The positions of supervising inspector in the Steamboat Inspection Service are hereby placed under and included in the classified civil service. There shall be 11 supervising inspectors, who shall be appointed by the Secretary of Commerce, in accordance with and under the provisions of the act of January 16, 1883, known as the civil service act. The supervising inspectors shall be entitled, in addition to his authorized pay and traveling allowances, to his actual and reasonable expenses for transportation of instruments, which shall be certified and sworn to under such instructions as shall be given by the Secretary of Commerce.

"SEC. 2. That this act shall be effective on and after the date of its approval."

During the year I have kept in close touch with the work of the districts, and, while I have not been able to visit every district, I have visited every part of the United States, including the Pacific coast, and I anticipate being able to report for the next fiscal year, having visited again every local district. I hope that I may have the opportunity of going also to San Juan, Porto Rico; Honolulu, Hawaii; and the Alaskan districts. This service has nothing about it of a monastic nature. It is not away from the world but in it, and it must give service constantly. It can only do so by the maintenance of an efficient personnel, and the head of the service can only know how things are being done and what his employees are like by going into the districts and observing the effect of the operation of laws and rules and regulations and the efficiency of the personnel.

STABILITY CONDITIONS

I have referred to the fact that the stability work is behind. This is because we have been attempting to do with two men work that requires four. I hope that during the coming year we may be able to bring this stability work up to date. All that we have been able to do in connection with the stability tests has been to work out the one condition of stability that presented itself in connection with the particular ship that was being inclined. What we should be able to do, and will do with the increased force, will be to work out the five or six different conditions that properly should be considered in each inclining test. With the limited force that we have, should we be called upon to bring into court detailed information in regard to stability tests, while we could comply there would be considerable delay in working up the calculations. With the cases completed, requested information may be furnished at a moment's notice.

There seems to have been an impression abroad that it was the purpose of this office to standardize stability calculations. That impression is erroneous, and it undoubtedly grew out of a very praiseworthy effort in connection with the activities of the American marine standards committee. It is to be borne in mind that every vessel must be handled upon its merits, and, while there are certain general fundamental rules that are to be followed by all experts conducting inclining tests, yet the greatest rule of all must always be kept in mind, and that is that a rule that may apply to one ship would not necessarily be applicable on all fours to others. I believe that the United States Government was the first, and was alone for a number of years, in requiring stability tests. If my information is correct, the British Government now has similar requirements or is contemplating them. There may be some objection to the Government undertaking to require stability tests, but I would say to that objection that, while it may not be possible to lay down standardized rules, there is no expert but who must admit that the problem exists of being sure that a vessel possesses proper stability.

It may be true that much discretion must be left to the master, but our stability calculations have already shown that there are a number of vessels in which we have required fixed ballast that have undoubtedly been made safer by the requirement, and it can be shown that in the adjustment of disputes—and there have been some in regard to stability requirements—this office, while always keeping in mind safety, has proceeded in every instance as generously as possible, and has always applied the principle of settling each case upon its merits.

BOILER INSPECTION

For some time the proper technical committee of the American Marine Standards Committee has been working upon a tentative boiler code for this service. However, it is not to be forgotten that the legal responsibility rests with the Steamboat Inspection Service. If boilers are constructed according to rules that are dangerous, that responsibility is in this service, and it can not be avoided or side-stepped. Having in mind, however, the necessity of proceeding constructively and in accordance with best modern practice, I did, as you know, request the advice of the American Marine Standards Committee in connection with boiler construction, my thought being that we would take the best in all of the codes, including our own as it at present exists, and build from all of them one that may be considered the best and in advance of all others. In so proceeding, we must have no pride of opinion, and the controlling factor must be that which is the best in principle for the purpose to be met. I intend within the next fiscal year to move actively in this respect, and by that time I trust that I may have the suggestions of the committee above referred to.

In regard to boiler inspection, however, it must be remembered that many of the criticisms directed at this service, while they are justified, can not be charged against the work of the Board of Supervising Inspectors. It is to be remembered that in this respect, as in many others, the Board of Supervising Inspectors is controlled by statutory requirements of Congress. I submit below a suggested form of bill to amend sections 4433 and 4418, Revised Statutes (U. S. C., title 46, secs. 411 and 392), which, if enacted into law, will give the Board of Supervising Inspectors the authority that it needs:

"*Be it enacted, etc.*, That section 4433 of the Revised Statutes of the United States be, and the same is hereby, amended so as to read as follows:

"SEC. 4433. The working steam pressure allowable on all boilers in vessels which are required to be inspected under the laws of the United States shall be determined under and in accordance with such rules and regulations as the Board of Supervising Inspectors, with the approval of the Secretary of Commerce, shall hereafter establish in respect thereto."

SEC. 2. That section 4418 of the Revised Statutes of the United States as amended by the act of Congress approved March 3, 1905, be, and the same is hereby, amended so as to read as follows:

"SEC. 4418. The local inspectors, under such rules and regulations as the Board of Supervising Inspectors, with the approval of the Secretary of Commerce, shall hereafter establish in respect thereto, shall also inspect the boilers subject to steam pressure and all the attachments, connections, equipment, apparatus, and appurtenances thereof, on all vessels required to be inspected before the same shall be used and at least once in every year thereafter. No local inspector shall approve any such boilers or the attachments, connections, equipment, apparatus, or appurtenances thereof unless in his opinion they meet the requirements of said rules and regulations and may be safely used in the service proposed. The local inspectors shall also subject all such boilers to hydrostatic tests in accordance with such rules and regulations as the Board of Supervising Inspectors, with the approval of the Secretary of Commerce, shall hereafter establish in respect thereto."

SEC. 3. That this act shall take effect three months after its passage.

INTERNATIONAL CONFERENCE

The British Government has extended an invitation to the leading maritime powers to attend an international conference on safety of life at sea in London in the spring of 1929. As that conference has to do with safety of life at sea, manifestly this service is one that is vitally interested, and it is actively participating in the work of the Government incident to the preparation for that conference. The agenda submitted by the British Government covers suggestions with reference to subdivision of ships, life-saving appliances, wireless telegraphy, fire-extinguishing appliances, ice patrol, and collisions at sea. In connection with those suggestions this service is actively engaged in the work of the committees on life-saving appliances and fire-extinguishing appliances, the Supervising Inspector General acting as chairman of the committee on life-saving appliances, and the supervising inspector of the ninth district acting as chairman of the committee on fire-extinguishing appliances.

For the last three years this office has been actively engaged, with the assistance of that supervising inspector who is chairman of the fire-fighting committee of the Board of Supervising Inspectors, upon a study of fire-fighting apparatus, in connection with which particular attention has also been given to fire-indicating apparatus. In pursuing these studies the service has not proceeded in an ex parte manner, but it has invited to its conferences representatives of shipbuilders, underwriters, and owners of steamships, having in mind that, while safety must be had at all times, a business must not be regulated in such a manner as to destroy it. So far as the British suggestions for fire-extinguishing appliances are concerned, it is pleasing to note that this service has for a number of years been proceeding along modern lines, but there is progress yet to be made. Our thought has been to have apparatus that is powerful in the extinguishment of fire. That is good, but it is better when planning for construction to have a ship as nearly fireproof as possible when being built. This thought is consistent with that given in my last annual report concerning the desirability of excursion steamers being built of fireproof material.

While it has been contended that it is not practicable to build fireproof excursion steamers, or steamers other than of the excursion type, yet there are features of a safety nature that can be considered and that will doubtless be considered by the international conference. For example, in the building of vessels, our rules and regulations cover no provisions with reference to fire-resisting bulkheads, excepting in so far as reference is made to steel casings about boilers, metal-lined lamp lockers, oil rooms, etc. In speaking of bulkheads, I have reference to fire-resisting bulkheads, notably in the 'tween decks, and these bulkheads should be carried as high as may be necessary, and where such bulkheads might interfere with interior design, fire curtains could be substituted. While it is realized that the stairways of passenger ships are quite often selected by marine architects as one of the most beautiful features in a ship, they might well have in mind that something should be done toward protecting these stairways against draft in case of fire, as continuous stairways form a regular flue for draft.

In connection with the work of the committees on fire-extinguishing appliances and life-saving appliances, the service has prepared comparative statements showing the requirements under the convention of 1914, the present British proposals, and the present American practice, and it is believed that it will be found as the result of the compilation of this data that better and more constructive work will be accomplished in the study of the requirements so as to ably prepare the American delegates to the conference than in any other way.

Gentlemen, I would not have burdened you with this report nor would I encumber the RECORD with it had it been reported in full in the published printed report of the Department of Commerce. Having been deleted of most of its meat and substance, its recommendations having been blue-penciled, I deem it

proper to bring it to your attention and to have it appear in the permanent RECORD. I do hope that recommendations therein contained will be carefully considered by Congress.

Speaking of inspection, gentlemen, a great deal of criticism was directed a few weeks ago to the inspection of the *Vestris*, and in all fairness I want to say that under existing regulations, considering the conditions existing in our busy ports such as New York, San Francisco, and Seattle, it is absolutely impossible for an inspector to do his work according to regulations and hold his job. If he were to attempt to inspect in accordance with the requirements of his own regulations, gentlemen, the steamship companies would come to Washington, would get members of their delegation to go to the department, and that inspector would have to lay off or lose his job. There is no doubt about it. Let me give you an illustration. He is required under the regulations, not under the law but under the regulations, to take the lifeboats and lower them to the water on the one side and on the other side to the dock. Now, gentlemen, anyone familiar with dock conditions knows that it is physically impossible, if that ship is loading in a busy port, to lower those boats on the dock side, and 9 chances out of 10 on the off side she has coal barges and is coaling or has freight barges or the ship at the next dock has such barges, and it can not be done. Question: Is this inspection and test of lifeboats necessary? If so, we must write it into the law, and we must make provisions giving the inspector the right to order the boat freed from the docks and then have a real lifeboat inspection. One of two things must be done, gentlemen: Have the law specify and authorize the details of the inspection, or else not to expect the impossible from the inspector. There is no other way to aid the inspector. We must either do this or simply have regulations for window-dressing purposes, expect the inspector to make a perfunctory inspection, sign a certificate, and if everything goes all right, all right; or if anything happens, then blame him. We must decide definitely just what inspection is necessary, write that into the law, and back the inspector who is carrying out the law in the performance of his duty.

Now, gentlemen, as to foreign ships, I stated a minute ago that ships plying between American ports and home ports are not required to submit to any examination, assuming that the standards of their country equal ours. Ordinarily this ought to be sufficient. I am going to tell you of an instance where one of the largest ships afloat left the port of New York in the month of December, 1924, with a full complement of passengers in an absolutely unseaworthy condition. If it had so happened that that ship had encountered a storm, every marine engineer concedes that she might have broken apart. I am referring to the British steamer *Majestic*. The statement I have just made is very serious. I would not make it if I were not absolutely sure that it is correct. The case of the *Majestic* and her condition on that December trip in 1924 has been the discussion of naval architects all over the world. Strange as it may seem, nothing appeared in the press of either country giving the details or stating the extent of her damage and the great danger in sending her out on the eastbound trip with what is known in the parlance of the sea "her back broken." I am going to read to you gentlemen an article appearing in Marine Engineering, of August, 1925. It is written by one of the foremost naval architects in this country. Although the article is technical in its character, it is so well written that a layman can readily understand and realize the serious condition of the ship on that trip. The article is written by Commander Edward Ellsberg, formerly of the United States Navy, and a man in whom every Member of this House has confidence. [Applause.] I read the article:

It is an unfortunate truth that no shipowners will publish the facts concerning structural failures of their vessels. As a consequence, the naval architect is usually enabled to learn little or nothing from the defects found in operation on ships other than those belonging to his own company. A few rumors get about, conjectures are made—usually erroneous—but the actual facts ordinarily remain a secret and the designer can only guess at the faults.

A shining example of this nature was the accident to the *Majestic* last winter. This vessel was so damaged as to necessitate her withdrawal from service from late December until nearly May for repair. Her condition was extensively commented on in the British press at the time and her canceled passages were briefly noted in the American papers. What caused the damage, the extent of the trouble, and the adequacy of the means taken to remedy it were not made public. It was noted that even in the British shipbuilding press there was considerable criticism of this policy.

A knowledge of the facts in this case will lead to the conclusion that the damage, instead of being the result of general structural weakness or of any unusual strains peculiar to large ships, was due only to a local strain arising from a detail error in design which was in no way connected with the size of the ship.

WHAT HAPPENED TO THE "MAJESTIC"

Chronologically, the following was the sequence of events:

During the summer of 1924 it was discovered that the C deck of the *Majestic* was fractured at the midship section in way of the inboard lobby. The C deck is the strength deck of the vessel, forming the top flange of the ship girder. This deck at the sides is formed of two courses of plating, which doubling is carried inboard on each side for several strakes, but these doubled stringers are pierced both port and starboard by the uptakes which on this vessel come through near the sides instead of on the center line as in the ordinary ship.

Just inboard of these uptake openings the deck is still further cut away by an elevator shaft on each side. This construction results in leaving only about 25 per cent of the beam of the ship intact inboard of the elevators and uptakes. However, this inboard section of the deck was not intended to take any strain and was made only five-eighths inch thick as compared with the deck stringer plating which is about 2 inches thick at the side and about 1½ inches thick in the strakes next inboard.

It was the section of ⅝-inch plating between the elevators which was first discovered to have parted. The failure in this location was verified by taking down the ceiling underneath. At the time, little importance was attached officially to the fracture. As the light plating here was not the strength plating, the vessel was not considered weakened and, as it was then in the midst of the tourist rush, nothing was done to remedy the damage. It was apparently intended to defer repairs to some slacker period in the future. However, a little reflection, and a further investigation at this time as to how a light strake could ever get sufficient strain to let go when there were outboard of it heavy strakes intended to take all the strain, would have proved both illuminating and profitable.

There can be no doubt that such an investigation would have shown the deck stringers on both sides already fractured through a considerable portion of their width, so that the strains in working had been partly thrown on the light strakes inboard, with the consequences noted. But the C deck at the sides was a weather deck covered with wood planking; underneath, the stateroom ceilings sheathed it. If anyone connected with the ship had any doubts, they were not strong enough to cause the laying open to inspection of the deck stringers, and no examination of them was made.

Matters continued in this status until the westbound trip in December. Very rough weather was the rule on this trip. While still over a day out from New York, a loud report, likened by many to "a cannon shot," was heard. An investigation showed that the C deck had now cracked open all the way from the starboard to the port side, and that the port sheer strake had also let go, the crack in it extending down the side to the top of a circular porthole, where the crack stopped. The starboard sheer strake held.

The *Majestic* made her way to New York, and sailed as per schedule on her return voyage to Southampton. The crack in the C deck on the port side opened as the vessel worked, about one-half inch, but the damage did not extend further. On this eastbound trip the weather was apparently not bad. On arrival at Southampton, all future trips were canceled, and the ship laid up for an indefinite period for repairs by Harland & Wolff.

STRUCTURAL CONDITIONS OF THE DECK REVEALED

The wood decking was removed from the C deck and the staterooms underneath torn out. Structural conditions of the deck were revealed as follows:

At the forward outboard corner of each uptake hatch the plating of the deck was cut out on a right angle. There was no compensation fitted around the corners of the opening. Just outboard of the uptake corner, and about 8 inches from it, another rectangular hole about 12 by 20 inches was cut through the deck stringer for a ventilator trunk. Just outboard of this ventilator was a butt in the adjoining strake of the deck plating, with its consequent close-rivet spacing. About 18 inches forward of the uptake was an expansion joint in the superstructure, which commenced just above the C deck. Underneath the C deck, and in line with the edge of the uptake, was a girder which ended with a small bracketed connection to the uptake plating. Inboard of the uptake openings were the elevator shafts as already pointed out.

All the above factors produced a most obvious line of weakness, which happened to come right on the midship section. In addition, failure to compensate the heavy deck for the openings cut in it, especially at the forward outboard corners, resulted in concentrating at these sharp corners all the strain carried from forward by a much wider strake of heavy plating.

Due to this local strain, it is evident that the cracking first started at the square corners. From this point, the cracks ran outboard a short distance into the ventilator hole. From here the cracks continued outboard, along the line of closely spaced rivets in the butt strap, to the

2-inch deck stringer, through which they ran to the sheer strakes and down the port sheer strake at its weakest section into a porthole.

FRACTURE GRADUALLY EXTENDED ALONG WEAKEST SECTION

It will be seen that in this case the damage followed the weakest section. Considering the structure and nature of the fracture, it is clear that the fracture was progressive. From the port and starboard uptake corners (diagram) worked their way outboard, rivet by rivet, until enough of the deck was gone on both sides to make the light inboard plating take part of the strain. This light plating then let go, which damage was soon discovered, as in this location there is a central passage over this spot and the interior deck covering would crack with the deck. This was the condition in the summer of 1924.

The progressive rupture of the C deck continued through the fall, and when in December the vessel was finally exposed to heavy weather, there was so little of the top flange left that, under a real strain, the remaining metal let go with a bang. It is safe to assume that at this instant the vessel was rolled to the starboard side, so that the port sheer strake was also acting as part of the top flange, and, consequently, was partly torn through when the deck parted.

There have been numerous instances previously in ships, buildings, and machines where cracks have started in structures that were adequately strong generally, but where a local stress was excessive due to an error in detail design. A crack once started is bound to extend itself, especially in a structure subjected to alternating stresses, regardless of the strength of the section through which it is working. Recognizing this, the designer usually tries to prevent the start by making all points subject to excessive local strain considerably stronger than the remainder of the structure and by making all changes in shape take place gradually. To these ends the machine designer fillets his corners and thickens up his shoulders; the ship designer endeavors to avoid sharp corners, and compensates all openings by thickening up his plating. Both Lloyds and the American bureau rules require compensating plates around openings cut in strength members.

Just why the German designer of the *Majestic* failed to compensate his strength deck when he cut out an oblong section of it on each side with the uptakes is not known. It can only be assumed that the stresses were so low in the sections of the deck stringers left that the chance of local concentrations of stress at the corners was overlooked.

HOW REPAIRS WERE MADE

In repairing the damage, care was taken to insure its nonrecurrence. All fractured plates were, of course, replaced. The initial error was corrected by making the new plating around the uptake corners half an inch thicker than the adjacent deck plating. In addition, the ventilator opening near the corner was eliminated, the butt strap outboard of the corner was moved several frames away, and the girder underneath the deck was more securely fastened to the uptake bulkhead. The effect of all this was to eliminate the line of relative weakness and to reinforce the corner against local strain. Finally, in renewing the fractured deck plate inboard between the elevator shafts, the thickness was increased from five-eighths inch by laying a new doubling, several hundred feet long, over this section. This, however, appears a useless precaution. As there are no inboard longitudinal bulkheads to connect this plating to, it can never take a strain until the outboard sections of the deck, which, due to their connections to the shell, act as the flanges, give way. As means to prevent such a mishap to the outboard plating have been provided, the strengthening of the deck inboard was unnecessary, resulting only in needless expense and addition of weight.

As this structural failure on the *Majestic* was not one peculiar to large ships, it is hoped that a knowledge of the trouble in this instance will prove useful to naval architects in the future in designing anything from yachts to liners.

The importance of the main deck, which I attempted to explain a few moments ago, will readily be seen from the reading of Commander Ellsberg's article.

It will require but little argument to show the necessity of writing into the law provisions which would compel foreign vessels engaged in passenger traffic and not subjected to our inspection to report to the proper authorities of our Government accidents or any damage sustained by the ship in order to give American officials an opportunity to pass on her seaworthiness before American citizens are permitted to embark as passengers at the risk of their lives.

Now, I want to call attention to another phase of the law which is very interesting. The owners of the *Vestris* are not liable in one single cent of damages to the families of persons who lost their lives through their negligence. When the *Titanic* and the *Lusitania* sank the owners were not liable for one cent of damage to the families of the people who lost their lives. That is under the act of 1851, where the liability of owners are limited. This law of limited liability was first enacted in France in the sixteenth century, when imprisonment was the punishment for nonpayment of a debt or judgment. When small sailing ships, usually owned by one individual and often the master of the ship, there might have been some reason for the limited liability. It was adopted in England during the reign of George III, and was followed by the colonists. It was put into the Revised Statutes in 1851.

Not only that, but the owners of the vessel can pocket the money that the insurance companies pay and still raise the defense of limited liability as provided for in the statutes. That was held as far back as 1886. The Supreme Court of the United States held that the statute of limited liability gave owners full protection and that the money received from insurance companies for the loss of the vessel could not be made applicable for the payment of damages.

I will read section 4283 of the Revised Statutes, which perhaps is the most archaic provision of all our laws.

SEC. 4283. The liability of the owner of any vessel for any embezzlement, loss, or destruction by any person of any property, goods, or merchandise shipped or put on board of such vessel, or for any loss, damage, or injury by collision, or for any act, matter, or thing, lost, damage, or forfeiture done, occasioned, or incurred, without the privity or knowledge of such owner or owners, shall in no case exceed the amount or value of the interest of such owner in such vessel, and her freight then pending.

Gentlemen, that is the law to-day and exactly as it was in the sixteenth century when first enacted. The dangers of the sea at that time can not be compared with conditions of to-day. I do not mean that the sea is less violent or that the elements have changed at all. But when this law was first enacted there were only tiny sailing ships. Compare that with conditions today—steel construction, water-tight compartments, and, above all things, the radio, which has made the isolation of a ship a thing entirely of the past. So that the risks of the sixteenth century are not to be compared with the risks assumed by owners of ships in the twentieth century. Negligence of the owners, of course, should not be exempt by the statute. Oh, yes, I will concede that the statute specifically says "without the privity of the owners"; yet, gentlemen, that is absolutely no safeguard, as it is humanly impossible under the law and the decisions and the way the steamship business is conducted to ever prove the privity required by the statute.

I noted several of the Members shaking their heads when I referred to the limited liability law being applicable in the United States courts to foreign owners of foreign ships as against claims for losses suffered by American citizens. It was so held in the case of Oceanic Steam Navigation Co. *v.* Mellor (the *Titanic*) (233 U. S. 718). The case of the *Lusitania* will be found in 351 Federal, 715. I might say right here that England has modified the law and, while it has not entirely repealed the limited liability statute, it does impose a minimum liability on the owners, where the ship is a total loss, of £15 a ton for loss of life and £8 a ton for loss of freight. That is a total—let me see—of about $115 a ton.

A splendid and scholarly review of the history of the owners' liability law will be found in the case of *The City of Norwich* reported in 118 United States, 468. That was really the test case, and as I said before it was decided in 1886. Several like cases were considered by the court at the same time and the question of whether or not insurance was applicable to the payment of damages or could be pocketed by the owners came up in the case of the *Great Western*, reported in the same volume on page 521, and it is in this latter case that a strong dissenting opinion was rendered. The dissenting opinion was rendered by Mr. Justice Matthews, with whom concurred Justices Miller, Harlan, and Gray. In this case, like in so many other cases where a property right was placed above a human right, the court decided by a divided vote of 5 to 4. I just want to read the closing statement in the dissenting opinion referring to the insurance feature of the case. Mr. Justice Matthews closed the dissenting opinion in these words:

We can not bring ourselves to think that Congress intended by limiting the personal liability of the shipowner, in cases where previously his whole fortune was responsible for the wrongs committed through his agents and representatives, to the value of his interest in the ship, which was the instrument of the injury, to permit the innocent party suffering the damage to go entirely without redress, when the vessel in fault, by disaster subsequently happening during the whole period of the same voyage, has been totally lost, and the owner, by a contract in force when the wrong was done, receives full compensation by way of insurance for the loss he has incurred, and has thus restored to him the offending vessel, not indeed in specie but in value. It seems to us it is the meaning of the statute that the owner shall receive no pecuniary benefit from his interest in the vessel doing the wrong which shall not inure to the compensation of him who has suffered the loss which it has caused. And that meaning Congress has taken pains to express by the use of the word "interest" as the subject which, or the value of which, the owner must surrender and transfer or account for, as the price of his immunity from personal liability, because it is appro-

priate to convey the idea, being large enough to embrace, not the mere legal title to the vessel or the wreck and remnant of her which may be saved from the perils of the voyage but every claim and benefit which constitutes to the owner its substance and value, capable of measurement in money.

I am sure that we have outlived the necessity of limited liability and I am certain that a study of existing law and prevailing conditions will result in the repeal of the statute. I can think of nothing that will make ships safer than repealing the limited liability provision of the law. It certainly is cheaper under existing law for owners to lose the entire ship, pocket the insurance money, and escape the payment of all damages. Once the liability is removed we will have little trouble in making shipowners comply with all the safety provisions of the law.

I have introduced a bill to repeal the limited liability section of the law. The bill has been referred to the Committee on Interstate and Foreign Commerce. Personally, I believe that it belongs to the Committee on Merchant Marine and Fisheries. I intend to confer with the chairmen of these two committees so that proper reference may be made. I do hope to get some action on it.

I do not say that we can sit here and on the spur of the moment revise these laws. I do not believe that a congressional investigation would do any good, because other fact-finding agencies of the Government have already attended to that. But I do believe that we should give this matter serious study and consideration and do it speedily. I suggest in my resolution (H. J. Res. 329) a commission to take all of the available data, to take the experience of the past, to study the laws and the treaties existing, and to make specific recommendation to Congress for the revision of our shipping laws.

I provide in my resolution for a commission to consist of three Members of the House; two Senators; an officer from the Bureau of Construction of the Navy; the senior naval officer; a delegate to the Conference at London for the Revision of the Convention of 1914 for the Safety of Life at Sea—and I will tell why in a moment; the Supervising Inspector General of the Steamboat Inspection Service of the Department of Commerce; a naval architect from the Naval Architects' School of the University of Michigan, and one from the Massachusetts Institute of Technology; a representative from the American Shipping Bureau, and one from the Society of Naval Architects. That would be a well-balanced commission. They could take their time and would necessarily have to wait the result of the London conference and take the findings of the conference into consideration. That is why I include the senior naval delegate from the United States sitting in the conference as a member of the congressional commission. That would establish the necessary contact between the London conference and this commission.

Mr. Speaker, I believe it necessary that such a resolution be passed. I do not care whether it be mine or some one's else, because I have no pride of authorship, but I think it should be passed at this session of Congress.

To show how sometimes we act hastily, although in the particular instance to which I shall refer we acted on good advice, we appropriated $12,000,000 for the reconditioning of the *Mount Vernon* and the *Monticello*. Those two boats were built 26 years ago. They are of the old German school that departed from the accepted formula of beam and draft. They are very narrow. The Germans have gone back now to the old formula. Those ships have low stability. They are 26 years old. Each will be required to carry at least 1,300 tons of fixed ballast, besides their water ballast. Yet we appropriated $12,000,000 to recondition them.

There is conflicting thought as to the advisability of reconditioning those two ships, and it is hoped that the appropriation will not be expended on those two old hulls, because the traveling public will be loath to take passage on them.

Mr. WAINWRIGHT. Who has the discretion in respect to that?

Mr. LAGUARDIA. I think it is in the Shipping Board. I do not think that I am violating any confidence when I suggest that any Member who is interested should consult some of the experts in the Bureau of Construction of the Navy, and consult some of the practical men who advise against this. It will take about a year and a half to recondition them, while it would take only two years, perhaps, to build new ships. In these days of keen competition, in the face of the splendid ships we are building of the type of the *Malola*, the *California*, and the *Virginia*, and those other ships I mentioned, it is simply ridiculous to spend that money on those two ships, and put them in the North Atlantic trade and expect to compete with the ships of foreign countries that we find in that trade, seeking American passengers.

Mr. WOODRUFF. Is it not a fact that the $12,000,000 authorized and appropriated for the reconditioning of those two ships would build two new ships of the same capacity?

Mr. LAGUARDIA. Perhaps not entirely, but very nearly.

Mr. WOODRUFF. That is $6,000,000 a ship, and I would say to my friend that $6,000,000 even to-day will build a mighty fine ship.

Mr. LAGUARDIA. It would certainly be criminal waste to spend it on those two ships.

Mr. WOODRUFF. I agree entirely with the gentleman.

Mr. GREEN. The decision to which the gentleman referred awhile ago, I believe, was in 1886. Does the gentleman recall whether the owners of that ship were at fault?

Mr. LAGUARDIA. That makes no difference.

Mr. GREEN. I want to ask the gentleman about the *Malola*.

Mr. LAGUARDIA. Let me make that clear. As I said before, if you can establish privity between the owners and the accident, which is almost impossible, then, of course, the limitation does not apply, but in doing that you have to practically establish criminal negligence.

Mr. GREEN. That was just what I wanted. Is this *Malola*, which the gentleman mentioned here, of the type commonly known as the nonsinkable?

Mr. LAGUARDIA. As near nonsinkable as a passenger ship can be. You understand, of course, you can make a warship more resistible to sinking than a passenger ship, because you must provide space in a passenger ship for cargo and passenger accommodations, such as large dining rooms, smoking rooms, and the like, while on a warship you can put several longitudinal bulkheads besides the cross bulkheads. Of course, it would not be possible to do that in a merchant ship required to also carry freight. But she is as nonsinkable as a passenger ship could be.

Gentlemen, I sincerely hope that Congress will no longer delay giving this subject consideration and action. [Applause.]

The SPEAKER pro tempore. The time of the gentleman has expired.

DEPARTMENT OF THE INTERIOR APPROPRIATION BILL

Mr. CRAMTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089, the Interior Department appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. CHINDBLOM in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15089, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 15089) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1930, and for other purposes.

Mr. CRAMTON. Mr. Chairman, yesterday afternoon the item on page 70 referring to fees for examining surgeons, Bureau of Pensions, was passed over until to-day.

The CHAIRMAN. Does the gentleman desire to return?

Mr. CRAMTON. I desire to return to it.

The CHAIRMAN. The gentleman from Michigan desires to return to page 70 under the arrangement made at the last sitting of the committee.

Mr. CRAMTON. At that time there was pending an amendment to the paragraph which I had offered following the action on the point of order. Since our adjournment I have discussed this matter with the Commissioner of Pensions, and I have here a memorandum from him and I will be glad to have it read, if it is desired, suggesting the importance of the paragraph. I have discussed it with the gentleman from Wisconsin [Mr. SCHAFER], who has, as I understand, given it other study and made investigation. The gentleman from Wisconsin suggests a change in the language further to perfect the situation. That change in language is indorsed by the Commissioner of Pensions and is entirely satisfactory to our committee.

Mr. JOHNSON of Texas. Will the gentleman indicate what the change is?

Mr. CRAMTON. It is to perfect the situation as to the examinations already ordered. If permission is given me, I will withdraw the amendment, although perhaps I had better offer this as a substitute for the pending amendment.

The CHAIRMAN. The Chair will state there is an amendment pending offered by the gentleman from Michigan on page 70, line 5, striking out the paragraph and inserting certain language. Does the gentleman from Michigan ask permission to withdraw his amendment?

Mr. CRAMTON. No; I am offering this as a substitute for the other amendment.

The CHAIRMAN. The gentleman asks unanimous consent to offer a substitute for the amendment which he offered at the sitting of the committee on yesterday. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the substitute offered by the gentleman from Michigan.

The Clerk read as follows:

Substitute offered by the gentleman from Michigan [Mr. CRAMTON] to the amendment proposed on yesterday:

Page 70, line 5, strike out the paragraph and insert the following:

"For fees and mileage of examining surgeons engaged in the examination of pensioners and of claimants for pension, for services rendered within the fiscal years 1929 and 1930, $300,000: *Provided,* That hereafter all necessary medical examinations of claimants or pensioners not heretofore paid shall be made by one physician or surgeon, duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1194), secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions, except when in the judgment of the said commissioner the examination should be made by more than one: *Provided further,* That the fee paid any such physician making such examination alone, or otherwise, shall be $5 for each examination, foreign or domestic."

Mr. BLANTON. I make a point of order against the amendment. It clearly violates the rule laid down by the Chair yesterday, in that it does not come within the provisions of the Holman rule. The Chair ruled on that yesterday, that where it gave the commissioner discretion to appoint more than one, he might appoint more than one in every case. It not only fails to come within the scope of the Holman rule on that but it clearly indicates that he can pay them $5 apiece hereafter, which will increase the expense instead of lowering it.

Mr. CRAMTON. Mr. Chairman, if I could explain the details of the matter to the gentleman from Texas [Mr. BLANTON], he would not be disposed to insist on the point of order. It would be very easy, I may say to the gentleman from Texas, to so draft the amendment as to avoid the point of order.

Mr. BLANTON. Yes. That is what I think. But now the gentleman comes and puts back into the bill the very thing against which the Chair ruled yesterday.

Mr. CRAMTON. I have endeavored to meet the views of the gentleman from Wisconsin [Mr. SCHAFER] and have offered the amendment in this shape. It is a complete rounded-out provision.

Mr. BLANTON. It is in effect exactly the same as the gentleman proposed yesterday.

Mr. CRAMTON. Not absolutely. The amendment which I offered yesterday, to which no point of order was raised, and which is now pending——

Mr. BLANTON. Because the Chair ruled it in order as coming within the Holman rule.

Mr. CRAMTON. If the gentleman will permit, the amendment which I offered yesterday and which is still pending was of a legislative character. It was exactly the provision reported by the committee, except that there was omitted the provision permitting the Commissioner of Pensions in his discretion, where desirable, to order an examination before the full board instead of before one member. That is the only difference between the amendment offered yesterday and now pending and the original recommendation of the committee. I am sure the gentleman from Texas would not be opposed to that being included, because the Commissioner of Pensions assured our committee that there will not be a great many cases where he would order pensioners before the full board. But there are some in which it is desirable by the commissioner to have an examination before a full board.

Mr. BLANTON. But in that case the applicant for pension can get it only when the commissioner sees fit to give it to him. I have in mind some of our hard-boiled physicians in the Veterans' Bureau who have made ridiculous decisions in regard to disabled soldiers. In the Pension Bureau you have no appeal. When you have a hard-boiled physician he turns a man down and the man has no appeal at all.

Mr. CRAMTON. The only thing in this controversy now seems to be that one clause——

Mr. BLANTON. Which takes it out of the scope of the Holman rule——

Mr. CRAMTON. And which I can get around if the Chair forces me to. But let us consider the matter on its merits and vote it up or down according to the merits. If not, of course, all that I have to do is to redraft that amendment——

Mr. BLANTON. To conform to the Chair's ruling.

Mr. CRAMTON. To get around the Chair's ruling——

Mr BLANTON. And the Chair will not let him do that.

Mr. CRAMTON. He will so long as I am parliamentary about it.

Mr. BLANTON. But the gentleman from Michigan comes back and offers the self-same amendment that the Chair has ruled out of order——

Mr. CRAMTON. With a provision in it that the gentleman from Wisconsin desired.

Mr. BLANTON. Fortunately for the country the Congress is composed of 435 Members, some of whom are from States other than Wisconsin, and all of whom ought to be heard in behalf of the people.

Mr. CRAMTON. Let me say to the gentleman from Texas that the amendment is one of very great importance to the good administration of the pension laws.

Mr. BLANTON. I am thinking about disabled soldiers obtaining a pension.

Mr. CRAMTON. And I am thinking about them, and also the Commissioner of Pensions is, and the commissioner emphasizes the need of this legislation. Of course, if my amendment carries as to this provision concerning these examinations before a full board—if it were to carry a provision to the effect that in no more than 10 or 20 per cent of the cases there should be such examinations before the full board, we would be keeping within the Holman rule, and we would be defeating the very thing the gentleman from Texas has in mind.

Mr. BLANTON. Mr. Chairman, will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. The gentleman stated yesterday that out in California, where one board made 30 examinations in a day, these physicians getting $90 under the law would be getting entirely too much money. He is fixing it so that one physician in California can make 30 examinations a day and get for it $150.

Mr. SCHAFER. Mr. Chairman, since this matter came before us yesterday I have made an investigation and have consulted the Commissioner of Pensions. It is not the intention to abolish the boards and give one member all of the examinations. The boards will be retained so that if their services should be required for a board examination they can be had. Under the proposed plan one physician will not make all the examinations which his board would make under the plan now in effect. The examinations will be assigned to various members of the present boards.

Mr. BLANTON. But this present commissioner may die or resign to-day and another commissioner may come in.

Mr. SCHAFER. I will say to the gentleman that from the standpoint of the pension boards in my district, which is a city district, perhaps the change is not necessary; but I have found upon investigation that in the rural communties there is a great hardship not only in having the board members travel many miles from their places of residence, but in having many of the veterans travel hundreds of miles to these boards; I have concluded after further investigation and consideration that it would be well to give the new plan a trial, and then if it does not work we can change it.

Mr. BLANTON. Mr. Chairman, I have not reversed my position. I make the point of order that it is in violation of the Chair's ruling.

Mr. CRAMTON. Mr. Chairman, in answer to that let me suggest this: There is pending now before the committee the amendment which I offered yesterday, which very clearly carries legislation in its last sentence, where it provides that the fee hereafter to be paid shall be $5 instead of $3. That is clearly legislation. It is true it could be sustained in an appropriation bill under the Holman rule, but the Holman rule does not take away its legislative character. It is still legislation. I am offering an amendment to-day that is also legislative, as the gentleman from Texas suggests, but it is germane to the amendment offered last night.

Mr. BLANTON. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. BLANTON. That is the very position I took yesterday, and the Chair cited a decision rendered by the distinguished gentleman from New York, Mr. Hicks, which he showed does not sustain the gentleman.

Mr. CRAMTON. No; the gentleman from Texas is not following me, apparently.

Mr. BLANTON. Yes; I followed the gentleman. I took that position yesterday, and the Chair said——

Mr. CRAMTON. Mr. Chairman, I do not yield any further, because I want to complete my statement without taking too much time of the committee. The gentleman has not understood what I said at all. I am suggesting that because the amendment already pending is legislative in character the amendment which I now offer, which is germane, is in order.

Mr. BLANTON. Mr. Chairman, I want to be heard for just a moment. The Chair held this provision in order only because he said it came within the Holman rule and that on its face it showed it might bring about a curtailment in expenses, but the Chair would not rule to that effect until they cut out the provision which the gentleman from Michigan is now offering in this last amendment. Now, the Chair can not say that the last amendment will come within the Holman rule, because, as the Chair said the other day, the commissioner may appoint every single one of these three men on boards and may not save one single penny. The Chair can look only at the face of the bill, and the Chair has cited the decision made by Mr. Hicks, which answers the very contention made by the gentleman from Michigan, and I presume the rule which applies in committee one day will apply all the time as long as the same Chairman is in control.

Mr. JOHNSON of Texas. Mr. Chairman, I wish my colleague would not insist upon his point of order for this reason: If we are going to change this law, which it seems we are going to do, I think it preferable to give the commissioner discretion to have more than one doctor make examinations when deemed necessary, rather than the iron-clad rule that only one doctor should do so. I think the commissioner should have authority to exercise this right not only in behalf of the Government but in behalf of the applicants for pensions, so that if we should have a constituent who was examined and we were dissatisfied with the examination made by one doctor I feel sure the Commissioner of Pensions would, upon request, have him reexamined by the board of doctors. For that reason, I would prefer giving the commissioner discretion to appoint more than one physician to make an examination when he thought it necessary.

Mr. BLANTON. I would rather keep the law we have here than to be compelled to get down on our knees and beg the commissioner to do something which we can make him do by law.

Mr. JOHNSON of Texas. I do not think we would have to beg the present Commissioner of Pensions because I think he has been both courteous and fair in his treatment, not only of Congressmen but of applicants as well.

The CHAIRMAN. On yesterday the gentleman from Michigan [Mr. CRAMTON] offered an amendment which was pending at the time the committee rose and which reads as follows:

For fees and mileage of examining surgeons engaged in the examination of pensioners and of claimants for pension, for services rendered within the fiscal years 1929 and 1930, $300,000: *Provided*, That hereafter all necessary medical examinations of claimants or pensioners shall be made by one physician or surgeon duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1195, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions. The fee to be paid any such physician making such examination, alone or otherwise, to be $5 for each examination, foreign or domestic.

The gentleman from Michigan [Mr. CRAMTON] thereupon made a short statement with reference to this amendment and it might be considered that that statement was debate and the Chair would hold that it was debate. To-day the gentleman from Michigan [Mr. CRAMTON] asks unanimous consent to offer a substitute for the amendment which was pending and that consent was granted. The substitute reads as follows:

For fees and mileage of examining surgeons engaged in the examination of pensioners and of claimants for pension, for services rendered within the fiscal years 1929 and 1930, $300,000: *Provided*, That hereafter all necessary medical examinations of claimants or pensioners, not heretofore ordered, shall be made by one physician or surgeon, duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1194, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions, except when in the judgment of the said commissioner the examination should be made by more than one: *Provided further*, That the fee paid any such physician making such examination alone, or otherwise, shall be $5 for each examination, foreign or domestic.

This substitute is exactly like the amendment offered yesterday and pending to-day except that after the words "claimants or pensioners" in the second line of the proviso, this phrase is added, "not heretofore ordered," and also after the words "Commissioner of Pensions" in the phrase "duly designated for such examination by the Commissioner of Pensions," there is added this clause: "Except when in the judgment of the said commissioner the examination should be made by more than one."

The gentleman from Texas [Mr. BLANTON] makes the point of order that the substitute contains legislation and is therefore in violation of the rules of the House.

Whether the amendment offered yesterday by the gentleman from Michigan, for which a substitute was offered this afternoon, was itself out of order, it seems to the Chair is immaterial. The result, in the opinion of the Chair, will be the same. If the amendment offered yesterday was not subject to a point of order, the additions to that amendment in the substitute are clearly legislation and under the substitute repugnant to the rule. If the amendment offered yesterday came within the protection of the Holman rule, it contained legislation. The substitute offered to-day contains the same legislation and also additional legislation, in the opinion of the Chair. Both of the phrases added in the substitute are in the nature of additional legislation, but the Chair particularly calls attention to the second new matter in the substitute reading as follows:

Except when in the judgment of the said commissioner the examination should be made by more than one.

The Chair thinks that the rule laid down by the distinguished gentleman from Ohio [Mr. BURTON] in Hinds' Precedents, No. 4, page 563, states the condition of the rules and precedents of the House upon this subject.

Mr. BURTON, then Chairman of the Committee of the Whole House on the state of the Union, said:

The Chair will state that the general rule, apparently established, is as stated in the Digest:

"'A paragraph which changes existing law being allowed by general consent to remain, it may be perfected by any germane amendment.'

"Now, it appears that a proviso was included here and passed without objection which would have been subject, the Chair believes, to a point of order. To that an amendment was proposed. There have been, as the Chair is informed, conflicting decisions, and it is desirable that a uniform rule be established. The rule has been applied that where a provision is inserted which changes existing law it may be perfected by an amendment (which is germane), even though not in accordance with existing law.

"The Chair, though somewhat doubtful, thinks this the best rule: That if a paragraph has been included in the bill which has in it a taint of illegality or of being contrary to existing law, that paragraph can be corrected or perfected by an amendment; but if the further paragraph which is proposed as an amendment carries a further degree of illegality affecting the whole paragraph as amended, then it is not in order.

"So, if the amendment of the gentleman from California simply pertained to the proviso which was out of order—that pertaining to the Bertillon system of identification, which was allowed to enter the bill—it would be in order, but if it pertains to the whole paragraph relating to the enforcement of the Chinese exclusion act it is not in order."

The Chair, with some reluctance——

Mr. CRAMTON. Will the Chair permit an observation?

The CHAIRMAN. Yes.

Mr. CRAMTON. It is to be observed that both the changes that are proposed in the amendment now submitted and now before the Chair are changes that come more closely in harmony with existing law; that is to say, it exempts from the change all examinations heretofore ordered and that certainly leaves the existing law in effect as to examinations heretofore ordered. Secondly, the existing law provides for an examination before more than one, and the second provision refers to the examination before more than one in the discretion of the commissioner. Both changes are not getting further away from existing law, but are bringing the amendment more closely in harmony with existing law.

Mr. BLANTON. Will the Chair permit an observation?

The CHAIRMAN. Yes.

Mr. BLANTON. The Chair let the gentleman from Michigan bring in this legislation only upon the ground that it came within the Holman rule, and the Chair shut out that part which did not come within the Holman rule, and did so very properly; and the other day when the gentleman from South Carolina [Mr. STEVENSON] made his point of order on the word "hereafter," which was the only addition I had offered, and I made the very point that the gentleman from Michigan has now made, that where there is some legislation already, you can offer additional legislation, the Chair cited us to the decision by Mr. Hicks, of New York, which holds, just the same as Mr. BURTON'S decision, that if it goes further, it is still subject to the point of order, and takes it without the Holman rule. If the Chair were to let the gentleman from Michigan do now what he sought to do the other day, it would be a reversal of the decision of the Chair.

The CHAIRMAN. The amendment, offered by the gentleman from Michigan yesterday, changed the existing law and provided that hereafter all necessary medical examinations of

claimants or pensioners shall be made by one physician or surgeon duly appointed under the act of July 25, 1882, as amended, and duly designated for such examination by the Commissioner of Pensions.

This changed the existing law, took away the board of surgeons, deprived them of their authority, but provided that hereafter all necessary medical examinations of claimants or pensioners shall be made by one physician or surgeon. Perhaps, the Chair should not state it took away the board of surgeons, because it does not do that directly. The board of surgeons might still be appointed, but they would not make any examination, because under the amendment offered yesterday all necessary medical examinations of claimants or pensioners shall be made by one physician or surgeon.

The substitute offered this afternoon provides, first, that hereafter all necessary medical examinations of claimants or pensioners, "not heretofore ordered"—making therefore two classes—shall be made by one physician or surgeon duly appointed under the act of July 25, 1882, as amended, and duly designated, and so forth, except that when in the judgment of the commissioner the examination should be made by more than one, it may be made by more than one.

It seems clear to the Chair that this substitute goes beyond the scope of the amendment of yesterday and adds new legislation, and the Chair sustains the point of order.

Mr. CRAMTON. Mr. Chairman, I offer an amendment, and to simplify matters——

The CHAIRMAN. The Chair will state there is now pending the amendment offered by the gentleman yesterday. The substitute has been ruled out of order.

Mr. CRAMTON. Yes; I offer this as a substitute for the paragraph or as a substitute for the pending amendment; it does not matter.

The CHAIRMAN. The pending amendment must be disposed of.

Mr. BLANTON. A point of order, Mr. Chairman.

Mr. CRAMTON. Mr. Chairman, I offer the amendment in the nature of a substitute as an amendment to the pending amendment.

Mr. BLANTON. In order to get a ruling from the Chair and merely for that purpose I make the point of order that a Member, even though he be in charge of a bill, can not himself offer an amendment and then offer a substitute for his own amendment. If he wants to offer a different proposition, he must withdraw his amendment. It is something unheard of since I have been here for a Member to offer a substitute to his own amendment.

The CHAIRMAN. The Chair would like to hear the gentleman from Michigan. The Chair does not recall any decision on that matter and does not recall the practice.

Mr. CRAMTON. It is frequently the case that a Member offers an amendment to his own amendment. He has the same right to do that that any other Member has.

Mr. BLANTON. By unanimous consent.

Mr. CRAMTON. It does not require unanimous consent. I am in the same position as to the pending amendment as any other Member of the House.

The CHAIRMAN. The Chair will state that the rule in the House is that a Member may withdraw an amendment which he offers.

Mr. CRAMTON. I am not withdrawing this.

The CHAIRMAN. But in Committee of the Whole that practice is not permitted.

Mr. CRAMTON. I am not withdrawing the amendment; the amendment is before the committee and eventually will have to be acted on by the committee. I am placing before the committee the consideration of an amendment to that amendment, and I have the same right as any other member of the committee.

The CHAIRMAN. The Chair finds no precedent on the subject, and the parliamentary clerk informs the Chair that he does not know of any. The Chair will therefore decide it as a question of first impression. Under general parliamentary principles the Chair overrules the point of order. The Chair thinks that in the absence of a prohibition against a Member offering a substitute or an amendment, he has the natural inherent right within decorous conduct.

The Clerk will report the substitute offered by the gentleman from Michigan.

The Clerk read as follows:

Strike out the paragraph on page —, beginning on line 5, and insert the following:

"For fees and mileage of examining surgeons engaged in the examination of pensioners and of claimants for pension, for services rendered within the fiscal years 1929 and 1930, $300,000: *Provided,* That hereafter all necessary medical examinations of claimants or pensioners not heretofore ordered shall be made by one physician or surgeon, duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1194, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions, except when in the judgment of the said commissioner the examination should be made by more than one: *Provided further,* That the fee paid any such physician making such examination alone, or otherwise, shall be $5 for each examination, foreign or domestic: *Provided further,* That such examinations especially ordered by the commissioner before more than one shall not exceed 10 per cent of the total number of examinations."

Mr. BLANTON. Mr. Chairman, I make the point of order in good faith that this has in it more vice than the other amendment. This does not come within the Holman rule. If the Chair will notice, instead of being restricted to three surgeons, it is unlimited. If the commissioner wants to do so he could appoint 20 surgeons. He is not limited to any number; he could appoint 20 or 100. There is no limit whatever, and instead of paying them $3 apiece as they are restricted now, by this amendment the fee is increased from $3 to $5. The commissioner could enlarge the board and be within the provisions of the bill. Say he was to appoint 25 surgeons in one case at $5 each. The Chair can not determine upon its face that that would retrench expenses. I submit that it is an enlargement of the present law. It is a change of law on an appropriation bill unauthorized by law and does not come within the rule.

Mr. CRAMTON. Mr. Chairman, I insist, in so far as the amendment is different from the pending amendment, that taken as a whole it is in order under the Holman rule. The existing law provides for an examination by a board of three at $3 each, or $9. The bill proposes an examination by one at $5, except that the commissioner may in his discretion order an examination by more than one, but the total of those examinations by the board must not exceed 10 per cent of the total. Therefore, the reduction from $9 to $5 will more than overbalance the 10 per cent. The gentleman from Texas urges that the number is not limited. These are examinations before a board. This goes back to the existing law, and under the existing law there are only three physicians on the board. These boards are continued, these surgeons are all members of the board, and so an examination ordered by more than one is ordered before that board. It is possible, of course, if there is any ambiguity in the language to correct it.

Mr. BLANTON. The gentleman might offer another substitute.

Mr. CRAMTON. Possibly I may be forced to do that, but the ambiguity is not present because the existing law creates the boards and limits them to three.

The CHAIRMAN. The Chair is ready to rule. The existing law, to which reference is made in the substitute, being found in the United States Code, page 1194, sections 71 and 72, reads, in the beginning, as follows:

The Commissioner of Pensions is authorized to appoint surgeons who, under his control and direction, shall make such examination of pensioners and claimants for pension or increased pension as he shall require; and he shall organize boards of surgeons, to consist of three members each, at such points in each State as he shall deem necessary, and all examinations, so far as practicable, shall be made by the boards, and no examination shall be made by one surgeon excepting under such circumstances as make it impracticable for a claimant to present himself before a board.

In the proposed substitute it is provided that—

Hereafter all necessary medical examination of claimants or pensioners not heretofore ordered shall be made by one physician or surgeon, duly appointed under the act of July 25, 1882, as amended (U. S. C., p. 1194, secs. 71, 72), and duly designated for such examination by the Commissioner of Pensions, except when in the judgment of the said commissioner the examination should be made by more than one.

The gentleman from Texas [Mr. BLANTON] makes the point of order that under the language just quoted the commissioner might order the examination to be made by more than the number now constituting the board of surgeons. The Chair thinks that would be a very strained and far-fetched construction of the language, although it does seem that the language might a little more clearly limit the number that could be selected. However, the Chair thinks that the language in connection with existing law is plain enough to warrant and probably require, and the Chair thinks it does require, the construction that not more than three, being the membership of the board of surgeons, could be called in by the commissioner to examine a single case. That situation furnishes the only possible difficulty in the substitute.

Mr. BLANTON. Mr. Chairman, to relieve the Chair of difficulty, I withdraw the point of order.

The CHAIRMAN. The Chair is not under any personal difficulty. The gentleman from Texas apparently observing the trend of the opinion of the Chair, withdraws the point of order.

Mr. CRAMTON. Mr. Chairman, the amendment before us is one that we have discussed at some length, and in which I have had some difficulty. Now that the gentleman from Texas and I seem to be pretty much in accord again, I desire to propound a parliamentary inquiry. I would like to have that amendment before the House without that last proviso upon it and if the gentleman from Texas will be reconciled to have it that way——

Mr. BLANTON. Mr. Chairman, the Committee on Appropriations, headed by the distinguished gentleman from Michigan, is going to have its way anyhow, and why not let them have it now. [Laughter.]

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to modify the amendment before the committee by omitting the last proviso. That is the one with reference to the limit of 10 per cent of the examination.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to modify the substitute offered by him and now before the committee by striking out the last proviso. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Chairman, since I am on my feet I offer a statement from the Commissioner of Pensions with reference to this legislation, which I ask to have read from the desk.

Mr. BLANTON. Why take the time up in that way? Why not extend the gentleman's remarks and print it?

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to extend my remarks by inserting that statement at this time.

The CHAIRMAN. Is there objection?

There was no objection.

The statement referred to is as follows:

UNITED STATES DEPARTMENT OF THE INTERIOR,
BUREAU OF PENSIONS,
Washington, December 14, 1928.

Memorandum for Hon. LOUIS C. CRAMTON

Of the 66,714 certificates of medical examinations made in the last fiscal year, 54,518 were made by boards of surgeons and 12,196 by single examining surgeons.

In the adjudication of pension claims, just as satisfactory conclusion was reached as to degree of disability on the findings of one examining surgeon as on findings of boards of three examining surgeons. In fact, the complaints of veterans and veteran organizations against the work of boards far outnumbered complaints against the work of single surgeons.

As constituted, boards have a president, a secretary, and a treasurer and much of the work devolves on the secretary who, as a rule, is the dominant factor on the board and his work is usually concurred in by the president and treasurer. Each doctor receives $3 for his services. This fee is not attractive to competent physicians who receive not less than $5 for examinations made for insurance companies or other concerns, and medical associations, local, State, and National, frown down upon a fee of less than $5 for medical examination work. On the present $3 fee basis the bureau is satisfied that it is not getting as good service as it would on a $5 fee basis, as the latter fee would attract to the Pension Office medical examination service a better class of physicians and result in more thorough and satisfactory work.

Other Government agencies having to settle medical questions, such as the Veterans' Bureau, Indian Office, Employees' Compensation Commission, Civil Service Retirement Division, do so, almost entirely, on the findings of single surgeons and the medical determinations on such examinations are satisfactory to both applicants and the Government.

Under the proposed single-surgeon plan on a $5 fee basis there will result a saving of $3.35, as under the present board system the average cost per examination is $8.35. In other words, as the average annual number of board examinations is 50,000, the total savings should, conservatively estimated, be something over $150,000 per year.

As the number of outstanding board orders at any given time is about 8,000, unless provision is made in the legislation for these examinations and at existing rates, the result would be confusion as to payment of fees and dissatisfaction among claimants with outstanding orders for medical examination, because otherwise every outstanding board order would have to be canceled and boards and claimants notified and new examination orders issued to conform to the new system of examinations. To take care of this situation the attached provision is suggested.

The present medical referee of the Pension Bureau and the Commissioner of Pensions have been closely observing the workings of the present board system of examinations, contacting with boards and veterans' organizations as to work of boards, and are satisfied that the proposed single-surgeon plan is bound to result in more complete examinations and a service more satisfactory both to the Government and the veterans.

WINFIELD SCOTT, *Commissioner.*

The CHAIRMAN. The Chair would like to know if the gentleman from Michigan desires his statement read as well as extended?

Mr. CRAMTON. No; in response to the sentiment it is not necessary that it be read.

The CHAIRMAN. The question is on the substitute to the amendment offered by the gentleman from Michigan.

Mr. SCHAFER. Mr. Chairman, I rise in favor of the substitute. I was one of those who opposed this change in existing law yesterday when it was before the House. I have made a further investigation and have consulted with the Commissioner of Pensions and found that this is a proposition which he has advocated since 1926. One of the reasons why I opposed this proposition yesterday was that after carefully reading the entire testimony before the Subcommittee of the Committee on Appropriations I could not find any clear and convincing language indicating that the Commissioner of Pensions had approved the change. While the district which I have the honor to represent is a city district and the examining boards are convenient for my constituents, I found upon investigation that under existing law in many communities, especially the rural districts, applicants for original pensions and increases have a great deal of inconvenience, as on many occasions they have to travel long distinces to an examining board. I have reached the conclusion that we should give this new proposition a trial, especially since I now know it has the whole-hearted approval of the Commissioner of Pensions.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Michigan to his own amendment, the substitute being modified in accordance with his amendment.

The question was taken, and the substitute was agreed to.

The CHAIRMAN. The question now recurs upon the amendment as amended by the substitute.

The question was taken, and the amendment was agreed to.

Mr. KNUTSON. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman rise?

Mr. KNUTSON. I rise for the purpose of submitting a unanimous-consent request. I ask unanimous consent to return to page 61.

The CHAIRMAN. To what point?

Mr. KNUTSON. Line 17.

The CHAIRMAN. For what purpose?

Mr. KNUTSON. To offer an amendment.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent to return to line 17 on page 61 for the purpose of offering an amendment.

Mr. CRAMTON. Mr. Chairman, I suggest the amendment be reported pending the request.

The CHAIRMAN. Without objection, the amendment will be reported for the information of the committee.

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. KNUTSON: Page 61, line 17, after the word "Interior," change the period to a semicolon and insert the following: "*Provided*, That not to exceed $10,000 of the principal funds on deposit to the credit of the Chippewa Indians of Minnesota shall be immediately available for the purpose of aiding indigent Chippewa Indians upon the conditions herein named."

The CHAIRMAN. Is there objection to the unanimous consent? [After a pause.] The Chair hears none.

The gentleman from Minnesota has offered an amendment, which has been read, and, without objection, will not be reread. The question is on the amendment.

Mr. CRAMTON. Mr. Chairman, I will say the committee is quite in sympathy with the purpose and has no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota.

The question was taken, and the amendment was agreed to.

Mr. CRAMTON. Mr. Chairman, there is pending before us, if I recollect correctly, the item at the bottom of page 79. I think it had just been read by the Clerk. Am I correct in that? Has the Kittitas item been read?

The CHAIRMAN. The reading stopped at the end of line 24 on page 79.

Mr. CRAMTON. Mr. Chairman, I offer an amendment to that paragraph.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 79, line 24, after the figures "$20,000," insert the following: "Continuation of construction, $862,000: *Provided*, That the unexpended balance of $138,000 of the appropriation of $1,500,000 contained in the act making appropriations for the Department of the Interior for the fiscal year 1929 (45 Stat. 277) shall remain available during the fiscal year 1930 for such continuation of construction."

Mr. BLANTON. Mr. Chairman, I reserve a point of order on that.

Mr. CRAMTON. I wish the gentleman would make the point of order.

Mr. BLANTON. Has this new $862,000 item been approved by the Budget?

Mr. CRAMTON. It has been.

Mr. BLANTON. Was an additional estimate sent in?

Mr. CRAMTON. No.

Mr. BLANTON. Has it been authorized by law?

Mr. CRAMTON. It is authorized by law.

Mr. BLANTON. Is there a law authorizing the expenditure of this $862,000?

Mr. CRAMTON. Yes. And besides, it is in continuation of a work already in progress.

Mr. Chairman, the Kittitas division of the Yakima project in the State of Washington is one of the most important projects now under construction. It has been under construction for perhaps a year or two. For the present year the work is under way. At the end of this fiscal year the main canal will be completed to the Yakima River; also the north branch will be completed to Jones Creek on the north side of the Yakima River. The south branch of the canal will also be completed.

The program which the Budget sent to Congress was for $1,500,000 for this project. That included an estimated cost of $500,000 for a siphon to go under the Yakima River, and then $500,000 for the construction of laterals subordinate to the north branch of the canal so far as constructed to Jones Creek, and then another $500,000 to extend that branch of the canal from Jones Creek to Johnson Creek.

The situation surrounding reclamation in the West is one that has depressed our committee very seriously, and it is due to the fact that as projects are being completed in several States and water is made available, so frequently no use is made of the land; the work of settlement and development of the land for which the water is made available proceeds so very slowly. Therefore our committee feel that we ought to study very carefully the situation of projects under construction. We ought to take every action possible to insure proper use of these lands after the construction is completed. Oftentimes it involves the highest degree of cooperation as between the Government and adjacent communities, railroads serving that region, and even the States involved.

When the Commissioner of Reclamation came before our committee he reported to us that conditions were not satisfactory with reference to this project leading up to its final settlement. By reason of the showing made by the department, the committee omitted any item for construction. Just before the bill was reported, really too late for us to give it consideration in the bill, a representative of that district, who did not come here for this purpose but was on his way, arrived and in company with the Representative from that district, the gentleman from Washington [Mr. SUMMERS], he placed the situation very fully before our committee. Conferences were held with these gentlemen and with the Reclamation Service.

As the result of those further conferences, our committee felt it was not desirable to suspend the construction work, but we still feel it is desirable to slow it down somewhat, in the belief that thereby, there will be brought about a more active interest on the part of all elements concerned and that in the long run the project will be better off by some slowing down this year. Therefore the amendment which I have offered, by direction of my subcommittee, provides for an appropriation of $862,000, plus a reappropriation of $138,000. That gives them $1,000,000 in cash for next year, which is $500,000 below the regular Budget estimate.

Mr. BLANTON. Will the gentleman yield?

Mr. CRAMTON. I yield.

Mr. BLANTON. Then the gentleman ought to revise the remarks he made in first debating this bill under general debate and claiming to keep it within the Budget estimates, because in addition to $283,000,000 he first brought in, he has added from the floor already $114,000, $78,000, $90,000, and now this very enormous sum of $280,000 more, so that the gentleman is building up quite an enormous bill out of his committee, from the floor and otherwise.

Mr. CRAMTON. If the gentleman desires, I will state that the bill as reported to the House was, as I recall, $2,100,000, and a little more, below the Budget, and the $114,000 and $90,000 items are estimated for.

Mr. BLANTON. And yet $10,000,000 more than the bill last year, which in turn was larger than the bill of the preceding year, and increasing all the time.

Mr. CRAMTON. The gentleman is wrong. I will say to the gentleman that the bill this year is lower than the bill of two years ago. The bill of two years ago was for $311,000,000.

Mr. BLANTON. But it is $10,000,000 more than the bill of last year, is it not?

Mr. CRAMTON. I think so, and for very good reasons. The gentleman does not want the pensioners to go without their money, does he? Did the gentleman vote for the bill to increase the pensions of Civil War widows to $40?

Mr. BLANTON. Oh, yes.

Mr. CRAMTON. If so, that added $10,500,000 to the annual expense of the Bureau of Pensions.

Mr. BLANTON. And these additions here of $114,000, $78,000, $90,000, and $862,000 are coming pretty fast.

Mr. CRAMTON. I do not yield further until I can answer the gentleman. This Congress can not pass authorizations for the spending of money and then object to appropriations to take care of those authorizations, and the increase in pensions for Civil War widows amounts to over $10,000,000.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to proceed for three additional minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to proceed for three additional minutes. Is there objection?

There was no objection.

Mr. CRAMTON. The bill as reported to the House is $2,100,000 below the Budget, and the bill as it finally becomes law will not be one penny above the Budget unless this House takes it away from our committee. I will say to the gentleman from Texas that we knew when we reported the bill that we had under consideration this Kittitas item and that there would be some of it restored. When I spoke on Tuesday I discussed this subject and stated then that the committee would very possibly have some amendment to offer for the consideration of the House when the item was reached. The increases we have offered do not take up the reduction that the committee recommended in the bill, so if the House sees fit to accept such amendments as we are suggesting the bill will go out of this House very far below the Budget estimate.

The CHAIRMAN. The Chair desires to ask the gentleman from Texas whether he withdraws his reservation.

Mr. BLANTON. This is not subject to a point of order, and I withdraw it.

Mr. SUMMERS of Washington. Mr. Chairman, I move to strike out the last word. I would like to say, in regard to the amendment, that we very much appreciate the further consideration the committee has given this item.

This does not make an additional draft on the Treasury. This amount is to be appropriated from the Federal reclamation fund. The project is in the course of construction; it has been duly authorized by Congress and there have already been large sums of money expended. However, water can not be put on very much of the land until further construction is accomplished. The money already expended can not be returned to the reclamation fund until construction proceeds and water goes onto the land.

The Director of Reclamation says:

Dealings with the Kittitas reclamation district have been satisfactory and the financial condition of the district is apparently favorable.

Again he said:

The principal immediate need of the project is the rapid continuation of construction to reach the main body of irrigable land in the lower end of the project.

And coming from the Budget, from the President, and from the Director of Reclamation was the suggestion that there should be $1,500,000 appropriated, besides the $138,000 of unexpended balance. However, the committee at this time has not seen proper to include that whole amount that was recommended by the Budget and by the Director of Reclamation. I hope the committee will decide after further consideration to

adopt the language suggested by the Budget, which is as follows:

Yakima project (Kittitas division), Washington: For continuation of construction and operation and maintenance, $1,500,000: *Provided*, That the unexpended balance of the appropriation of $1,500,000 contained in the act making appropriations for the Department of the Interior for fiscal year 1929 (45 Stat. 227) shall remain available during the fiscal year 1930.

That is the quickest way of putting the project on a paying basis and securing repayment of funds already expended. Roughly speaking, two-thirds of the cost of the project has been expended, while only one-third of the land (and that the least-desirable land) can be put under water.

The Kittitas project of 72,000 acres lies in immediate contact with highly developed, settled lands that have been producing abundantly and profitably for 30 to 50 years. Many of the project's lands have been dry farmed or partially irrigated and farmed for many years. Railroads and highways traverse the tract. Ellensberg, the thrifty county seat, with a State normal school, banking facilities, and markets of every kind, is but a few miles distant. Thousands of reliable, responsible business and professional people and farmers are backing this project and are determined that it shall succeed. On further consideration, I believe the committee will approve the Budget's recommendation.

Mr. CRAMTON. Mr. Chairman, I should observe that I was in error in my statement of the amount the bill as reported is below the Budget. Instead of that amount being $2,100,000, it is $1,957,000.

Mr. BLANTON. That is close enough.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The Clerk read as follows:

Secondary projects: For cooperative and general investigations, $75,000.

Mr. LEATHERWOOD. Mr. Chairman, I move to strike out the last word for the purpose of asking the chairman of the committee a question. On page 571 of the hearings this colloquy occurred between the gentleman and Doctor Mead with reference to secondary projects:

Mr. CRAMTON. For secondary projects, for cooperative and general investigations, you want continued the $75,000?

Doctor MEAD. Yes.

Mr. CRAMTON. You say you expect to spend all the appropriation for the current year?

Doctor MEAD. Yes. The expenses of the Colorado River Commission compelled us to drop everything else.

Is the gentleman able to state to the committee what Doctor Mead had in mind by that statement?

Mr. CRAMTON. As I recall, it was this special engineering commission or board of engineers with reference to Boulder Canyon Dam, which was authorized at the last session and was required to report at this session, and in their work the Reclamation Service, of course, cooperated and gave all the facilities that were requested.

Mr. LEATHERWOOD. That is the point I am getting at. Was there any money taken from the Reclamation Service and used for defraying the expenses of this commission?

Mr. CRAMTON. I can not answer that definitely.

Mr. LEATHERWOOD. The answer of Doctor Mead would imply that there was.

Mr. CRAMTON. Yes; I agree with the gentleman that would appear to be the case, and, of course, it would not be entirely improper if that proved to be the fact, for the reason that reclamation is involved in the Colorado River project. The item is reimbursible and if any money was expended for that purpose, it would be reimbursed from the Boulder Dam project; but I am speculating somewhat because I have no definite information.

Mr. LEATHERWOOD. I will say to the gentleman that the statement of Doctor Mead is so disconnected with anything that precedes or follows it that I was wondering if by some oversight something had been left out of the hearing.

Mr. CRAMTON. No; I think nothing of that kind happened. Our committee had before it the statement above in smaller type analyzing this $75,000 item, and the examination by our committee was not very thorough on this item, but everything that there was is in the record, according to my recollection.

Mr. LEATHERWOOD. I have gone over the statement very carefully and I can find no reason for the statement of Doctor Mead in anything that precedes or follows it, and I am just wondering what he had in mind, and thought perhaps the gentleman could enlighten me.

Mr. CRAMTON. I have given the gentleman my impression of it. I may not be entirely accurate, but it is the best I can do.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Whenever, during the fiscal year ending June 30, 1930, the Commissioner of the Bureau of Reclamation shall find that the expenses of travel, including the local transportation of employees to and from their homes to the places where they are engaged on construction or operation and maintenance work, can be reduced thereby, he may authorize the payment of not to exceed 3 cents per mile for a motor cycle or 7 cents per mile for an automobile used for necessary official business.

Mr. BLANTON. Mr. Chairman, I reserve a point of order on the paragraph to ask a question. I want to ask the gentleman from Michigan if he does not think that this provision authorizing 7 cents per mile as an allowance where a Government automobile is used is rather high. They can make 300 miles a day which would mean an allowance of $21 which they would be given for driving a Government automobile.

Mr. CRAMTON. It is their own automobile.

Mr. BLANTON. Oh, it may be a Reclamation Service automobile, and probably furnished most of the time.

Mr. CRAMTON. No, it is not. It is a privately owned automobile.

Mr. BLANTON. It does not say that, and the Reclamation Service has a number of automobiles. It can furnish a Government automobile and then allow an employee 7 cents a mile for maintenance, which is $21 a day, because they can easily make 300 miles a day.

Mr. CRAMTON. This never applies to a Government-owned machine. This only applies to a privately owned machine.

Mr. BLANTON. Even in the case of a privately owned machine, 7 cents a mile would mean $21 a day, and that is a high allowance for maintenance.

Mr. CRAMTON. And they, of course, pay the oil and gasoline expense.

Mr. BLANTON. They can drive a Chevrolet or Ford car of their own and pay for it in a short time if they are getting $21 a day from the Government.

Mr. CRAMTON. This includes the cost of gasoline, oil, and tires, and also includes depreciation.

Mr. BLANTON. Yes; but $21 a day would be a very high allowance for a Ford or Chevrolet.

Mr. CRAMTON. That would be an exceptional case in any event. There would not be much profit in driving your own automobile on this basis.

Mr. BLANTON. I think that is rather high and this simply sets a precedent.

Mr. CRAMTON. This is not a precedent. There are many of these cases. This is not a new item this year, and this is not the only place where this plan is followed. This is quite general in the Government service.

Mr. BLANTON. Of course, this paragraph is very adroitly drawn to come within the Holman rule, because it provides that only when he can decrease expenses can he make this allowance. What is the present allowance?

Mr. CRAMTON. This is what has been allowed for some time.

Mr. BLANTON. I know that; but what is the present allowance?

Mr. CRAMTON. This is the allowance now, and what the language about decreased expenses means is that they can travel in this way instead of some other way that is authorized by law.

Mr. BLANTON. There is no way of taking it out on a point of order because, unfortunately, it does not change existing law. I want, however, to file my protest against this allowance. I think it is exorbitant.

I withdraw the reservation of a point of order.

The Clerk read as follows:

For engraving and printing geologic and topographic maps, $107,000.

Mr. HUDSON. Mr. Chairman, I move to strike out the last word, for the purpose of getting some information. I would like to ask the gentleman in charge of the bill if there was any discussion before the committee with reference to cooperating with the States in securing maps of forest reserves within the State with reference to fire protection? The State of Michigan would be willing to appropriate $50,000 provided there was an appropriation carried in the survey item that would allow the making of maps of forest and forest reserves.

Mr. CRAMTON. The questions are not necessarily so closely related as the gentleman has in mind. This item is in reference to topographical surveys.

Mr. HUDSON. I know that; but I was asking for general information.

Mr. CRAMTON. This item would not have anything to do with fire prevention. I expect that that would come under the Agricultural Department bill so far as the prevention of fire in national forests. I think I know what the gentleman has in mind. The Geological Survey makes topographical maps, and in that work the States cooperate, including the State of Michigan. A part of that work involves the use of air photography, and we have been working to get better cooperation between the War Department and the Interior Department in that matter. In that connection I think the director of the Geological Survey of Michigan has urged the other subjects, which so far as I know goes outside of the Geological Survey. The maps the gentleman speaks of, although it has been urged, I do not think will fit in with this work. I mean the fire prevention.

Mr. TEMPLE. The Geological Survey makes these topographical maps for every purpose. We have been trying as much as possible to get away from making special maps that serve only one purpose. A topographical map is a map for everything. I think the proper solution is to go on with the topographical maps for fire prevention and every other purpose.

Mr. CRAMTON. In so far as we have anything to do with it it is a topographical map. As far as it involves aerial photography our committee insists that the War Department shall cooperate and push the work more rapidly than heretofore. If the State of Michigan wants $100,000 worth of topographical work in one year, if they will appropriate $50,000 that will be met by $50,000 from Federal funds. In the last three or four years our committee has recommended sufficient money in topographical survey work to match the State contributions.

Mr. HUDSON. I feel sure that the gentleman from Michigan is ready to recommend the passage of such legislation as will provide funds that can be matched by Federal funds.

Mr. CRAMTON. The policy of our committee is not to force the work under the Temple bill, which provides for the completing of topographical maps in 30 years, but to appropriate enough money to match the State contributions so far as they can reasonably be forecast. It is not possible for the Survey to have a high peak one year and cut it down the next.

Mr. BLANTON. There are $270,000,000 in the Treasury bill that the two gentlemen from Michigan do not need, and you might use some of that for these topographical maps.

Mr. HUDSON. Yes; that might be for fire prevention.

Mr. BLANTON. Fire water.

The Clerk read as follows:

During the fiscal years 1929 and 1930, upon the request of the Secretary of the Interior, the Secretary of War or the Secretary of the Navy is authorized to furnish aerial photographs required for topographic mapping projects, in so far as the furnishing of such photographs will be economical to the Federal Government and does not conflict with military or naval operations or the other parts of the regular training program of the Army and Navy flying services, and the Secretary of the Interior is authorized to reimburse the War or Navy Department for the cost of making the photographs, and the Department of the Interior is authorized to furnish copies to any State, county, or municipal agency cooperating with the Federal Government in the mapping project for which the photographs were taken. In the event that the War or Navy Department is unable to furnish such photographs in time to meet the needs for which they are requested, the Geological Survey is authorized to contract with civilian aerial photographic concerns for the furnishing of such photographs.

Mr. CRAMTON. Mr. Chairman, with reference to this item, which ties in in a very important way with what my colleague from Michigan [Mr. HUDSON] has been discussing, the use of aerial photography, and our effort to get cooperation necessary between the departments, I ask unanimous consent to extend my remarks and therein to include one or two letters.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks and include therein some letters. Is there objection?

There was no objection.

Mr. CRAMTON. In our hearings, as well as in the hearings on the War Department bill, appears considerable concerning the effort our committee has been making to secure effective cooperation of the War Department in the making of aerial photographs in connection with the work of topographic surveying. Full cooperation in that way will greatly promote this important topographic work and save money, but such cooperation has not been secured in a way to be very helpful. Delays have frequently amounted to denial.

An illustration was last year in Yosemite National Park, where the photographs were to serve the purposes of the special Yosemite commission as well as the topographic survey. The following memorandum illustrates the delays and the haphazard compliance that has greatly weakened the value of the cooperation rendered by the Air Service of the Army in this work:

UNITED STATES DEPARTMENT OF THE INTERIOR,
NATIONAL PARK SERVICE,
Washington.

Memorandum for Hon. LOUIS C. CRAMTON

As per your verbal request, there are attached hereto copies of such letters as we have in our files relative to a photographic survey of the Tuolumne Meadows in Yosemite National Park, which we hoped to have made by the Air Corps of the War Department and the Geological Survey.

You will note that we initiated proceedings through the Geological Survey by conference on August 31, following up this by an official request on September 1, that the Director of the Geological Survey made a prompt request upon the Air Corps on September 4, and that we were advised that orders had been transmitted by the Air Corps to Crissey Field at San Francisco on September 17. Inquiry at the survey, however, reveals that these orders were not received until October 20. I also find, nevertheless, that a flyer from Crissey Field made a preliminary flight over Tuolumne Meadows on or about September 25 without waiting for specific orders in order to test out flying conditions and cameras. In this flight he took pictures of the Tuolumne Meadows area and also of Yosemite Valley, copies of which were delivered to the acting superintendent in Yosemite Valley in time for use by the Board of Expert Advisers, at the time of their meeting in Yosemite Valley on November 1. While these pictures, I believe, satisfactorily served the board in making tentative studies of a development program in Tuolumne Meadows, I am advised by the Geological Survey that they will not serve for making the topographic survey intended to be made by the use of aerial photographs, so that even yet, our request for pictures suitable for an aerial photographic survey has not been met. Furthermore, on account of the lateness of the season, the Geological Survey requested the Air Corps to abandon the project.

Officers of the Geological Survey tell me that the flying personnel of the Air Corps are enthusiastic over this type of work and prosecute the assignments vigorously once the assignments are made.

W. B. LEWIS,
Assistant to the Director.

I am sure that the matter can be worked out in a way to be helpful to both the Air Service and the Geological Survey, as well as the Federal Treasury.

The Clerk read as follows:

Appropriations herein made shall be available for payment of the costs of packing, crating, and transportation (including drayage) of personal effects of employees upon permanent change of station, under regulations to be prescribed by the Secretary of the Interior.

Total, United States Geological Survey, $2,040,800.

Mr. HASTINGS. Mr. Chairman, I move to strike out the last word. I would not detain the House except for the purpose of expressing my very great appreciation for the laborious services which the chairman of the subcommittee [Mr. CRAMTON] has given to the preparation of this bill. With painstaking care he has scrutinized every paragraph in it and required those under whose supervision the money is to be expended to justify every item in it. He has protected the Government's interest in every item and has been just in the consideration of all of them.

He has exhibited sound judgment and splendid business ability in the preparation of every item in this bill. He and the other members of the subcommittee met a number of days prior to the convening of Congress to begin the preparation of the bill, and it is due to their efforts that this bill was prepared and reported for early consideration during the present Congress. I want to commend him particularly for his earnest consideration and fair treatment of the large number of Indian tribes scattered for the most part throughout the Western States.

All of the items in the bill present an interesting study. The Indians are wards of the Government. They have been under the supervision of the Interior Department since that department was created in 1849. It is estimated that there are approximately 350,000 in the United States. To deal fairly and justly with all of the members of the various tribes is not an easy matter. The treaties and agreements or laws respecting each tribe may and do differ in some respects. Some tribes are more advanced than others. Some members of a particular tribe need the close supervision of the Government.

I want to make this statement in order to impress upon you that all tribes could not be similarly dealt with, and for that matter there is a vast difference in administration between the individual members of the same tribe. Mr. CRAMTON and the other members of the subcommittee have given painstaking care in their study of the Indian question, and I want to express my very great appreciation on behalf of the Indians of

the Nation and of my State for the generous treatment given the many items in the bill. I can not too highly commend each one of them. In my judgment, by far the most important items for consideration are appropriations for education and health work among the Indians. Of course their property must and should be preserved. We are, however, greatly interested in the development of the individual Indian so far as we can to make him a self-sustaining, productive citizen of the Republic. To do this the Indian citizen must acquire a knowledge of the English language. He must not only be taught the English language but he must learn to think in it.

This bill makes generous appropriations for the education of the Indian. There is recommended for appropriation out of the Federal Treasury for educational purposes $7,994,000, and out of tribal funds $1,149,000, or a total of $9,143,000, being an increase of $855,000 over the amount appropriated for educational purposes for the year 1929. There are many splendid Indian schools in the United States. They are doing a great work. The boys and girls attending these schools are given an industrial education. As to boarding schools, there are what is known as "reservation" and "nonreservation," and the expenses of some of these are paid out of the Federal Treasury, while the expenses of others are paid from their tribal funds, the distinction being whether any tribe has sufficient of its own tribal funds for the maintenance of the schools. In addition to the boarding schools, tuition is paid for the attendance of Indian children in public schools throughout the Western States. In my State of Oklahoma there is an appropriation of $250,000 for the payment of tuition for Indian children, in lieu of taxes not collected from tax-exempt Indian lands, in the rural schools.

Before the convening of another session of Congress, it is the hope and expectation of the subcommittee to make a thorough study of this question with a view of determining the equitable amount that should be paid from the Federal Treasury in the support of rural schools in the several States, including my State of Oklahoma.

I am sure that a full and fair investigation will convince the subcommittee that larger appropriations should be made and that this amount will be increased at the next session of Congress. In Oklahoma 10 cents per day is paid for tuition for each Indian child attending rural schools. In other States the average is approximately 40 cents per day.

A number of boarding schools are maintained by both Federal and State funds for Indian pupils in Oklahoma, for which there is carried an appropriation in this bill, including the appropriation of $250,000 for tuition in rural schools, amounting to a total of $1,177,800.

The bill carries an appropriation for schools, both day and boarding schools, of $1,177,800; for Chilocco, $232,500; for the Sequoyah Orphan Training School, $93,000; for Bloomfield Academy, $52,600; for Euchee, $39,775; for Eufaula, $58,625; for Haskell Institute, $264,500. Of this amount, $105,800 is for the benefit of Oklahoma Indians, inasmuch as 40 per cent of the children in attendance at Haskell Institute are from the Five Civilized Tribes. For Seneca, $53,000, maintained from the lump-sum appropriation for schools. For the Osage Agency, $8,000, payable from tribal funds. Two hundred and fifty thousand dollars in aid of the common schools of the Five Civilized Tribes and $250,000 expended from the tribal funds of the Five Civilized Tribes, as follows: Seminole Nation, $33,000; Chickasaw Nation, $22,000; Choctaw Nation, $195,000. Of this latter amount $50,000 is for kitchen, dining hall, and auditorium at Wheelock Academy and $3,000 for employees' cottage at Jones Male Academy. For school at Fort Sill, in addition to maintenance, $15,000 is appropriated for additions to dormitories and $21,500 for Cheyenne and Arapahoe schools for enlarging dormitories in addition to maintenance. These and other schools are maintained out of the lump-sum appropriation for Indian schools.

The bill carries an appropriation of $120,000 for new hospitals in Oklahoma, as follows: For the Pawnee and Ponca Tribes, $60,000; for an addition to the Kiowa Hospital at Lawton, $60,000; and $150,000 for the maintenance of the following hospitals: Cheyenne and Arapahoe Hospital, $25,000; Choctaw and Chickasaw Hospital, $45,000; Shawnee Sanatorium, $48,000; Claremore Hospital, $25,000; and Seger Hospital, $7,000, or a total of $270,000 for new construction and maintenance.

The office of the Superintendent for the Five Civilized Tribes is provided for in the lump-sum appropriation of $925,000, out of which approximately $203,000 is allocated to this agency. This office is placed under the civil service, as it should be, to remove it from the influence of partisan politics.

The bill carries many other items for fulfilling treaty stipulations with the various tribes throughout the Western States, 33 of which are in Oklahoma. Of the approximately 350,000 Indians in this country, 123,000 are in my State of Oklahoma.

This bill authorizes for administrative purposes the expenditure of $180,000 for the Osage Agency out of tribal funds and $16,000 for the Quapaw Agency out of the Treasury.

There is carried in this bill an appropriation of $243,211,000 for pensions for the fiscal year ending June 30, 1930. This is an increase of $11,458,000 over last year.

There is appropriated for the Bureau of Reclamation, $6,449,000; for the Geological Survey, $2,040,800; for the National Park Service, which is being expanded and enlarged, $8,340,940; for the Bureau of Education, including expenses in Washington and in Alaska, $1,071,940. This bill carries an appropriation for the Federal expenses in the Territories and Alaska Railroad of $1,419,600; for St. Elizabeths Hospital, $1,430,000; for Columbia Institution for the Deaf, $120,000; for Howard University, $600,000; for Freedmen's Hospital, $260,180. In addition, appropriations are carried for the office of the Secretary of the Interior aggregating $917,000; for the General Land Office of $2,159,400. The total amount carried for the Indian Service is $16,472,103.02, which is an increase of $2,187,594.02 over the amount appropriated for the past year.

The hope is that we may give the Indian an industrial education and ultimately free him of all supervision of every kind and character.

In Oklahoma there were 101,508 enrolled allottees of the Five Civilized Tribes. Approximately 9,000 of these allottees are now restricted or under the supervision of the Federal Government.

It is important to each State that the Indians be taught to be productive citizens of the State and Nation. That is the object of the Indian Bureau. That is the purpose for which these appropriations are made. We are making rapid strides to that end. Within approximately 25 years the Indian question will be entirely solved. Many people do not understand why the expenses for the Indians increase instead of decrease. The reason is that the Government is now attempting to deal with the Indians individually instead of collectively as tribes. Formerly the Indians had large acreages of land and lived upon reservations, and those in charge of the administration of Indian affairs came in contact with the Indians as tribes and not as individuals. Now the Indian Service is attempting to come in close contact with every individual restricted Indian in the hope that through encouragement and the lending of a helping hand he may be lifted to a plane of equality in every respect with his white neighbor with whom he comes in contact and with whom he must in a large measure compete. To do this the Government must teach him either individually on farms or through industrial training in boarding schools the value of his property and how to handle it. This requires sympathy and patient study on the part of a large number of employees. The friends of the Indian, who have given this question long and painstaking study, are convinced that this is the proper solution of the Indian question. Develop him through giving each individual Indian a little more responsibility, make him appreciate the value of his property, train him industrially in boarding schools, on the reservation, and on the farm. Slowly but gradually enable him to take up all the duties of citizenship.

Rapid progress has been made during the past 25 years. Let us not be too impatient. Let us keep in mind and always remember that the Indians must overcome all handicaps and not only acquire a knowledge of the English language, but we must learn to think in it as well. There have been many notable Indians in the past 100 years who have contributed to the enrichment of the citizenship of this Nation. I have frequently expressed the thought that it was of far greater importance to develop the individual Indian into a productive and honored citizen of the State and Nation than through technicalities assist him in accumulating more property at the expense of paying his honest obligations, thereby losing his own self-respect and the confidence of the people with whom he associates. There is not a parent in the Nation who would not rather see his boy or girl brought up to manhood and womanhood fully equipped for the duties of citizenship than to conserve his property at the expense of his educational and moral development.

The Indians are the wards of the Government, and they should, as I believe they do, receive the generous, sympathetic consideration of the Nation.

Mr. TILSON. Mr. Chairman, I rise in opposition to the pro forma amendment, to say just a word along the line of the remarks by the gentleman from Oklahoma [Mr. HASTINGS]. The gentleman from Michigan [Mr. CRAMTON], who has charge

of this bill, has not only performed a notable work in connection with the hearings and preparation of the bill but also by taking advantage of the information that he has thus gained has utilized it for the benefit of the House and the country by applying it to the consideration of other legislation. He diligently watches proposed legislation that would affect appropriations for the department which this bill provides for. What I have said regarding the gentleman from Michigan applies to other chairmen of subcommittees of the Committee on Appropriations. The gentleman from Idaho [Mr. FRENCH], for instance, who sits before me, the chairman of the Subcommittee on Appropriations for the Navy Department, in addition to his close attention to his own appropriation bill is always on the alert for bills affecting the department with which he has particularly to do on the Committee on Appropriations, and concerning which he is so well informed. Personally, I wish to thank these two gentlemen and the others who, like them, are doing this kind of work. It is work that ought to be genuinely appreciated by Congress and by the country.

The Clerk read as follows:

Bryce Canyon National Park, Utah: For administration, protection, and maintenance, $6,300; for construction of physical improvements, $19,800, including not exceeding $8,200 for the construction of buildings, of which $4,000 shall be available for an employee's residence and $3,600 for two comfort stations; in all, $26,100.

Mr. COLTON. Mr. Chairman, I move to strike out the last word. This is the first time that the item for Bryce Canyon National Park has appeared in an appropriation bill. I rise to express appreciation for the work that has been done in bringing this great area into the national park system. A few years ago three different agencies had supervision over the lands embraced in Bryce Canyon National Park. The Forest Service supervised part of it, and did some excellent work, too, in developing the area; built many fine roads leading up to the canyon. The State of Utah had jurisdiction over a part of the land and leased a part to the Union Pacific Railroad Co. It was seen long ago that it would be greatly to the advantage of the area if it were all embraced in a national park, and I rise to express a word of appreciation for the men who have cooperated in bringing about this happy result. The Union Pacific officials did their part, the officials of the State of Utah did their part, and the Forest Service and park service have cooperated splendidly.

Also in connection with what has been said, permit me to express a word of appreciation concerning the work of the gentleman from Michigan [Mr. CRAMTON], chairman of this committee for the work he has done. In Utah we appreciate very much the spirit of cooperation that has characterized all who have been connected with the bringing about of the creation of Bryce Canyon National Park. It is a wonderful area and is now added to the family of parks under the supervision of the National Park Service. One may now leave Cedar City, Utah, and go to Zion National Park, thence to the north rim of the Grand Canyon of the Colorado through the beautiful Kiabab Forest and return via Bryce Canyon National Park and Cedar Breaks, and enjoy one of the most marvelous trips in the world. The Union Pacific system is spending millions to advertise and develop that whole area. With Bryce Canyon now a national park and with the completion of the Mount Carmel Road, we are looking forward to an era of great development. We appreciate this fine spirit of cooperation.

The Clerk read as follows:

Platt National Park, Okla.: For administration, protection, maintenance, and improvement, $16,200.

Mr. SWANK. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. SWANK: Page 94, line 21, strike out the figures "$16,200" and insert "$18,000."

Mr. SWANK. Mr. Chairman, this amendment increases this appropriation reported in the bill by $1,800, or up to $18,000, the amount appropriated for the present fiscal year.

Mr. CRAMTON. Mr. Chairman, the amount each year appropriated includes not only administration, but some improvements, and for the current year there was necessity for a little more than that here proposed for the next year. I am not sure what the item was. It seems to me it was something about the water supply, but I am not sure about that, but I do know in 1928, $12,096 was available at this park for administration and in 1929, $14,400, and for 1930 that same amount. It seems to be sufficient to continue the administration, and I hope the amendment will not prevail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

Mr. SWANK. Mr. Chairman and gentlemen of the committee, since becoming a Member of Congress in 1921, I have worked at all times for an increased appropriation for Platt National Park, which is the only national park in Oklahoma. I am glad to say that these appropriations have been increased from $6,000 in 1920 to $18,000 for the present fiscal year, yet in this bill the Committee on Appropriations has recommended $16,200 for the next fiscal year. Many times have I called the attention of this House to the greatness and usefulness of this park. It is not a large park, but, in my judgment, does more good to our citizens than any of our other parks, and they should be judged largely for their usefulness and not altogether by their size and beauty.

The visitors are checked at Bromide Springs, where the record is kept. Previous to 1926, the National Park Service, in arriving at the number of visitors at this park, divided the number reported by the superintendent by four as an estimate of visitors, for the reason that some people visited the park more than once. While that is done, it is also true that thousands of people visit this park and are never counted as they do not go to Bromide Springs, where they are checked. There are many kinds of water in the numerous springs and many visitors go there for the hot sulphur baths, for the other water, and for pleasure without visiting the springs where visitors are counted.

The number of visitors at our leading parks for the past three years, as shown in the annual report of the Secretary of the Interior, is given in the following table:

Name of park	1926	1927	1928
Hot Springs (Ark.)	260,000	181,523	199,099
Yellowstone (Wyo.)	187,807	200,825	230,984
Sequoia (Calif.)	89,404	100,684	98,035
Yosemite (Calif.)	274,209	490,430	460,619
General Grant (Calif.)	50,597	47,996	51,988
Mount Rainier (Wash.)	161,796	200,051	219,531
Crater Lake (Oreg.)	89,019	82,354	113,323
Platt (Okla.)	124,284	294,954	280,638
Wind Cave (S. Dak.)	85,466	81,023	100,309
Sullys Hill (N. Dak.)	19,921	22,632	24,979
Mesa Verde (Colo.)	11,356	11,915	16,760
Glacier (Mont.)	37,325	41,745	53,454
Rocky Mountain (Colo.)	225,027	229,862	235,057
Hawaii (Territory of Hawaii)	35,000	37,551	78,414
Lassen Volcanic (Calif.)	18,739	20,089	26,057
Mount McKinley (Alaska)	533	651	802
Grand Canyon (Ariz.)	140,252	162,356	167,226
Lafayette (Me.)	101,256	123,699	134,897
Zion (Utah)	21,964	24,303	30,016
Total	1,930,865	2,354,643	2,522,188

During the years 1927 and 1928 but one national park had more visitors than Platt Park. This report shows that visitors in this park have increased from 27,023 in 1920 to 280,638 in 1928, and with adequate appropriations that number would be doubled. According to the reports of the Secretary of the Interior this year, Platt Park had more private automobiles entering it than any other park, with one exception. The automobiles entering the park have increased from 30,000 in 1922 to 70,000 in 1928. This place has been a noted health resort for many years, and long before Oklahoma Territory was opened to settlement. Before that time people went there for the medicinal properties of the water and get relief from their ailments. In Indian Territory days I have visited the section many times. In the more than 30 mineral springs you will find an abundance of sulphur, bromide, medicine, and pure water coming from the springs near each other. It is impossible to tell of the greatness and value of these waters in words. I wish you could see the many cures effected by these waters and hear the praise given by those who have been cured by their medicinal properties. People who visit the park find the waters an almost sure cure for all forms of digestive troubles, sleeplessness, skin diseases, and nervousness, and the black sulphur and hot sulphur baths are almost a sure cure for rheumatism. There are several fine swimming pools, excellently equipped and filled by pure sulphur water from deep artesian wells. This is not only a place where thousands are restored to health, but it is a place where people can enjoy themselves in other ways and by other sports. Near this park is the historic old Washita River that is not excelled by any river for fishing. The park is in the foothills of the Arbuckle Mountain Range and is a place of great natural beauty.

Adjacent to the park the State of Oklahoma erected its great soldiers' hospital for the care and treatment of our soldiers who were in the World War. The State has spent hundreds of thousands of dollars for the construction and maintenance of

this institution. The location was chosen by a committee of physicians after a most complete and thorough survey. Near the park is also located Oklahoma's School for the Deaf, which is one of the best of its kind in the country.

I wish the members of this committee could visit this park in the summer during the tourist season, and then you would be ready to provide more appropriations. It is not a local park but is national in its scope and in the good that it does. It is the duty of Congress to make adequate appropriations to maintain all our national parks, and Platt Park should be no exception. People of wealth visit this park, for they suffer with ailments as well as others. Most of the visitors are probably people of modest means, who can visit here and camp, if they like, free of charge in a healthy and sanitary location. Living conditions are reasonable and first class. It costs nothing to drink the water and bathe in the creeks entering the park. I favor a liberal program for our national parks for the benefit of our people who visit them.

Sulphur, the county seat of Murray County, where this park is located, is a community of energetic, Christian, law-abiding citizens, and they always extend a welcome to all visitors.

There is need of many improvements in this park in the way of additional bridges across the creeks, more improvement of the roads, extension of the sewer and water lines, more comfort stations, fencing, further improvements at the different springs, dams, drilling additional wells, improved camping grounds, and the erection of a new dwelling and office building for the superintendent and employees.

All that is needed to make this the most noted park in the United States and the largest in the number of visitors are adequate appropriations.

I have offered this amendment to only increase the appropriation for the next fiscal year to where it is for this year. The amount should not be reduced, and I sincerely hope that the committee will adopt my amendment.

The Clerk read as follows:

Rocky Mountain National Park, Colorado: For administration, protection, and maintenance, including not exceeding $1,300 for the maintenance, operation, and repair of motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general park work, $82,400; for construction of physical improvements, $13,600, including not exceeding $7,500 for the construction of buildings, of which not exceeding $2,000 shall be available for a stable, and $4,000 for employees' quarters; in all, $96,000.

Mr. GILBERT. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Kentucky moves to strike out the last word.

Mr. GILBERT. Mr. Chairman, I want to express my disapproval right now of the sentiments expressed by the gentleman from Colorado [Mr. TAYLOR].

We are rapidly following in the footsteps of monarchy. The strength and beauty of this country have always lain in its simplicity. It was not the intention of the framers of the Constitution that we should have castles in the mountains and at the seashore for our President, but it was the intention that we should have one simple home at the seat of government, the White House; and right now I want to seriously express opposition to any tendency to have a king or royal palaces or royal families in this country. The President has a palatial yacht lying in the Potomac and a traveling fund for any visits, and we have gone far enough in providing luxuries for our Presidents.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Yosemite National Park, Calif.: For administration, protection, and maintenance, including not exceeding $3,500 for the purchase, maintenance, operation, and repair of motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general park work, not exceeding $3,200 for maintenance of that part of the Wawona Road in the Sierra National Forest between the park boundary 2 miles north of Wawona and the park boundary near the Mariposa Grove of Big Trees, and not exceeding $2,000 for maintenance of the road in the Stanislaus National Forest connecting the Tioga Road with the Hetch Hetchy Road near Mather Station, and including not exceeding $10,000 for fire prevention and necessary expenses of a comprehensive study of the problems relating to the use and enjoyment of the Yosemite National Park and the preservation of its natural features, $325,000; for construction of physical improvements, $87,360, of which not to exceed $4,000 shall be available for a ranger station and barn at Glacier Point, $14,100 for three employees' cottages, and not to exceed $4,000 for payment of balance of purchase price of electric transmission line constructed in the park in 1925 by the San Joaquin Light & Power Corporation under contract with the Department of the Interior, dated May 21, 1924, and payments heretofore made to said corporation toward purchase of said electric transmission line under the contract hereinbefore referred to by supplying surplus electric energy produced by the Government hydroelectric plant are hereby authorized and confirmed; in all, $412,360.

Mr. CRAMTON. Mr. Chairman, I offer an amendment. On page 96, in line 25, after the word "and," insert the word "including."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 96, in line 25, after the word "and," insert the word "including."

Mr. CRAMTON. Mr. Chairman, the fear has been expressed that as it stands the $10,000 would be held to include the expenses of that commission as well as the fire prevention. The intention is that the $10,000 is to be available for fire protection and then the expenses of the commission are taken care of out of the general amount.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Carlsbad Cave Monument, N. Mex.: For administration, protection, maintenance, development, and preservation, including not exceeding $800 for the maintenance, operation, and repair of motor-driven passenger-carrying vehicles for the use of the superintendent and employees in connection with general monument work, $59,500; for construction of physical improvements, $40,500, including not exceeding $1,500 for an addition to the office building, $4,000 for a power house, $12,000 for additional water supply and water storage, $12,000 for a sewage-disposal plant, and $500 for a garage to be constructed in Carlsbad, N. Mex.; in all, $100,000: *Provided*, That the Secretary of the Interior is authorized to accept that certain parcel of land in the town of Carlsbad, N. Mex., which has been tendered to the United States of America in fee simple, as a donation, for the site of superintendent's residence, and the appropriation of $5,000 for the construction of a superintendent's residence, contained in the Interior Department appropriation act for the fiscal year 1929 shall remain available until June 30, 1930.

Mr. ABERNETHY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from North Carolina moves to strike out the last word.

Mr. ABERNETHY. Mr. Chairman and Members of the House, the item carried in this bill to enable the Secretary of the Interior to carry out the provisions of the act of February 1, 1925, and also the act of May 22, 1926, which has to do with the establishment of the Great Smoky Mountain National Park in the States of North Carolina and Tennessee and the Shenandoah National Park of Virginia, is not a very large one, but it indicates that the department is getting ready to establish these two great parks. I was honored by the Public Lands Committee of the House by being put in charge of this legislation when it was passed by Congress. There were those of this body who felt that the Government was going into projects that would cost the taxpayers a great deal of money, but I am happy to inform the House and the country that large areas of land have been secured, and are about to be secured, to be turned over to the Government for these parks without expense. The park in which I am primarily interested is the Great Smoky Mountain National Park.

Out of an area of 704,000 acres lying within the boundary line selected and recommended by the Appalachian Park Commission after careful inspection of the area, in effect that a park of 427,000 acres should be established. The act prescribed that when title to lands within the area referred to shall have been vested in the United States in fee simple the park is established ready for administration, protection, and development by the United States. Under authority of the act, under the direction of the Secretary of the Interior, the National Park Service has made careful inspection of the area and pointed out to the States of North Carolina and Tennessee where the acquisition of 427,000 acres should lie.

The act further prescribes—

That the United States shall not purchase by appropriation of public moneys any land within the aforesaid areas, but that such land shall be secured by the United States only by public or private donation.

Based upon careful estimates prepared by the experts of the North Carolina and Tennessee Park Commissions it was figured

that the acquisition of the land for the park would require $10,000,000. The citizens of North Carolina and Tennessee had pledged $1,066,693. In addition the State of Tennessee had purchased about 76,000 acres which had been accepted at a valuation of $500,000 and authorized a bond issue of $1,500,000, making in all a contribution from these States in pledges of about $5,000,000, one-half of the amount considered necessary to acquire the park.

When the splendid efforts of the people and official representatives of the States of North Carolina and Tennessee became known to the Laura Spelman Rockefeller Memorial the memorial fund established by Mr. John D. Rockefeller, sr., in memory of his beloved wife, for purposes of general good, that memorial, of which Mr. John D. Rockefeller, jr., is president, pledged up to $5,000,000, matching dollar for dollar the funds made available in North Carolina and Tennessee.

The respective acts of the States of North Carolina and Tennessee prescribing the acquisition of the necessary land for this park by purchase, condemnation, or otherwise have been found constitutional in both States. The moneys authorized by both States are available, releasing an equal amount of donated funds. In both the Tennessee and North Carolina park areas some lumber cutting among the virgin timber is still going on, and strenuous efforts are being made by the respective park commissions to enjoin such further cutting in order that these scenic values may be saved. Considerable progress has been made in the acquisition of land by purchase. Every assistance possible under the laws has been given by the Interior Department, particularly through Col. Glenn Smith, who is a member and secretary of the Appalachian Park Commission, and Mr. Stephen Mather, Director of National Parks, and Mr. Cammerer, the Associate Director of the National Park Service, who have spared no time or effort to expedite this project.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. ABERNETHY. I ask unanimous consent, Mr. Chairman, to proceed for two minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. ABERNETHY. The splendid assistance of the donors of the contributed funds is outstanding in its inspiration to the two States.

It is hoped that it will be only a matter of months now before the entire area necessary for the establishment of this park may be acquired, so that it may be tendered to and accepted by the Interior Department under the authorities of the various acts involved, and that thereby the southern Appalachian Range will contribute its wonderful share in adding its outstanding scenic attraction to that galaxy of national scenic wonders comprised in our national park and monument system. [Applause.]

The CHAIRMAN. Without objection, the pro forma amendment is withdrawn. The Clerk will read.

The Clerk read as follows:

To enable the Secretary of the Interior to carry out the provisions of the act entitled "An act for the securing of lands in the southern Appalachian Mountains and in the Mammoth Cave regions of Kentucky for perpetual preservation as national parks," approved February 21, 1925 (43 Stat. 958–959), the act entitled "An act to provide for the establishment of the Shenandoah National Park in the State of Virginia and the Great Smoky Mountain National Park in the States of North Carolina and Tennessee, and for other purposes," approved May 22, 1926 (U. S. C., p. 1936, sec. 403), and the act entitled "An act to provide for the establishment of the Mammoth Cave National Park in the State of Kentucky, and for other purposes," approved May 25, 1926 (U. S. C., p. 1936, sec. 404), including personal services in the District of Columbia and elsewhere, traveling expenses of members and employees of the commission, printing and binding, and other necessary incidental expenses, $3,000.

Mr. TEMPLE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Pennsylvania offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TEMPLE: Page 100, line 2, at the end of the line, strike out the period and insert a comma and the following: "And the unexpended balance of the appropriation for the above-mentioned purpose for the fiscal year 1929 shall continue available during the fiscal year 1930."

Mr. CRAMTON. Mr. Chairman, the committee has no objection to that amendment.

Mr. TEMPLE. If the chairman of the committee has no objection to it, I do not care to discuss it.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania.

The amendment was agreed to.

Mr. TEMPLE. Mr. Chairman, I would like to incorporate in my remarks a letter from the secretary of the Appalachian Park Commission bearing on the necessity of this appropriation.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to extend his remarks by printing a letter from the secretary of the Appalachian Park Commission. Is there objection?

There was no objection.

The letter referred to is as follows:

RICHMOND, VA., *December 13, 1928.*

Hon. H. W. TEMPLE,
House of Representatives, Washington, D. C.

DEAR DOCTOR: I have just seen a copy of the Interior Department bill in which there is an item of $3,000 to provide for the clerks' hire for our commission and the traveling expenses for the coming year.

At the time I made this estimate for funds to be expended during the coming year I had expected to use all the funds that had been made available for the commission's use for the fiscal year ending June 30, 1929. Unfortunately, I was unable to secure the services of the Army Air Service to secure the photographs needed in connection with the establishment of the boundary line of the Shenandoah National Park. Therefore I have not expended any money for this work and have it available to expend when I can secure the services of the Army or, if necessary, contract with commercial firms for the work.

However, there is another complication which has arisen within the last few weeks in that it seems now necessary to actually survey the proposed boundary line of the Shenandoah National Park and mark it on the ground in accordance with the line as indicated by Mr. Cammerer on the map which we completed this year. This will necessitate our going into the field again and expending $1,000 or $1,500 to determine whether this would be the practical and feasible way to insure the State purchasing the land which has been designated as acceptable to the Government for national-park purposes.

To do this additional work it will take more money than the $3,000 requested for next year's appropriation, and I am writing you to ask if you will see Mr. CRAMTON and have inserted on the floor of the House when the Interior bill is considered an amendment making the unexpended balance of our appropriation for the Southern Appalachian Park Commission which remains unexpended on June 30 be made available for use during the fiscal year ending June 30, 1930.

With the expenses which we have in view between now and June 30, 1929, I do not believe there will be a balance of more than $1,500 on June 30 that will be available for the fiscal year ending June 30, 1930.

Yours very sincerely,

GLENN S. SMITH.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The total of the foregoing amounts shall be immediately available in one fund for the National Park Service: *Provided*, That the Secretary of the Interior shall not authorize for expenditure prior to July 1, 1929, any of the amounts herein appropriated except those for construction of physical improvements, for tree-disease and insect-control work in Crater Lake, Mesa Verde, and Lafayette National Parks, and for administration, protection, and maintenance of Bryce Canyon National Park: *Provided further*, That in the settlement of the accounts of the National Park Service the amount herein made available for each national park and other main headings shall not be exceeded, except that 10 per cent of the foregoing amounts shall be available interchangeably for expenditures in the various national parks named, and in the national monuments, but not more than 10 per cent shall be added to the amount appropriated for any one of said parks or monuments or for any particular item within a park or monument: *Provided further*, That any interchange of appropriations hereunder shall be reported to Congress in the annual Budget.

Mr. CRAMTON. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. CRAMTON: Page 101, after line 20, insert: "For the acquisition of privately owned lands and/or standing timber within the boundaries of existing national parks and national monuments by purchase, or by condemnation under the provisions of the act of August 1, 1888 (U. S. C. p. 1302, sec. 257), whenever in the opinion of the Secretary of the Interior acquisition by condemnation proceedings is necessary or advantageous to the Government, $250,000, to be expended only when matched by equal amounts by donation from other sources for the same purpose, to be available until expended: *Provided*, That in addition to the amount herein appropriated the Secretary of the Interior may incur obligations and enter into contracts for additional acquisition of privately owned lands and/or standing timber in the

existing national parks and national monuments not exceeding a total of $2,750,000 as matching funds from outside sources are donated for the same purpose, and his action in so doing shall be considered contractural obligations of the Federal Government: *Provided further,* That the sum herein appropriated and the appropriations herein authorized shall be available to reimburse any future donor of privately owned lands and/or standing timber within the boundaries of any existing national park or national monument to the extent of one-half the actual purchase price thereof: *Provided further,* That as part consideration for the purchase of lands, the Secretary of the Interior may, in his discretion and upon such conditions as he deems proper, lease lands purchased to the grantors for periods, however, not to exceed the life of the particular grantor, and the matching of funds under the provisions hereof shall not be governed by any cash value placed upon such leases: *Provided further,* That appropriations heretofore and herein made and authorized for the purchase of privately owned lands and/or standing timber in the national parks and national monuments shall be available for the payment in full of expenses incident to the purchase of said lands and/or standing timber."

Mr. BANKHEAD. Mr. Chairman, I want to reserve a point of order against the amendment.

Mr. CRAMTON. If the gentleman cares to reserve it, I would like to make a statement on the merits of the question and then I am sure the gentleman will not care to press any point of order that might lie against the amendment. A great deal of it is not subject to a point of order but some provisions are.

Mr. BANKHEAD. I think it is patent, from the reading of the amendment, that it is subject to a point of order. I want to put this proposition to the chairman of the subcommittee, because it is a matter that has been raised here several times in debate. If I, as a member of the Committee of the Whole, were to offer an amendment of this sort, I have no doubt the chairman of the subcommittee would very promptly make a point of order against it and insist on it.

Does the gentleman from Michigan think that the chairman of the subcommittee is setting a very fair example to be followed by the ordinary member of the Committee of the Whole when he constantly presents amendments that are patently subject to a point of order and that constitute new legislation? That is the question I want to raise, because it seems to me it is a matter of some importance to protect the procedure and integrity of the rules of the House.

The CHAIRMAN. The gentleman from Alabama reserves a point of order against the amendment.

Mr. BANKHEAD. Specifically for the purpose of having the chairman of the subcommittee answer my inquiry.

Mr. CRAMTON. I am glad to do so, although, perhaps, not at as great length as I might some other time. The amendment has for its purpose the purchase of private lands in national parks. There is authority of law for that purpose. We could report here an amendment to spend $5,000,000 of cash for that purpose and it would not be subject to a point of order. The authority already exists for that. Now, to safeguard the Treasury, in making such an appropriation, this item has been worked out. In the main it is not subject to a point of order, but there are some provisions that are in themselves minor as compared with the paragraph as a whole, but rather essential to it in its complete working out.

Our committee does not recommend legislation as such, but sometimes, where an expenditure of money authorized by law is desirable, it is desirable also to safeguard the Treasury by having some safeguards thrown around it. I would be glad to have the gentleman see fit to withdraw the point of order and then I will proceed to discuss the merits of it. I am sure that in this case the gentleman from Alabama will be absolutely in accord with the committee.

Mr. BANKHEAD. Well, Mr. Chairman, in the beginning I said it was not my purpose to really make the point of order, but I will ask the gentleman this further question: In instances of this sort, where it is patent that a violation of the rules is indulged in and legislation is brought in that has no legislation to support it, is it the policy of the chairman of the subcommittee to recommend to the legislative committee, in instances of this sort, remedial legislation that might make impossible the constant violation of the rules of the House with reference to items of this sort?

Mr. CRAMTON. Where it is possible, I will say, our committee works in close harmony with the legislative committees, and at my request the chairman elect of the committee that would have this in charge is on the floor, the gentleman from Utah [Mr. COLTON]. He is thoroughly in sympathy with it and is prepared to support the amendment. It is not enacting far-reaching legislation.

The authority is already there to buy these lands and to spend exclusively Government funds, but we are trying to arrange, I will state to the gentleman, to allow private individuals to stand half of the expense, and some details had to be worked out to meet that extraordinary situation.

Mr. BANKHEAD. I am willing to follow the gentleman's judgment on the practical phases of the bill and my real purpose in rising was to have the gentleman make a statement along the lines I have suggested.

Mr. CRAMTON. Answering the last question propounded by the gentleman, I will say that if something is of a legislative character and there seems to be an emergency we consult with the chairman of the legislative committee involved.

Mr. BANKHEAD. Mr. Chairman, I withdraw the reservation.

Mr. CRAMTON. Mr. Chairman, I feel this is of such far-reaching importance, and there are some reasons why there should be some record in connection with it, that I want to take about five minutes, and perhaps a few minutes more, to put this situation before you.

I am tremendously interested in this amendment. There is nothing of greater importance to our national-park system today than the program that is proposed in this amendment. In all our national parks our committee have found privately owned lands. We have found that those privately owned lands frequently get in the way of the desirable development of the parks. That can happen either because the people who own them make an undesirable use of them, as compared with the park use, or that we want to develop the lands and can not do it because we do not own them.

So three or four years ago our committee commenced its study of this matter. Two years ago an item of $50,000 for purchasing such lands was put in the bill without a Budget estimate, providing that private funds should match the Government appropriation for this purpose. Thereby we established what seemed to be a desirable policy with reference to this proposition. Last year the Budget accepted this policy and recommended $50,000 more, which was appropriated.

In the meantime a survey of the situation has been carried on by the park service, with the result that a report has been made that it will probably cost from $5,000,000 to $6,000,000 to acquire these private holdings in all of the national parks. This report appears in the hearing.

The most acute situation in the national parks is in the Yosemite National Park.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. TEMPLE. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. CRAMTON. There is a very acute situation in the Yosemite National Park. Eight thousand five hundred acres of land within that park, bearing some of the very best sugar pine and other pine in California, is owned privately and the holdings have been consolidated in one owner, who is operating his lumbering operations in that vicinity. Within a few weeks, or within the coming summer at the most, he will begin cutting the timber in this tract. The most important roads in that part of the park will go through this 8,500 acres or 13 square miles of timber. The Big Oak Flat Road for four miles will traverse this section. All the Tioga Road travel as well as from the Stockton country will come into Yosemite this way. The new road, which the city of San Francisco is to build, from Mather Station to Harding Lake, will go through it for two or three miles. This road, running for four miles along the south rim of the Grand Canyon of the Tuolumne will give a view of half the great Yosemite Park area and will provide a wonderful scenic route. Where there is now this beautiful timber, if you delay a few months longer, there will be only stumps to line these highways for several miles. It is a situation that does not permit further delay.

We have therefore been delighted because private sources have offered a contribution of $1,000,000 to be matched by Government funds, particularly for this Yosemite situation, the balance to be used in other parks. We want to make available this $1,000,000 that has now been offered, so that the cutting of this timber this summer can be prevented.

At the same time, we have reason to hope that if the Government manifests its definite policy and purpose to go ahead with this program, the entire contribution of $3,000,000 from private funds will be forthcoming. This is the purpose of the amendment and the language of the amendment is sufficiently broad to accomplish the purpose. I would like to have offered an amendment here for $1,000,000, but we can not absorb that in this bill. We can absorb the amount that has been suggested.

This makes it possible for the private donor to acquire these lands and later for us to acquire them at half the price that he pays for them, and later appropriations herein authorized can probably be somewhat deferred.

I will ask unanimous consent to revise and extend my remarks in the RECORD, and, Mr. Chairman, in so doing, I will want to include a telegram from Francis P. Farquhar, of San Francisco, representing the Sierra Club of California.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. CRAMTON. The telegram is as follows:

SAN FRANCISCO, CALIF., *December 13, 1928.*

Hon. LOUIS C. CRAMTON,
House of Representatives, Washington, D. C.:

We are deeply concerned over threatened destruction Yosemite forests through cutting of private lands, which we understand likely to occur next spring unless purchased for Government ownership. Sierra Club at annual meeting last Saturday considered this most urgent problem confronting us and voted use every endeavor to arouse nation-wide action to prevent such disaster. We believe part of purchase funds can be raised by subscription, but task too large and time too short for accomplishment without Government aid. We have heard that appropriation is contemplated and hope this is true.

FRANCIS P. FARQUHAR.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan.

The amendment was agreed to.

The Clerk read as follows:

Construction, etc., of roads and trails: For the construction, reconstruction, and improvement of roads and trails, inclusive of necessary bridges, in national parks and monuments under the jurisdiction of the Department of the Interior, including the roads from Glacier Park Station through the Blackfeet Indian Reservation to various points in the boundary line of the Glacier National Park and the international boundary, and the Grand Canyon Highway from the National Old Trails Highway to the south boundary of the Grand Canyon National Park as authorized by the act approved June 5, 1924 (43 Stat. 423), and including that part of the Wawona Road in the Sierra National Forest between the Yosemite National Park boundary 2 miles north of Wawona and the park boundary near the Mariposa Grove of Big Trees, and that part of the Yakima Park Highway between the Mount Rainier National Park boundary and connecting with the Cayuse Pass State Highway, to be immediately available and remain available until expended, $5,000,000, which includes $4,000,000, the amount of the contractual authorization contained in the act making appropriations for the Department of the Interior for the fiscal year 1929, approved March 7, 1928 (45 Stat. 237, 238): *Provided,* That not to exceed $18,000 of the amount herein appropriated may be expended for personal services in the District of Columbia during the fiscal year 1930: *Provided further,* That in addition to the amount herein appropriated the Secretary of the Interior may also approve projects, incur obligations, and enter into contracts for additional work not exceeding a total of $2,500,000, and his action in so doing shall be deemed a contractual obligation of the Federal Government for the payment of the cost thereof and appropriations hereafter made for the construction of roads in national parks and monuments shall be considered available for the purpose of discharging the obligation so created.

Mr. LEAVITT. Mr. Chairman, I move to strike out the last word. This item for the construction of highways in the national parks brings to my mind a question which I would like to propound to the chairman of the committee with regard to the plan for the completion of what is known as the Transmountain Highway through the Glacier National Park.

At the present time, as I understand it, somewhere in the neighborhood of $1,000,000 has been expended for the construction of this road from the western side of Glacier Park to the top of Logan Pass, and provision has been made for its completion on the eastern side as far as the Going-to-the-Sun Chalets, leaving about 7 miles not now provided for in the center of the park. The completion of that 7 miles is necessary to give the people of this country the full value of this tremendous expenditure on the part of the United States. I would greatly appreciate a statement as to the plans for its completion, and the reasons why the completion is not now provided for in this bill.

Mr. CRAMTON. Mr. Chairman, the Transmountain Road is one which the gentleman from Montana and I have visited on several occasions. We went over the proposed route of the road three years ago and went over the uncompleted portion of it this fall. At that time I think we suggested it should be named the Going-to-the-Sun Highway, a very attractive and very fitting name, because for miles it works around the Going-to-the-Sun Mountain, and in the main it is an east and west route. The west end of this road along Lake McDonald traverses land in the park which is almost entirely privately owned. As soon as this highway is completed there will be great travel over it of people going to the coast, and if we complete the highway and then proceed to buy the private holdings, we will have to pay a large amount additional because of the increased value caused by the construction of the highway.

It has been the position of the committee that we would not provide for the completion of the highway until we owned the private lands. It seems shortsighted business when we have use for the money for roads elsewhere to push up the price of these lands by rushing this road to completion.

This question emphasizes the importance of the amendment just adopted. If that goes through I am very hopeful that there will go along with the Yosemite provision a clean up of the situation around Lake McDonald. As soon as that is cleared up, we are in a position to go ahead and build the Glacier Road.

I think this should be said as to the road situation: The bill appears to be on an annual $5,000,000 basis. It is, in fact, on a basis of three million and a half this year, because while there is $5,000,000 cash appropriation, only $1,000,000 is free, and $4,000,000 is for previous contracts.

When we considered the matter last year, providing authority to contract for $4,000,000, and the question was gone over with the chairman of the Committee on Appropriations, Mr. Madden, that authority was given with the understanding that a supplemental estimate of one to two million dollars would come in this fall. That supplemental estimate has not come in, and so it is all to be be taken out of this appropriation; so this leaves only three million and a half dollars as a basis for this year, including the $1,000,000 of free cash and the new authority to contract for $2,500,000. I hope something can be done for the Glacier Park, together with the Going-to-the-Sun Highway, and it can be if the private-holding situation is taken care of.

Mr. LEAVITT. What is the plan this year so far as completing the road is concerned?

Mr. CRAMTON. It is my understanding that the road will remain in status quo until the private land situation is cleared up.

Mr. LEAVITT. Where does the initiative lie in clearing it up? Is there any legislation we have passed which makes an appropriation to be matched?

Mr. TAYLOR of Colorado. Mr. Chairman, may I make a suggestion to the gentleman from Montana? Of course, the gentleman from Montana, and no one else, wants the Government of the United States to be put in the attitude where it would be unconscionably held up. As the chairman intimated, if we go ahead and build a magnificent highway through these private lands when the Government comes to buy the land the price will be limited only by the blue sky. We feel that there ought to be something done by the State of Montana whereby we can know that these people would be rightfully and fairly compensated by the Government, but that the Government would not be imposed upon.

In one of the Government reclamation projects there is a large amount owned by a railroad company, and we are building a project which will make it enormously valuable. We have had the price fixed by an appraisement so that there will be no injustice or controversy about it. If something of that kind or some understanding could be had in Montana to protect the Federal Treasury it would have the appreciation of at least one minority member on the committee. I do not want to hold up the work and yet I do not like the idea of encouraging outrageous profiteering when we are rendering that country a wonderfully beneficial service.

Mr. LEAVITT. The position taken by the gentleman from Colorado and other members of the subcommittee would be much more tenable if it had been taken five or six years ago. As to expending money on reclamation projects bringing up the price of land it is true mistakes have been made in the past, but that gives no foundation for this.

In this particular case the Federal Government has already spent over a million dollars, if I am not mistaken. We have constructed that highway to the Continental Divide to Logan Pass on the west and have started it on the east side of the park. If we can add to the price of these lands by road construction, then we have already greatly added to that price. We are dealing here with a situation which to a great extent existed before we began the construction of that road.

I agree that as a matter of good general policy within the national parks there might well be an acquiring of private lands in order that the people of this country may be guaranteed national-park standards in the handling of those lands. I understand that law already exists giving to the Federal Government

power to condemn lands under situations of that kind, or perhaps to determine the character of the improvement and the way in which to a certain extent those lands should be handled within the national parks; but I believe that the construction of this highway, with this great expenditure of money already made, with the cost of maintaining a road already partly constructed, should not be unduly delayed, but that the Federal Government, having put itself in the position of already spending that tremendous amount of money, can not now come in and say to the State of Montana, we are not going to move until you do something which was not even considered at the time the road was started, or that private individuals in Montana must do something not then contemplated. The Federal Government ought to take the initiative along the line proposed in the amendment recently written in this bill, and we ought to give to the people who do now own lands on Lake McDonald some sort of protection and terms under which those purchases will be made, which will look to the future and allow them to use the land they now own for the purposes, within reasonable limits, for which they were acquired.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. LEAVITT. Yes.

Mr. CRAMTON. From my personal contact I know of the continued, active, and effective interest the gentleman from Montana has in this highway and in the park generally. I first met him in that park in 1920. I am very hopeful that under the amendment just adopted a situation will work out that will satisfactorily take care of this proposition. The amendment just adopted provides for giving back a life lease to those who have cottages there, because the Government can afford to wait if no undesirable use is made of them. I hope the situation will work out satisfactorily. In the meantime, any money not spent on that road is being spent to splendid advantage on some other road.

Mr. LEAVITT. Would I be safe in assuming, then, that if under the law as it now exists these lands are purchased, the present owners as, for example, some who now use cottages as a protection for their lives from hay fever, would be protected in that use during the lifetime of the present owners and that the lands would be taken only after that use has been completed?

Mr. CRAMTON. If reasonable terms for the purchase can be arranged, there would be no difficulty about arranging for life leases for the same use that they have been making of the lands before that time.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

ST. ELIZABETHS HOSPITAL

For support, clothing, and treatment in St. Elizabeths Hospital for the Insane from the Army, Navy, Marine Corps, Coast Guard, inmates of the National Home for Disabled Volunteer Soldiers, persons charged with or convicted of crimes against the United States who are insane, all persons who have become insane since their entry into the military and naval service of the United States, civilians in the quartermaster service of the Army, persons transferred from the Canal Zone who have been admitted to the hospital and who are indigent, and beneficiaries of the United States Veterans' Bureau, including not exceeding $27,000 for the purchase, exchange, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles for the use of the superintendent, purchasing agent, and general hospital business, and including not to exceed $150,000 for repairs and improvements to buildings and grounds, $955,000, including maintenance and operation of necessary facilities for feeding employees and others (at not less than cost), and the proceeds therefrom shall reimburse the appropriation for the institution; and not exceeding $1,500 of this sum may be expended in the removal of patients to their friends, not exceeding $1,500 in the purchase of such books, periodicals, and newspapers, for which payment may be made in advance, as may be required for the purposes of the hospital and for the medical library, and not exceeding $1,500 for actual and necessary expenses incurred in the apprehension and return to the hospital of escaped patients: *Provided*, That so much of this sum as may be required shall be available for all necessary expenses in ascertaining the residence of inmates who are not or who cease to be properly chargeable to Federal maintenance in the institution and in returning them to such places of residence: *Provided further*, That during the fiscal year 1930 the District of Columbia, or any branch of the Government requiring St. Elizabeths Hospital to care for patients for which they are responsible, shall pay by check to the superintendent, upon his written request, either in advance or at the end of each month, all or part of the estimated or actual cost of such maintenance, as the case may be, and bills rendered by the superintendent of St. Elizabeths Hospital in accordance herewith shall not be subject to audit or certification in advance of payment; proper adjustments on the basis of the actual cost of the care of patients paid for in advance shall be made monthly or quarterly, as may be agreed upon between the superintendent of St Elizabeths Hospital and the District of Columbia government, department, or establishments concerned. All sums paid to the superintendent of St. Elizabeths Hospital for the care of patients that he is authorized by law to receive shall be deposited to the credit on the books of the Treasury Department of the appropriation made for the care and maintenance of the patients at St. Elizabeths Hospital for the year in which the support, clothing, and treatment is provided, and be subject to requisition by the disbursing agent of St. Elizabeths Hospital, upon the approval of the Secretary of the Interior: *Provided further*, That the practice of allowing quarters, heat, light, household equipment, subsistence, and laundry service to the superintendent and other employees who are required to live at St. Elizabeths Hospital may be continued without deduction from their salary, notwithstanding the act of March 5, 1928 (45 Stat. p. 193).

Mr. BLANTON. Mr. Chairman, I make the point of order against the provision, beginning in line 15, page 114, which reads as follows: "*Provided further*, That the practice of allowing quarters, heat, light, household equipment, subsistence, and laundry service to the superintendent and other employees who are required to live at St. Elizabeths Hospital may be continued without deduction from their salary, notwithstanding the act of March 5, 1928 (45 Stat. p. 193)," for the reason that it is legislation on an appropriation bill.

Mr. CRAMTON. Mr. Chairman, I admit it is subject to the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. FRENCH. Mr. Chairman, would the gentleman from Texas withhold the point of order for a moment?

Mr. BLANTON. Does the gentleman want to defend this?

Mr. FRENCH. Not the point of order.

Mr. BLANTON. This proposition?

Mr. FRENCH. Yes.

Mr. BLANTON. I do not think we ought to stay here for that. It is after dark now.

Mr. FRENCH. Just let me have a couple of minutes.

Mr. BLANTON. Then I want to condemn this situation, so I shall ask for two or three more minutes after that. That prolongs the situation. Let it rest where it is. The paragraph giving allowances has gone out of the bill on my point of order. There are others who want to condemn this proposition also.

Mr. SCHAFER. I will need about half an hour to bring the facts to the House.

Mr. BLANTON. It would take an hour to properly condemn the situation.

Mr. FRENCH. I recognize the force of the point of order. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on this point. I think the House ought to have the facts before it upon which the committee acted.

Mr. SCHAFER. Mr. Chairman, reserving the right to object, will the gentleman incorporate in his remarks the total amount of the people's money that has been used for four servants each year by the superintendent of the institution in violation of law?

Mr. FRENCH. The gentleman can make his own statement and his own remarks. I have my statement to make and I have asked to extend. I am not caring whether he objects to the extension or not.

Mr. SCHAFER. I do not object. I ask unanimous consent to extend my remarks in the RECORD on this subject.

The CHAIRMAN. The point of order is sustained. The gentleman from Idaho asks unanimous consent to extend his remarks in the RECORD in the manner and upon the subject indicated. Is there objection? [After a pause.] The Chair hears none.

The gentleman from Wisconsin asks unanimous consent to extend his remarks upon the same subject. Is there objection? [After a pause.] The Chair hears none.

Mr. BLANTON. Mr. Chairman, on page 112, beginning in line 20, I move to strike out the following language:

Including not exceeding $27,000 for the purchase, exchange, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles for the use of the superintendent——

Mr. CRAMTON. This is for the use not alone of the superintendent but the purchasing agent and general hospital business.

Mr. BLANTON. I will modify my amendment if the gentleman will permit and simplify the matter. I move to strike out the following words: In line 22 strike out "passenger-carrying," and in line 23 strike out "superintendent." That simplifies it.

The CHAIRMAN. The gentleman from Texas offers an amendment which the Clerk will report.

Mr. CRAMTON. That is logical even if it is not wise.

The Clerk read as follows:

Page 112, line 22, strike out the words "passenger-carrying," and in line 23 strike out the word "superintendent."

Mr. BLANTON. On that I ask for recognition.

Mr. MURPHY. The gentleman just asked Members to refrain from speeches. Be as good a sport as the rest.

Mr. BLANTON. That was something not before the House.

Mr. MURPHY. Be a good sport. The gentleman is complaining about time. It is now three minutes of 5; be a good sport.

Mr. BLANTON. I do not yield to the dry gentleman from Ohio.

Mr. MURPHY. The gentleman is speaking about being a good sport; be one.

Mr. BLANTON. I am going to use my own time in my own way. If you gentlemen will get the report on the investigation by Congress of one of our own House committees in reference to this institution and its superintendent more than twenty-odd years ago and read it, you will find this committee of ours then condemned this superintendent for the number of passenger-carrying vehicles he then had in his stables for his own use and the use of his own family.

I wish you would read just how many he had there and how many servants it took and what was paid by the people of this Government to take care and maintain them for his personal use. He was condemned then, and he has been condemned time after time for it. Go out there and see what he has for his own private use now, and here is $27,000 more you are giving him. If he wants to do it he can spend every single dollar of it for limousines in addition to the ones he has now. If you want to do it, go ahead. I am doing my duty when I call attention to it.

Mr. SCHAFER. Will the gentleman yield?

Mr. BLANTON. I will.

Mr. SCHAFER. Is any of this appropriation of $27,000 for passenger vehicles which are used to take the incompetent patients and veterans out riding?

Mr. BLANTON. No. The only thing I am seeking to do—I know the committee will not accept it; you will vote it down, but I am putting it up to you—the only thing I am trying to do is to take the passenger part out of it and let the appropriation stand for such use as the institution needs.

Go out there and look at his big limousines that he now uses and which are furnished to him for his own use. Look at the other elegant cars that are furnished to him. I do not want to see any part of this $27,000 to be used by him. I can not stop this, but I have the satisfaction of having knocked out of the bill the $11,000 sought to be given him for allowances, as the Chair sustained my point of order against same.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Louisiana moves to strike out the last word. The gentleman is recognized in opposition to the pending amendment.

Mr. O'CONNOR of Louisiana. Mr. Chairman, I have not spoken upon this bill for the reason that I understood it was a western bill and that eastern and southern Members are not supposed to butt in. I do not fall under the denomination of a "sport," good or bad, and, consequently, I am going to speak for about two minutes.

A point of order, as I understand it, was made against the provision for quarters, heat, light, household equipment, subsistence, and laundry service to the superintendent and other employees who are required to live at St. Elizabeths Hospital. I want to rise in opposition to the proposition urged here on the floor of giving employment in institutions like St. Elizabeths and then withholding laundry service and other expenses that are necessary in order to keep the employees in a satisfied state of mind. I am opposed to making them pay for those services. If the service over there is not what it should be, those employees ought to be dismissed from the service.

I do not know the superintendent. I have never been on the grounds, but I understand the employees there are competent and render efficiently a most exacting service.

I once heard the statement made in the Louisiana Legislature when I was a member years ago by a fellow member who subsequently gained a national reputation through a paper read before or at a meeting of the American Bar Association to the effect that subjects like these and the discussion of them was so trival as to resemble cracking nits and fleas, to use an inelegant but forceful expression. We should devote our attention to matters of larger import than the insignificant matter against which the point of order was made and the insignificant amount involved, and we should give relief to employees that are not overpaid, and give them a little light, and a little allowance for expenses. Employment in an insane asylum is not of the most desirable nature. The work calls for patience, understanding, and a God-given sympathy with the afflicted.

Mr. BLANTON. The gentleman has overlooked the point that we are furnishing to this man $19,000 worth of service.

Mr. SCHAFER. Does the gentleman think that the violation of existing law and the incurrence of illegal expenses are trifling matters?

Mr. O'CONNOR of Louisiana. I have heard of those things that are too small for the attention of able legislators like my distinguished friend from Texas [Mr. BLANTON] and my friend [Mr. SCHAFER] from Wisconsin.

If the superintendent is guilty of the offenses named, he should be incontinently fired. If the employees have not the ability, the sympathy, or the requirements, they should be released from a service that calls for the best that is in human nature. To cut off employees in this asylum from the only comforts that makes his position tolerable is not discipline. It is merely evidencing a lack of wisdom. Release the job holder if incompetent, but do not make the job so unattractive to competent men that they will not seek the position.

Many of the comptroller's rulings have been so drastic as to make them unreasonable and utterly at variance with common sense. The extreme of the law is the extreme of injustice. The laws of the Medes and Persians were so inflexible and inelastic and so rigidly construed that they became a synonym for injustice, intolerance, tyrrany, oppression, and brutality.

Mr. FRENCH rose.

Mr. SCHAFER. Mr. Chairman, I would like to have five minutes.

Mr. CRAMTON. I ask unanimous consent, Mr. Chairman, that all debate on this paragraph and all amendments thereto close in 10 minutes; 5 minutes to be allotted to the gentleman from Idaho [Mr. FRENCH] and 5 to the gentleman from Wisconsin [Mr. SCHAFER].

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that all debate on this paragraph and amendments thereto be closed in 10 minutes. Is there objection?

There was no objection.

Mr. HASTINGS. This proviso is already out.

Mr. SCHAFER. Not at this point.

Mr. FRENCH. Mr. Chairman, I can not remain quiet when severe criticisms are made against an institution that you must care for in the pending bill and in such a way that they are criticisms of the committee itself in the work that it has done. If the superintendent and employees of St. Elizabeths Hospital are not what they ought to be, there are ways to get rid of them. If we must maintain St. Elizabeths Hospital, it should be maintained in a way that is worthy of the patients who are there and of the dignity of our country.

St. Elizabeths is one of the world's greatest institutions of its kind. Doctor White, the head of the institution, is recognized as one of the foremost psychiatrists.

When Rear Admiral Stitt, who for years has been the Surgeon General of the United States Navy and who is president of the board of visitors of St. Elizabeths Hospital, was before our committee he quoted Doctor Kraepelin, whom he characterized as "probably the most famous man in psychiatry in the world," as saying "of all institutions in the world that he had visited, St. Elizabeths was the most efficient."

Doctor White has been superintendent of that institution for more than 25 years.

Many years ago, and before Superintendent White took charge, the Congress, by law, provided that the superintendent should live upon the grounds of the institution. This is a policy that is followed by practically all of the institutions for mental cases within the United States and in foreign countries. It is not a pleasant place to live, but it is the place where the superintendent ought to live if he is to do the right thing by those under his charge. This being so, he is virtually upon duty, or must be ready for duty, 24 hours per day. Not only should the superintendent live at the hospital but other doctors and other employees, who have the care of patients, ought to live at the hospital if they are to render the most efficient service.

We have a plant at St. Elizabeths that is worth something like $5,500,000. We have a farm of more than 800 acres. Last year on that farm we produced for the institution food supplies worth more than $200,000.

At St. Elizabeths we are caring for men and women who are ill, who are broken mentally. Last year we cared for more than 4,700, with a daily average of 4,143.

To care for this institution, the patients as the objective, requires money, and we ought not to limit the administration of the institution by denying the money that the Department of the Interior tells us is necessary for motor-propelled vehicles and to which the gentleman's amendment is directed. These vehicles are for the use of the superintendent, the purchasing agent, and the general hospital business.

The gentleman who spoke just a moment ago referred to the home where the superintendent lives. May I say that the superintendent lives where he is required to live under the law. It is not of his own volition. It is not a very happy or attractive place to live. The superintendent, any superintendent, is required by law to "reside on the premises."

For many years, and before the present superintendent took charge, this officer was assigned quarters in one of the large buildings of the institution, a building used for hospital purposes. More than that, the quarters assigned to him are not assigned to him personally, but they are a part of the institution and are for official use. This institution is visited constantly by representatives of similar institutions throughout the country, and from foreign countries.

The institution is in a sense a laboratory where we are seeking out the best ways to relieve suffering human kind. What would you have the superintendent do; dismiss these many visitors who are interested in the care of those afflicted mentally?

What you call the superintendent's house is the quarters as well, provided for just such visitors. They occupy rooms there and they have their meals.

For St. Elizabeths we have provided a board of visitors. The members of the board are given by law responsible work. They visit the institution from time to time, and when they do they are officers of the institution.

The room that is the board's room and where their meetings are held is one of these same rooms that we are told belongs to the superintendent. Another is the superintendent's study, where he checks up on the experiences of the day. What critics have called the dining room of the family of the superintendent is where members of the board and visitors to the institution have their meals.

Again, that the doctors and nurses at this hospital may be abreast of the times, specialists are called in for discussions and lectures. These specialists are not the personal guests of the superintendent, they are the guests of the institution.

A situation exists here somewhat similar to that which exists at Annapolis and West Point, where we make special appropriations for the case of guests and visitors to these institutions. The situation is quite similar to that which exists in every university and educational institution of the country, where visitors and special lecturers are made the guests of the institution, though maybe being housed in the president's home and dining at his table.

Mr. CRAMTON. Will the gentleman yield?

Mr. FRENCH. Yes.

Mr. CRAMTON. And even if the gentleman from Texas were correct in his estimate as to Doctor White personally and professionally, if he, as the head of this institution, were to leave the institution or be dismissed the effect of the point of order would make it quite impossible to get a physician of proper standing in his place.

The CHAIRMAN. The time of the gentleman from Idaho has expired.

The question is on the amendment offered by the gentleman from Texas.

The question was taken and the amendment was rejected.

The Clerk read as follows:

For completion of the medical and surgical building, $475,000, including cost of supervision of work and including the removal and reconstruction of the isolation building.

Mr. GILBERT. Mr. Chairman, I move to strike out the last word. I would like to ask the gentleman from Idaho [Mr. FRENCH] who defends the committee in this matter, what is the proportion of employees to patients in St. Elizabeths Hospital?

Mr. FRENCH. The question is not involved here in so far as this particular paragraph is concerned.

Mr. GILBERT. The gentleman has the information?

Mr. FRENCH. I have the information here. The number of patients last year receiving treatment was 4,727 with an average number of 4,143. Then we have of physicians 33——

Mr. GILBERT. Give me the whole amount. The gentleman is taking up all my time.

Mr. FRENCH. Is the gentleman proposing to classify as one group the doctors and laborers who work in the gardens——

Mr. GILBERT. All the employees there, doctors and laborers of all kinds. What is the proportion of employees to patients?

Mr. FRENCH. Thirty-three doctors, 678 graduate nurses, other employees including some who are trained specialists, making a total of 1,238.

Mr. GILBERT. That brings out exactly what I wanted to bring out. That is 1 employee to 4 patients. Our hearings showed and it is the truth, that the general average throughout the United States is less than 1 to 7, under the same circumstances as here. The gentleman spoke of the farm. I have no personal animus in this matter at all, but they have there several times as many as are necessary and as are customary and usual to run a farm. They have 1 man to every 10 or 15 cows, when 1 man for 25 cows is enough. As I have said, I have no personal feeling in this matter at all. They have too many employees of every kind, they consume too much, their treatment is inhuman, they have killed patients in corrections and altogether this is the most expensively run and the most outrageously conducted hospital in the United States.

Their records are not kept correctly.

Mr. FRENCH. Does the gentleman know the average cost per patient in other institutions?

Mr. GILBERT. I had all that before me and this is by far the most expensively run hospital in the United States. The average cost is not $500 and here it is over seven hundred.

Mr. FRENCH. The average cost per patient per day for the current year will be less than $2, and for the fiscal year 1930 the estimate is $1.81 per day.

Mr. GILBERT. I want to make this further statement in summation: Public indignation caused former Commissioner Fenning to resign by reason of the fact that he was exploiting the shell-shocked veterans of the World War. If that was justifiable, then there is no reason why Doctor White is not subject to the same criticism, because he not only furnished the means but he furnished the cooperation in a vast majority of all those cases.

This man has been under the constant fire of Congress for more than 20 years. It is not a recent development of some special committee that the gentleman might feel has animus, but he has been under successful criticism for more than 20 years.

Two years ago I called attention by facts and figures to some inexcusable conduct in this institution—falsification of records and many other irregularities—that ought not to be permitted. Why his resignation is not called for and why he is continually defended in the face of sworn facts is more than I can understand.

Mr. BLANTON. Will the gentleman yield for one question?

Mr. GILBERT. Yes.

Mr. BLANTON. Is it not a fact that not only the District Committee of 21 members but the Judiciary Committee both unanimously agreed that there was an unholy alliance between Fenning and Doctor White in all these matters?

Mr. GILBERT. Why, absolutely.

Mr. SCHAFER. Will the gentleman yield?

Mr. GILBERT. I yield.

Mr. SCHAFER. Is not the fact that the Comptroller General's decision clearly shows that he illegally expended the people's money for his own personal benefit, in the amount of thousands of dollars, sufficient justification to kick him out at this time?

Mr. GILBERT. The records further showed and it was admitted before our committee that they put opposite the names of men who had escaped and had never been found, "Cured; released." The whole thing is a falsification and a sham and the conduct of this hospital is inexcusable.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Total, Howard University, $600,000.

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD, and in doing so I wish to include the law which has just been signed by the President authorizing such appropriations.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to extend his remarks in the RECORD in the manner indicated. Is there objection?

There was no objection.

Mr. CRAMTON. The law which was signed by the President yesterday is as follows:

That section 8 of an act entitled "An act to incorporate the Howard University in the District of Columbia," approved March 2, 1867, be amended to read as follows:

"SEC. 8. Annual appropriations are hereby authorized to aid in the construction, development, improvement, and maintenance of the university, no part of which shall be used for religious instruction. The university shall at all times be open to inspection by the Bureau of Education and shall be inspected by the said bureau at least once each year. An annual report making a full exhibit of the affairs of the university shall be presented to Congress each year in the report of the Bureau of Education."

By reason of this new law no points of order have been made to-day against proposed appropriations for Howard, and none are in order against appropriations for the "construction, development, improvement, and maintenance" of that institution. Because of the annual points of order, even though the items were later restored, no definite and constructive policy could be followed, and the financial support of that growing institution was very uncertain. By reason of the experience of our committee in this regard, I drafted a bill to authorize appropriations for Howard University and introduced it in the House in December, 1924, and each Congress thereafter. It now becomes law in the identical form in which I introduced it four years ago.
